EDWARD ARNOLD'S LIST.

- The Dynamical Theory of Sound.** By H. LAMB, D.Sc., Professor of Mathematics in the Victoria University of Manchester. 12s. 6d. net.
- The Theory of Optics.** By A. SCHUSTER, F.R.S., Hon. Professor of Physics, Victoria University, Manchester. 15s. net. Second Edition.
- Homogeneous Co-ordinates.** By W. P. MILNE. 5s. net.
- Five Figure Tables of Mathematical Functions.** By J. B. DALE, M.A. 3s. 6d. net. (Selected for use in Exams. of University of London.)
- Mathematical Drawing.** By G. M. MINCHEN and J. B. DALE. 7s. 6d.
- Projective Geometry.** By Dr. L. N. G. FILON. 7s. 6d.
- Physical Chemistry : Its Bearing on Biology and Medicine.** By J. C. PHILIP, D.Sc. 7s. 6d. net.
- Exercises in Chemical Calculation.** By H. F. COWARD, D.Sc., and W. H. PERKINS, M.Sc. 2s. 6d. net.
- An Introduction to Practical Physics.** By E. H. BARTON, D.Sc., F.R.S.E., and T. P. BLACK, M.Sc., Ph.D. 3s. 6d.
- Organic Chemistry for Advanced Students. Part I.** By JULIUS B. COHEN, Professor of Organic Chemistry in the University of Leeds. Demy 8vo. 21s. net.
- An Introduction to Bacteriological and Enzyme Chemistry.** By G. J. FOWLER, D.Sc., F.I.C., Lecturer in Bacteriological Chemistry in the Public Health Department, Victoria University of Manchester. 10s. 6d. net.
- The Chemistry and Testing of Cement.** By C. H. DESCH, D.Sc., Ph.D. 10s. 6d. net.
- The Chemistry of Breadmaking.** By J. GRANT, M.Sc. Tech., Examiner in Chemical Technology in the Victoria University of Manchester. 5s. net.
- The Principles of Applied Electro-Chemistry.** By A. J. ALLMAND, D.Sc. 18s. net.
- A Text-Book of Geology.** By P. LAKE and R. H. RASTALL. 16s.
- The Theory of Structures.** By R. J. WOODS, M.Inst.C.E. 10s. 6d. net.
- The Strength and Elasticity of Structural Members.** By R. J. WOODS, M.E., M.Inst.C.E. 292 Diagrams. 10s. 6d. net. Second Edition.
- Hydraulics.** By F. C. LEA, B.Sc. New Edition. 15s. net.
- Reinforced Concrete Design.** By O. FABER, B.Sc., A.M.I.C.E., etc., and P. G. BOWIE, A.C.G.I. xx + 332 pages. 12s. 6d. net.
- The Balancing of Engines.** By Prof. W. E. DALBY, M.Inst.C.E. 10s. 6d. net.
- Valves and Valve-Gear Mechanisms.** By Prof. W. E. DALBY. 21s. net.
- A Text-Book of Electrical Engineering.** By Dr. A. THOMÄLEN. Translated by G. W. O. HOWE, M.Sc. Royal 8vo. Second Edition. 15s. net.
- Steam Turbine Design.** By JOHN MORROW, M.Sc., D.Eng., Lecturer on Engineering at Armstrong College, Newcastle-on-Tyne. 16s. net.
- The Foundations of Alternate Current Theory.** By C. V. DRYSDALE, D.Sc. (Lond.). 8s. 6d. net.
- Electrical Traction.** By E. WILSON, Professor of Electrical Engineering, King's College, London, and F. LYDALL, B.Sc. 2 vols. 15s. net each.
- Organic Analysis. Qualitative and Quantitative.** By H. T. CLARKE, B.Sc. 5s. net.
- Practical Anatomy: The Student's Dissecting Manual.** By F. G. PARSONS, F.R.C.S., Lecturer on Anatomy at St. Thomas' Hospital, London; and W. WRIGHT, M.B., D.Sc., F.R.C.S., Lecturer on Anatomy at the London Hospital. 2 vols. 8s. 6d. net each.
- A Text-Book of Medical Treatment (Alphabetically arranged).** By W. CALWELL, M.D., Physician, Royal Victoria Hospital, Belfast. 16s. net.
- A System of Clinical Medicine.** By the late T. D. SAVILL, M.D. New Edition in 1 vol. 25s. net.
- Applied Physiology for Medical Students.** By R. HUTCHISON, M.D. (Edin.), Physician to the London Hospital. 8s. 6d. net.
- Practical Physiology.** By A. P. BEDDARD, M.D., J. S. EDKINS, M.B., L. HILL, M.B., J. J. R. MACLEOD, M.B., and M. S. PEMBREY, M.D. 14s. net.
- Recent Advances in Physiology and Bio-Chemistry.** By LEONARD HILL, B. MOORE, M. S. PEMBREY, J. J. R. MACLEOD, and A. P. BEDDARD. 18s. net.
- Further Advances in Physiology.** Edited by Dr. LEONARD HILL, with contributions by various writers. 15s. net.
- Lectures on Diseases of Children.** By R. HUTCHISON, M.D. (Edin.). Illustrated. New and enlarged Edition. 8s. 6d. net.
- Human Embryology and Morphology.** By A. KEITH, M.D. 12s. 6d. net.
- Manual of Human Physiology.** By LEONARD HILL, M.B. 6s.
- A Manual of Pharmacology for Students.** By Professor W. E. DIXON. 15s. net.
- An Introduction to the Study of the Protozoa.** By Professor E. A. MINCHIN, F.R.S. 21s. net.
- The Evolution Theory.** By AUGUST WEISMANN. Translated by Prof. J. ARTHUR THOMSON. 2 vols. 32s. net.
- A History of England.** By C. W. OMAN, M.A., Professor of Modern History at Oxford University. 760 pp., Crown 8vo., cloth, 5s. (Also sold in parts.)
- English Political Philosophy.** By Prof. WILLIAM GRAHAM. 10s. 6d. net.
- A Short History of English Commerce and Industry.** By L. L. R. PRICE. 3s. 6d.

LONDON : EDWARD ARNOLD, 41 & 43, MADDOX STREET, W.

TEXT-BOOKS OF SCIENCE.

Photography. By Captain Sir W. De Wiveleslie Abney, K.C.B., D.C.L., F.R.S., D.Sc. With 134 illustrations. Crown 8vo, 5s.

The Strength of Materials and Structures. By Sir J. Anderson, C.E., etc. With 66 illustrations. Crown 8vo, 3s. 6d.

Railway Appliances. By Sir John Wolfe Barry, K.C.B., M.I.C.E. With 218 illustrations. Crown 8vo, 4s. 6d.

Introduction to the Study of Inorganic Chemistry. By William Allen Miller, M.D., LL.D., F.R.S. With 72 illustrations. Crown 8vo, 3s. 6d.

Qualitative Analysis and Laboratory Practice. By Sir T. E. Thorpe, C.B., Ph.D., F.R.S., and M. M. Pattison Muir, M.A. and F.R.S.E. With Plate of Spectra and 57 illustrations. Crown 8vo, 3s. 6d.

Quantitative Chemical Analysis. By Sir T. E. Thorpe, C.B., F.R.S., Ph.D. With 88 illustrations. Crown 8vo, 4s. 6d.

Introduction to the Study of Chemical Philosophy. By Sir William A. Tilden, D.Sc. London, F.R.S. With five illustrations. Crown 8vo, 5s. With Answers to Problems. Crown 8vo, 5s. 6d.

Elements of Astronomy. By Sir R. S. Ball, LL.D., F.R.S. With 130 illustrations. Crown 8vo, 6s. 6d.

Systematic Mineralogy. By Hilary Bauerman, F.G.S. With 373 illustrations. Crown 8vo, 6s.

Descriptive Mineralogy. By Hilary Bauerman, F.G.S., etc. With 236 illustrations. Crown 8vo, 6s.

Metals: Their Properties and Treatment. By A. K. Huntington and W. G. M. Millan. With 122 illustrations. Crown 8vo, 7s. 6d.

The Study of Rocks. By Frank Rutley, F.G.S. With 6 Plates and 88 illustrations. Crown 8vo, 4s. 6d.

Elements of Machine Design. By W. Cawthorne Unwin, F.R.S., B.Sc., M.I.C.E.

Part I. With 387 illustrations. Demy 8vo, 7s. 6d. net.

Part II. Chiefly on Engine Details. With 259 illustrations. Crown 8vo, 6s.

Theory of Heat. By J. Clerk Maxwell, M.A., LL.D., Edin., F.R.S.S. I, and E. With 38 illustrations. Crown 8vo, 4s. 6d.

Practical Physics. By R. T. Glazebrook, C.B., D.Sc., F.R.S., and W. N. Shaw, M.A., F.R.S. With 134 illustrations. Crown 8vo, 7s. 6d.

Preliminary Survey and Estimates. By Theodore Graham Gribble, Civil Engineer. Including Elementary Astronomy, Route Surveying, Tacheometry, Curve ranging, Graphic Mensuration, Estimates, Hydrography and Instruments. With 133 illustrations. Crown 8vo, 7s. 6d.

Algebra and Trigonometry. By William Nathaniel Griffin, B.D. Crown 8vo, 3s. 6d.

The Steam Engine. By Sir George C. V. Holmes, K.C.V.O., C.B., Chairman of the Board of Works, Dublin. With 212 illustrations. Crown 8vo., 6s.

Electricity and Magnetism. By Fleeming Jenkin, F.R.S.S., L. & E. With 177 illustrations. Crown 8vo. 3s. 6d.

The Art of Electro-Metallurgy. By G. Gore, LL.D., F.R.S. With 56 illustrations. Crown 8vo, 6s.

Telegraphy. By Sir W. H. Preece, K.C.B., F.R.S., and Sir J. Sivewright, M.A., K.C.M.G. With 284 illustrations. Crown 8vo, 7s. 6d.

Physical Optics. By R. T. Glazebrook, C.B., D.Sc., F.R.S. With 183 illustrations. Crown 8vo, 6s.

Technical Arithmetic and Mensuration. By Charles W. Merrifield, F.R.S. Crown 8vo, 3s. 6d.

Key, by the Rev. John Hunter, M.A. Crown 8vo, 3s. 6d.

Workshop Appliances, including Descriptions of some of the Machine Tools used by Engineers. By C. P. B. Shelley, M.I.C.E. With 323 illustrations. Crown 8vo, 5s.

Structural and Physiological Botany. By Dr. Otto Wilhelm Thomé and A. W. Bennett, M.A., B.Sc., F.L.S. With 600 illustrations. Crown 8vo, 6s.

A NEW LINE FOR LINE TRANSLATION

HOMER'S ODYSSEY

Translated in the Metre of the Original by

H. B. COTTERILL, M.A.

And Illustrated with Twenty-four Drawings by

PATTEN WILSON360 Pages. Printed in Red and Black in Distinctive Type.
The Lines do not over-run.

THE aim of the Translator has been to produce an English version of the *Odyssey* in a form resembling the original as closely as possible in its rapidity, directness, naturalness, and vigour—characteristics which make Homer himself so vivid and attractive.

Dr. H. M. BUTLER writes—

“It helps one to feel as Homer—or, say, Odysseus—felt, and it leads one on, never wearying.”

Dr. WALTER LEAF writes—

“I know of no translation which so vividly recalls the original to me.”

“Mr. Cotterill has made what, we think, may justly be called a very bold experiment. . . . He should be read in bulk—a book at least at a time—and it is his high merit that he tempts to such reading. There is a simple and unaffected ease about him which carries you along, and he very rarely offends. In fact, as Dr. Leaf—and who could be a better judge?—has borne witness, he ‘reproduces the naturalness of Homer, the easy flow as of a river which is Homer’s own, with as much success as anyone, perhaps with more success,’ and his version, which is also a very faithful one, with no ‘pretty lying that improves to suit the modern taste,’ is one which any teacher who can read aloud well would find of real service in conveying some living sense of Homer’s poetry even to inattentive ears. . . . The book is magnificently printed, and adorned with beautiful illustrations. . . .”

ORDINARY EDITION. Size 10½ × 8 in. Bound in Cloth Extra. Gilt top. Price 21/- net. Bound in Full Calf. Price £2 2s. net.

LARGE PAPER EDITION. Size 12 in. × 9 in. 105 Copies for England and America. Printed on Hand-made Paper. Each Copy signed and numbered by the Translator. Price £5 5s. net.

INORGANIC CHEMISTRY

By **F. STANLEY KIPPING, Ph.D., Sc.D., F.R.S.**

Professor of Chemistry, University College, Nottingham, and

W. H. PERKIN, Ph.D., Sc.D., LL.D., F.R.S.

Professor of Chemistry, Victoria University, Manchester.

768 pages 7s.6d. Separately—Part I., 3s.6d.; Part II. 4s.

The subject-matter of Part I. is essentially the same as that of the chemistry syllabus of the London University for the external matriculation examination and that of the Board of Education for Stage I.

Part II. contains the subject-matter which, in the opinion of the authors, is suitable for those who, having mastered Part

I., intend to devote at least two

years more to the study of in-

organic chemistry while at or-

ganic chemistry and the same

time working at other

subjects, with the

view of obtaining

a University

pass degree.

State, University, and Professional Examinations, Private Tuition, and Tutorial Classes.

(Established 1887.)

Mr. Arthur A. Mutimer M.A.

(of Trinity College, Cambridge. Mathematical Tripos, 1881),

Receives Pupils at University Chambers, 5, Edmund Street, Birmingham, for Individual Tuition and Classes in any department of Mathematical, Physical, or Chemical Science, for Examination or for Professional purposes.

Special Courses for Engineering Pupils requiring instruction in the principles of Engineering Science, or preparing for University Degrees, Assoc.M.Inst.C.E., etc.

For University Intermediate, or Matriculation Examinations, or for any Professional Preliminary Examinations, a full weekly curriculum is arranged, including, with Mathematics and Science, the necessary work and set subjects in Classics, English and Modern Languages.

Details relating to the Subjects for any State, University, or Professional Public Examination, can be obtained at University Chambers.

Resident Pupils are received at Mr. Mutimer's private residence.

LODGINGS.

NOTICE TO PARENTS AND GUARDIANS OF INTENDING STUDENTS.

The Principal desires to commend to Parents and Guardians the desirability of taking care to select suitable lodgings for Students who are going to live away from home. The University cannot undertake responsibility for the conduct of Students outside its own walls, but it is anxious to offer every assistance both to responsible Students not living at home and to their friends.

The University Hostel for Women is announced on page 4, but, unfortunately, at present no similar institution for men is associated with the University. A list of approved lodgings is, however, kept in the University Offices at Edmund Street; and from this list it is recommended that choice be made. The Secretary of the University, Mr. Morley, takes pains to keep the list up to date, and is always willing to advise Students as to residence.

Every Student is required to record his address at the Office, and it is a Regulation of the University that when a Student changes his lodging, for any reason, he notifies the change to the Secretary, who is willing thereupon to inform the Parent or Guardian if it be so desired.

RAILWAY SEASON TICKET ARRANGEMENTS.

Such Students of the University as may not yet have reached the age of 18 can obtain Season Tickets from the various Railway Companies at half the usual rates upon production of a certificate of studentship signed by the Secretary.

Hall of Residence for Women Students,

University House, Edgbaston Park Road.

House Committee:

MRS. BEALE, *President.*

Miss C. CHAMBERLAIN, *Secretary.*

Mrs. WILLIAM CADBURY.
Mrs. CHARLES DIXON.

Mrs. WILSON KING.
Mrs. MUIRHEAD.

Warden : Miss S. MARGERY FRY, M.A.

Sub-Warden : Miss BEATRICE ORANGE.

In October, 1904, a movement among a group of private friends of the University was started with the view of providing a Hall of Residence for women students who desire to follow a course of study in the University, and who are not living with their parents or friends, but wish to avoid the isolation and other drawbacks of living in lodgings, or the inconvenience of journeys by trains. A fund was raised sufficient to cover about two-thirds of the cost of erection of a Women's Hostel. The University accordingly acquired a site of $2\frac{1}{2}$ acres in the Edgbaston Park Road, and erected a block of buildings containing a Hall, Common Room, Library, Dining Hall, and apartments for 57 students and lecturers. The main block of the building faces south.

The garden gives room for three grass and one ash Tennis Court, and a large Cycle House is provided. The majority of the Women Students are not at present in attendance at the New Buildings of the University, but at those in Edmund Street, which can be reached in less than half an hour by a convenient service of trams running near to the Hall of Residence.

The Hall is primarily for University Students, but it may also be available for Students at the School of Art.

Applications for admission should be made at the earliest possible date to the Warden, who will also be pleased to furnish any further particulars that may be required.

UNIVERSITY OF BIRMINGHAM.

UNIVERSITY OF BIRMINGHAM.

CHARTER.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith.

To all to whom these presents shall come, greeting :

Whereas Petitions have been presented to Us by the Mason University College of Birmingham by the Mayor Aldermen and Citizens of the City of Birmingham in the County of Warwick by the School Board for the said City by the Governors of the Grammar School of King Edward VI in the said City and by others praying Us to erect within the said City for the promotion of Arts Sciences and Learning a University and to grant a Charter with such appropriate provisions therein in that behalf as shall seem to Us meet and fit.

And whereas We have taken the said Petitions into Our Royal consideration and are minded to accede thereto.

Now therefore Know Ye that We by Virtue of Our Royal Prerogative in that behalf and all other powers enabling Us so to do of Our special grace certain knowledge and mere motion by these Presents do for Us Our Heirs and Successors grant will direct and ordain as follows :—

1.—There shall be from henceforth for ever in Our said City of Birmingham a University by the name and style of “The University of Birmingham” with Faculties of Science Arts Medicine and Commerce and such other Faculties as the Statutes of the University may from time to time prescribe.

2.—Our trusty and well-beloved Councillor Joseph Chamberlain the persons named in the Schedule hereto as members of the Court of Governors and of the Council and the Members for the time being of the Court of Governors the Council and the Senate of the University the Chancellor the Pro-Chancellor the Vice-Chancellor the Pro-Vice-Chancellor and the Principal

and Vice-Principal of the University for the time being and all others who shall pursuant to this Our Charter and the Statutes of the University for the time being be Members of the University are hereby created and from henceforth for ever shall be one body politic and corporate with perpetual succession and a Common Seal by the name and style of "The University of Birmingham" with full power and capacity by and in such name to sue and be sued and to take and hold land and to do all other lawful acts whatsoever and with full right authority power and capacity without any further or other licence by virtue of this Our Charter to take and hold such lands tenements and hereditaments as may be for the time being occupied by or on behalf of the said Corporation for the transaction of its business and the actual carrying out of its purposes and also in addition other lands tenements and hereditaments to the annual value of £50,000 according to the annual value thereof at the respective times when the same shall be respectively taken.

3.—We Our Heirs and Successors Kings and Queens of the Kingdom aforesaid shall be and remain the Visitor and Visitors of the University of Birmingham through the Lord President of Our Council for the time being.

4.—There shall be a Chancellor of the said University and one Pro-Chancellor who subject to the Statutes of the University shall act for the Chancellor pending a vacancy in that office or during the absence or inability of the Chancellor.

The first Chancellor shall be Our said trusty and well-beloved Councillor Joseph Chamberlain.

The Vice-Chancellor for the time being shall be Pro-Chancellor.

5.—There shall be a Vice-Chancellor of the said University and one Pro-Vice-Chancellor who subject to the Statutes of the University shall act for the Vice-Chancellor pending a vacancy in that Office or during the absence or inability of the Vice-Chancellor.

6.—There shall be a Principal of the University and one Vice-Principal who subject to the Statutes of the University shall act for the Principal pending a vacancy in that office or during the absence or inability of the Principal.

There shall also be a Dean of each of the Faculties within the University. The Dean of the Faculty of Medicine shall be appointed by the Council from among the Members of that Faculty. The Deans of the other Faculties shall be appointed as provided by the Statutes of the University.

The Principal shall be from time to time appointed by Us Our Heirs and Successors through the Lord President of Our Council for the time being.

The first Vice-Principal shall be Robert Samuel Heath, M.A., D.Sc., now Principal of Mason University College.

The first Dean of the Faculty of Medicine shall be Bertram Coghill Alan Windle, M.A., M.D., D.Sc., F.R.S.

7.—The Supreme Governing Body of the University shall be the Court of Governors and subject to this Charter the Statutes of the University and the Law of the Realm the Court of Governors shall have absolute power within the University.

The first Members of the Court of Governors shall be the persons nominated in the First Schedule to these presents.

Statutes of the University shall regulate the powers and business of the Court the election and continuance in office of the Members of the Court (including the continuance in office of the first Members) the filling of vacancies among the Members and all other matters relative to the Court which it may be thought are proper to be so regulated. Women shall be eligible to be Members of the Court of Governors.

The Chancellor shall be ex-officio head of the University and a Member and President of the Court of Governors.

The Pro-Chancellor shall be ex-officio a member of the Court of Governors.

8.—There shall be a Council of the University which shall subject to the Statutes of the University and the control of the Court of Governors as regulated by the said Statutes have the government and control of the finances of the University and of the discipline practical affairs business and work of the University.

The Vice-Chancellor shall be ex-officio a member and President of the Council.

The Pro-Vice-Chancellor shall be ex-officio a member of the Council.

The Principal Vice-Principal and the Deans of the Faculties shall be ex-officio members of the Council.

There shall also be one Member of the Council who shall be elected by the Faculty of Medicine of the University.

At no time shall the Members of the Council who are members of the Senate be more in number than the number of Members of the Council divided by four.

The first Members of the Council shall be the persons nominated in the First Schedule to these presents.

Statutes of the University shall regulate the performance of the duties of the Council the election and continuance in office of the Members of the Council (including the continuance in office of the first Members) the filling of vacancies among the Members and all other matters relative to the Council which it may be thought are proper to be so regulated.

9.—There shall be a Senate of the University consisting of the Principal Vice-Principal Deans of Faculties and all the Professors of the University which shall subject to Statutes of the University and the control and approval of the Council have the regulation and control of the Curriculum and Education afforded by the University and the Discipline of the Students of the University.

The Principal shall be Ex-officio President of the Senate.

Statutes of the University shall regulate and define the powers and business of the Senate and all other matters relative to the Senate which it may be thought are proper to be so regulated.

10.—The University shall be both a Teaching and an Examining University and shall further the prosecution of original research in all its branches.

The University may confer on persons of either sex Degrees Diplomas and Certificates whether Honorary Substantive or otherwise and such Degrees Diplomas and Certificates shall be conferred and held subject to any such provisions as may be made by the Statutes and Ordinances of the University with reference thereto.

No religious test of any kind whatsoever shall be applied in the University or imposed upon or observed by any Member Graduate Student or Office Holder of the University.

11.—The University may admit to affiliation with it or to any of its privileges any College or Institution or the Members or Students thereof upon such terms and conditions and subject to such regulations as may from time to time be prescribed by the Statutes of the University.

12.—The Court of Governors may from time to time make Statutes for the University which shall carry into effect this Charter and its provisions and may regulate and govern and contain prescriptions in regard to the affairs business work and interests of the University and those of the Corporate Members thereof as such and the status appointment and removal of the Members Chancellor Pro-Chancellor Vice-Chancellor Pro-Vice-Chancellor Principal Vice-Principal and Dean of the Faculty of Medicine and Officers thereof and may contain all such provisions as the Court may deem it fit and meet should be made with respect to or for the governing of the University its Constituent parts and Members or to promote the objects of these presents.

The Council shall have such power to suggest draft or propose to the Court Statutes to be made by the Court as the Statutes of the University may provide for and it shall be the duty of the Court to duly consider the same.

The first Statutes of the University shall be those Scheduled to these presents and they are hereby declared to be valid and within the powers by this Article of these presents conferred.

The Statutes may add to amend alter or repeal the Statutes from time to time in force (including the first) and the power to make Statutes shall not be limited by or with reference to the first or any subsequent Statutes or the several subject matters therein dealt with.

Any Statutes to be hereafter made which are not repugnant to the provisions of this Charter or the Laws of the Realm shall be operative and have effect when allowed by Us or by any Committee of Our Most Honourable Privy Council and not before. Such allowance shall be conclusive evidence of the Statutes so allowed being authorised by the provisions of this Charter.

13.—The Court of Governors the Council and the Senate respectively may from time to time make regulations for Governing subject to these presents and the Statutes of the University the proceedings of those bodies respectively. The power to make regulations shall include the power to add to amend alter or repeal any theretofore made.

The Council shall make the first regulations for the Court of Governors and the Council. The regulations for the Court of Governors require the approval of the said Court.

14.—It shall be the duty of the Council from time to time to bring before the Court of Governors and the Senate any matters which in its opinion should be dealt with by these bodies respectively.

15.—There shall be a Guild of Graduates of the University and a Guild of its Students each of whom

shall have such and so many Representatives on the Court of Governors as may be provided by the Statutes of the University. The constitution functions privileges and all other matters connected with the said Guilds requiring to be prescribed shall be prescribed as may be provided by the Statutes.

16.—The Court of Governors may at any time alter amend or add to these presents and their provisions by a Special Resolution in that behalf and such alteration amendment or addition shall when allowed by Us Our Heirs or Successors under the sign manual or otherwise as We or They shall deem meet become effectual so that these presents shall thenceforward continue and operate as though they had been originally granted and made as so altered amended or added to as aforesaid. This Article of these presents shall apply to this Charter as altered amended or added to in manner aforesaid. A Special Resolution means a Resolution passed and confirmed in the manner provided by the Statutes of the University.

17.—Our Royal Will and Pleasure is that these presents shall ever be construed benevolently and in every case most favourably to the University of Birmingham and the promotion of the objects of this Our Charter.

FIRST SCHEDULE.

Provided that at least one such External Examiner shall be appointed by the Council for each subject or group of subjects forming part of the courses of studies required for University degrees.

2.—All matters respecting the subjects time and mode of the Examinations, and respecting the degrees and distinctions to be conferred by the University shall be provided for by Ordinance. Provided always that all Examinations of members of the University shall be conducted jointly by External Examiners and by Examiners being Professors or Lecturers of the University.

SECTION 18.

COMMITTEES.

1.—The Court Council and Senate may respectively appoint such and so many standing and special Committees as may seem to them fit for the purpose of dealing with any subjects or matters delegated to such Committees. The Committees' power shall be such as the bodies appointing them from time to time direct and may be revoked altered or enlarged as to the appointing bodies shall seem meet. Every Committee shall report to the body appointing it but to the extent to which that body from time to time directs the proceedings and acts of Committees shall not require the approval of the appointing body.

2.—The Council shall make regulations for the proceedings of all Committees but subject thereto every

Committee may regulate its own procedure times and places of meeting.

3.—The Vice-Chancellor shall ex-officio be a member of every Committee of the Court and Council and every joint Committee of the Court and Council.

SECTION 19.

ADVISORY BOARDS.

The Council may from time to time appoint Advisory Boards consisting either wholly or partly of members unconnected with the University upon such terms and for such purposes as the Council may consider advisable and may refer to them for advice and report any subject or matter in the Council's opinion requiring to be so dealt with. And such advice and report shall be duly considered and weighed by any body in the University to which the Council direct such advice to be given or report to be made.

SECTION 20.

AFFILIATION.

1.—The University shall have power to affiliate Colleges which may have attained a standard which shall be deemed satisfactory by the University to require contributions for University purposes from such Colleges as a condition of affiliation or otherwise and to make ordinances for regulating their relations to the University and in particular for regulating the number of the representatives of such Colleges on the University Court.

2.—The University may recognise attendance upon courses of study in an affiliated College as wholly or in part qualifying students for graduation. Provided that the recognition of lecturers teachers and examiners the regulations respecting the period of attendance upon and the character and subjects of such courses and the period of attendance at such College and the period of collegiate study for which exemption is to be granted shall be approved by the Council and

provided also that the Council shall not approve thereof unless the Senate have recommended the same or unless and until the Senate shall have had a reasonable opportunity of considering and reporting thereupon to the Council.

3.—Notwithstanding that a subject is not taught in the University the Court shall have power to recognise a College in which such subject is taught and to recognise such subject as a subject for degrees in the University. Provided that pursuance of a scheme of study in that subject approved by the Council be a condition precedent to examination in that subject.

SECTION 21.

MEETINGS OF THE COURT.

1.—A meeting hereinafter distinguished as the “yearly meeting” of the Court shall be held once a year in the month of January or February at such day and hour as shall be appointed by the Council with the approval of the Chancellor and at such yearly meeting a Report of the Proceedings of the Council and of the University together with a Statement of the Receipts and Expenditure and the Balance Sheet as audited shall be presented by the Council to such meeting.

2.—For the purposes of transacting the business in the preceding clause mentioned a quorum of the Court shall be twenty members.

3.—All other business at the yearly meeting shall be deemed special business and for the purpose of any such special business and also for the purposes of all special general meetings the quorum shall be forty members.

4.—In the absence of a quorum no business but the adjournment of the Court can be transacted.

5.—Special general meetings may be convened by the Council at any time.

6.—Twenty-one days' notice of the yearly meeting shall be sent by the Secretary to every member of the Court.

7.—Members intending to bring forward any special business at the yearly meeting shall give notice of such business to the Secretary at least fourteen days before the day appointed for such meeting and at least seven days notice of all special business to be brought forward at the yearly meeting shall be sent to every member of the Court.

8.—Twenty-one days' notice of any special general meeting stating generally the nature of the business to be transacted shall be sent to each member of the Court and no meeting shall be competent to transact any other business than that mentioned in the notice or directly arising thereout. Provided always that this clause shall not interfere with the operation of clause 7 of this section.

9.—The procedure at meetings of the Court shall be in accordance with the regulations made for governing the same as provided by the Charter.

SECTION 22.

POWERS OF THE COURT.

1.—The Court shall exercise all the powers and authority of the University except to the extent to which the exercise of the same may by the Charter Statutes and Ordinances be otherwise provided for.

2.—To make Statutes either at its own initiative or on the proposal of the Council.

3.—All Statutes must be passed at one meeting of the Court and confirmed at the next and special notice of the fact that Statutes will be considered and containing a short statement of the nature of the proposed Statutes must have been given with respect to each of the two meetings aforesaid.

4.—A Special Resolution of the Court means a resolution passed at one meeting of the Court and confirmed at a subsequent meeting held not less than one calendar month nor more than three calendar months after the former provided the resolution be passed at each meeting by a majority of not less than two-thirds of those present and voting.

5.—The Court shall exercise control over the Senate through the Council and not otherwise and over the Council by means of Statutes and of Resolutions passed in plenary sittings of the Court and not otherwise.

SECTION 23.

ACTS DURING VACANCIES.

1.—No act or resolution of the Court the Council or the Senate shall be invalid by reason only of any vacancy in the body doing or passing it or by reason of any want of qualification by or invalidity in the election or appointment of any de facto member of the body (whether present or absent).

SECTION 24.

POWERS OF THE COUNCIL.

1.—Subject to the Charter and the Statutes and any Ordinances and Regulations made in pursuance thereof the Council shall have the following Powers:—

1. To draft statutes as and when they see fit and submit the same to the Court for consideration and enactment.
2. To make ordinances for any matters in respect of which ordinances are authorised to be made.
3. To make regulations for any purposes for which regulations are authorised to be made.
4. To exercise all such powers as are conferred on the Council by the Charter Statutes Ordinances and Regulations and carry the Charter Statutes Ordinances and Regulations into effect.

5. To review and control or disallow any act of the Senate and give directions to be obeyed by the Senate.
6. To govern manage and regulate the finances accounts investments property business and all affairs whatsoever of the University.
7. To make contracts on behalf of the University.
8. To sell buy exchange lease or take leases of the University's real and leasehold estates.
9. To provide the buildings premises furniture and apparatus and other means needed for carrying on the business of the University.
10. To supervise the Instruction and Teaching of the University.
11. To entertain adjudicate upon and if thought fit redress the grievances of members of the Senate on appeal against the acts of the Senate and of the Officers of the University the Professors the Teaching Staff the Graduates Under-Graduates and the University Servants who may for any reason feel aggrieved otherwise than by an Act of the Court.
12. To select a seal and arms for the University and have the sole custody and use of the seal.
13. To borrow money on behalf of the University and for that purpose (if the Council think fit) to mortgage all or any part of the property of the University whether real or personal or give such other security whether upon such real or personal property or otherwise as the Council think fit.
- 2.—The Council shall obey and carry out the Statutes and the Resolutions of the Court.

SECTION 25.

POWERS OF THE SENATE.

- 1.—The Senate shall subject to review by the Council have the government management and carrying out of

the curriculum instruction and education afforded by the University the examinations held by the University recommendations for degrees diplomas certificates fellowships and scholarships and the discipline (whether intra-mural or extra-mural) of the students or undergraduates of the University and the carrying out of such discipline.

2.—Such matters as shall be committed to the Senate by the Council shall be transacted by the Senate.

SECTION 26.

Contracts made by or on behalf of the University shall be validly made and binding on the University if made as follows—

- (1) Any contract which if made between private persons would be by law required to be in writing and if made according to English law to be under seal may be made on behalf of the University in writing under its common seal and such contract may be in the same manner varied or discharged.
 - (2) Any contract which if made between private persons would be by law required to be in writing and signed by the parties to be charged therewith may be made on behalf of the University in writing signed by any person acting under the express or implied authority of the Council and such contract may in the same manner be varied or discharged.
 - (3) Any contract which if made between private persons would by law be valid although made verbally only and not reduced into writing may be made either in writing or verbally on behalf of the University by any person acting under the express or implied authority of the Council and such contract may be in the same way varied or discharged.
-

SECTION 27.

1.—These Statutes shall be interpreted in such manner as not to conflict with the Charter.

2.—Words defined in the Charter or Statutes shall have the same meaning in the Ordinances and Regulations unless the context be repugnant thereto.

In Witness whereof We have caused these Our Letters to be made patent. **Witness** Ourself at Westminster the twenty-fourth day of March, in the sixty-third year of Our reign.

AN ACT

To Transfer all the property and liabilities of Mason University College in the City of Birmingham, and to repeal the Mason University College Act 1897; to confer certain powers on the said University; and for other purposes.

[*Royal Assent, 25th May, 1900.*]

WHEREAS the late Sir Josiah Mason founded out Preamble.
of his own resources in Birmingham an institution for the promotion of thorough systematic education and instruction specially adapted to the practical mechanical and artistic requirements of the manufactures and industrial pursuits of the Midland District of England which subsequently became known as the Mason Scientific College:

And whereas the said Institution was by the Mason University College Act 1897 incorporated under the name of Mason University College with a new constitution and powers and all the lands and other property vested in the Trustees of the said Institution were by the said Act vested in the said College:

And whereas the said Act expressly contemplated that the said College might become a member of a University to be established having power to grant degrees in arts sciences medicine and surgery:

And whereas upon the petition of the said College and of the Corporation of the City of Birmingham and of the School Board for the said City and of the Governors of the Grammar School of King Edward the

Sixth in the said City and others Her Majesty has been pleased to grant a Charter establishing in the said City of Birmingham a University by the name and style of the University of Birmingham with faculties of Science Arts Medicine and Commerce and such other faculties as the Statutes of the University may from time to time prescribe :

And whereas the said Charter directs that the University shall be both a Teaching and an Examining University and shall further the prosecution of original research in all its branches :

And whereas the Governors of the said College are desirous and it is expedient that the College be merged in the University and that all its property and liabilities be transferred to and vested in the University and that the Mason University College Act 1897 be repealed :

And whereas the Council of the City of Birmingham and the Overseers of the Poor of the Parish of Birmingham are desirous and it is expedient that the exemption from local rates granted to the said College be continued to the said University :

And whereas it is expedient to empower the said University to hold examinations under section three of the Medical Act 1886 and to elect a representative on the General Council mentioned in section seven of the same Act :

And whereas it is provided by a Scheme made by the Court of Chancery which is scheduled to and confirmed by the Queen's College Birmingham Act 1867 that the

physicians and surgeons of the Queen's Hospital at Birmingham shall hold their respective offices on condition of giving to all students of the Queen's College at Birmingham such clinical instruction in kind and quantity and in such manner as shall from time to time be required by the medical examining boards therein referred to and that the students of the said College shall at all times have free access to the said Hospital for the purposes of clinical instruction upon payment of such fees and on such other terms and conditions as shall be from time to time agreed and that any dispute between the said College and the said Hospital regarding such fees terms or conditions or otherwise regarding the privileges to be enjoyed by the students of the said College or any such dispute as therein mentioned between the said Hospital and any physician or surgeon thereof shall be referred to the visitor of the said College whose decision shall be binding on the parties to the dispute :

And whereas in pursuance of an Order of the Chancery Division of the High Court made by the Hon Mr. Justice Chitty at Chambers on the twenty-second day of June one thousand eight hundred and ninety-two the medical and dental departments of the said Queen's College were closed and abandoned and the anatomical and other collections books and other things specified in the said Order and formerly belonging to the said Queen's College were handed over to and became the absolute property of the trustees of the Mason College :

And whereas the medical students of the Mason College have accordingly since the latter part of the year one thousand eight hundred and ninety-two received clinical instruction from the physicians and surgeons of the said Queen's Hospital :

And whereas it is now desirable to continue to the students in the Faculty of Medicine of the University the same rights and privileges as have been enjoyed first by the medical students of Queen's College and latterly by the medical students of Mason College under the provisions of the above-recited Scheme and Order :

And whereas it is expedient that the other provisions contained in this Act be made .

And whereas the objects of this Act cannot be attained without the authority of Parliament :

MAY IT THEREFORE PLEASE YOUR MAJESTY

That it may be Enacted and BE IT ENACTED by the Queen's Most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal and Commons in this present Parliament assembled and by the authority of the same as follows (that is to say) :—

Short title

1.—This Act may be cited as the Birmingham University Act 1900.

Commencement
of Act.

2.—This Act shall come into operation on the first day of October one thousand nine hundred which date is hereinafter referred to as the commencement of this Act.

3.—On the commencement of this Act Mason University College shall be dissolved and the Mason University College Act 1897 shall be repealed without prejudice to anything lawfully done or suffered thereunder and in particular without prejudice to the provisions of Part III. of the said Act for confirming or rendering valid certain leases sales exchanges estates interests rights payments and contracts therein referred to.

Dissolution of
Mason
University
College and
repeal of Act
of 1897.

4.—On the commencement of this Act all property real and personal of every description (including things in action) which immediately before the passing thereof belonged to or was vested in Mason University College shall be by virtue of this Act without any conveyance or other instrument transferred to and vested in the University of Birmingham for all the estate and interest therein of Mason University College and shall be applied to the objects and purposes for which the University is incorporated.

Transfer of
Property to
University of
Birmingham.

5.—(1) Any three Governors present at a meeting of the Council of the University and voting against any resolution passed or order made at such meeting with respect to any lease sale exchange mortgage disposition or contract of or relating to any property of the University or with respect to the borrowing of money may appeal against such resolution to the visitor subject to the following conditions:—

Appeal to
visitor with
respect to
management of
property &c.

- (A) The appeal must be made in writing signed by the appellants within seven days after the date of the meeting:

- (B) Notice of the appeal stating the grounds thereof in writing signed by one or more of the appellants must be given to the Secretary of the University within the said period of seven days.

(2) The visitor shall if desired hear the appellants and the Council and the decision of the visitor allowing disallowing or modifying the resolution or as the case may be shall be binding and final.

Transfer of liabilities to University of Birmingham.

6.—On the commencement of this Act all debts and liabilities of Mason University College shall be by virtue of this Act transferred and attach to and be discharged and satisfied by the University of Birmingham.

Saving for agreements deeds actions &c.

7.—All agreements awards contracts deeds and other instruments and all actions and proceedings and causes of action or proceedings which immediately before the commencement of this Act were existing or pending in favour of or against Mason University College shall continue and may be carried into effect enforced and prosecuted by or in favour of or against the University of Birmingham to the same extent and in like manner as if the University instead of the College had been party to or interested in the same respectively.

Transfer of powers to nominate members of certain governing bodies.

8.—The power or right of Mason University College to appoint or nominate a member of the Governing Body of any educational or charitable institution shall on the commencement of this Act be transferred to and

may be exercised by the Council of the University of Birmingham.

9.—The University of Birmingham is hereby empowered to hold qualifying examinations in medicine surgery and midwifery for the purpose of registration under the Medical Acts as if the University had been a university in the United Kingdom legally qualified at the passing of the Medical Act 1886 to grant diplomas in medicine and surgery; and the provisions of Part I of that Act shall be read and have effect accordingly.

Power of
University of
Birmingham
to hold
examinations
under 49 & 50
Vict. c. 48.

10.—The Council of the University of Birmingham shall be entitled to choose one representative to be a member of the General Council constituted by the Medical Acts; and section seven of the Medical Act 1886 shall be read and have effect as if the University of Birmingham had been expressly included therein.

Power of
University
to choose
representative
on General
Medical
Council.

11.—The University of Birmingham shall not be assessed or rated to pay or contribute to any borough improvement or parochial rates in respect of any buildings lands or property of any description occupied by the University which were exempt from rating under the Mason University College Act 1897: Provided always that the exemption herein contained shall not extend to any part of such buildings land and property which shall for the time being be occupied by any member officer or servant of the University and the

Exemption of
University
from rates.

parts of buildings so occupied shall be rated as separate tenements.

Saving for existing officers of Mason University College.

12.—All professors and other members of the teaching staff of Mason University College and all officers and servants of the College shall hold as nearly as practicable the same offices and places in the University of Birmingham as they held in the said College immediately before the commencement of this Act and upon the same terms and conditions unless and until the Council of the University otherwise decide.

Application of certain provisions of Scheme scheduled to Queen's College Birmingham Act, 1867.

13.—Clauses fifty and fifty-one of the Scheme set forth in the Schedule to the Queen's College Birmingham Act 1867 shall be read and have effect as if the University were mentioned therein instead of the College so that students in the faculty of medicine of the University shall have at all times provided for them by the physicians and surgeons of the Queen's Hospital at Birmingham such clinical instruction as therein mentioned and shall have free access to the said Hospital for the purposes of clinical instruction as therein mentioned. Provided that any such dispute between the University and the said Hospital or between the said Hospital and any physician or surgeon thereof as therein mentioned shall be referred to the visitor of the University whose decision shall be binding on the parties to the dispute.

As to jurisdiction of Charity Commissioners.

14.—The Charitable Trusts Acts 1853 to 1894 shall not extend to the University of Birmingham or any College or Hall therein and the said University and

any such College or Hall shall be exempt from the control or jurisdiction of the Charity Commissioners.

15.—The costs charges and expenses of and incidental to preparing obtaining and passing this Act shall be defrayed by the University of Birmingham out of the income of the property by this Act transferred to the University or if the Council of the University think fit out of money representing capital or to be raised by sale or mortgage of some part of the said property. Costs of Act.

NOTE ON CLAUSE 13.

By an Act entitled "An Act for the Regulation of the Queen's College at Birmingham and for incorporating the Queen's Hospital at Birmingham" but having the short title of "The Queen's College Birmingham Act 1867" which received the Royal Assent on the 12th day of August 1867 the Queen's Hospital was separated from the Queen's College and separately incorporated by the title of "The Queen's Hospital Birmingham" but for the purpose of preserving the right the Queen's College had of clinical instruction for its students in the Hospital the following clauses Numbered 50 and 51 in the Scheme sanctioned by the Act were inserted in the Schedule to the Act :—

The Hospital shall be maintained as a Clinical Hospital and afford every facility for clinical instruction ; and such persons shall from time to time be appointed to be Physicians and Surgeons of the Hospital whose certificates as to clinical instruction shall be

accepted by the Medical Examining Boards of the United Kingdom ; and such Physicians and Surgeons shall hold their respective offices on condition of giving to all students of the *College* such clinical instruction in kind and quantity and in such manner as shall from time to time be required by the said Medical Examining Boards.

The students of the *College* shall at all times have free access to the Hospital for the purposes of clinical instruction, upon payment of such fees and on such other terms and conditions as shall be from time to time agreed upon between the Council and the Hospital. Any dispute between the *College* and the Hospital regarding such fees terms or conditions or otherwise regarding the privileges to be enjoyed by the students of the *College* under this clause or the preceding clause or any dispute between the Hospital and any Physician or Surgeon thereof as to the preceding clause shall be referred to the Visitor of the *College*, whose decision shall be binding on the parties to the dispute.

The effect of Clause 13 is to substitute *University* for *Queen's College*.

ORDINANCES OF THE UNIVERSITY.

MADE BY THE COUNCIL in accordance with the provisions of Section 14 of the Second Schedule to the Charter.

FINANCES, INVESTMENTS, AND ACCOUNTS.

1.—The Finances, Investments, and Accounts of the University shall be controlled by the Council, who shall report thereon from time to time to the Court as may be required by the regulations of the Court.

FEEES.

2.—The payment and amount of fees to be exacted within the University or in relation to the enjoyment of privileges therefrom shall be determined by the Council.

FELLOWSHIPS, SCHOLARSHIPS, EXHIBITIONS AND PRIZES.

3.—The provisions and tenure of Fellowships, Scholarships, Exhibitions, Prizes, Rewards and pecuniary and other aids, shall be determined by the Council on the recommendation of the Senate.

FACULTIES.

4.—The Members of the FACULTY OF SCIENCE shall be the Principal and Vice-Principal, and the Professors of Mathematics, Physics, Chemistry, Zoology, Botany, Geology, Engineering, Metallurgy, Mining, Brewing, and Education.

To this Faculty shall be attached the Professors of Anatomy, Physiology, Pathology and Bacteriology, Hygiene and Public Health, and Mental and Moral Philosophy.

5.—The Members of the FACULTY OF ARTS shall be the Principal and Vice-Principal, and the Professors of Latin and Greek, English, **French**, German, Mental

and Moral Philosophy, History, Education, and Music, and the Lecturer on Spanish and Italian.

To this Faculty shall be attached the Professor of Mathematics.

6.—The Members of the FACULTY OF MEDICINE shall be the Principal and Vice-Principal, and the Professors of Anatomy, Physiology, Medicine, Surgery, Pathology and Bacteriology, Hygiene and Public Health, Therapeutics, Midwifery, Gynæcology, Forensic Medicine, Mental Diseases, Operative Surgery, Ophthalmology, and the Lecturer on Materia Medica.

To this Faculty shall be attached the Professors of Physics, Chemistry, and Zoology.

7.—The Members of the FACULTY OF COMMERCE shall be the Principal and Vice-Principal, the Professor of Commerce and Public Finance, and the Professors of Accounting and Commercial Law.

To this Faculty shall be attached the Professors of English, French, German, Mathematics, Philosophy, and History, and such other Professors as may for the time being be taking part in the courses of study prescribed for degrees in Commerce.

8.—Professors or Lecturers attached to any Faculty without being Members shall receive notice of and shall be entitled to attend all meetings of such Faculty, but shall be entitled to vote only upon questions relating to the subjects of their respective Chairs or Lectureships.

DUTIES AND POWERS OF FACULTIES.

9.—Each Faculty shall have the right of taking into consideration all matters bearing upon its work and development.

10.—Subject to approval by the Senate and Council each Faculty shall be responsible for the transaction of all academic business specially pertaining to it.

11.—It shall be the duty of each Faculty, subject to review by the Senate and Council, to draft regulations as to degrees, diplomas, certificates, scholarships and prizes falling within the province of the Faculty, and to draft the courses of study and the time-tables and schemes of examinations of the Faculty.

12.—It shall be the privilege and duty of each Faculty to report, according to the method provided by the Regulations for the time being, upon the candidates for, or persons to be proposed for, appointment to all teaching posts and examinerships belonging to the Faculty, before the appointments are made by the Council.

APPOINTMENT AND TENURE OF OFFICE OF PROFESSORS, LECTURERS, TEACHING STAFF AND OFFICERS.

13.—The manner of appointment and the duties of the Professors, Lecturers, Teaching Staff, External Examiners and Librarian, shall in each case be determined by the Council after report thereon by the Senate.

14.—The duties of the Registrar shall be determined by the Council, after report thereon by the Senate.

15.—The emoluments, allowances, and salaries of the officers of the University, its Professors, Lecturers, Teaching Staff, Secretary, Registrar, and servants shall be determined by the Council.

16.—Professors and Independent Lecturers shall hold office during good behaviour, but may be removed by the Council for good cause as defined by the Statutes of the University; provided also that it shall be competent for the Senate, either on its own initiative or upon request by the Council, to take into consideration the case of any Professor or Independent Lecturer, and for a majority of the members of the Senate present and voting at a duly convened meeting of the Senate (such voting to be by ballot), to represent to the Council that in the general interest of the University or for some special reason it is desirable that the engagement of

any Professor or Independent Lecturer should be determined, and upon receipt of such representation the Council may terminate the engagement of such Professor or Lecturer by six months' notice in writing.

17.—The engagements of members of the Teaching Staff (other than Professors and Independent Lecturers) and of the Secretary, Registrar, officers, and servants of the University may, subject to any special provision in the terms of their engagements, respectively, be determined by three months' notice in writing on either side.

PROFESSORS AND LECTURERS.

18.—Each Professor and Lecturer shall, on his appointment, enter into an agreement with the University, which shall indicate:—

- (i.) The subject or subjects committed to the office undertaken;
- (ii.) The arrangement as to stipend;
- (iii.) Any special terms of the appointment.

19.—A Professor or Lecturer shall not resign his appointment except by three months' notice in writing, which notice shall end at the expiration of some one of the University terms as regulated by the Calendar of the University for the time being; a Professor or Lecturer may, however, resign his appointment on the 30th of September in any year by giving notice in writing at any time in the preceding months of July or August, and the Council shall at all times have the power to waive notice to such extent as it may think fit.

20.—Every Professor and Independent Lecturer, while confining himself within the limits of the subject committed to his charge, shall have complete freedom of teaching, so far as the matter and methods of his instruction are concerned, subject only to the approval of his Faculty and of the Senate and Council in regard to the amount and times of his teaching and the scope and standard of such of his courses as form integral parts of Degree courses in the University.

ORDINANCES.

EMERITUS PROFESSORS.

21.—The Court shall have power on the recommendation of the Council to confer the title of Emeritus Professor upon any Professor of the University on or after his retirement, in recognition of conspicuous services to the University. The title "Emeritus Professor" shall in no case be conferred unless the connexion with the University shall have extended over a period of not less than ten academic years, and then only so long as the Professor in question does not hold another office of a similar character. An Emeritus Professor shall for all purposes of courtesy and on ceremonial occasions, be upon the same footing as members of the Senate, but shall not be entitled to perform any administrative or executive functions as a member of the Senate or otherwise. A previous and continuous term of service in Mason University College or in Mason College, Birmingham, or in the Faculty of Medicine of Queen's College, Birmingham, shall be deemed to be service in the University for the purposes of this Ordinance.

SPECIAL LECTURERS OR READERS.

22.—The Council shall have power on the recommendation of a Faculty and of the Senate to appoint as special University teachers persons whether on the regular teaching staff or not, and to recognise the courses delivered by them as qualifying courses for University Examinations and Degrees. Such persons shall be selected on the ground of scholarship or special knowledge and ability, and shall be appointed on such terms of tenure and status as the Council may decide.

DISCIPLINE.

23.—Every student shall be subject to such regulations as shall from time to time be passed by the Senate and approved by the Council.

24.—There shall be a Committee of Discipline, consisting of the Principal, the Vice-Principal, the Deans

of the Faculties, and the Secretary of the University; which Committee shall report to the Senate.

25.—Every Professor, Reader, Lecturer, Assistant Lecturer, or Demonstrator shall have the power, and it shall be his duty, to check any disorderly conduct that may occur in a class room or laboratory, and if he deem it necessary may require any student to withdraw from the room for the day. In the event of such an occurrence in a room under the charge of an Assistant Lecturer or Demonstrator, he shall report the matter without delay to his Professor or immediate chief.

26.—Professors, Lecturers, and other officers shall have the power to check disorderly or improper conduct, or any breach of Regulations arising in any part of the precincts of the University.

27.—Any member of the Discipline Committee shall have power to exclude any student from the University or its precincts until the next meeting of the Discipline Committee which shall be held as soon as possible after each such exclusion, and the circumstances of the case shall be laid before the meeting for further adjudication.

28.—The Discipline Committee shall have power to suspend any student from attendance at the University for any period not extending beyond the next meeting of the Senate. Every such suspension shall be reported to the Senate at its next meeting, and the Senate shall have power to extend the period of suspension for the remainder of a University term, and subject to the approval of the Council, to expel.

29.—Habitual neglect of work in any class, shall be regarded as a breach of discipline, and may subject the student to suspension.

MATRICULATION.

30.—Matriculation is the formal admission of a student to membership of the University.

31.—An Examination called the Matriculation Examination shall be held by the University at least

once in each year at such time and in such subjects and under such conditions as may be prescribed by Regulations.

32.—Any person who shall have paid to the University the prescribed fee, and shall have satisfied such other conditions as may be prescribed by Regulations, shall be entitled to be admitted to the Matriculation Examination.

33.—The University may by Regulations recognise the Matriculation or any other examination or examinations of any British or foreign University or of any public Educational Authority in his Majesty's dominions as exempting from the Matriculation Examination of the University or from any part thereof.

34.—Any person who shall have passed the Matriculation Examination, or a Schools' Leaving Examination of the University, or other examination or examinations recognised by the University as exempting from the Matriculation Examination, and shall have paid to the University the fee prescribed by these Ordinances, and shall have satisfied such other conditions as may be prescribed by Regulations, shall be entitled to be matriculated.

UNDERGRADUATES AND OTHER STUDENTS.

35.—Every person who has been matriculated shall be entitled to the privileges of membership of the University and of the Guild of Undergraduates, so long as he is in actual attendance on a course of study in the University approved by a Faculty of the University, but no longer.

36.—The University may admit all persons who shall have satisfied such conditions as may be prescribed by Regulations to any of the courses of study offered by the University, although they have not passed the Matriculation Examination or any examination exempting from the Matriculation Examination; but such students shall not be entitled to be matriculated or to be members of the Guild of Undergraduates, nor shall

they be entitled to wear the academic dress prescribed for Undergraduates.

DEGREES IN THE FACULTIES OF SCIENCE, ARTS, AND COMMERCE.

37.—In the Faculty of Science there shall be the following degrees, viz. :—

Bachelor of Science, to be denoted by the letters	B.Sc.
Master of Science	„ „ M.Sc.
Doctor of Science	„ „ D.Sc.

In the Faculty of Arts there shall be the following degrees, viz. :—

Bachelor of Arts, to be denoted by the letters	B.A.
Master of Arts	„ „ M.A.
Doctor of Letters	„ „ D.Litt.
Doctor of Philosophy	„ „ D.Phil.
Bachelor of Music	„ „ B.Mus.
Doctor of Music	„ „ D.Mus.

In the Faculty of Commerce there shall be the following degrees, viz. :—

Bachelor of Commerce, to be denoted by the letters
B.Com.

Master of Commerce, to be denoted by the letters
M.Com.

38.—The courses of study and the number and nature of the examinations qualifying for admission to these degrees respectively shall be prescribed by regulations.

39.—Attendance upon courses of study in the University shall not in general be accepted as any part of the qualification necessary for a degree unless the candidate for the degree shall have previously been matriculated; but in exceptional cases the Senate may recognise as part of such qualification attendance on courses of study taken previous to matriculation,

provided always that no examination passed previous to matriculation be recognised as a qualifying University Examination.

40.—Except as hereinafter provided, no candidate shall be admitted to the degree of Bachelor until he shall have attended in the University the prescribed courses of study extending over a period of at least three years.

41.—No Bachelor of the University shall be admitted to the degree of Master until at least one year after the time of his admission to the degree of Bachelor.

42.—No Bachelor or Master of the University shall be admitted to the degree of Doctor until at least two years after the time of his admission to the degree of Bachelor.

43.—The Senate shall have the power of admitting graduates or persons who have passed Degree Examinations of other Universities to the courses and examinations for the higher degrees of Master and Doctor under conditions prescribed by Regulations without requiring such persons to attend the courses of study or pass the examinations qualifying for the degree of Bachelor. Such students after being matriculated shall be called Graduate Students, and shall be members of the Guild of Undergraduates.

44.—The Senate shall have the power of recognising attendance at another University or University College as part of the attendance qualifying for the Degree of Bachelor, and of recognising examinations passed at such other University as exempting from the first year's examination for such degree; provided that no candidate from another University be admitted to the Degree of Bachelor until he shall have attended in the University the prescribed courses of study extending over a period of at least two years.

PAST STUDENTS OF MASON UNIVERSITY COLLEGE.

45.—Students who have passed the Intermediate Examination in Science or Arts of the University of London after at least one session of regular study at Mason University College shall be excused the First Year's Course and the Intermediate Examination, and shall enter on the Degree Course as second year students of the University.

46.—Persons who, on October 1st, 1900, were regular students of Mason University College having passed the Intermediate Examination in Science or Arts of the University of London, and having subsequently spent at least one session at the College in regular study for the Final Examination, may be excused the first two years and the Intermediate Examination and may enter as third year students of the University if, in the opinion of their Faculty, they have fulfilled in the College conditions sufficiently nearly corresponding to those laid down for second year students.

47.—Persons who, on October 1st, 1900, were regular students of Mason University College having passed the Intermediate Examination in Science or Arts of the University of London, and having subsequently spent at least two sessions at the College in regular study for the Final Examination may be excused the Intermediate Examination and further attendance at lectures, may enter the University and take rank as if they had completed three years at the University, and may present themselves at a Final Examination for a Degree if, in the opinion of their Faculty, they have fulfilled in the College conditions sufficiently nearly corresponding to those laid down for second and third year students of the University.

48.—Past Students of Mason University College who have passed the Bachelors' Examination in the University of London, after a course of at least one year's regular study at Mason University College in two subjects at least, shall be permitted to enter the University

and present themselves at the Examination for the Masters' Degree after at least one further year of study at the University, as if they had taken the Bachelor's Degree of the University of Birmingham.

DEGREES IN THE FACULTY OF MEDICINE.

49.—In the Faculty of Medicine there shall be the following degrees, viz. :—

Bachelor of Medicine, to be denoted by the letters	M.B.
Doctor of Medicine	" " M.D.
Bachelor of Surgery	" " Ch.B.
Master of Surgery	" " Ch.M.
Bachelor of Science in Public Health	" B.Sc.
	(Public Health.)
Master of Science in Public Health	" M.Sc.
	(Public Health.)
Bachelor of Dental Surgery	" " B.D.S.
Master of Dental Surgery	" " M.D.S.

50.—In the Faculty of Medicine there shall be a Diploma in Dental Surgery, entitled Licentiate in Dental Surgery (L.D.S.), which shall be registrable in accordance with the Dentists Act, 1878 (41 and 42 Vict., xxxiii., Clause xviii.).

51.—The courses of study and the number and nature of the examinations qualifying for admission to these degrees, respectively, and to the Licentiate of Dental Surgery, shall be prescribed by Regulations.

52.—No attendance upon courses of study in the University shall be accepted as any part of the qualification for a degree, unless the candidate for the degree shall have previously passed the Matriculation Examination of the University as prescribed for Medical students or an examination recognised by the University as exempting from the same.

53.—Except as hereinafter provided, no candidate shall be admitted to either or both of the degrees of Bachelor of Medicine and Bachelor of Surgery unless he shall have attended the courses of study prescribed by Regulations extending over a period of at least five years after matriculation, of which the first four years must be spent in the University, and the fifth year

either in the University of Birmingham or some other school or schools of medicine recognised for this purpose by the University.

54.—No candidate shall be admitted to the higher degrees of Master of Surgery or Doctor of Medicine unless he has attained both the degrees of Bachelor of Medicine and Bachelor of Surgery in the University, and until a further year shall have elapsed after such Bachelor's degrees were conferred.

55.—No candidate shall be admitted to the degree of Bachelor of Science in Public Health unless he has previously attained to both the degrees of Bachelor of Medicine and Bachelor of Surgery in the University.

56.—No candidate shall be admitted to the degree of Bachelor of Dental Surgery who has not obtained a License in Dental Surgery from some body legally entitled to confer such qualification, and until a period of twelve months shall have elapsed after he obtained such License.

57.—No candidate shall be admitted to the degree of Master of Dental Surgery unless he shall have previously attained to the degree of Bachelor of Dental Surgery, and until a further period of twelve months shall have elapsed after he obtained such Bachelor's degree.

58.—Notwithstanding the preceding ordinance, the Senate shall have the power of admitting graduates or persons who have passed Degree Examinations of other Universities to the courses and examinations for the higher degrees of Master and Doctor under conditions prescribed by Regulations without requiring such persons to attend the courses of study or pass the examinations qualifying for the degree of Bachelor. Such students shall be called Graduate Students, and shall be members of the Guild of Undergraduates.

59.—The Senate shall have power of recognising attendance at another University as part of the attend-

ance qualifying for the degrees of Bachelor of Medicine and Bachelor of Surgery, and of recognising examinations passed at such other Universities as exempting from the examination in Chemistry, Physics, and Comparative Anatomy, for such degrees, provided that no candidate from another University be admitted to the degree of Bachelor until he shall have attended in the University the prescribed courses of study extending over a period of at least three years.

PAST STUDENTS OF THE BIRMINGHAM SCHOOLS OF
MEDICINE AND DENTISTRY.

60.—Persons who, on October 1st, 1900, were students of the School of Medicine and who originally entered as first year students of the school, and have since regularly pursued their studies in the school, shall be permitted to present themselves for the examinations of the University without passing its matriculation examination, and without repeating any courses of lectures which they may already have taken out.

61.—Students of the School of Medicine falling under the above category who have passed any medical examinations in any British or Irish University shall be allowed to count such examination or examinations in lieu of the corresponding examination or examinations in the University of Birmingham, but no such allowance shall be made in the case of students who have passed examinations conducted by licensing bodies other than Universities. Provided that in all cases it shall be essential that the student shall pass the Final Examination of the University of Birmingham.

62.—Past students of the Birmingham Medical School who have taken out their whole course in Birmingham, and are duly qualified Medical Men, shall be permitted at any period during the seven years commencing on the 1st of October, 1900, to present themselves for a Final Examination for the Degrees of Bachelor of Medicine and Surgery.

63.—Past students of the Birmingham Dental School (including those who qualified not later than the November, 1900, Examination of the Royal College of Surgeons of England) who have taken out their whole course in the Birmingham School, and are duly qualified and Registered Dental Surgeons, shall be permitted at any period during the seven years commencing on the 1st of October, 1900, to present themselves for a Final Examination for the Degree of Bachelor of Dental Surgery.

64.—That Students who enter the Department of Dentistry in Mason University College in the years 1897 to 1899 inclusive, and have obtained both the License in Dental Surgery and the qualifications in Medicine and Surgery from some body legally qualified to confer such qualifications, and produce evidence that after having obtained the License in Dental Surgery they have received instruction in the Dental Department of a General Hospital for a period of not less than six months, be admitted to the Degree of Bachelor in Dental Surgery on passing the final examination for such Degree held by the University.

EXTERNAL EXAMINERS.

65.—The appointments of External Examiners shall be made in the first instance for one year, but may be renewed annually for the two following years.

EXAMINATIONS AND BOARDS OF EXAMINERS.

66.—The Matriculation Examination of the University shall be conducted by Professors or Lecturers of the University appointed for this purpose by the Senate, without the assistance of External Examiners.

67.—Class Examinations and Examinations provided for students who are neither undergraduates nor candidates for any Degree of the University shall be conducted by the Professors or Lecturers of the University without the assistance of External Examiners.

68.—There shall be a Board of Examiners for the Matriculation Examination, consisting of the Principal and Vice-Principal, the Examiners who are taking part in the Examination, and the Professor of Education, the Principal being Chairman of the Board.

69.—For every University Examination prescribed by the Regulations for Degrees of the University there shall be a Board or Boards of Examiners, consisting of the internal and external Examiners who are taking part in the conduct of the Examination, together with the Dean of the Faculty to which the Examination belongs. The Dean of the Faculty shall be the Chairman of all such Boards of Examiners as belong to that Faculty.

70.—The Principal and Vice-Principal shall be members of all the Boards of Examiners.

SCHEDULES OF QUALIFICATION.

71.—Before admission to any University Examination each candidate is required to present to the Registrar a Schedule of Qualification certifying that he has attended the lectures, classes, laboratory or hospital instruction prescribed by the Regulations for that examination to the satisfaction of the Professors or other teachers concerned, and that he has passed such class examinations and performed such other exercises as his teachers may prescribe in connexion with their own courses, to the satisfaction of the Faculty.

DEGREES, DIPLOMAS, SCHOLARSHIPS, AND OTHER UNIVERSITY HONOURS.

72.—The ordinary Degrees, Diplomas, Certificates, Scholarships, Prizes and Honours of the University (except Honorary Degrees) shall be awarded by the Council on the nomination of the Senate.

73.—Honorary Degrees may be conferred upon persons approved by the Council on the nomination of the Senate.

74.—Degrees whether ordinary or honorary shall be conferred at a special congregation of all members of the University to be held for the purpose at least once a year, and such persons other than members of the University as the Council may direct shall be invited to be present. The formal admission of persons to degrees shall be made by the Chancellor, or in his absence by the Vice-Chancellor, or in the absence of both by the Pro-Vice-Chancellor or Principal. Recipients of ordinary degrees shall be presented to the Chancellor or Vice-Chancellor by the Dean of the Faculty to which the degree belongs. Each recipient of an Honorary Degree shall be presented by a member of the University specially appointed for the purpose by the Council; provided that no person shall be admitted to any degree, ordinary or honorary, until he has signed the Register of Graduates and paid the fees prescribed. No University fee shall be required of persons admitted to Honorary Degrees.

75.—Notwithstanding this ordinance, degrees may in exceptional cases, on the recommendation of the Senate, be conferred upon persons *in absentia*, by special warrant, signed by the Chancellor or the Vice-Chancellor.

76.—The Council may on the recommendation of the Senate revoke the Degree or Degrees, Diplomas, Certificates and distinctions and all privileges connected therewith of any graduate of the University who shall be convicted of felony or of any indictable misdemeanour, or whose name shall have been removed for misconduct by a properly constituted legal authority from any official register or roll of members of the profession to which he belongs, and may restore on cause being shown any person whose degree has been revoked to the degree he previously enjoyed without further examination.

77.—Degrees may be conferred on members of the teaching staff and other officers of the University *ex-officio*.

INSPECTION OF SCHOOLS.

78.—The regulations for the Inspection and Examination of Schools and other Institutions, and the scholars and students therein, and the regulations for the award of certificates of proficiency, shall be determined by the Council after report thereon by the Senate.

AFFILIATED INSTITUTIONS.

79.—A College, School, or other Educational Institution in the Midland Counties may apply to be recognised as an affiliated institution of the University. Such recognition shall only be given upon evidence of efficiency satisfactory to both Senate and Council. Students of any such affiliated Institution shall be permitted to attend at such Institution a course of study approved by the University instead of the whole or part of the first year's course of study at the University, in the Faculties of Science, Arts, Medicine or Commerce; and after presentation of Schedules of Qualification certifying that they have attended the classes and laboratory instruction and passed the class examinations prescribed by the University, and have been matriculated in the University, shall be admitted to the first University Examinations in those Faculties.

80.—Any College, School, or Institution desiring to take advantage of the foregoing ordinance must—

- (a) Give satisfactory evidence of its educational status and that it is established on a permanent and effective footing.
- (b) Submit, for the approval of the Senate, courses of study of such scope and standard as may be accepted by the University instead of the whole or part of the first year's courses in the Faculties of Science, Arts, Medicine and Commerce, or any part thereof.

81.—The University shall in no case grant the privilege of this ordinance to any College, School, or Insti-

tution for a period of more than five years, but such privilege may be renewed for a further period after a report from the Senate.

82.—The University reserves the right of inspecting the libraries, laboratories, and the equipment and apparatus provided for practical work, and of enquiring into the qualifications of the teachers appointed to conduct the qualifying courses.

ASSOCIATE MEMBERS OF THE GUILD OF GRADUATES.

83.—Persons who were Associates of Mason University College on October 1st, 1900, may be admitted as Associate Members of the Guild of Graduates, and shall have the same privileges as other Members of the Guild except the power of voting at the election by the Guild of Members of the Court.

84.—Associates may make application to their respective Faculties on or before 1st October, 1905, for admission to the Degree of Bachelor. They will be required to submit at the same time copies of their contributions to Medicine, Science, or Literature, or a Thesis specially composed for the occasion, and an account of the appointments which they hold or have held. These papers shall be submitted to Assessors, one of whom shall be an external examiner, and in the event of a Thesis having been submitted, these Assessors shall be at liberty to question the candidate upon it, should they see fit, or to call upon him to pass any examination they may think proper. On the report of the Assessors the Faculty shall decide in each case whether they will recommend the Senate to nominate the candidate for a Degree.

85.—The fee payable by Associates who are Candidates for any degree shall be £5.

86.—Students and members of the staff of Mason University College who would have been eligible for the Associateship before 30th September, 1901, had the College continued to exist, shall be permitted to apply for admission to the above privileges before the 30th September, 1901.

THE GUILD OF GRADUATES.

87.—Every person who has been admitted to a Degree in any Faculty of the University shall, after the lapse of such time as may hereinafter be prescribed by regulations, be eligible to be a Member of the Guild of Graduates, and may be elected a Member of the Guild after payment of such fee as may also be so prescribed.

88.—The Guild of Graduates shall be an organised Association of Graduates for the furthering of their common interests, and shall be the recognised means of communication between the Graduates on the one hand and the Court of Governors, Council, Senate, and other authorities of the University on the other hand.

89.—The Guild of Graduates may make laws for its internal management and administration, and the election of its officers, the alteration of its laws and all other matters requiring to be dealt with.

THE GUILD OF UNDERGRADUATES.

90.—All matriculated students of the University shall be members of the Guild of Undergraduates, and shall remain members so long as they are in actual attendance on a systematic course of study approved by a Faculty of the University for a Degree, notwithstanding that they may have become members of the Guild of Graduates.

91.—The Guild of Undergraduates shall be an organised association of the students of the University for the furthering of their common interests, and shall be the recognised means of communication between the students on the one hand and the Court of Governors, Council, Senate, and other authorities of the University on the other hand.

92.—The Guild of Undergraduates may make laws for its internal management and administration the election of its officers, the alteration of its laws and all other matters requiring regulation, but no law shall be effective until approved by the Council.

UNIVERSITY OF BIRMINGHAM.

COUNCIL.

Chancellor:

The Right Hon. J. CHAMBERLAIN, LL.D., M.P.

Vice-Chancellor:

Pro-Vice-Chancellor:

FRANCIS CORDER CLAYTON, Esq., J.P.

Treasurer:

HUME CHANCELLOR PINSENT, Esq., M.A.

Principal:

Sir OLIVER J. LODGE, D.Sc., LL.D., F.R.S.

Members of Council:

The Rt. Rev. HENRY RUSSELL WAKEFIELD, D.D.

Sir JOHN C. HOLDER, Bart., J.P.

Sir GEORGE H. KENRICK, J.P.

NEVILLE CHAMBERLAIN, Esq., J.P.

ROWLAND HILL, Esq., M.A., LL.D.

J. T. HOMER, Esq., J.P.

JOSEPH JAMES, Esq., M.A.

KENNETH A. MACAULAY, Esq.

Mrs. WILSON KING.

Rev. CHARLES ELSEE, M.A.

W. WATERS BUTLER, Esq.

F. D. CHATTAWAY, Esq., D.Sc., F.R.S.

Miss S. MARGERY FRY, M.A.

RICHARD THRELFALL, Esq., M.A., F.R.S.

MICHAEL TOMKINSON, Esq., J.P.

A. G. ELLAWAY, Esq.

ARTHUR GODLEE, Esq.

JOHN HENRY LLOYD, Esq., M.A., J.P.

MAURICE POLLACK, Esq., J.P.

Sir JAMES SMITH, J.P.

Professor R. S. HEATH, M.A., D.Sc. (*Vice-Principal*).

Professor J. H. POYNTING, Sc.D., F.R.S., J.P.

Professor ALFRED HUGHES, M.A.

Professor PETER THOMPSON, M.D.

Professor W. J. ASHLEY, M.A., M.Com., Ph.D.

Professor GILBERT BARLING, M.B., F.R.C.S., J.P. (*Representative of the Faculty of Medicine*).

*Representatives of the
Birmingham City Council.*

*Deans of
Faculties.*

Secretary:

GEO. H. MORLEY.

Assistant Secretary:

FREDK. E. MOORE.

SENATE.

	Date of Appointment.
Principal Sir OLIVER J. LODGE (<i>Chairman</i>) Mariemont, Edgbaston.	16th June, 1900
Professor R. S. HEATH (<i>Vice-Chairman and Secretary</i>) The Gables, 359, Bristol Road.	21st May, 1884*
Professor BOSTOCK HILL	9th July, 1879†
Professor J. H. POYNTING 10, Ampton Road, Edgbaston.	10th Jan., 1880*
Professor C. LAPWORTH 38, Calthorpe Road, Edgbaston.	10th May, 1881*
Professor E. A. SONNENSCHIEIN 30, Calthorpe Road, Edgbaston.	15th Nov., 1882*
Professor GILBERT BARLING	24th Sept., 1885*
Professor JORDAN LLOYD	24th Sept., 1891*
Professor ALFRED H. CARTER	17th March, 1892*
Professor R. SAUNDBY	5th July, 1892*
Professor PERCY F. FRANKLAND West Heath Road, Northfield	6th June, 1894*
Professor EDWARD MALINS	7th Nov., 1894*
Professor F. W. BURSTALL 170, Middleton Hall Road, Kings Norton.	29th July, 1896*
Professor PRIESTLEY SMITH	14th July, 1897*
Professor J. H. MUIRHEAD The Rowans, Balsall, Warwickshire.	29th Sept., 1897*
Professor ADRIAN J. BROWN West Heath House, Northfield.	3rd May, 1899*
Professor R. F. C. LEITH 16, Portland Road, Edgbaston.	7th June, 1899*
Professor J. T. J. MORRISON	7th June, 1899*
Professor E. W. WACE CARLIER Granville Road, Dorridge.	5th July, 1899*
Professor W. J. ASHLEY 3, Yateley Road, Edgbaston.	31st July, 1901
Professor T. TURNER Springfields, Selly Hill.	5th Mar., 1902
Professor ALFRED HUGHES 29, George Road, Edgbaston.	10th June, 1903
Professor GIBBERT KAPP Pen-y-coed, Pritchatt's Road, Edgbaston.	7th Dec., 1904
Professor STEPHEN M. DIXON 25, Highfield Road, Edgbaston.	5th July, 1905
Professor A. W. KIRKALDY Norlands, Richmond Hill Road, Edgbaston.	4th July, 1906
Professor KARL WICHMANN West Hill Road, King's Norton.	2nd Oct., 1907

* Mason College. † Queen's College.

					Date of Appointment.
Professor JOHN CADMAN	8th July, 1908
61, Wellington Road, Edgbaston.					
Professor GRANVILLE BANTOCK	4th Nov., 1908
Broadmeadow, King's Norton.					
Professor E. DE SELINCOURT	2nd Dec., 1908
30, George Road, Edgbaston.					
Professor C. R. BEAZLEY	26th May, 1909
48, Hagley Road, Edgbaston.					
Professor HENRI L. CHATELAIN	30th June, 1909
1, West Hill Road, King's Norton.					
Professor G. S. WEST	30th June, 1909
36, Carpenter Road, Edgbaston.					
Professor F. W. GAMBLE	30th Sept., 1909
38, Frederick Road, Edgbaston.					
Professor PETER THOMPSON	30th Sept., 1909
14, Rotton Park Road, Edgbaston.					
Professor Sir ROBERT M. SIMON	19th Jan., 1910
Professor CHARLES E. MARTINEAU	6th July, 1910
Beechcroft, Solihull.					

FACULTIES.

Faculty of Science.

The PRINCIPAL	Professor FRANKLAND
The VICE-PRINCIPAL	Professor GAMBLE
Professor POYNTING (<i>Dean</i>)	Professor HUGHES
Professor BROWN	Professor KAPP
Professor BURSTALL	Professor LAPWORTH
Professor CADMAN	Professor TURNER
Professor DIXON	Professor WEST

Attached Members.

Professor BOSTOCK HILL	Professor MUIRHEAD
Professor CARLIER	Professor THOMPSON
Professor LEITH	

Faculty of Arts.

The PRINCIPAL	Professor DE SÉLINCOURT
The VICE-PRINCIPAL	Professor MUIRHEAD
Professor HUGHES (<i>Dean</i>)	Professor SONNENSCHN
Professor BANTOCK	Professor WICHMANN
Professor BEAZLEY	Mr. DE ARTEAGA
Professor CHATELAIN	

Attached Member.

Professor HEATH

Faculty of Medicine.

The PRINCIPAL	Professor MALINS
The VICE-PRINCIPAL	Professor MORRISON
Professor THOMPSON (<i>Dean</i>)	Professor SAUNDBY
Professor BARLING	Professor SIMON
Professor CARLIER	Professor PRIESTLEY SMITH
Professor CARTER	Mr. GEORGE HEATON.
Professor HILL	Mr. COOLE KNEALE
Professor LEITH	Dr. THOMAS WILSON
Professor LLOYD	

Attached Members.

Professor FRANKLAND	Professor GAMBLE
Professor POYNTING	

Faculty of Commerce.

The PRINCIPAL	Professor KIRKALDY
The VICE-PRINCIPAL	Professor MARTINEAU
Professor ASHLEY (<i>Dean</i>)	

Attached Members.

Professor BEAZLEY	Professor MUIRHEAD
Professor CHATELAIN	Professor WICHMANN
Professor DE SÉLINCOURT	Mr. F. TILLYARD
Professor HEATH	

OFFICERS OF THE UNIVERSITY.

Principal :

SIR OLIVER LODGE, Kt., M.Sc. ; D.Sc. (Lond.) ; Hon. D.Sc. (Oxon., Cantab., Vict., Liverpool and Sheffield) ; LL.D. (St. And., Glas., and Aberdeen) ; F.R.S., M.Inst.E.E.

Vice-Principal : Professor R. S. HEATH.

Deans of Faculties :

<i>Faculty of Science</i>	... Professor J. H. POYNTING.
<i>Faculty of Arts</i>	... Professor ALFRED HUGHES.
<i>Faculty of Medicine</i>	... Professor PETER THOMPSON.
<i>Faculty of Commerce</i>	Professor W. J. ASHLEY.

Registrar : Professor R. S. HEATH.

Professors, Lecturers, and other Officers of the University :

MATHEMATICS.

Mason Professor : R. S. HEATH, M.Sc. ; M.A. (Cantab.), D.Sc. (Lond.), late Fellow of Trinity College, Cambridge.

Lecturer : C. T. PREECE, M.A. (Cantab.).

Assistant Lecturers : { S. B. McLAREN, M.A. (Cantab.).
ARTHUR J. KENNY, M.A. (Dublin).

PHYSICS.

Mason Professor : J. H. POYNTING, M.Sc. ; Sc.D. (Cantab.)
Hon. D.Sc. (Vict.), F.R.S., late Fellow of Trinity
College, Cambridge.

Lecturer : G. A. SHAKESPEAR, D.Sc. ; M.A. (Cantab.), B.A.,
B.Sc. (Lond.).

Assistant Lecturers : { GUY BARLOW, D.Sc. ; D.Sc. (Wales and Lond.).
HORACE B. KEENE, B.Sc. (Birm.).
EDMUND E. FOURNIER d'ALBE, M.Sc. ; B.Sc.
(Lond.), A.R.C.S.

Special Lecturer on Experimental Physics : G. A. SHAKESPEAR,
D.Sc. ; M.A., B.Sc.

CHEMISTRY.

Mason Professor : PERCY F. FRANKLAND, M.Sc. ; LL.D. (St. Andrews), Ph.D. (Würzburg), B.Sc. (Lond.), F.R.S.

Assistant Lecturers : { HAMILTON McCOMBIE, M.A. (Aber.), B.Sc. (Lond.), Ph.D. (Strass.), A.R.C.S., F.I.C.
C. K. TINKLER, D.Sc. ; B.Sc. (Wales).
JOSEPH E. COATES, M.Sc. (Wales).

Assistant Lecturers and Demonstrators : { EDWARD P. FRANKLAND, M.Sc. ; B.A. (Cantab.), Ph.D. (Würz).
ERNEST VANSTONE, B.Sc. (Wales).
(Vacant).

Special Lecturer on

Physical Chemistry : J. E. COATES, M.Sc.

ZOOLOGY AND COMPARATIVE ANATOMY.

Mason Professor : FREDERICK W. GAMBLE, M.Sc. ; D.Sc., F.R.S.

Lecturer : C. L. BOULENGER, D.Sc. ; M.A. (Cantab.), F.Z.S.

BOTANY.

Professor : GEORGE S. WEST, D.Sc. ; M.A. (Cantab.), A.R.C.S., F.L.S.

Lecturer and Demonstrator : JESSIE S. ELLIOTT, D.Sc. ; B.Sc. (Lond.).

Honorary Curator of Fungus Herbarium : W. B. GROVE, M.A.

GEOLOGY AND PHYSIOGRAPHY.

Professor : CHARLES LAPWORTH, M.Sc. ; LL.D. (Aber.), F.R.S., F.G.S.

Senior Lecturer on Geology and Geography : THEODORE GROOM, M.A. (Cantab.), D.Sc. (Lond.), F.G.S. F.R.G.S., Late Scholar of St. John's Coll., Camb.

Lecturer : FRANK RAW, B.Sc. (Lond.), F.G.S.

Special Lecturer on Petrology : FRANK RAW, B.Sc.

MECHANICAL ENGINEERING.

Chance Professor : F. W. BURSTALL, M.Sc. ; M.A. (Cantab.), M.Inst.C.E., M.Inst.M.E.

Lecturer : R. C. PORTER, M.Sc. (Vict.), A.M.Inst.C.E.

Demonstrator : W. E. FISHER, D.Sc. (Birm.).

Lecturer on Machine Design : F. J. BROSCOMB, B.Sc. ; A.M.I.M.E.

Assistant Lecturer on Machine Design : W. G. WISHART, B.Sc. (Edin.).

CIVIL ENGINEERING.

Professor : STEPHEN M. DIXON, M.Sc. ; M.A., B.A.I. (Dublin),
M.Inst.C.E.

Lecturer : JOHN PURSER, M.Sc. ; B.A., B.A.I.

Assistant Lecturers and Demonstrators : { ROBERT C. PANTON,
B.A., B.A.I. (Vacant).

Lecturer on Town Planning : RAYMOND UNWIN, F.R.I.B.A.

ELECTRICAL ENGINEERING.

Professor : GISBERT KAPP, M.Sc. ; D.Eng., M.Inst.C.E.,
M.Inst.E.E.

Lecturers : { E. J. KIPPS, M.Sc. ; M.Inst.E.E.
THOMAS F. WALL, D.Sc.(Manch.), M.Eng. (L'pool),
A.M.Inst.C.E., A.M.Inst.E.E.

Assistant Lecturer and Demonstrator : GEORGE SHEARING
B.Sc. (Lond.), A.M.Inst.E.E.

BREWING.

Professor : ADRIAN J. BROWN, M.Sc. ; F.R.S., F.I.C.

Lecturer : T. H. POPE, B.Sc. ; F.I.C.

METALLURGY.

Feeney Professor : THOMAS TURNER, M.Sc. ; A.R.S.M., F.I.C.

Lecturer and Instructor in Assaying : O. F. HUDSON, M.Sc. ;
A.R.C.S.

Assistant Lecturer and Demonstrator : HENRY IVOR COE,
M.Sc.

Special Lecturer on Metallography : O. F. HUDSON, M.Sc.

MINING.

Professor : JOHN CADMAN, M.Sc. ; D.Sc. (Lond.), F.G.S.

Demonstrator in Coal Mining } ALEXANDER CLUBB,
and Lecturer in Surveying : } B.Sc. (Glas.)

Demonstrator in Metal Mining and
Lecturer in Economic Miner- } J. L. JEFFERY, A.R.S.M.
alogy :

Lecturer in Mine Rescue Work : PERCY ORMAND, M.I.M.E.

LATIN AND GREEK.

Professor : E. A. SONNENSCHN, M.A. ; D.Litt. (Oxon.)

Lecturer : C. D. CHAMBERS, M.A. (Oxon.)

Lecturer in Greek : ST. GEORGE STOCK, M.A. (Oxon.)

ENGLISH LANGUAGE AND LITERATURE.

Professor : E. DE SÉLINCOURT, M.A. ; D.Litt. (Oxon.)

Lecturer : M. MACMILLAN, D.Litt. ; M.A. (Oxon.)

Assistant Lecturer : GORDON HISLOP, M.A. (Edin.).

FRENCH LANGUAGE AND LITERATURE.

Professor : HENRI L. CHATELAIN, M.A.; agrégé de grammaire; docteur ès lettres.

Lecturer : PAUL DEMEY, licencié ès lettres.

Assistant Lecturer : F. A. HEDGCOCK, docteur ès lettres.

Assistant in Conversational French : Mdlle. JEANNE LEPETIT.

GERMAN LANGUAGE AND LITERATURE.

Professor : KARL WICHMANN, M.A.; Ph.D. (Kiel)

Lecturer : FRANCIS E. SANDBACH, M.A. (Cantab.) Ph.D. (Strass.)

Assistant Lecturer : O. INTZE, Ph.D. (Erlangen).

Special Lecturer in Commercial German : F. E. SANDBACH, M.A.

SPANISH AND ITALIAN.

Lecturer : F. DE ARTEAGA, M.A.; M.A. (Oxon.)

MENTAL AND MORAL PHILOSOPHY AND POLITICAL ECONOMY.

Professor : JOHN H. MUIRHEAD, M.A.; M.A. (Oxon.) LL.D. (Glasgow).

Lecturer : J. W. HARVEY, B.A. (Oxon.).

HISTORY.

Professor : C. RAYMOND BEAZLEY, M.A.; D.Litt. (Oxon.) F.R.G.S., late Fellow of Merton College, Oxford.

Lecturer : ROSE SIDGWICK, M.A.

EDUCATION.

Organising Professor : ALFRED HUGHES, M.A.; M.A. (Oxon.) B.A. (Manch.).

Assistant : MARY A. HOLLINGS, M.A. (Dublin).

MUSIC.

Richard Peyton Professor : GRANVILLE BANTOCK, M.A.

WORKERS' EDUCATIONAL ASSOCIATION.

Tutor : GERARD COLLIER, M.A.

HUMAN ANATOMY AND ANTHROPOLOGY.

Professor : PETER THOMPSON, M.D.; M.D., Ch.B. (Vict.).

Demonstrators : { THOMAS YEATES, M.B., C.M. (Edin.), B.Hy.,
D.P.H. (Durham).
LEWIS GRAHAM, M.B., B.S. (Lond.),
M.R.C.S.
VIOLET A. P. COGHILL, M.B., Ch.B. (Edin.).

Honorary Demonstrators : { W. E. BENNETT, M.B., Ch.B.; F.R.C.S.
J. JAMESON EVANS, M.D.; M.D., C.M.
(Edin.), F.R.C.S.

Special Lecturer in Osteology : THOMAS YEATES, M.B., C.M.

PHYSIOLOGY.

Professor : E. W. WACE CARLIER, M.Sc. ; M.D. (Edin.),
F.R.S. (Edin.).

Lecturer : (Vacant).

MEDICINE.

Professor : R. SAUNDBY, M.Sc. ; M.D. (Edin.), F.R.C.P., LL.D.

Professor : A. H. CARTER, M.Sc. ; M.D. (Lond.), F.R.C.P.

Assistant : LEONARD G. J. MACKEY, M.D. ; Ch.B. ; M.R.C.P.

SURGERY.

Professor : GILBERT BARLING, M.Sc. ; M.B., B.S. (Lond.),
F.R.C.S.

Professor : JORDAN LLOYD, M.Sc., M.D. ; M.B., M.S. (Dur.),
F.R.C.S.

Assistant : LEONARD P. GAMGEE, F.R.C.S.

PATHOLOGY AND BACTERIOLOGY.

Professor : R. F. C. LEITH, M.Sc. ; M.A., M.B. (Edin.), F.R.C.P.E.

Lecturer on Pathology and Bacteriology : SHOLTO DOUGLAS,
M.A., M.D. (Oxon.), M.R.C.S., L.R.C.P.

Assistant Lecturer in Bacteriology : } C. J. LEWIS, M.D., D.Sc. (Edin.), F.R.C.P.E.

Junior Assistant : L. BALL, M.B., B.S., M.R.C.P.

Assistant Curators of the Pathological Museum : { STANLEY BARNES, D.Sc. ; M.D. (Lond.),
M.R.C.P., M.R.C.S.

J. T. HEWETSON, Ch.M. ; M.D. (Edin.).
F.R.C.S.

A. W. NUTHALL, Ch.M. ; M.R.C.S.
LAWTON S. SEDGWICK, M.R.C.V.S.

Special Lecturer in Bacteriology of Public Health : C. J. LEWIS,
M.D.

HYGIENE AND PUBLIC HEALTH.

Professor : A. BOSTOCK HILL, M.Sc. ; M.D., D.P.H.

Assistant Lecturer in Hygiene : WILLIAM SISAM, M.D.,
B.Sc. (Public Health), D.P.H.

THERAPEUTICS.

Professor : SIR ROBERT M. SIMON, Kt., M.D. ; M.D., F.R.C.P.,
B.A.

PHARMACOLOGY.

Lecturer : W. A. POTTS, M.D. ; M.A. (Cantab.), M.D., C.M.
(Edin.).

MATERIA MEDICA.

Lecturer : J. COOLE KNEALE, M.B., Ch.B. ; L.R.C.P., L.R.C.S.
(Edin.), M.P.S.

Demonstrator : F. R. GREENWOOD, M.B., Ch.B. ; M.D., B.S.
(Lond.), M.R.C.S.

MIDWIFERY AND DISEASES OF WOMEN.

Professor : EDWARD MALINS, M.Sc. ; M.D. (Edin.), F.R.C.P.

Lecturer : THOMAS WILSON, Ch.M. ; M.D. (Lond.), F.R.C.S.

Assistant : C. E. PURSLOW, M.D. (Lond.), M.R.C.P.

FORENSIC MEDICINE AND TOXICOLOGY.

Professor : J.T. J. MORRISON, M.Sc. ; M.A., M.B., B.C. (Cantab.), F.R.C.S.

Assistant : W. H. WYNN, M.Sc., M.B., Ch.B. ; M.D., B.Sc. (Lond.), M.R.C.P.

MENTAL DISEASES.

Lecturer : PERCY T. HUGHES, M.B., Ch.M. (Edin.), D.P.H (Lond.)

OPERATIVE SURGERY.

Lecturer : GEORGE HEATON, M.A., M.B., B.Ch. (Oxon.), F.R.C.S.

OPHTHALMOLOGY.

Professor : PRIESTLEY SMITH, M.Sc. ; M.B., Ch.B. ; F.R.C.S

Teachers under the University Clinical Board.

1. *Lecturers on Clinical Medicine.*

(a) At the General Hospital :

SIR ROBERT SIMON, Knt., M.D., F.R.C.P.

T. STACEY WILSON, M.D., F.R.C.P.

T. SYDNEY SHORT, M.D., M.R.C.P.

J. W. RUSSELL, M.A., M.D., F.R.C.P.

(b) At the Queen's Hospital :

O. J. KAUFFMANN, M.D., F.R.C.P.

DOUGLAS STANLEY, M.D., M.R.C.P.

J. G. EMANUEL, M.D., M.R.C.P.

2. *Lecturers on Clinical Surgery.*

(a) At the General Hospital :

GILBERT BARLING, M.B., B.S., F.R.C.S.

WILLIAM F. HASLAM, M.B., Ch.B., F.R.C.S.

GEORGE HEATON, M.S., M.B., B.Ch., F.R.C.S.

ALBERT LUCAS, F.R.C.S.

(b) At the Queen's Hospital :

JORDAN LLOYD, M.S., F.R.C.S.

J. T. J. MORRISON, M.A., B.C., F.R.C.S.

C. A. LEEDHAM-GREEN, Ch.M., F.R.C.S.

3. *Clinical Lecturers on Gynaecology and Obstetrics.*
 - (a) At the General Hospital :
THOMAS WILSON, Ch.M., M.D., F.R.C.S.
 - (b) At the Queen's Hospital :
C. E. PURSLOW, M.D., M.R.C.P.
4. *Clinical Lecturers on Ophthalmic Surgery.*
 - (a) At the General Hospital :
D. C. LLOYD-OWEN, M.D., F.R.C.S.I.
 - (b) At the Queen's Hospital :
WILFRED ALLPORT, M.B., B.S., F.R.C.S., Edin.
5. *Clinical Lecturer on Aural Surgery.*
At the General Hospital :
F. W. FOXCROFT, M.D., C.M.
6. *Clinical Lecturer on Dermatology.*
At the General Hospital :
A. DOUGLAS HEATH, M.D., M.R.C.P.
7. *Assistant Lecturers on Clinical Medicine.*
 - (a) At the General Hospital :
A. STANLEY BARNES, M.D., M.R.C.P.
WILLIAM H. WYNN, M.D., M.R.C.P.
J. E. H. SAWYER, M.D., M.R.C.P.
L. G. PARSONS, M.D., M.R.C.P
 - (b) At the Queen's Hospital :
L. G. J. MACKEY, M.D., Ch.B., M.R.C.P.
8. *Assistant Lecturers on Clinical Surgery.*
 - (a) At the General Hospital :
LEONARD P. GAMGEE, F.R.C.S.
FRANK BARNES, M.B., M.S., F.R.C.S.
SEYMOUR BARLING, M.B., M.S., F.R.C.S.
E. MUSGRAVE WOODMAN, M.S., F.R.C.S.
 - (b) At the Queen's Hospital.
W. BILLINGTON, M.B., M.S., F.R.C.S.
A. W. NUTHALL, Ch.M., F.R.C.S.,
B. J. WARD, F.R.C.S.
9. *Assistant Lecturer on Obstetrics and Gynaecology.*
 - (a) At the General Hospital :
H. BECKWITH WHITEHOUSE, M.S., F.R.C.S.

10. *Tutors.*

(a) At the General Hospital :

Senior Medical—J. E. H. SAWYER, M.D., M.R.C.P.

Junior Medical—L. G. PARSONS, M.D., M.R.C.P.

Senior Surgical—SEYMOUR BARLING, M.B.,
M.S., F.R.C.S.Junior Surgical—E. MUSGRAVE WOODMAN,
M.S., F.R.C.S.Gynaecological—H. BECKWITH WHITEHOUSE,
M.S., F.R.C.S.

Pathological—J. SHOLTO DOUGLAS, M.A., M.D.

Anæsthetical—W. J. McCARDIE, B.A., M.B., B.C.

(b) At the Queen's Hospital :

Senior Medical—L. G. J. MACKEY, M.D., Ch.B. ;
M.R.C.P.Senior Surgical—W. BILLINGTON, M.B., M.S.,
F.R.C.S.

Junior Surgical—A. W. NUTHALL, Ch.M., F.R.C.S.

Pathological—LAURENCE BALL, M.B., B.S.,
M.R.C.P.

Fevers : H. M. CARGIN, M.B., Ch.B., D.P.H.*Mental Diseases* : CECIL B. ROSCROW, L.R.C.P., L.R.C.S.*Vaccination* : W. H. LINE, M.D., D.P.H.

DENTAL SURGERY.*Lecturer* : F. E. HUXLEY, M.D.S., M.R.C.S., L.D.S.**DENTAL ANATOMY AND PHYSIOLOGY.***Lecturer* : JOHN HUMPHREYS, M.D.S., L.D.S.I., F.L.S., F.S.A.
F.G.S.**DENTAL MECHANICS.***Lecturer* : A. E. DONAGAN, M.A. (Cantab.), L.D.S.**DENTAL HISTOLOGY AND PATHOLOGY.***Lecturer* : ALFRED W. WELLINGS, B.D.S. ; L.D.S.**DENTAL METALLURGY.***Lecturer* : Professor T. TURNER, M.Sc. ; A.R.S.M., F.I.C.**MEDICINE FOR DENTAL STUDENTS.***Lecturer* : T. STACEY WILSON, M.D. (Edin.), F.R.C.P.**SURGERY FOR DENTAL STUDENTS.***Lecturer* : W. F. HASLAM, M.B., Ch.B., F.R.C.S.

DENTAL MATERIA MEDICA.

Lecturer : W. T. MADIN, B.D.S. ; L.D.S.

DENTAL BACTERIOLOGY.

Lecturer : SHOLTO DOUGLAS, M.A., M.D. (Oxon.)

COMMERCE.

Professor : W. J. ASHLEY, M.Com. ; M.A. (Oxon.), Ph.D. (Berlin), late Fellow of Lincoln College, Oxford.

Assistant Lecturer : HERBERT HEATON, M.A. (Leeds).

ACCOUNTING.

Professor : CHARLES E. MARTINEAU, M.Com. ; M.A. (Cantab.), F.C.A.

FINANCE.

Professor : A. W. KIRKALDY, M.Com. ; M.A., B.Litt. (Oxon.)

COMMERCIAL LAW.

Lecturer : FRANK TILLYARD, M.Com. ; M.A. (Oxon.), Barrister-at-Law.

Emeritus Professors :

ENGLISH.

Professor : EDWARD ARBER, F.S.A., D.Litt. (Oxon.)

ENGINEERING.*

Professor : ROBERT H. SMITH, M.I.M.E., Assoc. M.I.C.E.

SURGERY.

Professor : BENNETT MAY, M.Sc. ; M.B., B.S. (Lond.), F.R.C.S.

DAY TRAINING COLLEGE.

Master of Method (Men) : FRANK ROSCOE, M.A.

Assistants : { LAWRENCE W. EDWARDS, B.Sc. ; F.G.S.
FRANK THORNLEY, B.A.

Teacher of Music : ARNOLD GRIFFIN.

Head Mistress (Women): ANNE HOLLINGWORTH JOYCE, M.A.

Assistants : { FLORENCE C. M. CLARK, B.A. (Lond.)
MILDRED F. FIELD, B.A. (Lond.)
EDITH M. HENLEY, B.A. (Lond.)
MARGARET S. CLEGHORN, M.A. (Edin.)
LILY HARRISON, Nat. Sci. Tripos, Camb.

Teacher of Physical Training : DOROTHY BOTT.

University Organist :

C. W. PERKINS.

Esquire Bedell :

S. B. McLAREN, M.A.

Secretary :

GEO. H. MORLEY.

Assistant Secretary

FREDK. E. MOORE.

Librarian :

WILLIAM H. COPE.

Clerk to the Dean of the Faculty of Medicine :

EDWARD B. LAWLEY.

Registrar's Clerk :

G. J. WALKER.

UNIVERSITY EXAMINERS FOR DEGREES,

SESSION 1911-12.

Mathematics.—ALFRED LODGE, M.A. (Oxon.), formerly Professor of Pure Mathematics at the Royal Engineering College, Cooper's Hill.

Professor R. S. HEATH.

C. T. PREECE (Sub-Examiner for Intermediate Examinations).

Physics.—ERNEST RUTHERFORD, M.A., D.Sc., LL.D., F.R.S., Langworthy Professor of Physics in the University of Manchester.

Professor J. H. POYNTING.

G. A. SHAKESPEAR (Sub-Examiner for Intermediate Examinations).

Chemistry.—KENNEDY J. PREVITE ORTON, M.A. (Cantab.), Ph.D. (Heid.), F.I.C., Professor of Chemistry in the University College of North Wales, Bangor.

Professor PERCY F. FRANKLAND.

Dr. C. K. TINKLER (Sub-Examiner for Intermediate Examinations).

Zoology.—SYDNEY J. HICKSON, M.A. (Cantab.), D.Sc. (Lond.), F.R.S., Professor of Zoology in the University of Manchester.

Professor F. W. GAMBLE.

Botany.—PERCY GROOM, M.A. (Cantab. et Oxon.), D.Sc. (Oxon.), E.Sc. (Birm.), Professor of Technology of Woods and Fibres in the Imperial College of Science and Technology, South Kensington.

Professor G. S. WEST.

Geology (including Geography).—WM. S. BOULTON, B. Sc., Assoc. R.C.S., F.G.S., Professor of Geology at University College, Cardiff.

Professor C. LAPWORTH.

Mechanical Engineering.—WILLIAM H. WATKINSON, M.Eng. M.Inst.C.E., M.Inst.Mech.E., M.I.E.E., Harrison Professor of Engineering in the University of Liverpool.

Professor F. W. BURSTALL.

Civil Engineering: SAMUEL WRIGHT PERROTT, B.A., M.A.I. (Trinity College, Dublin), Professor of Civil Engineering in the University of Liverpool.

Professor S. M. DIXON.

Electrical Engineering.—WILLIAM MUNDELL THORNTON, D.Sc. (Vict. and Liverpool), D.Eng. (Liverpool), M.I.E.E., Professor of Electrical Engineering in Armstrong College, Newcastle-upon-Tyne.

Professor GISEBERT KAPP.

Metallurgy.—G. T. HOLLOWAY, A.R.S.M., F.I.C., Examiner in Metallurgy to the Institute of Chemistry.

Professor T. TURNER.

Mining.—RICHARD A. S. REDMAYNE, M.Sc. (Birm.), H.M. Chief Inspector of Mines.

Professor JOHN CADMAN.

Biology and Chemistry of Fermentation.—ARTHUR HARDEN, Ph.D., D.Sc., F.R.S., Chemist-in-chief of the Lister Institute of Preventative Medicine.

Professor A. J. BROWN.

Brewing.—F. LAWRENCE TALBOT.

Professor A. J. BROWN.

Classics.—ROBERT MITCHELL HENRY, M.A., Professor of Latin in the Queen's University of Belfast.

Professor E. A. SONNENSCHNEIN.

C. D. CHAMBERS (Sub-Examiner for Intermediate Examinations).

English.—OLIVER ELTON, M.A. (Oxon.), Professor of English Literature in the University of Liverpool.

Professor E. de SÉLINCOURT.

Dr. M. MACMILLAN (Sub-Examiner for Intermediate Examinations).

French.—R. L. GRAEME RITCHIE, M.A., Docteur Lit., Université de Paris, Lecturer in French in the University of Edinburgh.

Professor HENRI L. CHATELAIN.

PAUL DEMEY } (Sub-Examiners for Intermediate
F. A. HEDGCOCK } Examinations).

German.—HERMANN G. FIEDLER, Ph.D. (Leip.), M.A. (Birm.), M.A. (Oxon.), Taylorian Professor of German Language and Literature in the University of Oxford.

Professor KARL WICHMANN.

Dr. F. E. SANDBACH (Sub-Examiner in Scientific and Commercial German).

Spanish and Italian.—COLOMBO ANGELO TOLEDANO, Spanish Master at the Manchester Athenæum and Municipal School of Commerce.

F. DE ARTEAGA.

Philosophy.—Sir HENRY JONES, Kt., M.A. (Glas.), LL.D. (St. Andrews), D.Litt. (Wales), Professor of Moral Philosophy in the University of Glasgow.

Professor J. H. MUIRHEAD.

History.—The Ven. WM. HOLDEN HUTTON, M.A., B.D., Fellow of St. John's College, Oxford, and Canon of Peterborough.

Professor C. R. BEAZLEY.

Education.—ERNEST T. CAMPAGNAC, M.A. (Oxon.), Professor of Education in the University of Liverpool.

Professor A. HUGHES.

ANNE HOLLINGWORTH JOYCE.

FRANK ROSCOE.

Music.—WILLIAM GRAY McNAUGHT, F.R.A.M., Mus.Doc., Editor of "The Musical Times."

Professor GRANVILLE BANTOCK.

YEAR 1912.

Anatomy.—ARTHUR ROBINSON, M.D., Professor of Anatomy in the University of Edinburgh.

Professor PETER THOMPSON.

Physiology.—WILLIAM DOBINSON HALLIBURTON, M.D., LL.D., B.Sc., F.R.C.P., F.R.S., Professor of Physiology in King's College, London.

Professor E. WACE CARLIER.

Medicine.—Sir JOHN ROSE BRADFORD, K.C.M.G., M.D. D.Sc. (Lond.), F.R.C.P., F.R.S., Holme Lecturer on Clinical Medicine at the University College Hospital Medical School, London.

Professor R. SAUNDBY.

Professor A. H. CARTER.

(*Clinical*).—DOUGLAS STANLEY, M.D.

Surgery.—GEORGE ARTHUR WRIGHT, B.A., M.B. (Oxon.), F.R.C.S., Professor of Surgery in the University of Manchester and Consulting Surgeon to the Manchester Royal Infirmary.

Professor GILBERT BARLING.

Professor JORDAN LLOYD.

(*Clinical*).—WILLIAM F. HASLAM, M.B., Ch.B., F.R.C.S.

Ophthalmology.—

Professor PRIESTLEY SMITH.

Pathology and Bacteriology.—GEORGE DEAN, M.A., M.B., C.M., Regius Professor of Pathology in the University of Aberdeen.

Professor R. F. C. LEITH.

Mental Diseases.—CECIL B. ROSCROW, L.R.C.P., L.R.C.S.
Medical Superintendent of the City Asylum, Winson Green.

Hygiene and Public Health.—HENRY RICHARD KENWOOD,
M.B., C.M., F.R.S. (Edin.), D.P.H., Chadwick Professor of
Hygiene in the University of London.

Professor A. BOSTOCK HILL.

Therapeutics and Pharmacology and Materia Medica and Pharmacy.—ROBERT BRIGGS WILD, M.D., M.R.C.P., M.Sc.
Leech Professor of Materia Medica and Therapeutics in the
University of Manchester.

Professor SIR ROBERT M. SIMON, Kt.

J. COOLE KNEALE, M.B., Ch.B.

Midwifery and Diseases of Women.—

Professor EDWARD MALINS.

Forensic Medicine and Toxicology.—FREDERICK J. SMITH,
M.A., M.D. (Oxon.), F.R.C.P., F.R.C.S., Physician to and
Lecturer on Medical Jurisprudence at the London Hospital.

Professor J. T. J. MORRISON.

Dental Subjects.—NORMAN GODFREY BENNETT, M.A.,
M.B., B.C. (Cantab.), L.D.S. (Eng.), Dental Surgeon to St.
George's Hospital and to the Royal Dental Hospital,
London.

Professor R. F. C. LEITH.

Professor T. TURNER.

JOHN HUMPHREYS, M.D.S., F.L.S.

F. E. HUXLEY, M.R.C.S., M.D.S.

A. E. DONAGAN, M.A., L.D.S.

ALFRED W. WELLINGS, B.D.S., L.D.S.

W. T. MADIN, L.D.S., B.D.S.

Dental Mechanics and Clinical Dental Surgery.—J. ERNEST
PARROTT, L.D.S., Honorary Dental Surgeon to the Birm-
ingham Dental Hospital.

SESSION 1911-12.

Commerce.—JOHN MAYNARD KEYNES, M.A., Girdlers'
Lecturer in Economics in the University of Cambridge.

Professor W. J. ASHLEY.

Professor A. W. KIRKALDY.

Accounting.—J. HOWARD HEATON, F.C.A.

Professor CHARLES E. MARTINEAU.

Commercial Law.—MICHAEL CABABÉ, B.A., Barrister-at-Law.
FRANK TILLYARD.

REPRESENTATIVES OF THE UNIVERSITY

ON SCHOOLS AND OTHER INSTITUTIONS.

University of Liverpool Court of Governors—Principal Sir OLIVER LODGE.*

University of Bristol Court of Governors—Professor ALFRED HUGHES.*

Warwickshire County Association under Territorial and Reserve Forces Act, 1907—NEVILLE CHAMBERLAIN, Esq.

General Medical Council—Professor R. SAUNDBY.

Birmingham Board of Legal Studies—Professor W. J. ASHLEY.

Birmingham Chamber of Commerce, Council of:—
Professor W. J. ASHLEY.

Institute of Bankers, Local Committee—Professor W. J. ASHLEY.

Poor Law Examinations Board—FRANK TILLYARD, Esq., M.A.

Headmasters' Association, Joint Scholarship Board—Professor A. HUGHES.

Teachers' Registration Council—Professor A. HUGHES.

Education Committees—

Aston Manor—Professor R. F. C. LEITH.

Birmingham—Professor R. S. HEATH.

Bridgnorth—JOHN PRIESTLEY, Esq., M.R.C.S.

Coventry—Professor K. WICHMANN.

King's Norton and Northfield—F. ROSCOE, Esq., M.A.

Longton—Professor J. CADMAN.

Leicestershire—Professor W. J. ASHLEY.

Oldbury—C. T. PREECE, Esq., M.A.

Rowley Regis—Miss F. C. M. CLARK, B.A.

Shropshire—Professor A. HUGHES.

Smethwick—HAMILTON MCCOMBIE, Esq., M.A.

Staffordshire—Professor A. HUGHES.

Sutton Coldfield—Professor E. DE SÉLINCOURT.

Tunstall—F. HARRISON, Esq., M.A.

*Nominated by the Chancellor.

Warwickshire—Professor C. R. BEAZLEY.

West Bromwich—Miss E. M. HENLEY, B.A.

Wolverhampton—Miss M. A. HOLLINGS, M.A.

Worcestershire—Professor T. TURNER.

Burslem Exhibition Endowment—F. HARRISON, Esq., M.A.

Alcester, Newport's School—ARTHUR L. CHANCE, Esq.

Ashby-de-la-Zouch Grammar School—Mrs. W. B. WORTHINGTON.

Atherstone Grammar School—SHELDON R. HART, Esq., M.A.

Bablake School, Coventry—Rev. Canon MASTERMAN.

Bewdley Grammar School—Dr. THEODORE GROOM.

Birmingham Blue Coat School—Sir JOHN C. HOLDER, Bart., and
Mr. JOSEPH JAMES.

Birmingham, King Edward's School—Sir OLIVER LODGE.

Birmingham and Midland Institute—Professor A. HUGHES.

Brewood Grammar School—R. MENTZ-TOLLEY, Esq.

Bridgnorth Grammar School—Mrs. WICHMANN, D.Litt.

Burton-on-Trent Endowed School—Professor A. J. BROWN.

Coleshill Grammar School—

Coventry Grammar School—Dr. T. WEBB FOWLER.

Derby School—W. B. WORTHINGTON, Esq.

Dudley Educational Foundation—S. B. McLAREN, Esq., M.A.

Dudley Grammar School—Professor A. HUGHES.

Dudley High School for Girls—Miss ROSE SIDGWICK, M.A.

Evesham, Prince Henry's Grammar School—Dr. C. K. TINKLER.

Fentham's Charity—NEVILLE CHAMBERLAIN, Esq., and Professor
GILBERT BARLING.

Halesowen Grammar School—Dr. FRANCIS E. SANDBACH.

Handsworth Grammar School—Professor C. E. MARTINEAU and
J. T. HOMER, Esq., J.P.

Hanley Castle Grammar School—A. O. HOLBECH, Esq., L.R.C.P.

Hartlebury Grammar School—G. W. GROSVENOR, Esq., J.P.

Hinckley Grammar School—Professor G. S. WEST.

Jackson's Charity—Councillor A. G. ELLAWAY.

Kibworth Beauchamp Grammar School—Mrs. ASHLEY.

Kidderminster Grammar School—Dr. THEODORE GROOM.

Kinver Grammar School—JOHN PRIESTLEY, Esq., M.R.C.S.

- Lichfield Grammar School*—FRANK TILLYARD, Esq., M.Com.
Lutterworth Endowed Schools—HAMILTON MCCOMBIE, Esq., M.A.
Newcastle-under-Lyme High School—Professor J. CADMAN.
Nuneaton Grammar School—Dr. G. A. SHAKESPEAR.
Rugby, Lawrence Sheriff School—Rev. Canon MASTERMAN.
Rugeley Grammar School—C. D. CHAMBERS, Esq., M.A.
Southam Secondary School—C. D. CHAMBERS, Esq., M.A.
Stafford Girls' High School—Miss ROSE SIDGWICK, M.A.
Stafford, King Edward's School—F. E. KITCHENER, Esq., M.A.
Stourbridge Grammar School—ROWLAND HILL, Esq., M.A., LL.D.
Stratford-on-Avon, King Edward VI Grammar School—Professor
 C. R. BEAZLEY.
Sutton Coldfield Grammar School—Professor E. DE SELINCOURT.
Tamworth Grammar School—Dr. T. J. MURRAY.
Tamworth High School for Girls—MRS. SONNENSCHN. ¹
Tewkesbury Grammar School—Miss BEATRICE ORANGE.
Walsall, Queen Mary's School—MRS. E. DE SELINCOURT.
Warwick, King's School—Miss BEATRICE ORANGE.
Whitchurch Grammar School—Dr. G. A. SHAKESPEAR.
Wolverhampton Grammar School—Professor E. A. SONNENSCHN.
Wolverhampton High School—Professor A. HUGHES.
Wolverley, Seabright's Endowed Schools—Professor T. TURNER
Yardley Charity Estate—W. WRIGHT WILSON, Esq., F.R.C.S
 (Edin.)
Yardley Secondary School—Professor PETER THOMPSON.
-

ACADEMIC COSTUME.

GOWNS.

Undergraduates.—Gown of black stuff, similar to the Oxford Scholars' Gown, with the fore-arm seam open.

Bachelors.—Gown of black stuff with an open sleeve.

Masters.—Gown of black stuff or silk, similar to a Cambridge M.A. Gown with ribbons, but with a \perp -shaped slit in the sleeve.

Doctors.—Robe of scarlet cloth of the same shape as the Cambridge Doctors' Gown, trimmed with silk of the colour characteristic of the Faculty.

Doctors' Undress.—Gown of black stuff or silk of the same shape as the Masters' Gown, but edged with braid.

HOODS.

FACULTY OF SCIENCE.

B.Sc.—Black silk or stuff edged with silver-grey watered silk.

M.Sc.—Black silk lined with silver-grey watered silk.

D.Sc.—Scarlet cloth lined with silver-grey watered silk.

FACULTY OF ARTS.

B.A.—Black silk or stuff edged with electric-blue watered silk.

M.A.—Black silk lined with electric-blue watered silk.

D.Phil. and D.Litt.—Scarlet cloth lined with electric-blue watered silk.

B.Mus.—Black silk or stuff edged with tangerine watered silk.

FACULTY OF MEDICINE.

M.B. and Ch.B.—Black silk or stuff edged with cardinal watered silk.

Ch.M.—Black silk lined with cardinal watered silk.

M.D.—Scarlet cloth lined with cardinal watered silk.

DEPARTMENT OF DENTISTRY.

B.D.S.—Black silk or stuff edged with dark red (Grenat) watered silk.

M.D.S.—Black silk lined with dark red (Grenat) watered silk.

FACULTY OF COMMERCE.

B.Com.—Black silk or stuff edged with terra-cotta watered silk.

M.Com.—Black silk lined with terra-cotta watered silk.

HONORARY DEGREE.

LL.D.—Scarlet cloth lined with bronze-green watered silk.

CAPS.

Undergraduates, Masters, and Doctors will wear the ordinary square College Cap, and Doctors in full dress will wear a cap of black velvet with a gold cord, lined with the colour characteristic of the Faculty.

Robe Makers to the University—

MESSRS. EDE, SON, & RAVENSCROFT, 93 AND 94, CHANCERY LANE, LONDON.

FACULTIES OF SCIENCE, ARTS AND COMMERCE.

Session 1912-1913.

UNIVERSITY BUILDINGS.

The Courses in Science (except those in Zoology and Botany) are held at the University, Edgbaston, and the Courses in Arts and Commerce and Biology at the University, Edmund Street.

Applications relating to the admission of students should be addressed to the Registrar, the University, Edgbaston.

UNIVERSITY TERMS.

The University Session, or academic year, is divided into three terms—Winter, Spring and Summer. The WINTER TERM commences on Tuesday, October 1st, and ends on Saturday, December 14th, 1912; the SPRING TERM commences on Tuesday, January 7th, 1913, and ends on Saturday, March 15th; the SUMMER TERM commences on Tuesday, April 15th, and ends on Saturday, June 28th.

ADMISSION OF STUDENTS.

1.—No Student will be admitted to the University under the age of 16 years. Students are not recommended to enter the University until they have attained the age of 17 years.

2.—All the courses of study are open to men and women on the same terms. Separate cloak rooms and reading rooms are reserved for the accommodation of women students.

3.—Students intending to enter the University and also present Students are required to fill up and return to the Registrar, before the first day of the Session, a form of application for admission (copies of which may be obtained from the Registrar).

4.—All Undergraduates are required to sign the Matriculation Register at the Registrar's Office, Edmund Street buildings. It is important that this should be done immediately after entrance as Students in the University, as work towards a Degree counts only from the date at which candidates sign the Register.

5.—The classes and laboratories of the University are open to all who are sufficiently prepared to take advantage of the instruction offered. Every person seeking admission as a student to a recognised course of instruction in preparation for a diploma, certificate, or other professional qualification must produce such testimonial or reference and pass such examination as shall be deemed necessary by the Vice-Principal; but no examination is as a rule deemed necessary in the case of students attending classes for the purposes of general culture, and not in preparation for any University Examination.

Students who wish to join the courses in Engineering, who have passed no examination qualifying them for Matriculation, are required to pass an entrance examination in Mathematics, and in either Experimental Mechanics or Chemistry of about the same standard as the Matriculation examination.

6.—Every student entering any Faculty is required to seek an interview with the Dean of his Faculty or the Vice-Principal before finally selecting his classes or paying his fees at the Secretary's office.

7.—Students on admission are required to sign a declaration that they will obey the Regulations of the University, submit to its discipline, and uphold its honour and credit to the best of their ability.

8.—The Vice-Principal will be present every day (except Saturday) during the week commencing September 23rd and also on Monday, September 30th, from 10 o'clock a.m. to 1 o'clock p.m. at the University, Edgbaston, and from 2.30 to 5 at the University, Edmund Street, to confer with intending students, and give them advice respecting their courses of study, and may be seen at other times by appointment. The Deans of the Faculties and the Professors will also be present on Monday, September 30th, for the same purpose.

9. After having settled their course of study in consultation with the Vice-Principal, or the Deans of Faculties, students must apply for admission either in writing or personally to the Secretary of the University. The Secretary's offices, both at Edgbaston and at Edmund Street, are open from 9 to 1 and from 2 to 5, except on Saturdays, when they are open from 9 to 1 only.

10.—*Reports on the attendance, progress and conduct of students will be sent to parents and guardians on application in writing to the Vice-Principal.*

11.—For particulars as to the Hall of Residence for Women, see page 4.

12.—Students intending to take lodgings in Birmingham or the vicinity are recommended to place themselves in communication with the Secretary, Mr. G. H. Morley.

13.—Every student residing in lodgings in Birmingham is required to leave his local address at the Secretary's office, and to notify the Secretary of any change in his address.

F E E S .

All Fees are to be paid in advance (*i.e.*, at the beginning of the Session or term on account of which they are due) at the Secretary's office in the University. Cheques should be drawn in favour of Mr. Geo. H. Morley. *Students should not enter for classes until after mature consideration, as fees once paid cannot be returned.*

I.—MEMBERSHIP FEE.

Students are required to pay a Membership Fee, which includes all charges for the use of the Library and University Club rooms.

The following statement shows the Membership Fees :—

Men	£1 11 6 per session.
Women	£1 6 0 per session.
Students in Training College (Men)	£1	1	0 per session.		

II.—FEES FOR CLASSES AND LABORATORIES.

As the courses prescribed during the different years of study in most cases allow students to choose alternative subjects, it is not practicable to give a tabular statement of the fees for every combination of subjects. The fees charged for the different courses of study in each subject are appended to the Syllabuses of the Courses. *These fees are all subject to revision from year to year.*

The following table shows the *approximate* cost of the various courses for degrees :—

(a) Courses for B.Sc. degree in Pure Science :

First year, from 16 to 24 guineas.

Second year, from 12½ to 26 guineas.

Third year, from 12½ to 27 guineas.

- (b) Courses for B.Sc. degree in Engineering :
 Composition fees (including membership fee) :
 First year, £34 10 6
 Second year, £50 10 6
 Third year, £50 10 6
 Fourth year (Mechanical, Civil and Electrical),
 £50 10 6
- (c) Courses for B.Sc. degree in Metallurgy.
 Composition fees (including membership fee) :
 First year, £30 10 6
 Second year, £35 10 6
 Third year (Metallurgists), £35 10 6
 Third year (Metallurgical Chemists), £35 10 6
- (d) Courses for B.Sc. degree in Mining.
 Composition fees (including membership fee) :
 First year, £30 10 6
 Second year, £35 10 6
 Third year, £45 10 6
- (e) Courses for B.A. degree :
 First year, 19 guineas.
 Second year, 16 guineas.
 Third year, 16 guineas.
- (f) Course for M.A. Degree :
 The minimum fee for the M.A. course (excluding membership fee) is 5 guineas per Session.
- (g) Courses for B.Com. degree :
 Composition fees (including membership fee) :
 First year, £21 10 6
 Second year, £24 13 6
 Third year, £24 13 6

III.—FEES FOR EXAMINATION.

Faculty of Science.

(v)	Social Study Diploma Examination	...	1	0	0
(vi)	Social Study (Higher) Diploma Examination	...	2	0	0

The fees for Examination cannot be returned, but candidates are allowed to repeat any examination on payment of £1. The fee for re-examination in separate subjects is 10s. per subject.

REGULATIONS TO BE OBSERVED BY ALL STUDENTS.

1.—Students are not permitted to be in the University buildings before 8.45 a.m., nor after 7 p.m., unless attending classes or the meetings of some Society of the University.

2.—All students are required to conduct themselves in a quiet and orderly manner whilst in the University, not only during lecture hours, but on entering and leaving the building.

3.—Smoking is prohibited in the corridors and front hall of the University buildings, and is restricted to the students' common rooms.

4.—Card playing is prohibited in all parts of the buildings.

5.—Students committing any damage to the University buildings, or University property, will be required to pay for making good the same, and may be excluded from the University till payment is made.

6.—Students are required to attend punctually and regularly at the lectures and classes for which their names are entered.

7.—When a student has been absent it is desirable that he should report the cause of his absence to the Professor on his return to the class. In the event of illness or unavoidable absence, notice should be sent by the absentee to the Dean of his Faculty as soon as convenient.

LIBRARY REGULATIONS.

1.—The Harding Library at Edgbaston and the Library at Edmund Street are open daily during the Session from 9 a.m. to 6 p.m., except on Saturdays, when they are closed at 1 p.m. They are closed at 5 p.m. during the vacations. They are also closed during the month of August for cleaning purposes.

2.—The Libraries being set apart expressly for study, *all conversation is strictly prohibited*. Students are required to sit at the tables, and are not permitted to stand about in any part of the Libraries.

3.—Students are permitted to take books from the shelves, but they are to be *returned to the Librarian*, and are not to be replaced upon the shelves by the readers.

4.—The Libraries are to be used by *present students, for reference and study only*, and no books, pamphlets, or journals, etc., are to be taken from it, except by members of the Teaching Staff.

5.—Certain valuable books of reference (including Dictionaries and Encyclopædias), as indicated by the Council, are not allowed to be taken from the Libraries. Current Journals, Transactions of Societies, etc., are not allowed to be taken from the Libraries until after the publication of a succeeding part.

6.—In the event of a book being damaged by scribbling, tearing, etc., the person damaging it will be required to supply another copy in its place to the satisfaction of the Council. Any defect in a printed book should be pointed out to the Librarian.

7.—Books borrowed from the Libraries must be returned to the Librarian before the expiration of 15 days, subject to a renewal for a further period of 15 days, unless required by another reader.

8.—All books, pamphlets, etc., in the hands of borrowers must be returned to the Librarian on or before the last day of the Session.

9.—The Librarian is authorised to exclude temporarily any person infringing the regulations of the Libraries.

LOCKERS FOR BOOKS, &c.

Lockers are provided in the locker room (first floor) and in the cloak room of the Medical School, at the Edmund Street buildings and in the cloak room at the Edgbaston buildings, to enable students to preserve their books and papers in safety. Each student will be supplied with a key, upon which a deposit of two shillings and sixpence will be charged. The key must be delivered up on or before the last day of the Term or Session for which payment has been made, or the deposit will be forfeited.

A master-key of all the lockers is kept in the Secretary's office.

UNIVERSITY CLUB.

The accommodation at Edmund Street consists of a reading and debating room, which can also be used for meetings, and other social purposes; writing room, and dining room, where meals and refreshments at moderate prices are procurable throughout the day.

There is also a games room, and a billiard room fitted with two tables. A bath room, dressing rooms, and cycle accommodation are also provided.

Women students are provided with club rooms, including dining and tea rooms.

At the new buildings at Edgbaston a common room and dining room have been provided, and a separate reading room for women.

All members of the University Court of Governors and Council, all Professors, Lecturers and Demonstrators of the University, all present and past students of the University and Medical School, and all members of the Honorary and Resident Staffs of the Hospitals in connection with the University, are eligible as members. Entrance fee half-a-guinea. Annual subscription, £1 1 0.

All students are members of the Club both at Edmund Street and at Edgbaston, by virtue of their University membership fees.

Full particulars as to membership, and copies of the rules, can be obtained from the Hon. Secretary.

MATRICULATION REGULATIONS.

MATRICULATION : ITS PRIVILEGES.

Matriculation is the formal admission of a student to membership of the University.

Although the classes in the University are open to all students who are sufficiently prepared to take advantage of the instruction offered, students are strongly recommended to pass some qualifying examination and be matriculated before entering the University. It is only matriculated students who can become undergraduates and enjoy the privileges of Membership of the University and the Guild of Undergraduates and are eligible to become candidates for degrees in the University. Undergraduates and Graduate Students are required to wear academic dress when in attendance upon University lectures and examinations, when calling upon the officers of the University, and upon all official occasions. Students who are not Undergraduates or Graduates are not entitled to wear academic dress.

Students who have been matriculated are entitled to the privileges of membership of the University and of the Guild of Undergraduates only so long as they are in actual attendance on a course of study approved by a Faculty of the University.

No candidate can be matriculated in the University under the age of sixteen years.

QUALIFICATIONS FOR MATRICULATION.

- (a) By means of the Matriculation Examination or its equivalent.

Students may be matriculated in any Faculty provided that they have passed the Matriculation Examination or have obtained the Senior School Certificate of the University in the necessary subjects, or can produce evidence that they have passed one of the Examinations which the University accepts as exempting from the Matriculation Examination. A schedule of such examinations will be found on page 159. Persons desiring to be matriculated by virtue of such an examination are required to pay a fee of £1.

- (b) By means of a complete Higher Examination.

Candidates may also qualify for matriculation by passing in June or September, 1913, one of the following higher examinations, viz. :—

- (1) Intermediate Science or Arts Examinations ;
- (2) First Examination in Engineering, Metallurgy, or Mining ;

provided that at the July or September Matriculation Examination (of 1913) they also pass at one examination in all such subjects required for matriculation as are not included in the higher examination they select.

- (c) By means of an incomplete Higher Examination.

If such candidates fail to pass the complete higher examination in June, 1913, but pass in two subjects out of three (Intermediate Science) or in two subjects out of four (1st Engineering, 1st Mining, and 1st Metallurgy) or in three subjects out of five (Intermediate Arts) they will be allowed to complete the examination in the following September, without being re-examined in the subjects in which they have passed. But unless they have completed all the subjects at the September examination, they will not be credited with any part of the higher examination. Candidates who do themselves credit at the higher examination, although they

do not actually pass it, may be allowed to be matriculated without further examination, except in such subjects as are not included in the higher examination.

ENTRY OF MATRICULATED CANDIDATES FOR HIGHER EXAMINATIONS AT ENTRANCE.

Candidates who have already passed an examination qualifying for matriculation may also pass one of the foregoing higher examinations before entrance, and so can enter the University as students of advanced standing.

PRIVILEGES OF THOSE WHO TAKE A HIGHER EXAMINATION AT ENTRANCE.

(a) Incomplete Examinations.

Matriculated candidates who pass the higher examination in two subjects out of three (Intermediate Science) or in two subjects out of four (1st Engineering, 1st Metallurgy and 1st Mining) or in three subjects out of five (Intermediate Arts) will not be required to attend Course I in these subjects or be re-examined in Course I.

(b) Higher Mathematics at Matriculation.

Candidates who pass the Matriculation Examination in Higher Mathematics at an adequate standard will not be required to attend or be examined in Mathematics, Course I, when they enter the University.

(c) Complete Examinations.

Candidates who have passed one of the higher examinations in all subjects and completed their Matriculation may then enter upon the second year's course of study in the Faculties of Science and Arts, and take the examination for the Bachelor's Degree at the end of their second year; but they will still be required to complete three years of study before being admitted to any Degree. Those candidates who pass the Final Examination for the Bachelor's Degree at the end of

their second year may take the course for the Master's Degree in their third year, and be eligible for that Degree at the end of three years from entrance.

Candidates who pass the Intermediate Science Examination or the First Engineering Examination before entrance become eligible for the B.Sc. Degree in Engineering after *three* years instead of four.

Candidates who pass the Intermediate Arts Examination before entrance may proceed at once to the courses for the Schools of Modern Languages, Classics, English Literature, History, or Philosophy, and at the end of their third year of study will be eligible for the degree of Master of Arts.

HIGHER EXAMINATION IN MEDICINE AT ENTRANCE.

Candidates for degrees in the Faculty of Medicine may enter for the first professional examination (Chemistry Physics and Elementary Biology) before commencing their courses in the University, provided that they have already passed the Matriculation Examination or some preliminary examination accepted by the University in lieu of its Matriculation Examination. Such candidates will become eligible for the Final Examination for the Degrees of M.B., Ch.B., after *four* years of study in the University, provided that they have then been registered medical students for a period of five years.

ALTERNATIVE HIGHER EXAMINATIONS OF OTHER UNIVERSITIES.

The complete Intermediate Science Examination of any approved University will be accepted in lieu of the Intermediate Science or First Engineering Examination of the Birmingham University, and the complete Intermediate Arts and Preliminary Scientific Examinations of other approved Universities will be accepted as equivalent to the corresponding examinations of the Birmingham University, as qualifying students to enter

on second year courses of study and entitling them to the foregoing privileges.

MATRICULATION EXAMINATION.

There will be Matriculation and Senior School Certificate Examinations, commencing on **Monday, July 7th**, and **Monday, September 8th, 1913**. Candidates for these examinations must apply to the Registrar for a form of entry, which must be returned on or before June 11th or August 6th respectively, accompanied by a certificate of good character from the last school attended or from some responsible person, a birth certificate and the proper fee.

The Fee for the Matriculation Examination is £2 ; and, in cases of failure or withdrawal from the examination, for each subsequent Examination £1.

The examination will be conducted partly by means of printed papers, and partly by means of a *viva voce* examination.

Candidates will not be admitted to the Matriculation Examination under the age of sixteen on the first day of the Examination. Students over the age of fifteen, who are being educated at one of the Secondary Schools in the list issued by the Board of Education, whether under inspection by the University or not, will be admitted with the consent of their Head Master or Head Mistress, to the Senior School Certificate Examination on payment of the usual fee of £2, but they will not be eligible to receive the Certificate until they have attained the age of sixteen years.

The examination will be held at the University Buildings, Edgbaston, Birmingham.

Copies of the examination papers set at previous examinations may be obtained from Messrs. Cornish Bros., New Street, Birmingham, price sixpence, post free eightpence.

Every candidate must pass in *five* subjects at one examination, viz. :—

- (1) English History and Literature.
- (2) Mathematics.
- (3), (4) and (5) Three subjects (of which one must be a language) chosen from the following list :—
 - (a) Latin.
 - (b) Greek.
 - (c) French.
 - (d) German.
 - (e) Italian.
 - (f) Spanish.
 - (g) Higher Mathematics.
 - (h) Experimental Mechanics.
 - (i) Chemistry.
 - (j) Geography.
 - (k) Botany.
 - (l) Animal Biology.
 - (m) Geometrical Drawing

Candidates for :—

(a) **Degrees in Science, Commerce and Music** are allowed free choice of subjects under the headings (3), (4) and (5), except that one of the subjects must be a language.

(b) **Degrees in Engineering** are required to pass in Experimental Mechanics as one of their subjects, and are further recommended to take Higher Mathematics.

(c) **Degrees in Arts** are required to pass in Latin and a modern language as two of their subjects.

(d) **Degrees in Medicine** are required to pass in Latin, another language, and either Experimental Mechanics or Chemistry as three of their subjects.

Candidates for Degrees in Pure and Applied Science are recommended to take both French and German, if possible.

In certain cases foreign students are allowed to offer their native language instead of the prescribed English. Such candidates should give notice to the Registrar before April 21st for the July examination, and before June 17th for the September examination.

Candidates may offer six subjects for examination if they choose, but they will receive credit for only five. Candidates who have passed the examination in five subjects, but have not satisfied the special requirements for degrees in Engineering, Arts or Medicine, may qualify for entry to the courses for these degrees by passing separately at a subsequent examination in the subject or subjects omitted. The fee for examination in one subject is 10s.

The particulars of the foregoing subjects of examination in July and September, 1913, are set out in the following schedule. The books to be prepared in Latin, Greek, French, German, Italian and Spanish are left to the choice of candidates, subject to the approval of the University, but they should be of about the same length and standard of difficulty as the books suggested under the various headings below.

1. English History and Literature.

A. History of the English People

either (1) 829 to 1603

or (2) 1603 to 1900.

Students should give attention to the social and literary, as well as to the political and geographical, aspects of History. They should also pay some attention to the relation of European and Colonial History to English.

Books recommended ;

J. R. Green: *Short History of the English People*

S. R. Gardiner: *Student's History of England.*

B. English Literature :

Candidates will be required to write three or four short compositions on subjects drawn from *one* of the following groups, to be selected by the candidate,

Groups for 1913 :

- (a) Palgrave: Golden Treasury, Books I and II.
 Spenser: Faerie Queene, Book II.
 Shakespeare: Julius Cæsar, The Tempest.
 North: Plutarch's Lives of Julius Cæsar and Marcus Brutus.
 Milton: Paradise Lost, Book I; Areopagitica.
- (b) Swift: Gulliver's Travels to Lilliput and Brobdingnag.
 Bunyan: Pilgrim's Progress.
 Johnson: Rasselas, Lives of Addison, Pope and Swift.
 Pope: Rape of the Lock.
 Addison: Essays in Golden Treasury Series (pp. 1-160).
 Goldsmith: She Stoops to Conquer, The Good-natured Man, The Citizen of the World.
- (c) Wordsworth: Ruth, Hartleap Well, The White Doe of Rylstone, Laodamia, Michael.
 Coleridge: Ancient Mariner.
 Scott: Lay of the Last Minstrel, Lady of the Lake, Marmion, Ivanhoe, Heart of Midlothian,
 Jane Austen: Pride and Prejudice.
 Byron: Childe Harold, IV.

Group for 1914 :

- Marlow: Edward II.
- Spenser: Faerie Queene, Book I.
- Milton: Samson Agonistes.

Shakespeare : As You Like It, Henry V.
Palgrave : Golden Treasury, Books I and II.
Bacon : Advancement of Learning, Book I.
Scott : Kenilworth.

The groups *a* and *b* are the same for 1914 as for 1913.

Candidates will be expected to show an intelligent understanding of the subject matter of the books they offer, but not a minute knowledge of allusions, parallel passages and criticisms which bear on the text of the books.

2. Mathematics.

1. *Arithmetic*.—A knowledge of recurring decimals and of the process of extracting cube root will not be required.

The use of algebraical symbols and processes will be permitted.

2. *Elementary Algebra*, viz., addition, subtraction, multiplication and division ; simple equations ; fractions ; highest common factor, lowest common multiple ; quadratic equations ; solutions of two simultaneous equations, one at least being linear ; simple graphs ; problems requiring the classes of equations specified ; simple questions on fractional indices ; the nature and simple properties of logarithms to the base 10, with easy applications of four-figure tables ; ratio and proportion ; arithmetic progression, finite geometric progressions.

3. *Geometry*.—The paper in Geometry will contain questions on Practical and on Theoretical Geometry. Every candidate will be expected to satisfy the Examiners in both branches of the subject.

The questions on Practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. In cases where the validity of a construction is not obvious, the reasoning by which it is justified may be required. Every candidate must provide himself with a ruler graduated in inches and tenths of an inch, and in centimetres and

millimetres, a set square, a protractor, compasses, and a hard pencil. All figures should be drawn accurately. Questions may be set in which the use of the set square or of the protractor is forbidden.

The questions on Theoretical Geometry will consist of theorems contained in the annexed Schedule B, together with questions upon these theorems, easy deductions from them, and arithmetical illustrations. Any proof of a Proposition will be accepted which appears to the Examiners to form part of a systematic treatment of the subject; the order in which the theorems are stated in Schedule B is not imposed as the sequence of their treatment.

In the proof of theorems and deductions from them, the use of hypothetical constructions will be permitted. Proofs which are only applicable to commensurable magnitudes will be accepted.

SCHEDULE A.

Bisection of angles and of straight lines. Construction of perpendiculars to straight lines. Construction of an angle equal to a given angle. Construction of parallels to a given straight line. Simple cases of the construction from sufficient data of triangles and quadrilaterals. Division of straight lines into a given number of equal parts or into parts in any given proportions. Construction of a triangle equal in area to a given polygon. Construction of tangents to a circle and of common tangents to two circles. Simple cases of the construction of circles from sufficient data. Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines. Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle. Construction of a square equal in area to a given polygon.

SCHEDULE B.

Angles at a Point.—If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles ; and the converse. If two straight lines intersect, the vertically opposite angles are equal.

Parallel Straight Lines.—When a straight line cuts two other straight lines, if (i) a pair of alternate angles are equal, or (ii) a pair of corresponding angles are equal, or (iii) a pair of interior angles on the same side of the cutting line are together equal to two right angles, then the two straight lines are parallel ; and the converse. Straight lines which are parallel to the same straight line are parallel to one another.

Triangles and Rectilinear Figures.—The sum of the angles of a triangle is equal to two right angles. If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles. If two triangles have two sides of the one equal to two sides of the other, respectively, and also the angles contained by those sides equal, the triangles are congruent. If two triangles have two angles of the one equal to two angles of the other, respectively, and also one side of the one equal to the corresponding side of the other, the triangles are congruent. If two sides of a triangle are equal, the angles opposite to these sides are equal ; and the converse. If two triangles have the three sides of the one equal to the three sides of the other, respectively, the triangles are congruent. If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent. If two sides of a triangle are unequal, the greater side has the greater angle opposite to it ; and the converse. Of all the straight lines that

can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest. The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram, and the diagonals bisect one another. If there are three or more parallel straight lines, and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

Areas.—Parallelograms on the same or equal bases and of the same altitude are equal in area. Triangles on the same or equal bases and of the same altitude are equal in area. Equal triangles on the same or equal bases are of the same altitude. Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities:—

$$\begin{aligned} k(a + b + c + \dots) &= ka + kb + kc + \dots, \\ (a + b)^2 &= a^2 + 2ab + b^2, \\ (a - b)^2 &= a^2 - 2ab + b^2, \\ a^2 - b^2 &= (a + b)(a - b). \end{aligned}$$

The square on a side of a triangle is greater than, equal to, or less than the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right or acute. The difference in the cases of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

Loci.—The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points. The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angle between the two given lines.

The Circle.—A straight line, drawn from the centre of a circle to bisect a chord which is not a diameter, is at right angles to the chord ; conversely, the perpendicular to a chord from the centre bisects the chord. There is one circle, and one only, which passes through three given points not in a straight line. In equal circles (or in the same circle) (i) if two arcs subtend equal angles at the centres, they are equal ; (ii) conversely, if two arcs are equal, they subtend equal angles at the centres. In equal circles (or in the same circle) (i) if two chords are equal, they cut off equal arcs ; (ii) conversely, if two arcs are equal, the chords of the arcs are equal. Equal chords of a circle are equidistant from the centre ; and the converse. The tangent at any point of a circle and the radius through the point are perpendicular to one another. If two circles touch, the point of contact lies on the straight line through the centres. The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference. Angles in the same segment of a circle are equal ; and, if the line joining two points subtends equal angles at two other points on the same side of it, the four points lie on a circle. The angle in a semicircle is a right angle ; the angle in a segment greater than a semicircle is less than a right angle ; and the angle in a segment less than a semicircle is greater than a right angle. The opposite angles of any quadrilateral inscribed in a circle are supplementary ; and the converse. If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segments. If two chords of a circle intersect either inside or outside the circle,

the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

Proportion and Similar Triangles.—If a straight line is drawn parallel to one side of a triangle, the other two sides are divided proportionally; and the converse. If two triangles are equiangular, their corresponding sides are proportional; and the converse. If two triangles have one angle of the one equal to one angle of the other and the sides about these equal angles proportional the triangles are similar. The internal bisector of an angle of a triangle divides the opposite side internally in the ratio of the sides containing the angle, and likewise the external bisector externally. The ratio of the areas of similar triangles is equal to the ratio of the squares on corresponding sides.

3, 4 and 5. (a) and (b) Latin, Greek.

- (i) Translation of easy passages at sight, with questions on Grammar (Accidence and Syntax).

Candidates are required to satisfy the Examiners in Unseen Translation.

- (ii) Easy Composition.
- (iii) Translation of passages from a prepared book.

For prepared work any book of about the same length and standard of difficulty as, Cicero, *Pro Lege Manilia*, (about 70 sections), or one of the longer books of Cæsar (e.g., Bell. Gall. I, V, VI, VII), or two of the shorter books of the Gallic War (II, III, IV), or a book of Vergil (excepting Aeneid Books IV and VI) or Ovid (about 700-800 lines) or Livy, and (for Greek) a book of Xenophon or a Greek play will be accepted.

Candidates proposing to offer other books than these must submit them for approval to the University.

(c) French.

- (i) Translation of easy passages at sight, with questions on Grammar (Accidence and elementary Syntax).
- (ii) Easy Composition and Dictation.
- (iii) *Viva voce*. Reading aloud and translation of passages from the prepared book, and easy conversation based on them.

For prepared work, any one of the following books (or another book of similar length and standard of difficulty approved beforehand by the University) may be offered in July and September, 1913 :—

Alph. Daudet, *Jack*; or *Le Petit Chose*.
Mérimée, *Colomba*.

(d) German.

- (i) Translation of easy passages at sight, with questions on Grammar (Accidence and elementary Syntax).
- (ii) Easy Composition and Dictation.
- (iii) *Viva voce*. Reading aloud and translation of passages from the prepared book, and easy conversation based on them.

For prepared work the following book (or any other book of similar length and standard of difficulty approved beforehand by the University) may be offered in July and September, 1913 :—

Storm, *In St. Jürgen*.

(e) Italian.

- (i) Translation of easy passages at sight, with questions on Grammar (Accidence and elementary Syntax).

- (ii) Easy Composition and Dictation.
- (iii) *Viva voce*. Reading aloud and translation of passages from the prepared book, and easy conversation based on them.

For prepared work the following book (or any other book of similar length and standard of difficulty approved beforehand by the University) may be offered in July and September, 1913 :—

Carlo Collodi, *Le avventure de Pinocchio*.

(f) **Spanish.**

- (i) Translation of easy passages at sight, with questions on Grammar (Accidence and elementary Syntax).
- (ii) Easy Composition and Dictation.
- (iii) *Viva voce*. Reading aloud and translation of passages from the prepared book, and easy conversation based on them.

For prepared work the following book (or any other book of similar length and standard of difficulty approved beforehand by the University) may be offered in July and September, 1913 :—

Cervantes, *The Adventure of the Wooden Horse and Sancho Panza, Governor of Baratania* (Clarendon Press).

(g) **Higher Mathematics.**

Algebra.—Elementary properties of surds and imaginaries ; simultaneous quadratics and equations like quadratics ; arithmetical and geometrical progressions and other simple series ; theory of indices ; theory and practical applications of logarithms ; permutations and combinations ; the binomial theorem for a positive integral exponent.

Trigonometry.—Trigonometrical ratios of acute angles ; solution of right-angled triangles, and simple problems of

heights and distances ; circular measure of angles ; length of arcs of circles ; angles of any magnitude and sign ; trigonometrical ratios of obtuse angles ; sine, cosine, and tangent of the sum and difference of angles ; formulæ for the ratios of the double angle, triple angle, and the half angle ; transformation of sums and differences of sines and cosines into products, and vice-versâ ; properties of triangles ; solution of triangles ; problems on heights and distances ; the chief circles related to a triangle ; regular polygons ; areas of circles, sectors, and segments.

Elementary Analytical Geometry.—Rectangular co-ordinates ; distance between two points ; areas of triangles and polygons ; the equation of the line joining two given points ; intersection of lines and other loci ; the equation to the circle.

Geometry.—The substance of Euclid, Book XI, 1—21, together with properties, areas of surface, and volumes of polyhedra, cylinders, cones, and spheres.

(h) Experimental Mechanics.

Statics. Force measured in pounds weight or grammes weight. Equilibrium under two equal and opposite forces. Equality of the action and reaction between two bodies. Transmissibility of force by strings, ropes, and rigid connexions. Experimental investigation of the conditions for the equilibrium of a body when acted on by three parallel forces. Resultant. Moment of a force about a point. Balancing of moments when a body is in equilibrium. Centre of parallel forces. Centre of gravity and the experimental investigation of its positions. Stability and instability of a body, supported from a point or on a base. Work and rate of working. Foot pound and horse power. The lever, the balance, the single string system of pulleys, the wheel and axle, the differential pulley, as illustrations of parallel forces, and of the

principle of work. Experimental investigation of the conditions for the equilibrium of a body when acted on by three forces not parallel. The triangle of forces. The parallelogram of forces. Graphic resolution and composition of forces. Simple cases of resultant of two forces acting at a point. Balancing of moments when a body is in equilibrium. Inclined plane. Windmill. Sailing. Screw, toothed and worm wheels, as treated by the principle of work. Efficiency of machines always reduced by friction.

Hydrostatics. Distinction between liquids and gases. Pressure at a point in a fluid. Equality of pressure at points on the same level. Change of pressure with depth. Surface of a liquid level. Transmission of pressure in liquid. Hydraulic press. Pressure against horizontal surfaces and vertical containing walls. Archimedes' principle. Density and specific gravity. Methods of finding specific gravities. Relation between volume and pressure in a gas. Air Pumps. Atmospheric pressure. Barometers. Common pumps. Force pump.

Dynamics. Units of length and time. Velocity. Uniform acceleration. Use of formulæ connecting velocity, time and distance travelled, with acceleration. Mass. Equal masses are those having equal acceleration under equal forces. Simple experiments to show that mass is proportional to weight at the same place. Constancy of mass under change of physical and chemical condition. Momentum and rate of change of momentum. Force measured by rate of change of momentum. Dyne and poundal. Momentum measure of force proportional to its weight measure. Relation between weight measure and momentum measure g . Atwood's

machine. Momenta generated in two bodies by their mutual action, equal and opposite. Constancy of momentum. Kinetic energy and Work.

(i) Chemistry.

Gaseous, liquid and solid states of matter.

Nature of chemical change. Elements, compounds, and mixtures.

Types of chemical action.

Solution, crystallisation, distillation, diffusion.

Chemical and physical properties of air and water.

Nature of acids, bases and salts.

Nature, occurrence, chief modes of preparation, and principal properties of the following non-metallic elements and their more important compounds : Hydrogen, Oxygen, Carbon, Silicon, Sulphur, Nitrogen, Phosphorus, Fluorine, Chlorine, Bromine, and Iodine.

Combination by weight and volume. Symbols, equations and calculations relating to weight and volume. Nomenclature.

Chemical and Physical characteristics of metals as illustrated by Sodium, Calcium, Iron, Zinc, Lead, Mercury, Copper and Silver.

Candidates are required to show knowledge of a concrete and experimental character throughout.

(j) Geography.

Part I.—Physical.

The Earth and the Solar System ; the form and size of the globe ; its movements ; day and night ; the seasons.

The Earth's surface ; distribution of land and water ; the relief of the land areas and floor of oceans.

The Atmosphere ; its composition and temperature, moisture, pressure, and movements (winds, storms, rain, snow, fog, etc., and their distribution).

The Sea ; the sea waters, waves, and currents ; the chief deposits on the ocean floor.

The Land ; the solid earth crust and its rocks ; its slow movements ; earthquakes and volcanoes, their phenomena and distribution.

The Work of Water, etc. ; the sea and its waves ; rain and rivers ; river basins ; glaciers and ice-sheets ; lakes, springs, waterfalls, deltas, &c.

Part II.—Political and Practical.

A. General.

The Continents ; generalities of their natural features, climate and productions ; their chief countries, peoples, modes of government, capitals, and other main centres of population.

B. Special.

The British Isles ; their natural features, climate, and productions ; their main political divisions, chief towns, population, industries, trade and commerce, colonies and dependencies.

C. Practical.

The reading of ordinary topographical maps on the scales of 1 inch and $\frac{1}{2}$ inch to the mile ; the measurement of distances and directions on maps generally ; interpretation of the modes of shewing natural features (relief and drainage), and artificial features (roads, railways, etc.)

NOTE.

Candidates will be required to satisfy the Examiners both in Part I and in Part II.

(k) **Botany.**

A. Plant Form as a key to Relationships.

The Candidate is expected to have *practical* familiarity with

- (i) The chief characters of root, stem, bud and leaf of the principal British plants of quite general distribution and of garden plants of general cultivation, and with the nature and structure, as determinable by eye or lens, of common bulbs, fruits, seeds or other vegetable products, in ordinary use, and universally met with in shop or market.
- (ii) The most important floral and fruiting characters of the following British Natural Orders :—Ranunculaceae, Cruciferae, Violaceae, Caryophyllaceae, Leguminosae, Rosaceae, Umbelliferae, Compositae, Primulaceae, Scrophularineae, Labiatae, Cupuliferae, Liliaceae.
- (iii) To be able to describe concisely and in systematic fashion, flowering or fruiting specimens taken from (i) or (ii) as above, the various parts being known by their technical names, but otherwise more importance being attached to accuracy of observation than to the memory of technical terms.

B. How Plants live, grow, and reproduce.

- (iv) The mode of development of the plant, the elementary facts of nutrition and respiration, the nature and function of root, stem and leaf, and their relations with external conditions and forces, to be determined *experimentally* by the aid of seedlings grown in the class-room from the following typical seeds or one-seeded fruits, viz., castor-oil *or* buck wheat, pea *or* bean, sunflower, mustard *or* cress, and maize, wheat *or* barley, and the bulb of hyacinth *or* onion.

- (v) The functions of the floral parts, their relations with pollination, the production and protection of seeds, and the provisions for seed-dispersal, especially as illustrated in the Natural Orders named above.

(l) **Animal Biology.**

- (i) Distinctive properties of living matter or protoplasm, as illustrated by the structure and mode of life of the Proteus-animalcule or *Amœba*. Differences between Animals and Plants. The nature of the Cell.
- (ii) The general structure of the Frog. Elementary physiology of the Frog. The organs of digestion and their use. The nature of blood. The structure of the heart, and the arrangement of the more important blood vessels. The use of a circulatory system. The nature of excretory organs. Mode of breathing. The kidneys and their use.
- (iii) The more important facts in the structure and habits of the freshwater Polype (*Hydra*); the Earthworm (*Lumbricus*); and the Crayfish (*Astacus*).
- (iv) Methods of reproduction in animals. The egg-cell and the sperm-cell. Fertilisation of the egg. Segmentation of the fertilized egg. The metamorphosis of the Frog, treated in an elementary fashion.

(m) **Geometrical Drawing.**

Plane Geometry. Construction of Scales. Areas of plane figures. Problems on construction and simple properties of polygons, and the following curves: circle, ellipse, parabola, hyperbola, cycloid, and involute of circle. Determination of mass centre of a polygon. Simple problems on loci, including point-paths in elementary

link-work. The representation and solution of algebraic equations by curves.

Solid Geometry. Elementary projections of points, lines, planes and solids, including the cylinder, cone and sphere. Simple sections. Projection of additional plans and elevations. Developments of the surfaces of simple solids. Elementary problems in inter-penetration of prisms, cylinders and cones, and developments of penetrated surfaces. Projection of helical surfaces and screw threads.

A list of candidates who have passed the Examination will be published, arranged in two divisions, in each of which the names will be placed in alphabetical order.

A pass-certificate signed by the Registrar will be sent to each successful candidate after the list is published.

Unsuccessful candidates will be informed of the subjects in which they have failed on application to the Registrar after the publication of the list.

SCHEDULE OF EXAMINATIONS.

accepted in lieu of Matriculation Examination.

1. The Previous Examination of the University of Cambridge, if it includes the "Additional Subjects."
2. Responsions of the University of Oxford, except in Mathematics.
3. The Preliminary or Matriculation Examination of a recognised University.
4. The Higher Certificate and the School Certificate of the Oxford and Cambridge Examinations Board.
5. The Oxford or Cambridge Senior Local Examination.
6. The Senior Certificate of the Central Welsh Board.

Provided that Candidates who offer Examinations 3, 4, 5 and 6 have passed at one examination in all the subjects required by the regulations for matriculation.

In the Faculties of Science, Arts and Commerce the Oxford and Cambridge Higher Local Examinations in any subject will exempt candidates from further examination in that subject in the Matriculation Examination. A written statement from the Secretary of the Oxford Delegacy or the Cambridge Syndicate certifying that the candidate has passed the examination in that subject must be presented.

RECOGNITION OF THE MATRICULATION EXAMINATION BY OTHER INSTITUTIONS.

The Matriculation Examination of the University of Birmingham is recognised by the following Institutions in lieu of the preliminary examination :—

University of Oxford, in lieu of Responsions, under certain conditions.

University of Cambridge, in lieu of the Previous Examination, under certain conditions.

Incorporated Law Society (provided that Latin is one of the subjects of examination.)

Institute of Chartered Accountants (provided that the Matriculation Certificate includes all the subjects required for the Institute's Preliminary Examination.)

The Society of Incorporated Accountants and Auditors.
Board of Education, for admission to Training Colleges (under certain conditions.)

General Medical Council, for Registration of Medical and Dental Students.

Institute of Chemistry.

Pharmaceutical Society of Great Britain (Certificate to include required subjects.)

Royal Society of Veterinary Surgeons (Certificate to include required subjects.)

Special Engineering Matriculation Certificate.

Candidates for the Matriculation Examination who pass the Examination in English History and Literature, Mathematics, a Foreign Language, Higher Mathematics and Experimental Mechanics will be awarded a Special Engineering Matriculation Certificate, which is accepted by the Institution of Civil Engineers as exempting from their Students' Preliminary Examination.

Students in Engineering at the University who at entrance have passed the ordinary Matriculation Examination for Science students may, at the end of their first year, be awarded the Engineering Matriculation Certificate, provided they pass the complete First Engineering Examination and repeat the Examination in English at one of the Matriculation Examinations held in July or September in the same year.

MATRICULATION EXAMINATION TIME TABLE.

The Examinations commence on July 7th, 1913, and September 8th, 1913.

1st Week.

Monday	10 to 1	Arithmetic and Algebra.
	2 to 5	Geometry.
Tuesday	10 to 1	English Literature.
	2 to 5	English History.
Wednesday	10 to 1	French (1st paper.)
	2 to 5	French (2nd paper.)
Thursday	10 to 1	Latin (1st paper.)
	2 to 5	Latin (2nd paper.)
Friday	10 to 1	Chemistry.
	2 to 5	Geography.
Saturday	10 to 1	Experimental Mechanics.
		Botany.

2nd Week.

Monday	10 to 1	Higher Mathematics (1st paper.)
		Greek (1st paper.)
	2 to 5	Higher Mathematics (2nd paper.)
		Greek (2nd paper.)
Tuesday	10 to 1	German (1st paper.)
	2 to 5	German (2nd paper.)
Wednesday	10 to 1	Geometrical Drawing.
		Animal Biology.

The above Time-table is provisional only, and due notice will be given of any alterations which may be rendered necessary by candidates entering for two subjects to which the same hour is assigned.

SCHOOL CERTIFICATES.

The conditions under which the University conducts the Inspection of Secondary Schools will be found on page 200. In Schools which come under this scheme the University is prepared to award Senior and Junior School Certificates under the following conditions :

1. Senior School Certificates will be awarded to candidates who

(a) have pursued an approved course of study for a continuous period of three years in one school, or of four years in two schools which are under the University's inspection ;

(b) have attained a standard of education fully equal to that of the University Matriculation Examination in an adequate range of subjects.

The Certificate shall enumerate the subjects in which the necessary standard has been reached.

The Certificate will in no case be awarded to candidates until they have attained the age of 16 years.

2. Holders of the Senior School Certificates will be exempted from the Matriculation Examination of the University in the cases where the subjects enumerated on the Certificate include all the subjects demanded by the Faculty which they propose to enter.

3. Junior School Certificates will be awarded to candidates who

(a) have pursued an approved course of study for a continuous period of three years in a school or schools which are under the University's inspection ;

(b) have attained such a standard as may reasonably be expected of a boy or girl of 15.

The Certificate shall enumerate the subjects in which the necessary standard has been reached.

4. The Certificates shall be awarded by the University upon the results of school examinations held by the inspectors of the University ; and the school record kept for each pupil throughout his period of attendance shall be available for inspection and consideration by the inspectors and examiners.

The Senior School Certificate is recognised by the following Institutions as exempting from their preliminary examinations :—

Royal Institute of British Architects.

General Medical Council, for Registration of Medical and Dental Students (if the required subjects are taken).

Institute of Chartered Accountants (provided that the Certificate includes all the subjects required for the Institute's Preliminary Examination).

Institute of Chemistry.

Incorporated Law Society (if Latin is taken).

Institution of Civil Engineers (if the required subjects are taken).

Board of Education, for admission to Training Colleges (under certain conditions).

INTERMEDIATE EXAMINATIONS FOR EXTERNAL CANDIDATES.

The Intermediate Science, First Engineering, First Metallurgy, First Mining, Intermediate Arts and First Medical Examinations are held twice each year, in June and September. The dates on which the examinations commence may be obtained on application to the Registrar. The fee for each of these Examinations is £2.

Candidates for any of these examinations must apply beforehand to the Registrar for a form of entry, which must be returned, accompanied by a certificate of good

conduct from the last school attended or from some responsible person, birth certificate, and by the proper fee, not later than April 21st for the June Examination, or August 6th for the September Examination.

I—INTERMEDIATE SCIENCE EXAMINATION.

Candidates are required to pass in *three* of the following subjects :—

- (i) Pure Mathematics.
- (ii) Physics.
- (iii) Chemistry. (Inorganic and Organic.)
- (iv) Elementary Biology (Botany and Zoology.)

II—FIRST ENGINEERING EXAMINATION.

Candidates are required to pass in the following four subjects :—

- (i) Mechanical Drawing.
- (ii) Pure Mathematics.
- (iii) Physics.
- (iv) Inorganic Chemistry.

III—FIRST METALLURGY EXAMINATION.

Candidates are required to pass in the following four subjects :—

- (i) Pure Mathematics.
- (ii) Physics.
- (iii) Inorganic Chemistry.
- (iv) Metallurgy.

IV—FIRST MINING EXAMINATION.

Candidates are required to pass in the following four subjects :—

- (i) Pure Mathematics.
- (ii) Physics.
- (iii) Inorganic Chemistry.
- (iv) Mining.

V—FIRST MEDICAL EXAMINATION.

Candidates are required to pass in the following three subjects at one examination :—

- (i) Physics.
 - (ii) Chemistry. (Inorganic and Organic.)
 - (iii) Elementary Biology.
-

The standard required in Pure Mathematics is the same as that of Higher Mathematics in the Matriculation Examination. Candidates will find particulars of the other courses under the respective subjects, in the General Syllabus, the course in each case being described as Course I.

There will be a practical examination in Physics, Chemistry and Elementary Biology. Examiners will not be precluded from holding a *viva voce* examination in any subject if they think fit.

VI—INTERMEDIATE ARTS EXAMINATION.

Candidates are required to pass in *five* subjects, chosen from the following list :—

- (i) Latin.
- (ii) English Language and Literature.
- (iii) Either Pure Mathematics or Logic.
- (iv) and (v) Two of the following, of which one must be a modern foreign language :—Greek, French, German, Italian, Spanish, Logic or Pure Mathematics, (if not already selected under heading iii,) a Physical or Natural Science, General European History, Geography.

Candidates will find full particulars of the above courses under the respective subjects in the General Syllabus, the course in each case being described as Course I.

Two examination papers will be set in each of the five subjects. There will also be a *viva voce* examination in Latin, Greek and modern foreign languages. Examiners will not be precluded from holding a *viva voce* examination in any subject if they think fit.

Candidates taking the Intermediate Arts Examination as the entrance examination to any of the Special Schools are not required to pass in either Mathematics or Logic, provided they pass in a higher paper in the principal subject of the Special School selected.

Non-matriculated candidates for the Intermediate Arts Examination who do not take Pure Mathematics as one of their subjects are required to pass the Matriculation Examination in Mathematics before receiving credit for the Intermediate Examination ; and the same rule applies to the Entrance Examination to Special Schools.

DEGREES.

The University confers the degrees of Bachelor of Science (B.Sc.), Master of Science (M.Sc.), and Doctor of Science (D.Sc.) in the Faculty of Science; the degrees of Bachelor of Arts (B.A.), Master of Arts (M.A.), Doctor of Letters (D.Litt.), Doctor of Philosophy (D.Phil.), Bachelor of Music (B.Mus.), and Doctor of Music (D.Mus.), in the Faculty of Arts; Bachelor of Commerce (B.Com.), and Master of Commerce (M.Com.) in the Faculty of Commerce; and the Honorary Degree of Doctor of Laws (LL.D.).

Degrees are conferred at a special Congregation of members of the University held for the purpose at least once a year. The formal admission to degrees is made by the Chancellor, or, in his absence, by the Pro-Chancellor. No candidate is entitled to the use of a degree or to any of the privileges of a graduate until he has thus been admitted to the degree, and has signed the Register of Graduates.

REGULATIONS FOR DEGREES IN THE FACULTIES OF SCIENCE AND ARTS.

No undergraduate can obtain a degree without attendance upon certain prescribed courses of study in the University, extending over a period of at least three sessions after matriculation; and no attendance upon lectures in the University prior to matriculation will be accepted as any part of the qualification necessary for a degree without special leave from the Senate. The work of candidates is estimated (1) by means of periodical exercises, class examinations, and inspection of laboratory note-books throughout the session, and (2) by means of

examinations at the end of the session. At the end of each session every undergraduate is required to be certified that he has attended to the satisfaction of the Professors concerned the necessary lectures, laboratory and exercise classes, and that he has passed such class examinations and performed such other exercises as his teachers may prescribe in connexion with their own courses, to the satisfaction of the Faculty, before being admitted to the University examination, and no matriculated student who has been in attendance on courses of study can be allowed to enter for an Intermediate Examination as an External candidate. If a student is prevented by illness from attending any of the terminal Examinations, a medical certificate must be sent to the Dean of the Faculty.

B.Sc. DEGREE IN PURE SCIENCE.

Candidates for the Bachelor's Degree in Pure Science are required to have spent at least three sessions in attendance on courses of study in the University after matriculation in the Faculty and to pass two University Examinations, the *Intermediate* and the *Final*, in addition to the class examinations held by the Professors in connexion with the courses of study. But if the candidates before entrance to the University have passed the Intermediate Examination (or an examination recognised by the University as equivalent to that examination), they will be allowed to sit for the Final Examination after two years of study; *but in no case will the degree be conferred on such candidates until they have completed a further year of study to the satisfaction of the Faculty, after which they become eligible for the degree of Master of Science.*

Candidates are further required to pass an examination in French and German, showing that they possess a knowledge sufficient to enable them to read scientific treatises or memoirs in these languages, before being admitted to the degree. Candidates who have taken either of these

languages at the Matriculation Examination will be exempted from further examination in that language. In special cases other modern languages may be substituted for French and German with the approval of the Faculty.

Foreign students are allowed to count English as one of the languages for the B.Sc. Degree, so that they will be required to offer only one other European language in addition to their native language and English.

FIRST YEAR COURSES.

After matriculation in the Faculty, candidates who have not passed the Intermediate Examination are required to attend courses of study for at least one session in three of the following subjects :—

- (i) Pure Mathematics.
- (ii) Physics.
- (iii) Chemistry.
- (iv) Elementary Biology (Zoology and Botany).

Candidates who are qualified by attendance and progress in two or more of the three subjects, will be admitted to the Intermediate Examination in those subjects in June.

Candidates must pass in the three selected subjects in order to complete the examination, but they may present themselves and pass in two subjects at one examination, and take the remaining subject at a later examination.

Two printed examination papers will be set in each section of the examination, and there will be a practical examination in Physics, Chemistry, Zoology, and Botany. Examiners will not be precluded from holding a *viva voce* examination in any subject, if they think it desirable.

There will be a supplementary examination in September, and candidates who have taken and passed in two or more of their subjects may complete the examination in September. Candidates who have failed in any of the subjects in June may be allowed by the Board of

Examiners to sit for the Examination again in September, or may be required to attend a further course in that subject before being admitted to a subsequent examination.

SECOND AND THIRD YEARS' COURSES.

After passing the Intermediate Examination candidates are required to take University Courses in one principal subject and two subsidiary subjects, or in two principal subjects, under the following groups :—

Principal Subjects.—Mathematics (Pure and Applied), Physics, Chemistry, Geology, Zoology, Botany, Physiology, Anatomy and Anthropology, Biology and Chemistry of Fermentation (together with Chemistry as a double subsidiary subject).

Subsidiary Subjects.—Pure Mathematics, Applied Mathematics, Elementary Pure Mathematics together with Elementary Applied Mathematics, Physics, Chemistry, Geology, Botany, Zoology, Physiology, Logic, Psychology, Metallurgy, Mining, Chemistry of Fermentation, Engineering, Education.*

Double Subsidiary Subjects (each counting as two).—Physics, Chemistry, Geology, Botany, Zoology, Anatomy and Anthropology, Physiology, Chemistry of Fermentation.

The principal subjects must be studied for two years, while subsidiary subjects need in general only be studied for one year ; but Subsidiary Mathematics and Education extend over two years. By the selection of a double subsidiary subject a student is enabled to continue the study of a subsidiary subject for a second year, instead of choosing a fresh subsidiary subject.

Candidates who are qualified by attendance and progress in the selected subjects, are admitted to the Final Examination. The examinations in principal subjects are of a higher standard and cover a wider range than the examinations in subsidiary subjects,

*Education may only be taken by Students in the Training College.

and must in general be taken at the end of the third year ; but in Mathematics, Physics, Geology and Education, candidates may be examined in the first part of the course at the end of the second year.

The examination in a subsidiary subject studied during the year following the completion of the Intermediate Examination may be taken at the end of the year.

The examination will be conducted by means of printed papers, and also by tests of practical work ; but the Examiners will not be precluded from holding a *viva voce* examination in any subject, if they think it desirable.

The B.Sc. class lists will be published in three divisions the first of which will be called Honours, and will contain the names of those candidates who distinguish themselves in their principal subject.

B.Sc. DEGREE WITH HONOURS IN CHEMISTRY.

Three years' study after Intermediate standard has been reached is obligatory.

There will be no alteration in the requirements as regards subsidiary subjects. Under ordinary circumstances a candidate for this degree will have disposed of his subsidiary subjects at the end of the second year after Intermediate, and the whole of the third year will be devoted to Chemistry.

The principal changes in the chemical curriculum will be that the *special* lectures (III) in Organic Chemistry, and an Advanced Course in General and Physical Chemistry will only be taken by those students who are preparing for this Degree with Honours. These lectures will be attended in the third year after Intermediate.

During the first and second years after Intermediate students must work as heretofore a minimum of 15 hours weekly in the Chemical laboratory, whilst during the third year the minimum will be 24 hours.

B.Sc. IN APPLIED SCIENCE.

I.—ENGINEERING.

Candidates may obtain the Degree of Bachelor of Science in any of the three branches of Engineering, viz., (a) Mechanical Engineering, (b) Civil Engineering, (c) Electrical Engineering, after attendance on prescribed courses of study in the University extending over a period of four years after matriculation.

But if a candidate before entrance to the University has passed the Intermediate Science or the First Engineering Examination (or an examination recognised by the University as equivalent), he will be allowed to enter on the second year courses of study, and will be eligible for the degree after three years instead of four.

Candidates are further required to pass an examination in French and German, showing that they possess a knowledge sufficient to enable them to read scientific treatises or memoirs in these languages, before being admitted to the degree. Candidates who have taken either of these languages at the Matriculation Examination will be exempted from further examination in that language. In special cases other modern languages may be substituted for French and German with the approval of the Faculty.*

The courses of study are briefly indicated in the following tables, and further particulars of the various subjects may be found in the Engineering Syllabuses.

FIRST YEAR COURSES.

The prescribed courses for the first year are the same in all the three branches of Engineering.

- (i) Engineering Lectures, Drawing and Workshop.
- (ii) Mathematics, Pure and Applied.
- (iii) Physics, Lectures and Laboratory.
- (iv) Chemistry, Lectures and Laboratory.

*For regulation respecting Foreign Students see page 170.

SECOND YEAR COURSES.

- (i) Engineering Lectures, Exercises, Drawing and Workshop.
- (ii) Mathematics, Pure and Applied.
- (iii) Physics, Lectures.
- (iv) Geology, for Civil Engineers, *or* Metallurgy, for Mechanical and Electrical Engineers.

THIRD YEAR COURSES.

A. For Mechanical Engineers.

- (i) Engineering Lectures, Laboratory, Drawing and Workshop.
- (ii) Mathematics.
- (iii) Workshop in the Summer Vacation.

B. For Civil Engineers.

- (i) Engineering Lectures, Laboratory, Drawing and Workshop.
- (ii) Mathematics.
- (iii) Surveying in the Summer Vacation

C. For Electrical Engineers.

- (i) Engineering Lectures, Laboratory, Drawing and Workshop.
- (ii) Mathematics.
- (iii) Workshop in the Summer Vacation.

FOURTH YEAR COURSES.

Candidates in their fourth year will spend their whole time at Engineering subjects, including Lectures, Laboratory, Drawing and Workshop. Civil Engineers also attend Lectures, Laboratory and Fieldwork in Geology.

At the end of each session there will be a University Examination on the prescribed courses of study, to which candidates will be admitted who are qualified by attendance and progress. Candidates who fail to pass

in the Engineering subjects and at least one of the other subjects, are required to repeat the year's courses; candidates who pass in the Engineering subjects and at least one of the other subjects are allowed to offer their remaining subjects at a subsequent examination.

There will be supplementary examinations in September for first, second and third year candidates to enable those who have passed in Engineering and one other subject to complete the examination if permitted by the Board of Examiners; but the Board of Examiners may if it thinks fit require any candidate to attend a further course of study in any subject before sitting for another examination.

The degree of B.Sc. (Engineering), provided that the Engineering Matriculation Examination be passed on entering upon the course of study, is recognised as a preliminary qualification for appointment of Assistant Engineers to the permanent establishment of the Public Works Department of India, and as exempting from the examination of the Institution of Civil Engineers for Associate Membership.

The University Laboratories in Engineering are also included in the list of suitable technical schools for the training of Engineers in the Mercantile Marine, issued by the Board of Trade.

II.—METALLURGY.

Candidates may obtain the Degree of Bachelor of Science in Metallurgy after attendance on prescribed courses of study extending over a period of three years after matriculation, and passing examinations at the end of each year.

Candidates are required to pass an examination in French and German, showing that they possess a knowledge sufficient to enable them to read Scientific treatises or memoirs in these languages, before being admitted to the Degree. Candidates who have taken either of these languages at the Matriculation Examination will

be exempted from further examination in that language. In special cases other modern languages may be substituted for French and German with the approval of the Faculty.*

The general arrangements for the examinations are similar to those already described in connexion with the Degree in Engineering.

The prescribed courses are as follows :—

FIRST YEAR COURSES.

- (i) Pure Mathematics.
- (ii) Physics, Lectures and Laboratory.
- (iii) Chemistry, Lectures and Laboratory.
- (iv) Metallurgy, Lectures and Laboratory.
- (v) Surveying.

SECOND YEAR COURSES.

A. *For Metallurgists.*

- (i) Metallurgy, Lectures and Laboratory.
- (ii) Engineering, Lectures, Drawing and Workshop.
- (iii) Mathematics (Applied).
- (iv) Geology, Lectures.

B. *For Metallurgical Chemists.*

- (i) Metallurgy, Lectures and Laboratory.
- (ii) Mathematics (Applied).
- (iii) Engineering, Lectures, Drawing and Workshop.
- (iv) Chemistry, Lectures and Laboratory.

THIRD YEAR COURSES.

A. *For Metallurgists.*

- (i) Metallurgy, Lectures and Laboratory.
- (ii) Mining, Lectures, Surveying and Laboratory.
- (iii) Engineering, Lectures and Laboratory.

B. *For Metallurgical Chemists.*

- (i) Metallurgy, Lectures and Laboratory.
- (ii) Chemistry, Lectures and Laboratory.
- (iii) Engineering, Lectures and Laboratory.

For further particulars of these courses, see the Syllabus of Metallurgy.

*For regulation respecting Foreign Students see page 170.

III.—MINING.

In order to obtain the Degree of Bachelor of Science in Mining, candidates are required as a rule to attend a prescribed course of study extending over a period of at least three years after matriculation, and pass examinations at the end of each year ; but with the consent of the Faculty on entrance to the University candidates may take the Matriculation Examination at the end of the first year, and on passing may then count that first year on condition that their work during the year has been satisfactory. Candidates are further required to have practical experience in a mine for at least two months in each year, or to have had at least four months of such experience before entering on their courses in the University.

Candidates are further required to pass an examination in French and German, showing that they possess a knowledge sufficient to enable them to read scientific treatises or memoirs in these languages, before being admitted to the degree. Candidates who have taken either of these languages at the Matriculation Examination will be exempted from further examination in that language. In special cases other modern languages may be substituted for French and German with the approval of the Faculty.*

The general arrangements for the examinations are similar to those already described in connexion with the Degree in Engineering.

The prescribed courses are as follows :—

FIRST YEAR COURSES.

- (i) Mathematics. ||
- (ii) Physics, Lectures and Laboratory.
- (iii) Chemistry, Lectures and Laboratory.
- (iv) Mining, Lectures and Surveying.
- (v) Drawing and Workshop.

SECOND YEAR COURSES.

- (i) Mathematics.

*For regulation respecting Foreign Students see page 170.

- (ii) Mining, Lectures, Laboratory and Surveying.
- (iii) Geology, Lectures and Laboratory.
- (iv) Metallurgy, Lectures and Laboratory.
- (v) Engineering Lectures and Drawing.

THIRD YEAR COURSES.

- (i) Mining, Lectures, Laboratory and Surveying.
- (ii) Engineering, Lectures and Laboratory.
- (iii) Geology, Lectures.
- (iv) Metallurgy, Laboratory.

For further particulars of these courses, see the Syllabus of Mining.

DEGREES IN ENGINEERING, MINING, OR METALLURGY FOR HOLDERS OF DIPLOMAS OF THE UNIVERSITY OF OXFORD.

Graduates of the University of Oxford who have obtained the Diploma in scientific Engineering and Mining subjects granted by that University, are eligible for the Degree of B.Sc. in Engineering, Mining, or Metallurgy, after two years' study, without examination in the previous parts of the course; provided that Mechanical and Electrical Engineers have taken at Oxford the subjects (*d*) Engineering Principles and Machine Drawing, and (*i*) Electricity, and Mining students have taken at Oxford the subjects (*e*) Surveying, (*f*) Geology, and (*h*) Mining and Engineering Hygiene, and Mine Ventilation.

Such students should be matriculated as undergraduates of the University before they commence their course.

M.Sc. DEGREE.

Bachelors of Science may be admitted to the degree of Master of Science after a further course of study extending over not less than one academic year.* Candidates are required—

* In ordinary cases, the year of study must be spent at the University of Birmingham; but candidates desirous of pursuing some special line of study at some other place may receive permission to do so on the recommendation of the Faculty.

either (1) to present a thesis and, if the Examiners think it desirable, to pass a *viva voce* examination ;

or (2) to pass an examination, both written and practical.

Bachelors of Science in Engineering, Metallurgy and Mining may be admitted to the Degree of M.Sc. either as already provided after one year's further study in the University subsequent to the B.Sc., or after two years subsequent to the B.Sc., without attendance at the University ; such candidates will be required—

either (1) to present a thesis, and, if the Examiners think it desirable, to pass a *viva voce* examination ;

or (2) to pass an examination, both written and practical.

Joint work is allowed for the Degree of M.Sc. in Applied Science when—and only when—the work is done at the University of Birmingham, and in all cases of joint work the candidates shall present separate theses and they shall be required to pass an examination of a kind to be decided by the Examiners, both on the subject of their theses and on allied subjects. In Pure Science joint theses for the Degree of M.Sc. are not allowed without the previous consent of the Faculty.

Forms of entry may be obtained from the Registrar and should be returned to him, together with two type-written copies of the thesis presented, on or before May 2nd.

D.Sc. DEGREE.

Candidates may be admitted to the degree of Doctor of Science, after the expiration of at least five academic years after qualifying for the B.Sc. degree, or three years from the Master's Degree, whichever time is the shorter, on the presentation and approval of printed and published work embodying the results of original research.

The Examiners may require a candidate to present himself for any examination or further test, theoretical

or practical, which they may think necessary, and in the case of degrees in Applied Science a candidate must produce satisfactory evidence of practical experience.

Forms of entry may be obtained from the Registrar and should be returned to him, together with two type-written or printed copies of the thesis presented, on or before May 2nd.

For ADMISSION OF GRADUATES of other Universities, see page 194.

ORDINARY COURSES FOR THE B.A. DEGREE.

Candidates for the Degree of Bachelor of Arts are required to have spent at least three sessions in attendance on lectures in the University after having been matriculated in the Faculty, and to pass three University Examinations, the Intermediate, and the First and Second Degree Examinations, in addition to the Class Examinations held by the Professors in connexion with their courses.

Candidates who pass the Intermediate Examination before entering the University are allowed to commence their studies at the second year's courses, and are eligible to sit for their final B.A. Examination after two years of study. Such candidates will not be eligible to receive the degree until they have completed another year of study, after which they will be eligible to receive the M.A. degree.

FIRST YEAR'S COURSES.

After being matriculated in the Faculty, candidates who have not passed the Intermediate Examination are required to attend courses of study for at least one session in each of the following subjects :—

- (i) Latin.
- (ii) English Language and Literature.
- (iii) Either Pure Mathematics or Logic.

- (iv) Two of the following, of which one must be a modern foreign language :—Greek, French, German, Italian, Spanish, Logic or Pure Mathematics (if not already selected under iii), a Physical or a Natural Science, General European History, Geography.

Candidates, who are qualified by attendance and progress in three or more of these subjects, will be admitted to the Intermediate Examination in those subjects.

Two printed examination papers will be set in each of the five subjects of Examination. There will also be a *viva voce* examination in Latin, Greek, and Modern Foreign Languages. The Examiners, however, will not be precluded from holding a *viva voce* examination in any subject, if they think it desirable.

The Intermediate Pass list will be issued in three divisions, the first of which will contain the names of those candidates who pass with distinction.

There will be a supplementary examination in September, and candidates who have taken and passed in three or more of their subjects may complete the examination in September. Candidates who have failed in any of the subjects in June may be allowed by the Board of Examiners to sit for the examination again in September, or may be required to attend a further course in that subject before being admitted to a subsequent examination, but candidates who fail to pass in any subject at the September examination shall be required to repeat the course in such subjects unless specially excused by the Faculty.

SECOND AND THIRD YEARS' COURSES.

Candidates are required to take either a two-year course of study in each of four principal subjects, or a two-year course of study in each of three principal subjects, and a one-year course in each of two subsidiary

subjects. When four principal subjects are taken, one subject must be selected from each of the following groups i—iv ; and when five subjects are taken one must be selected from each of the following groups i—v :—

- (i) One Ancient Language and Literature (Latin, Greek or Hebrew).
- (ii) One Modern Foreign Language and Literature (French, German, Italian, Spanish, or, provided that Greek is not taken under heading (i), Hellenistic Greek).
- (iii) Either English Literature or History (Ancient or Modern).
- (iv) Either Mathematics or Philosophy or Education.*
- (v) A "special subject" to be selected among the subjects taught in the University at compatible hours. This subject must be either
 - (a) A fifth subject (other than the four already selected) from one of the preceding four groups, or
 - (b) A fifth subject not contained in any of the above groups, studied for one year as a subsidiary subject ; e.g., Logic (if not already taken at the Intermediate Examination), a subject or group of subjects taught in the Faculty of Commerce, as approved by the Faculty of Arts, a Physical or Natural Science.

There will be a written examination at the end of each Session, at which two printed examination papers will be set in each subject studied during that Session, and candidates who are qualified by attendance and progress will be admitted to these examinations.

There will also be a *viva voce* examination in Latin, Greek, and Modern Foreign Languages. The Examiners,

* Education may only be taken as a principal subject.

however, will not be precluded from holding a *viva voce* examination in any subject, if they think desirable.

Candidates who pass the examination in one or more of their principal subjects shall not be required to be re-examined in those subjects, provided they have attained a standard equal to the second division at least.

The B.A. pass list will be issued in three divisions, the first of which will contain the names of those candidates who pass with distinction in one or more of their principal subjects.

Candidates who have failed in any of the subjects offered for examination may be required by the Faculty to attend a further course of study in that subject before being admitted to a subsequent examination.

M.A. DEGREE.

Bachelors of Arts may be admitted to the degree of M.A. after at least one further year of study in the University on passing an Examination in one or in two of the principal subjects taken at the B.A. Degree, and presenting a dissertation indicative of acquaintance with the methods of research and connected with the subject or with one of the subjects offered for examination. The dissertation may be submitted during the year following the written examination. The candidate will be specially examined, either orally or in writing, by the examiners on the subject of such dissertation and the Degree will not be awarded until after the dissertation has been approved. Two typewritten copies of the dissertation must be sent to the Registrar on or before May 6th. Candidates studying for one year only will be required to give their whole time to study, and to attend the lectures prescribed in their subject or subjects, but will not be required to sit for terminal examinations. Candidates who cannot give their whole time to study may extend their studies over two or more years; but in

every such case candidates must obtain the Faculty's approval of the course of study they intend to pursue, and must satisfy the Faculty at the end of their first year that their work and progress are satisfactory. In ordinary cases the year or years of study must be spent at the University of Birmingham; but candidates desirous of pursuing some special line of study at some other University (British or Foreign) may receive permission to do so on the recommendation of the Faculty.

ALTERNATIVE COURSES FOR DEGREES IN ARTS.

These courses are designed to allow students, especially those who are preparing for the career of a teacher in the higher forms of secondary schools, to devote themselves to a smaller number of subjects studied at a much higher standard than those prescribed in the preceding regulations.

(a) SCHOOL OF MODERN LANGUAGES.

Candidates may be admitted to the School of Modern Languages after passing the Intermediate Examination in Arts, the following subjects being taken :—(i) French, (ii) German, (iii) Latin, (iv) English Language and Literature, or History, (v) either Mathematics or Logic. Candidates may, however, substitute for Mathematics or Logic higher papers in their principal subject.

This Examination may be taken either at entrance to the University in lieu of the Matriculation Examination, or at the end of one year's course of study at the University after passing the Matriculation Examination.

Candidates not having already been matriculated who offer Logic or higher papers in their principal subject instead of Mathematics at the Intermediate Examination will be required to qualify in Mathematics at the Matriculation Examination, either in July or September.

After completing a three years' course of study, subsequent to passing the Intermediate Examination, and passing three examinations, and submitting a thesis

approved by the Examiners (two typewritten copies of which must be presented), students of the School will be admitted to the degree of Master of Arts in the School of Modern Languages.

Students in the School of Modern Languages are permitted to spend one or two terms of their three years' course at a French or German University and the time spent there is considered as a part of the ordinary course of study in the School, provided that they have been regularly matriculated and attend regular courses of lectures at the Foreign University.

The course for the degree of Master of Arts in the School of Modern Languages embraces the following subjects of study :—

- (i) French *or* German, taken as a principal subject.
- (ii) German *or* French *or* English, taken as a subsidiary subject.
- (iii) An additional subject during the first two years of the course, viz., either German *or* French *or* English *or* Latin.

The First examination in the School of Modern Languages will be held at the end of the first year of study.

The Second examination in the School of Modern Languages will be held at the end of the second year of study.

The Final examination in the School of Modern Languages will be held at the end of the third year of study, and will include papers of the standard of the ordinary M.A. examination in the following groups, of which Groups I and II must be taken in the principal subject, and Group I in the subsidiary subject :—

French.

GROUP I.

- (i) French Essay.
- (ii) Unprepared French Translation.
- (iii) Selected French Authors.
- (iv) History of French Literature.

GROUP II.

- (i) French History and Institutions.
- (ii) Old and Middle French Texts.
- (iii) Romance Philology.
- (iv) A selected period of French Literature.

German.

GROUP I.

- (i) German Essay.
- (ii) Unprepared German Translation.
- (iii) Selected German Authors.
- (iv) History of German Literature.

GROUP II.

- (i) German History and Institutions.
- (ii) Old and Middle High German Texts.
- (iii) Germanic Philology.
- (iv) A selected period of German Literature.

English (if taken as a subsidiary subject).

- (i) English Essay.
- (ii) Shakespeare.
- (iii) Selected English Authors.
- (iv) History of English Literature.

(b) SCHOOL OF CLASSICS.

Candidates may be admitted to the School of Classics after passing the Intermediate Examination in Arts, the following subjects being taken :—(i) Latin ; (ii) Greek ; (iii) English Language, Literature and History ; (iv) A Modern Foreign Language ; (v) Either Mathematics or Logic. Candidates may, however, substitute for Mathematics or Logic, higher papers in their principal subject.

This Examination may be taken either at entrance to the University in lieu of the Matriculation Examination, or at the end of one year's course of study at the University after passing the Matriculation Examination.

Candidates not having been already matriculated who offer Logic or higher papers in their principal subject instead of Mathematics at the Intermediate Examination will be required to qualify in Mathematics at the Matriculation Examination, either in July or in September.

After completing a three years' course of study subsequent to passing the Intermediate Examination, and passing three examinations, and submitting a thesis approved by the Examiners (two type-written copies of which must be presented), students of the School will be admitted to the Degree of Master of Arts in the School of Classics.

The course for the degree of Master of Arts in the School of Classics embraces the following subjects of study:—(i) Latin ; (ii) Greek ; (iii) English Literature, or some modern foreign language and literature, taken as an additional subject during the first two years of the course.

The First examination in the School of Classics will be held at the end of the first year of study.

The Second examination in the School of Classics will be held at the end of the second year of study.

The Final examination in the School of Classics will be held at the end of the third year of study, and will include papers of the standard of the ordinary M.A. Examination in Latin and Greek, as follows:—(i) Selected authors (Latin): 2 papers ; (ii) Selected authors (Greek): 2 papers ; (iii) Unseen translation (Latin): 1 paper ; (iv) Unseen translation (Greek): 1 paper ; (v) Composition (Latin): 1 paper ; (vi) Composition (Greek): 1 paper ; (vii) History of Literature and Language, with special reference to the authors selected (Latin and Greek): 2 papers ; (viii) Ancient History and Archaeology: 1 paper ; (ix) Ancient Philosophy: 1 paper.

(c) SCHOOL OF ENGLISH LITERATURE.

Candidates may be admitted to the School of English Literature after passing the Intermediate Examination in Arts. This Examination may be taken either at entrance to the University in lieu of the Matriculation Examination, or at the end of one year's course of study at the University, after passing the Matriculation Examination.

A higher paper in English Literature may be substituted for Mathematics or Logic at the Intermediate Examination.

Candidates not having already been matriculated who offer Logic or higher papers in English Literature instead of Mathematics at the Intermediate Examination will be required to qualify in Mathematics at the Matriculation Examination, either in July or September.

After completing a three years' course of study, subsequent to passing the Intermediate Examination, and passing three examinations, and on the approval of a thesis (two type-written copies of which must be presented), students of the School will be admitted to the Degree of Master of Arts in the School of English Literature.

The course for the Degree of Master of Arts in the School of English Literature embraces the following subjects of study :—

1. *Principal Subject* : English Literature studied for three years.
4. *Subsidiary* : A classical or modern language studied for two years.
3. *Additional* :
 - (i) A second classical or modern language studied for one year ; but if Latin be not taken as a Subsidiary subject, it must be taken as an Additional subject.
 - (ii) English History studied for one year.
 - (iii) Philosophy studied for one year.

The First examination in the School of English Literature will be held at the end of the first year of study, and candidates will be examined in English, two languages, and History *or* Philosophy.

The Second examination in the School of English Literature will be held at the end of second year of study, and candidates will be examined in English, the Subsidiary Subject and Philosophy *or* History.

The Final examination will be held at the end of the third year of study, and will comprise papers of the standard of the ordinary M.A. Examination. The following scheme of papers may be taken as representing the scope of the examination :—

1. History of English Literature, (i), with set books.
2. History of English Literature, (ii), with set books.
3. History of English Literature, (iii), with set books.
4. Shakespeare.
5. Old English Literature, with translation.
6. Middle English Literature, with translation.
7. The relations of English Literature with the literatures of those languages chosen as subsidiary and additional subjects.
8. Special subject.

In lieu of papers 7 and 8, candidates may offer the general philology of the English Language, and a special philological subject.

The set books will be those taken by Courses III and IV during the three years preceding the examination. Candidates will also be expected to show a general but first hand acquaintance with the principal English authors, and to have studied the history of literary criticism in England.

Students in the School of English Literature are required to attend in their principal, subsidiary, and additional subjects such lectures as are recommended to them by the Professor.

(d) SCHOOL OF HISTORY.

Candidates may be admitted to the School of History after passing the Intermediate Examination in Arts, the following subjects having been taken for Intermediate.

1. History.
2. Latin.
3. French.
- 4 & 5. Two of the following :—
 German ;
 English Language and Literature ;
 Mathematics ;
 Logic.

This Examination may be taken, either at entrance to the University, in lieu of the Matriculation Examination, or at the end of one year's course of study at the University, after passing the Matriculation Examination.

Candidates not already matriculated who offer any subject instead of Mathematics, at the Intermediate examination, will be required to qualify in Mathematics at the Matriculation Examination either in July or September.

After passing the Intermediate Examination, students of the School of History must complete a three years' course of study ; at the close of this, having passed three examinations, and submitted a thesis approved by the Examiners (two type-written copies of which must be presented), they will be admitted to the Degree of Master of Arts in the School of History.

The Course for this Degree embraces the following subjects of study :—

1. Principal Subject, History, studied for three years.
2. Subsidiary.
 - (a) Latin, studied for one year.
 - (b) French, studied for one year.
 - (c) German, studied for one year.
 - (d) Economic History, studied for one year (one term's lectures).
 - (e) Political Theory, studied for one year (one term's lectures).

The First examination in the School of History will be held at the end of the first year of study.

The Second examination at the end of the second year.

The Final examination at the end of the third year.

In the First examination, candidates will be examined in History (including Economic History) and Latin.

In the Second examination, in History, Latin, French and German.

In the Final examination, in :—

1. General European History.
 - (a) Mediaeval (one paper).
 - (b) Modern (one paper).
2. British Institutions (one paper).
3. Two Special Periods (two papers).
4. Ancient History (one paper).
5. Economic History and Political Theory (one paper).
6. Latin, French, and German translation (one paper).

Students in the School of History are required to attend in their Principal and Subsidiary subjects such lectures as are recommended to them by the Professor.

(c) SCHOOL OF PHILOSOPHY.

Candidates may be admitted to the School of Philosophy after passing the Intermediate Examination either in Arts or Science. This examination may be taken either on entrance to the University in lieu of the Matriculation Examination, or at the end of the first year's course of study at the University, after passing the Matriculation Examination.

After completing a three years' course of study subsequent to passing the Intermediate Examination and passing three examinations, and on the approval of a thesis, students of the School will be admitted to the degree of Master of Arts in the School of Philosophy.

The course of study embraces the following :—

FIRST YEAR.

1. Logic (Philosophy, Course I) if not already taken at the Intermediate Examination.

2. Psychology or Moral Philosophy (Courses II or III).
3. History of Ancient Philosophy.
4. Two of the following :—
 - (a) Economic Analysis (General Economics, Course I).
 - (b) Education Course IB.
 - (c) Greek or German.
 - (d) English (an approved course).

SECOND YEAR.

1. Moral Philosophy or Psychology (Courses III or IV).
2. History of Modern Philosophy.
3. One of the following :—
 - (a) Advanced Economic Analysis.
 - (b) Education IIA.
 - (c) Greek or German.
 - (d) British Institutions.
 - (e) English (an approved course).

THIRD YEAR.

1. Metaphysics, Problems of Modern Philosophy.
2. Political Philosophy.

Reading and discussion classes will be held weekly throughout the course.

Students will be expected to be familiar with the ground covered by the books mentioned on p. 391.

An examination will be held at the end of each year upon the work covered by the lectures and classes and such other parts of the general syllabus as may have been prescribed by the Professor at the beginning of the session.

The Final Examination may include questions in all parts of Philosophy included in the above syllabus.

D.Phil. and D.Litt. Degrees.

Masters of Arts may be admitted to the degree of D.Phil. (Doctor Philosophiæ) or D.Litt. (Doctor

Litterarum) after the expiration of at least three academic years from the Master's degree, on the presentation and approval of a Thesis, embodying the results of original research, and after passing a *viva voce* examination on the subject of the Thesis if the Examiners think it desirable. The Thesis shall be submitted to a Board of Examiners, consisting of the two Examiners in the Department concerned, and an expert in the subject of the Thesis, and no doctorate shall be awarded unless the Examiners report that the Thesis is worthy of publication. Forms of application may be obtained from the Registrar, and should be returned accompanied by three printed or typewritten copies of the thesis, on or before April 1st.

Degrees in the Faculty of Commerce.

For the Regulations respecting Degrees in the Faculty of Commerce, see page 427.

Degrees in Music.

For the Regulations respecting Degrees in Music see page 412.

Examination Papers.

Papers set at University Examinations during the previous session are published as soon as possible after the commencement of each session, and may be obtained from Messrs. Cornish Bros., New Street, Birmingham.

Admission of Students to University of Oxford.

Students of the University of Birmingham who have been in attendance for two years and upwards and have passed the corresponding examinations of the University, are entitled, under certain conditions, to admission to the University of Oxford as affiliated junior Students. Members of the University who have completed their three years' course of study and have passed the B.Sc. or B.A. Examination in the Honours Division or Division I are entitled for admission to the status and privileges of an affiliated Student.

ADMISSION OF GRADUATES OF OTHER UNIVERSITIES.

FACULTIES OF SCIENCE AND ARTS.

Graduates or persons who have passed degree examinations of other Universities, who present evidence satisfactory to the Faculty concerned that they are qualified to pursue a course of advanced study or research, are allowed to enter the University and to become candidates for the degree of Master in Pure Science or Master of Arts (without taking the Bachelor's degree) after one year of regular study or research.

Graduates in Applied Science of other Universities may on the same conditions become candidates for the degree of Master in Applied Science after a year of regular study or research.

Persons who take the Master's degree under this regulation will be allowed to become candidates for the Doctor's degree at any time after three years from the attainment of the Master's degree, without further attendance at the University.

Graduates or persons who have passed degree examinations of other Universities in Pure Science may be admitted to the courses in technical subjects prescribed for the two final years and may take the Degree of B.Sc. in those subjects after two years of study, provided that on entrance they give evidence satisfactory to the Professors concerned that they are sufficiently prepared to enter on the work at that stage.

Application, with full statement of the circumstances of the case, must be made to the Dean of the Faculty before the commencement of the Session.

All students admitted under this regulation must be matriculated at the commencement of their period of study, and are then called Graduate Students and are members of the Guild of Undergraduates.

SECONDARY TEACHERS' DIPLOMA REGULATIONS FOR 1912-13.

1. Candidates for the Secondary Teachers' Diploma shall have been admitted to a Degree in the University of Birmingham or in some other University of the United Kingdom, or shall have obtained such other qualifications as shall be approved by the Senate of the University as representing a standard equivalent to such degree.

2. The course for candidates for the Diploma shall extend over one academic year, and shall consist of regular attendance in a Secondary School approved by the University for the purpose (§3) and of attendance upon courses of lectures in the University (§6).

3. The attendance at the Secondary School shall be regular and continuous throughout the year; and it shall be arranged so as to include not less than three school mornings of the week. Each candidate shall, under the general supervision of the Head Master or Head Mistress, be specially attached for given periods to the work of a Master or Mistress, who shall make the candidate as thoroughly acquainted as possible with school methods, arrangements of curriculum, etc. Any work (including preparation for lessons) done by the candidate in connection with the school shall not extend beyond the ordinary hours of morning school. The preparation of lessons need not necessarily be done at the School.

4. A satisfactory report from the Head Master or Head Mistress shall be presented before the candidate can be admitted to the examination.

5. Each candidate will be required in the course of the year to give specimen lessons to a class of the school under the joint supervision of the Head Master or Head Mistress and of the University authorities.

6. Candidates shall attend courses of lectures at the University on such subjects as the following:—Theory and Practice of Teaching, History of Educational Ideas, Psychology, School Hygiene, Voice Production, and Methods of Teaching in Specific subjects. Such lectures shall average not less than five hours per week throughout the year. It will be arranged that the lectures be delivered at the University during the afternoon. The course of attendance at the University shall also, by arrangement with the City of Birmingham Education Committee, include observation of the method and arrangements of elementary schools.

7. The examination shall take place, as a rule, during June, and shall consist both of written papers and of the delivery of practical lessons. The examination papers, while following the general lines of the courses of lectures which have been attended at the University, will not be confined to the actual subject-matter dealt with in them, but will include examination in a wider range of reading on educational subjects. The fee for the examination is £3.

8. The list of successful candidates will be issued in alphabetical order, and no special honours will be assigned to any candidate. The Diploma will indicate at what school the candidate has attended under §3.

The Head Masters or Head Mistresses of the following schools in the Midland district are willing to accept candidates for the Teachers' Diploma in their schools under the conditions of §§ 3, 4, 5, and their schools have been approved by the University for these purposes:—

FOR BOYS :

Birmingham,	King Edward's High School.	*
„	King Edward's Grammar School,	Aston.
„	„	Camp Hill.
„	„	Five Ways.
„	Central Secondary School.	
„	St. Philip's R.C. Grammar School.	
„	George Dixon Secondary School.	

SECONDARY TEACHERS' DIPLOMA REGULATIONS. 197

Bromsgrove School.
Burton-on-Trent Grammar School.
Cheltenham College.
„ Dean Close School.
Coventry, King Henry VIII Grammar School.
Denstone College.
Derby School.
Handsworth Grammar School.
Kidderminster, King Charles I Grammar School.
Leicester, Wyggeston Boys' School.
Malvern College.
Newcastle-under-Lyme School.
Repton School.

Stafford High School for Girls.
Walsall, Queen Mary's High School for Girls.
Warwick, King's High School.
Wolverhampton High School for Girls.

FOR BOYS AND GIRLS:

Birmingham Waverley Road Secondary School.
West Bromwich Municipal Secondary School.

Candidates for the Secondary Teachers' Diploma shall pay a fee of £6 16s 6d. per session in the case of men students, and £6 11s. per session in the case of women students, which shall include the Membership Fee. This fee will admit to the course on the History of Educational Ideas (Mr. Roscoe), to the course on Psychology (Professor Muirhead), and to a course on the General Principles of Teaching, and also to a number of short courses of lectures, which will be specially arranged for Diploma candidates.

Acting Teachers in Secondary Schools will be admitted to all these special courses on payment of a Composition Fee of £1 11s. 6d. per session, which shall include the Membership Fee. The fee for any one of these courses will be 10s., including Membership Fee of 5s.

Communications may be addressed to

Professor ALFRED HUGHES,
at the University.

DIPLOMA OF ART INSTRUCTOR.

A Diploma of Art Instructor is awarded to candidates trained by the University of Birmingham in conjunction with the Municipal School of Art. Candidates for this Diploma are required to have satisfied the following conditions :—

(a) They shall have pursued for not less than four years, in the Birmingham School of Art, a course of study, and *either* shall have attained the grade of Art Teacher or Master, *or* shall have passed through a course of instruction approved by the Committee of the Birmingham School of Art.

(b) Before having attended this course of instruction they shall have passed either (1) the Matriculation Examination of the University of Birmingham, or (2) the Matriculation Examination of some other University, or (3) such other examina-

tion or examinations as may be approved of by the Senate of the University. Provided that, for the present and until the Senate shall otherwise decide, the examination alluded to in this section may be passed during or after the course of study laid down in clause (a).

(c) Subsequently to the passing of the examination mentioned in clause (b) they shall have attended in the University of Birmingham during one year a course in English Literature, and at least two out of the following courses, each of which shall be of one year's duration. Such courses may be taken in separate years or in two years, but not, unless by special permission of the Senate, in one year :—

- (1) Modern History and Archæology.
- (2) Ancient History and Archæology.
- (3) French Language and Literature.
- (4) German Language and Literature.
- (5) Italian Language and Literature.
- (6) Latin.
- (7) Greek.
- (8) External forms of Plants and Animals.
- (9) Earth Structure and Landscape.

(d) They shall have passed examinations in the subject of each course, which examinations may be passed separately at the termination of each course or otherwise.

(e) They shall have attended a course of Lectures on the Art of Teaching delivered in the University.

(f) Each candidate shall have acted for at least twelve months as an Assistant Teacher or Student Teacher under the supervision of one of the Teachers of the Birmingham School of Art, or of some other approved teacher, and shall have received, from such teacher, a certificate of competency to teach.

INSPECTION OF SCHOOLS.

The University undertakes to inspect and report upon Secondary Schools in the Midland District under the following conditions :—

(i) The school shall be open to the inspection of the Organising Professor of Education or other official of the University during the whole of the academic year, *i.e.*, September to July, on which the report is to be made.

(ii) The representative of the University shall consider the curriculum of the school in conjunction with the Head Master or Head Mistress of the school ; he shall have the opportunity of hearing lessons given by members of the staff, and of discussing the methods of teaching with them ; and he shall from time to time see written work of the scholars.

(iii) It is intended, however, that much freedom shall be given to teaching staffs as regards methods and curricula ; and they will not be required to conform to the conditions of any special examination.

(iv) An examination will be held near the end of the school year, on which Senior or Junior School Certificates will be awarded. The papers will be set by examiners of the University, after they have made themselves fully acquainted with the aims and methods of the teachers of the classes concerned, and the scope of their work. But the school may, if preferred, make use of the papers set by the University for other purposes, *e.g.*, those of the Matriculation Examination.

(v) The University will furnish a report to the authorities of the school at the end of the school year ; such report will take account of the results both of examination and inspection, and may deal with such matters as buildings and equipment.

(vi) If desired, one department of a school (*e.g.*, a modern side) may be inspected and reported upon separately.

(vii) The following will be the charges to the school :—

For Inspection, for a school of 100 scholars
or less £5 os.

For Inspection, for a school of between 100
and 200 scholars £7 10s.

For the Report £2 os

For the Certificate Examination one shilling per candidate per paper, and (a) where special papers are set for the school, £1 1s. per paper ; (b) where the papers of the Matriculation Examination are used, no charge will be made for the paper.

Where a viva-voce or practical examination in any subject is held, there will be a charge of 1s. per candidate if the examination takes place at the University ; if held elsewhere, the charge will be 1s. per candidate, with a minimum of £1 1s., and the Examiner's travelling expenses.

(viii) Each scholar who qualifies for a Senior School Certificate must pay £1 before it can be issued to him, and will be required to pay £1 in addition if he uses it as the qualification for matriculating at the University.

Each scholar who qualifies for a Junior School Certificate must pay 10s. before it can be issued to him.

FACULTY OF SCIENCE.

Syllabuses of Courses.

MATHEMATICS.

Mason Professor : R. S. HEATH, M.Sc. ; M.A. (Cantab.).
D.Sc. (Lond.), late Fellow of Trinity College, Cambridge.

Lecturer : C. T. PREECE, M.A. (Cantab.).

Assistant Lecturers :

S. B. McLAREN, M.A. (Cantab.).

A. J. KENNY, M.A. (Dublin).

Pure Mathematics.

Course I.

Mondays, Tuesdays, Thursdays, and Fridays at 11.30,
at Edgbaston (Dr. Heath and Mr. McLaren) ; also at
Edmund Street at 12.30 (Mr. Preece and Mr. Kenny).

FEE :—£4 4s.

ALGEBRA.—Elementary properties of surds and imaginaries ; simultaneous quadratics and equations like quadratics ; theory of indices ; theory and practical applications of logarithms ; permutations and combinations ; arithmetical and geometrical progressions, and other simple series ; the binomial theorem for a positive integral exponent.

TRIGONOMETRY.—Trigonometrical ratios of acute angles ; solution of right-angled triangles, and simple problems of heights and distances ; circular measure of angles ; length of arcs of circles ; angles of any magnitude and sign ; trigonometrical ratios of obtuse angles ; sine, cosine, and tangent of the sum and difference of angles ; formulæ for the ratios of the double angle, triple angle, and the half angle ; transformation of sums and differences of sines and cosines into products, and vice-versa ; properties of triangles ; solution of triangles ; problems on heights and distances ; the chief circles related to a triangle ; regular polygons ; areas of circles, sectors, and segments.

GEOMETRY.—The substance of Euclid, Book XI., 1—21, together with properties, areas of surface, and volumes of polyhedra, cylinders, cones, and spheres.

ELEMENTARY ANALYTICAL GEOMETRY.—Rectangular co-ordinates ; distance between two points ; areas of triangles and polygons ; the equations of loci ; intersection of loci ; the equation of the line joining two points ; the equation of the circle.

Course II.

Mondays, Wednesdays, and Fridays, at 10.30 at Edgbaston (Dr. Heath and Mr. Kenny) ; also Tuesdays, Fridays, and Saturdays, 10.30 at Edmund Street (Mr. Preece).

FEE :—£4 4s.

ALGEBRA.—Theory of quadratic functions and quadratics, their graphs and maxima and minima values ; the remainder and factor theorems of rational functions ; theory of rational and partial fractions ; the convergence and properties of the binomial, exponential and logarithmic series.

TRIGONOMETRY.—Inverse notation ; graphs of the trigonometrical functions ; hyperbolic functions.

SOLID GEOMETRY.—The elementary properties of sections of a cone ; rectangular co-ordinates in three dimensions ; the equation of surfaces ; cylindrical surfaces ; the equations of planes and lines ; the equation of the sphere.

DIFFERENTIAL CALCULUS.—Methods of differentiation ; Taylor's and Maclaurin's theorems ; theory of maxima and minima.

INTEGRAL CALCULUS.—Methods of integration ; calculation of curve lengths, areas and volumes by single integration.

Course III.

Mondays, Wednesdays, and Fridays, at 9.30 at Edgbaston (Mr. Kenny).

FEE :—£4 4s.

ANALYTICAL GEOMETRY up to the elementary properties of the conic sections.

DIFFERENTIAL CALCULUS.—Tangents, normals, asymptotes, singularities of curves ; tracing of curves ; properties of special curves (including sine-curve, logarithmic curve, cycloids and catenary).

INTEGRAL CALCULUS.—Formulae of reduction ; differentiation and integration of an integral with regard to constants ; properties of special curves ; double and triple integration.

DIFFERENTIAL EQUATIONS.—Standard forms ; singular solutions ; linear and homogeneous equations with constant coefficients ; special equations commonly occurring in dynamical and physical problems.

Course IV.

Lecture days by arrangement.

FEE :—£4 4s.

ANALYTICAL GEOMETRY of three dimensions.

THEORY OF EQUATIONS.

ELEMENTARY THEORY OF FUNCTIONS OF A REAL VARIABLE.

FOURIER'S SERIES.

Applied Mathematics.

Course I.

Mondays, Wednesdays, and Fridays, at 9.30 at Edgbaston (Dr. Heath) ; or Mondays, Wednesdays, and Thursdays, at 9.30, at Edgbaston (Mr. Preece) ;

or Tuesdays, Fridays, and Saturdays, at 9.30, at Edmund Street (Mr. Preece).

FEE :—£4 4s.

STATICS.—The theory of the composition and resolution of forces ; the theory of moments ; parallel forces and couples ; equilibrium of bodies under the action of forces in one plane ; force-diagrams and link-polygons ; centres of gravity ; the simpler machines, balances ; pulleys, screw-jacks, &c. ; friction and its effects in the working of machines ; theory of work and efficiency of machines ; statics of jointed frame-works.

DYNAMICS.—Definition, measurement, and properties of velocities and accelerations ; measurement of momentum and force ; work and energy ; motion of a body under the action of a force which is constant in magnitude and direction, including the motion of projectiles ; theory of impacts ; uniform circular motion ; harmonic oscillations ; the simple pendulum ; theory of dimensions of dynamical quantities ; change of units.

HYDROSTATICS.—Equilibrium of liquids under the action of gravity ; pressures of liquids on plane areas and on solid bodies partially or wholly immersed ; Boyle's and Charles' laws of gases ; hydrostatic machines, such as presses, barometers, pumps, &c.

Course II.

Mondays, Wednesdays, and Fridays, at 10.30, at Edgbaston (Mr. McLaren).

FEE :—£4 4s.

STATICS.—Continuation of the subjects of the Course I and more difficult applications ; application of integral calculus to the determination of centres of gravities ; stability ; equilibrium of strings ; small curvatures of flexible beams.

DYNAMICS OF A PARTICLE.—Application of differential and integral calculus to the measurement of velocities and accelerations ; motion of chains under the action of gravity ; motion under central forces ; motions of particles on fixed curves.

RIGID DYNAMICS.—Moments of inertia ; motion of a rigid body about a fixed axis ; theory of impacts and centres

of percussion ; theory of angular momentum and kinetic energy ; motions of bodies in two dimensions under the action of given forces.

HYDROSTATICS.—Metacentres, stability and small oscillations of floating bodies.

For Vacation Reading, see page 469.

REQUIREMENTS FOR DEGREES.

Intermediate Examinations in Science and Arts :—

Course I.

B.Sc. Degree :—

- (i) Mathematics as a Principal Subject :—
Courses II and III in Pure and Courses I and II in Applied Mathematics.
- (ii) Mathematics as a Subsidiary Subject :—
One of the following combinations :
 - (a) Courses II and III in Pure Mathematics.
 - (b) Courses I and II in Applied Mathematics (for students who know sufficient Pure Mathematics).
 - (c) Course II in Pure and Course I in Applied Mathematics.

B.A. Degree :—

- (i) (When Mathematics is taken for two years). The same combinations as for Subsidiary Mathematics for B.Sc. Degree.
 - (ii) (When taken for one year only). Course II in Pure Mathematics or Course I in Applied Mathematics.
-

PHYSICS.

THE UNIVERSITY, EDGBASTON.

Mason Professor: J. H. POYNTING, M.Sc.; Sc.D. (Cantab.), Hon. D.Sc. (Vict.), F.R.S., late Fellow of Trinity College, Cambridge.

Lecturer: G. A. SHAKESPEAR, D.Sc.; M.A. (Cantab.), B.A., B.Sc. (Lond.).

Assistant Lecturers: { G. BARLOW, D.Sc.; D.Sc. (Lond. and Wales).
H. B. KEENE, B.Sc. (Birm.)
E. E. FOURNIER D'ALBE, M.Sc.; B.Sc. (Lond.)

Special Lecturer on Experimental Physics:
G. A. SHAKESPEAR, D.Sc.; M.A., B.Sc.

INTRODUCTION.

All First Year Undergraduates in Pure Science, in Applied Science (including Engineering, Metallurgy, and Mining) and in Medicine, are required to take Course I, which includes three lectures and two hours laboratory weekly.

Undergraduates who, having passed the Intermediate Examination in Science, select Physics as a subject for their degree, may take it as a Single Subsidiary, as a Double Subsidiary, or as a Principal Subject. The following are the courses in the different cases:—

Single Subsidiary: Course II, which includes three lectures weekly, and six hours laboratory weekly for one session.

Double Subsidiary: Course II and six hours laboratory weekly in the second year. Course III, which includes three lectures weekly, and six hours laboratory weekly in the third year.

Principal: Course II and nine hours laboratory weekly in the second year. Course III and twelve hours laboratory weekly in the third year.

All Second Year Undergraduates in Engineering take Course II.

The lectures and laboratory are open to all students who are qualified to take them, whether they are Undergraduates or not.

Course I.

DR. SHAKESPEAR.

For First Year Undergraduates in Pure Science, Applied Science and Medicine.

Lecture Hours.—Mondays, Wednesdays and Thursdays, 10.30.

Practical Class.—Mondays, 11.30 to 1.30, or 2.30 to 4.30, or Fridays, 2.30 to 4.30.

For Vacation Reading see page 469.

FEE :—£5 15s. 6d.

The lectures will be on such parts of the following syllabus as can be dealt with in the time.

Position, Velocity and Acceleration always relative to a standard. Effect of change of standard. Resolution and Composition of Velocities and Accelerations. Uniform Motion in a circle. Conical Pendulum. Determination of *g*. Gravitation. Dimensions and Mass of the Earth.

PROPERTIES OF MATTER.—*Solids* : Sticking and sliding friction. Strains and Stresses. Bulk Strain and Shear Strain. Various kinds of permanent change of shape and rupture. Crystalline and Amorphous Solids. *Liquids* : Viscosity. Compressibility. Surface Tension. *Gases* : Compressibility. Viscosity. Kinetic Theory of Matter. Diffusion. Solution. Osmotic Pressure.

HEAT.—Temperature. Mercury in-glass thermometer. Determinations of high and low temperatures. Expansion of solids and liquids. Circulation and Convection in Liquids. Expansion of gases at constant pressure and increase of pressure at constant volume. Gas thermometer. Circulation and Convection in gases. Movements of the Atmosphere. Quantity of Heat. Specific Heat and simple methods of measuring it. Conduction of Heat. Conductivity. Heat a form of

Energy. The forms of Energy and their transformations according to fixed rates of exchange. The Conservation of Energy. Methods of determining the Mechanical Equivalent of Heat. The nature of Heat on the Kinetic Theory of Matter. Limitation in the amount of heat which can be transformed to work. Change of State. Latent Heat. Liquid-Vapour Change. Evaporation. Boiling. Vapour Pressure. Dependence of boiling point on Pressure, and explanation. Modes of measuring Vapour Pressure. Explanation of Vapour Pressure on the Kinetic Theory. Water Vapour in the Atmosphere. Hygrometers. Cloud. Fog. Dew. Solid-Liquid Change. Melting Point. Change of volume on melting. Effect of pressure on Melting Point. Regelation. Radiation. High and Low Radiating and Absorbing Powers. Comparison of properties of radiation from hot bodies and properties of light. Identification. The Spectrum. Substances absorb the radiations which they can emit. Dark lines in Solar and Stellar Spectra.

LIGHT.—Light a form of Energy. Rectilinear Propagation. Shadows. Eclipses. Inverse Square Law. Simple Photometers. Reflection. Refraction and Dispersion. Velocity of Light. Light a form of Wave Motion. Illustrations of Interference. The Diffraction Grating. Polarisation of Light. Mirrors. Prisms. Lenses. The Eye. Simple forms of Telescope and Microscope.

SOUND.—Sound arises from vibrating sources which send out longitudinal waves in air. Characteristics of the waves, corresponding to Loudness, Pitch and Quality. Velocity of Sound in air, and other media. Determinations of Frequency. Resonance. Its use to analyse sounds. Harmonics and Upper Partials. Quality. Transverse Vibrations of Strings. Vibrations of air in Pipes. Other vibrating sources. Beats. Concord and Discord. Combination Tones.

MAGNETISM.—Properties of Magnets. The two poles, their equality and inseparability. Magnetisation by Induction. Methods of making Magnets. Inverse Square Law. Magnetic Fields and Lines of Force. Strength of Poles and Moments of Magnets. The Earth as a Magnet. Declination, Dip and Intensity. Magnetic Properties of different substances. Temperature and Magnetic Qualities.

ELECTRICITY.—The two kinds of Electrification and simple modes of producing them. Conductors and Insulators. The Gold Leaf Electroscope. Electrification by Induction. Frictional Electrical Machines. The Electro-

phorus. The Wimshurst Machine. The Leyden Jar. Production and Disappearance of the two Electrifications, always in equal quantities. The Electric Field considered as the seat of Electric Strain, Electric Forces, and Electric Energy, respectively. The Inverse Square Law. The Unit of Charge. Potential, Capacity, and Energy of Charge. Electrometers. The effect of the medium. Specific Inductive Capacity.

ELECTRO-MAGNETISM.—Electric Discharge and the Magnetic Effects accompanying it. Electro-magnetic Waves. Electric Current. Voltaic and Storage Cells. The Magnetic Properties of the Current Circuit. The Ampère. Galvanometers and Ampère Meters. The Forces on Current Circuits in a Magnetic Field. Electric Motors. Ohm's Law. Resistance. The Heat developed in the Circuit. Joule's Law. The Ohm. The Volt. Electrolysis. Electro-chemical equivalents. Thermo-electricity. The Induction of Currents. Lenz's Law and Faraday's Law. The Dynamo. The Induction Coil. The Transformer.

Text Books.

DUFF, *Text-book of Physics*,

or some of the following :—

D. E. JONES, *Lessons in Heat and Light*

STEWART AND SATTERLY, *Text-book of Heat*

EDSER, *Heat for Advanced Students.*

GLAZEBROOK, *Light.*

EDSER, *Light for Students.*

CATCHPOOL, *Text-book of Sound.*

HADLEY, *Magnetism and Electricity for Students.*

DAVIDGE AND HUTCHINSON, *Technical Electricity.*

NOTE.—Every member of the class is required to have a slide rule for calculations. Slide rules, price from 3s. 6d. each, may be obtained in the Laboratory.

Course II.

PROFESSOR POYNTING.

Lectures on Elementary Mathematical Physics for all Undergraduates taking Physics as a subject for a degree, and for Second Year Undergraduates in Engineering.

Lecture Hours.—Mondays, Wednesdays and Fridays, at 11.30.

FEE for Lectures :—£3 13s. 6d.

Laboratory Hours.—Six hours weekly if Physics is a Subsidiary Subject, nine hours weekly if it is a Principal Subject, at times to be arranged.

FEE :—Six hours weekly, £6 6s. ; nine hours weekly, £7 17s. 6d.

For Vacation Reading see page 469.

The lectures will be on such parts of the following syllabus as can be dealt with in the time. The laboratory work extends over the whole range.

MECHANICS.—Simple Harmonic Motion. Simple Pendulum. Motion of a body round a fixed Axis. Compound Pendulum. Methods of determining relative and absolute values of *g*. Gravitation. Methods of determining *G*.

PROPERTIES OF MATTER.—*Solids* : Friction. Moduli of Elasticity and methods of determining them.—*Liquids* : Viscosity. Bulk Modulus of Elasticity. Surface Tension. *Gases* : Viscosity. Compressibility. Kinetic Theory of Gases. Molecular Dimensions.

HEAT.—The Laws of Thermodynamics. Absolute Scale of Temperature. Volume-pressure and Entropy-temperature Diagrams and their use. Solution. Osmotic Pressure. Exact Measurements in Heat.

MAGNETISM AND ELECTRICITY.—General propositions with regard to an inverse square field of force. *Magnetism* : Magnetic Measurements. The Earth's Field. Paramagnetism and Diamagnetism. Theory of the Magnetic Field. *Electricity* : Theory of the Electric Field. Electric Measurements. *Electro-magnetism* : Electric Discharge. Magnetic Properties of Current Circuits. Heating Effects. Chemical Effects. Thermo-electricity, Current Induction. Electro-magnetic Measurements. Theory of the Electro-magnetic Field.

OPTICS.—In the Spring Term all second year laboratory students will be expected to read the Geometrical Optics in Edser's *Light*, and to perform a series of illustrative experiments in the laboratory.

Text Books.

JACKSON AND ROBERTS, *A First Dynamics*.

EDSER, *General Physics*.

POYNTING and THOMSON, *Properties of Matter*.

POYNTING and THOMSON, *Heat*.

EDSER, *Light for Students*.

FOSTER and PORTER, *Electricity and Magnetism*.

WATSON, *Practical Physics*, as a Manual for the Laboratory Course.

Course III.

PROFESSOR POYNTING, DR. BARLOW AND MR. KEENE.

Lectures during the Winter and Spring Terms on any parts of the syllabus of Course II not dealt with in the previous Session and on the syllabus below. The work is more advanced than that of Course II. Members of the Class will be required to write essays on Physical Subjects, to be read to and discussed by the Class. The laboratory work extends over the whole range.

Lecture Hours.—Tuesdays, Thursdays and Saturdays, at 9.30.

FEE :—£3 3s.

Laboratory Hours.—Six hours weekly if Physics is a Double Subsidiary Subject, twelve hours weekly if it is a Principal Subject, at times to be arranged.

FEES :—Six hours weekly, £6 6s.; twelve hours weekly, £9 9s.

MECHANICS.—Some problems in Mechanics.

ELECTRO-MAGNETISM.—Continuation and amplification of the Syllabus in Course II.

SOUND.—Nature of Sound Waves in Air. Velocity of Sound. Measurements of Frequency. Forced Vibrations. Analysis of Waves. Strings. Pipes. Maintenance of Vibrations. Interference of Sound Waves. Beats. Concord and Discord. Combination Tones.

LIGHT.—Systems of Thick Lenses. Wave Theory. Interference. Diffraction. Polarisation by Reflection and Refraction. General account of Polarisation by Crystals. Circular and Elliptic Polarisation. Rotation of Plane of Polarisation. Polarimeters.

SPECTROSCOPY.—Early Spectrum observations. Kirchhoff's Law. Kinds of spectra. Nature of lines in spectra. The Prism. Plane diffraction gratings. Concave gratings. Spectrographs. Echelon gratings. Series of Lines. Methods of producing Spectra. Infra-red spectrum. Zeeman effect. Doppler's Principle. The Sun. The Spectro-heliograph. Stellar spectra.

RADIO-ACTIVITY.—Cathode Rays. X Rays. General Properties of Radio-active elements. Theory of Ionisation of Gases. The charge and nature of the α particle. The

absorption and range of the α particle. β and γ Rays. The disintegration theory. Properties of emanations and active deposits. Methods of measuring life periods of the radio-active elements. The age of the earth.

Text Books.

THOMSON, *Elements of Electricity and Magnetism.*

THOMSON, *The Corpuscular Theory of Matter.*

POYNTING and THOMSON, *Sound.*

EDSER, *Light for Students.*

BALY, *Spectroscopy.*

NEWALL, *The Spectroscope and its Work.*

McCLUNG, *Conduction of Electricity through Gases and Radio-activity.*

M.Sc. DEGREE IN PHYSICS.

For the general regulations, see page 178. Candidates are required to attend the Conference and to present evidence from time to time that they are studying Physical work other than that relating to their own research.

CONFERENCE ON RECENT ADVANCES IN PHYSICS.

A conference will be held on Tuesdays, at 5.30, for members of the Staff, Graduates, and Advanced Students, at which recent work will be described and discussed.

Those who wish to join the Conference should consult the Professor.

ELEMENTARY COURSE ON EXPERIMENTAL PHYSICS.

MR. FOURNIER D'ALBE.

A course of lectures especially designed for Medical and Dental candidates for the Conjoint Board Examination is given during the Winter and Spring Terms. (*See Medical Syllabus.*)

Lecture hours :—Tuesdays and Thursdays, 10.30.

Laboratory hours :—Friday, 10—12 ; 2.30—4.30.

FEE :—£5 5s.

COURSE ON SOUND.

DR. SHAKESPEAR.

Especially for students in Music. See page 409.

LABORATORY WORK FOR GRADUATES OR FOR
STUDENTS DESIRING SPECIAL COURSES.

The Laboratory is open for purposes of Research or for Special Courses, from 10 to 1 and 2 to 5 daily, except Saturdays.

FEES:—Six hours weekly, £6 6s.; nine hours, £7 17s. 6d.; twelve hours, £9 9s.; each succeeding six hours, £2 2s.

TIME TABLE.

CHEMISTRY.

THE UNIVERSITY, EDGBASTON.

Mason Professor : PERCY F. FRANKLAND, M.Sc. ; Ph.D.
(Würz.), LL.D. (St. Andrews), F.R.S.

Assistant Lecturers : { HAMILTON McCOMBIE, M.A. (Aber.), B.Sc.
(Lond.), Ph.D. (Strass.), A.R.C.S. F.I.C.
C. K. TINKLER, D.Sc. ; B.Sc. (Wales).
J. E. COATES, M.Sc. (Wales).

Assistant Lecturers and Demonstrators : { E. P. FRANKLAND, M.Sc., ; B.A.
(Cantab), Ph.D. (Würz.)
ERNEST VANSTONE, M.Sc. (Wales).
(Vacant).

Special Lecturer on Physical Chemistry :
J. E. COATES, M.Sc.

The new Chemical Department inaugurated in 1909 at the University, Edgbaston, is housed in a separate building, consisting of four floors. There is a large lecture theatre, capable of seating 300 persons, a smaller lecture room to seat 60 ; a Junior Laboratory with nearly 100 working benches, in addition to special laboratories for Organic, Physical, Electro-chemical, Analytical, and Public Health Chemistry, also Research Laboratories, Operation Rooms, Libraries, Dark Rooms for Spectroscopic, Polarimetric, Photometric, and Photographic purposes, etc., etc.

A special feature in the department is the electrical installation, which includes direct and alternating current dynamos, a storage battery of 48 cells, and a network of wires permitting currents of very varied density and voltage being obtained in almost every room in the building.

Course I.

PROFESSOR FRANKLAND.

A. This part of the course is arranged (1) to give a full exposition of the general principles of Chemical Science, (2) for the systematic study of the properties of the more important elements and their compounds, and (3) to indicate some of the chief applications of Chemistry in the Arts and Manufactures.

Three hours weekly during the Winter and Spring Terms. Further meetings of the class are specially arranged for tutorial work. Attendance at this tutorial class is compulsory, as is the performance of the exercises set by the Professor.

Lecture hours.—Mondays, Wednesdays and Thursdays, at 9.30.

The tutorial classes are held at hours shown in the time table, page 230.

FEE :—£4 4s.

For the guidance of students the following Syllabus of the requirements for the Intermediate Examination in Inorganic Chemistry is appended:—

I. GENERAL.

Nature of chemical change. Elements and compounds. Chemical affinity and the modes of chemical action. Regularities exhibited in the formation of compounds. Indestructibility of matter. Laws of constant, multiple, and equivalent proportions. Atomic theory. States of matter. Properties of Gases. Kinetic theory. Molecular theory. Avogadro's hypothesis. Atomic and molecular weights. Vapour density, isomorphism, atomic and molecular heats.

Chemical nomenclature, formulæ, equations. Valency.

Solution. Osmotic pressure. Electrolysis. Ionic theory. Acids, bases, and salts.

Thermo-chemistry. Energy, its transformation and conservation. Liquefaction of Gases.

II. SPECIAL.

Hydrogen. Oxygen. Ozone. Allotropy. Water; physical properties, natural waters. Hydrogen peroxide. Nitrogen; circulation of, in nature. The Atmosphere. Compounds of nitrogen with hydrogen; oxides of nitrogen; oxyacids of nitrogen; halogen compounds of nitrogen.

Carbon, its circulation in nature. Coal. Oxides of carbon. Hydrocarbons; methane, ethylene, acetylene. Combustion, flame, and luminosity.

Coal-gas, producer-gas, water-gas, oil-gas. Artificial illumination.

Chlorine and the halogens. Their compounds with hydrogen, their oxides, and oxyacids.

Sulphur; compounds with oxygen, hydrogen, and carbon oxyacids of sulphur.

Phosphorus; compounds with hydrogen, and oxygen; oxyacids of phosphorus. Arsenic, antimony, and bismuth; comparison of their properties and compounds with those of phosphorus and nitrogen.

Boron and silicon, and their more important compounds.

Classification of the Elements. Periodic law.

METALS.

Occurrence, modes of isolation, and general properties of the following metals, and their more important compounds:—Sodium, potassium, barium, strontium, calcium, magnesium, iron, chromium, aluminium, zinc, manganese, nickel, cobalt, mercury, copper, bismuth, cadmium, lead, tin, silver, and gold.

TEXT BOOKS.—Kipping and Perkin's Inorganic Chemistry.

Senter's Inorganic Chemistry.

Alex. Smith's General Inorganic Chemistry.

Holleman's Inorganic Chemistry.

B. This part of the course includes an introduction to the study of Organic Chemistry, with a description of the properties, relations, and methods of preparation of the more important groups of Carbon-compounds.

Three hours weekly during the Summer Term.

Lecture hours.—Mondays, Wednesdays and Thursdays, at 9.30.

FEE :—£1 11s. 6d.

For the guidance of students the following Syllabus of the requirements for the Intermediate Examination in Organic Chemistry is appended :—

III. ORGANIC CHEMISTRY.

DR. E. P. FRANKLAND.

Analysis of Organic compounds. Formulæ. Isomerism. Structure.

Hydrocarbons. Paraffins, Ethylene, Acetylene. Halogen derivatives. Chloroform. Iodoform.

Alcohols. Fermentation. Ether. Aldehydes. Chloral. Fatty Acids. Fats, Soap, and Saponification. Glycerine. Glycol. Oxalic acid. Succinic acid. Tartaric acid. Lactic acid. Citric acid.

Carbohydrates.

Cyanogen-compounds and Amines.

Urea, Glycocol, Uric acid.

Aromatic compounds. Benzene, Phenol, Aniline, Benzoic acid, Salicylic acid.

TEXT BOOK.—Remsen's Organic Chemistry.

In connection with these Courses, IA and IB, Tutorial Classes will be held during the Session on—

Tuesdays, 10.30 (Engineers and Miners) ;

Mondays, 2.0 (all other students).

Attendance at this class is compulsory, except in the case of students who have been exempted by the Professor.

No fee.

A special class on the Metals and Theoretical Foundations of Analytical Chemistry is held during the Session on Wednesdays at 11.30 a.m.

Attendance is compulsory for first-year students.

No Fee.

Course II.

PROFESSOR FRANKLAND.

A. *Advanced Organic Chemistry*.—This course extends over two years, and is divided into two parts :—

(i) Carbon-compounds of the Fatty Series.

(ii) Aromatic and other Cyclic Compounds.

Only one of these parts will be taken in each year. The class meets on Tuesdays and Wednesdays at 4 p.m. during the Winter and Spring Terms.

FEE for each part :—£2 2s.

DR. TINKLER.

B. *Advanced Inorganic Chemistry*.—This course is devoted to the consideration of special branches of Inorganic Chemistry, and direction is also given as to the private reading which should be pursued by students.

The class meets by arrangement once weekly during the Session.

FEE :—£1 is.

Course III.

PROFESSOR FRANKLAND.

A. *Advanced Organic Chemistry*.—Part (i) or (ii) of Course II A.

The Class meets on Tuesdays and Wednesdays at 4 p.m. during the Winter and Spring Terms.

FEE :—£2 2s.

MR. COATES.

B. *Physical Chemistry*, Course I.—This Course is designed to give a general account of the elements of Physical Chemistry. The class meets at 4 p.m. on Mondays and Thursdays during the Winter and Spring Terms.

FEE :—£2 2s.

Course IV.

DR. MCCOMBIE AND OTHERS.

A. *Advanced Organic Chemistry*.—Lectures on special subjects attracting attention at the time will be delivered during the Winter, Spring and Summer Terms.

The class meets once weekly.

FEE :—£1 is.

MR. COATES.

B. *Physical Chemistry*. Course II.—In this Course certain branches of the subject will be treated more fully than in Course I. The Class meets on Tuesdays at 10 a.m. during the Winter, Spring and Summer Terms.

FEE :—£1 is.

In connection with this course a knowledge of the elements of the differential and integral calculus is necessary.

ELECTRO-CHEMISTRY.

MR. COATES.

A course on Electro-chemistry will be held during the Spring Term, in which the following subjects will be studied: (*a*) the electrolytic preparation of inorganic and organic substances; (*b*) electrolysis of fused electrolytes; (*c*) electro-thermal reactions and the use of electric furnaces. In connection with this course arrangements will be made for practical work and for demonstrations.

The course will form part of the Honours Course in Physical Chemistry (Course IV B), but will be open also to students not taking the Honours Course.

FEE (for students not taking the whole of Course IV B): 10s. 6d.

Practical Chemistry.**I.**

Not less than nine hours weekly during the three terms must be devoted to Laboratory work.

The Course will include:—

Preparation of pure substances, gaseous, liquid, and solid.

Experiments illustrating the laws of combination

Simple qualitative analysis, simple gravimetric and volumetric determinations.

II.

Not less than fifteen hours weekly during the three terms must be devoted to Laboratory work.

The Course will include:—

Advanced qualitative and quantitative analysis.

Simple organic preparations.

III.

Not less than fifteen hours weekly during the three terms must be devoted to Laboratory work.

The Course will include :—

Gas analysis, molecular weight, and other physical determinations.

Advanced organic preparations and identification of organic compounds.

IV.

Not less than 24 hours weekly during the three terms must be devoted to laboratory work.

FEE: £16 16s. od.

LABORATORY PRACTICE.

The Laboratory will be open daily from 9.30 to 5, except on Saturdays, when it will be closed at 1 p.m.

Each student will pursue an independent Course of study to be determined after consultation with the Professor. He will be guided in his operations by the Professor or his Assistants.

TEXT BOOKS.—NEWTH'S *Manual of Chemical Analysis, Qualitative and Quantitative* (Longmans); TREADWELL'S *Quantitative Analysis* (Wiley & Sons); SUTTON'S *Volumetric Analysis* (Churchill); COHEN'S *Practical Organic Chemistry*; SUDBOROUGH & JAMES' *Practical Organic Chemistry* (Blackie); MEYER TINGLE'S *Determination of Radicles in Carbon Compounds* (Wiley & Sons); ELBS' *Electrolytic Preparations*; SMITH'S *Electro-chemical Analysis*; FINDLAY'S *Practical Physical Chemistry*; OSTWALD'S *Physical Chemical Measurements*.

FEES :—		All day.	Three hours per day.	Three hours per day; five days a week.	Three hours per day; three days a week.
		Guineas.	Guineas.	Guineas.	Guineas.
One Term	...	7	4½	4	2½
Two Terms	...	13	8½	7½	5
Three Terms	...	18	12	11	6½

Each student will be required to provide himself with a set of simple apparatus, the total cost of which need not exceed 30s.

Gas, water, and all ordinary reagents (except methylated spirit, ether, chloroform, silver nitrate and platinum perchloride) are supplied by the University, and the larger forms of apparatus may be obtained on loan from the Laboratory store, on condition that breakages are made good.

Some of the special chemicals required for organic preparations have to be purchased by the Student.

Some additional Apparatus will also be required by each student on commencing QUANTITATIVE ANALYSIS AND ORGANIC PREPARATIONS.

Special arrangements are made by the Professor for students pursuing Research.

Chemical Library.

The departmental library, adjoining the Laboratories, is open for the use of Students during working hours, subject to the rules prescribed by the Professor.

University Chemical Society.

The Society meets on alternate Mondays at 5.30 p.m., during the Winter and Spring Terms, for the reading and discussion of papers.

All Students are eligible for membership.

EXCURSIONS.

During previous Sessions permission has been obtained to visit some of the great factories in and near Birmingham, in which chemical and metallurgical industries are carried on. Students have thus had most valuable opportunities of gaining a practical acquaintance with

some branches of Applied Science. The privilege thus courteously granted by several manufacturers will, it is hoped, be enjoyed in every future Session. The excursions will be conducted by the Professor.

For Vacation Reading, see page 469.

REQUIREMENTS FOR DEGREES.

Intermediate Examination in Science :—

Lectures, Course I (A. and B.)
Laboratory, Course I.

B.Sc. Degree :—

- (i) Chemistry as a principal subject :
Lectures, Courses II and III.
Laboratory, Courses II and III.
- (ii) Chemistry as a subsidiary subject :
One of the following combinations :
 - (a) Lecture Courses II and III in Inorganic and Organic Chemistry, in successive years, with not less than fifteen hours weekly in the Laboratory during one Session.
 - (b) Lecture Courses II and III in Inorganic and Physical Chemistry, with not less than fifteen hours weekly in the Laboratory during three terms.

B.A. Degree :—

Lecture Course I, with not less than nine hours
Laboratory work weekly.

B.Sc. Degree with Honours in Chemistry :—

Three years' work after the Intermediate Examination are required. The requirements with regard to Subsidiary Subjects are the same as

for the ordinary B.Sc. Degree above, and under ordinary circumstances the examinations in the Subsidiary Subjects should be passed by the end of the second year after Intermediate, leaving the third year entirely free for chemical study alone.

TIME TABLE.

CHEMISTRY.	Mon.	Tues.	Wed.	Thurs.	Fri.	Sat.
Course I (A.)*	9.30	...	9.30	9.30
Course I (A) (Tutorial)	§2.0	10.30

*Winter and Spring Terms. †Summer Term.

§Science and Medical Students.

|| Engineering and Mining Students.

Manufacturers or Managers of Works having vacancies are requested to apply to the Professor.

ZOOLOGY AND COMPARATIVE ANATOMY.

Mason Professor: F. W. GAMBLE, M.Sc. ; D.Sc. ;
F.Z.S. ; F.R.S.

Lecturer: C. L. BOULENGER, D.Sc. ; M.A. (Cantab.),
F.Z.S.

All first year undergraduates in medicine and those who take Biology for the intermediate examination are required to attend Course I, which includes two lectures and two hours laboratory weekly during the Winter and Spring terms and two hours additional practical work weekly during the Summer term.

Candidates for the Bachelor's degree who select Zoology as one of their subjects may take it as a single subsidiary subject, as a double subsidiary one, or as a principal subject, as follows:—

Single Subsidiary: Course II, during one year (three hours lectures weekly and six hours laboratory work weekly for one session).

Double Subsidiary: Course II, during two years.

Principal: Course II. during two years and Course III during the final year. (Three hours lectures weekly ; six hours laboratory during the second year, and nine hours weekly during the third.)

Course I.

ANIMAL BIOLOGY.

Lecture Hours:—Tuesdays and Fridays, at 12.30, during the Winter and Spring terms ; 9.30 on the same days during the Summer term.

Laboratory:—Tuesdays, from 2 to 4.30 in Winter and Spring Terms ; and on Tuesdays and Fridays at the same time during the Summer term.

FEE: For lecture and laboratory courses, £3 3s.

A course of about fifty lectures on Animal Biology.

A. The anatomy and histology of the various systems of organs in the Frog, and the elementary physiology of

the organs of digestion, circulation, and excretion. Structure of the various elementary tissues of the Frog. Epithelia, connective, muscular, and nervous tissues. The combination of tissues to form organs. Living and non-living matter. Distinctive properties of living matter or protoplasm.

- B. This part of the course will treat of the structure of the following typical animals, viewed from a comparative standpoint :—

Amæba, *Paramecium*, *Vorticella*, the freshwater (*Hydra*), Polype *Obelia*, the Earthworm (*Lumbricus*), the Crayfish (*Astacus*), the Dog-fish (*Scyllium*), and the general structure of the Rabbit (*Lepus*).

- C. The concluding lectures of the course will deal with the phenomena of Reproduction. Asexual and Sexual Reproduction. Ova and Spermatozoa. Spermatogenesis. Fertilization and segmentation of the ovum in *Amphioxus* and *Rana*. The development and larval history of the Frog. The development of the Chick.

Course II.

This Course extends over two years, and is taken in full by those students who have entered for Zoology as a principal subject or as a double subsidiary subject. Those who take Zoology as a single subsidiary subject attend the course during one year only.

The course in Zoology for second year students varies in successive years. In 1912-13 the course will cover the lower invertebrates, during the Winter term, the lower vertebrates during the Spring term, and the annelids and arthropods in the Summer term. In 1913-14 the higher groups of each division will be dealt with.

The course will include a more or less detailed description of the Morphology, Bionomics and Embryology of selected examples of certain of the principal groups of animals, and of the more important modifications of structure which are met within the limits of each group. The Phylogenetic relations of each group will also be discussed, as well as the more elementary facts of Geographical Distribution.

Lecture Days :—Mondays, Wednesdays, and Thursdays, at 12.30,

Laboratory Hours :—Mondays, Wednesdays and Thursdays, at 9-30—12-30 in the Summer term, and 10 in the Winter and Spring terms.

FEE : For lecture and laboratory courses, £6 6s.

SYLLABUS OF GROUPS AND TYPICAL EXAMPLES.

Protozoa.

EXAMPLES.

- | | |
|---------------------------|--|
| (i) Rhizopoda | <i>Amœba, Gromia, Polystomella, Globigerina.</i> |
| (ii) Heliozoa | <i>Actinophrys.</i> |
| (iii) Radiolaria | <i>Thalassicolla.</i> |
| (iv) Mycetozoa | <i>Badhamia.</i> |
| (v) Sporozoa | <i>Monocystis, Coccidium, Hæmameba.</i> |
| (vi) Flagellata | <i>Englena, Codosiga, Ceratium, Noctiluca.</i> |
| (vii) Ciliata..... | <i>Paramecium, Stentor.</i> |
| (viii) Tentaculifera..... | <i>Acineta, Dendrosoma.</i> |

Porifera.

- | | |
|---------------------------|-----------------------------|
| (i) Calcarea | <i>Leucosolenia, Sycon.</i> |
| (ii) Non-calcareous | <i>Euspongia.</i> |

Cœlenterata.

- | | |
|-------------------------|---|
| (i) Hydrozoa | <i>Tubularia, Obelia, Carmarina, Physophora, Millepora.</i> |
| (ii) Scyphomedusæ | <i>Halicystus, Aurelia.</i> |
| (iii) Anthozoa— | |
| (a) Alcyonaria ... | <i>Alcyonium, Gorgonia, Pennatula.</i> |
| (b) Zoantharia ... | <i>Actinia, Edwardsia, Flabellum, Madrepora.</i> |
| (iv) Ctenophora | <i>Pleurobrachia.</i> |

Platyhelminthes.

- | | |
|------------------------|--|
| (i.) Turbellaria | <i>Convoluta, Polycelis, Dendrocoelum, Leptoplana.</i> |
| (ii) Trematoda | <i>Distomum.</i> |
| (iii) Cestoda | <i>Amphilina, Tænia.</i> |

Nemertini *Carinella, Cerebratulus.*

Nemathelminthes *Ascaris, Rhabditis.*

Annelida.

- (i) Archiannelida *Polygordius*.
- (ii) Chætopoda *Nereis, Lumbricus*.
- (iii) Hirudinea *Hirudo, Clepsine*.

Gephyrea *Sipunculus*.

Polyzoa.

- (i) Entoprocta *Loxosoma*.
- (ii) Ectoprocta *Bugula*.

Brachiopoda *Lingula, Waldheimia*.

Rotifera..... *Brachionus*.

Arthropoda.

- (i) Crustacea *Apus, Daphnia, Cypris, Cyclops, Lepas, Nebalia, Astacus, Cancer*.
- (ii) Arachnida *Limulus, Scorpio, Epeira*.
- (iii) Onychophora *Peripatus*.
- (iv) Myriapoda *Scolopendra, Julus*.
- (v) Insecta *Periplaneta, Apis*.

Mollusca.

- (i) Amphineura *Chiton, Neomenia*.
- (ii) Gastropoda *Patella, Haliotis, Helix, Buccinum*.
- (iii) Scaphopoda *Dentalium*.
- (iv) Cephalopoda *Nautilus, Sepia*.
- (v) Pelecypoda *Nucula, Mytilus, Anodonta*.

Echinoderma.

- (i) Crinoidea *Antedon, Pentacrinus*.
- (ii) Holothuroidea *Holothuria, Synapta*.
- (iii) Asteroidea *Asterias*.
- (iv) Ophiuroidea..... *Ophiura*.
- (v) Echinoidea *Echinus, Echinocardium*.

Chordata.

- (i) Hemichorda..... *Balanoglossus*.
- (ii) Urochorda *Appendicularia, Ascidia, Pyrosoma, Doliolum, Salpa*.
- (iii) Cephalochorda *Amphioxus*.
- (iv) Craniata [Vertebrata]
 - (a) Cyclostomata... *Petromyzon, Myxine*.
 - (b) Pisces *Raja, Chimaera, Polypterus, Neoceratodus, Gadus*.
 - (c) Amphibia *Siren, Rana*.

- (d) Reptilia *Sphenodon*, *Lacerta*, *Boa*,
Chelone, *Crocodilus*.
(e) Aves *Struthio*, *Columba*.
(f) Mammalia *Echidna*, *Macropus*, *Lepus*.

In the practical class, which will be conducted in connexion with this course, a selection of the above-mentioned animal types will be dissected and microscopically examined.

The course for Third Year Students will consist of the second part of Course II; of the course in General Zoology; of Laboratory and Museum work (at least nine hours weekly).

GENERAL ZOOLOGY.

This course deals with the more general problems of Zoology ; growth, size, form, longevity, movement, animal heat, colouration, parasitism, variation, selection, heredity, the influence of environment upon form and structure. It will be given during the Summer term at 9.30 on Mondays, Wednesdays and Thursdays.

FEE for lectures and laboratory, £8 8s.

The Laboratory will be open daily, from 10 to 5 (Saturdays 10 to 1). In the Summer term, 9.30—4.30. In addition to the Laboratory and Museum available for students taking up practical work in connection with the various lecture courses, there is a Research Laboratory open to those who may desire to engage in original investigations, either independently or with a view to the requirements for the higher University Degrees of M.Sc. and D.Sc.

LABORATORY FEE: £3 3s. per term.

Zoological Museum.

The Museum includes a representative series of animals illustrating the principal divisions of the Animal Kingdom. In addition, there are also special collections which have been presented to the Museum at different times, among which may be mentioned the Archer Collection of Shells; the Hunter Barron series of Land and Fresh-water Shells; the Williams Collection of British Birds' Eggs; and the Pickard Cambridge Collection of British Spiders.

The Port Erin Biological Laboratory.

The Council of the University makes an annual grant to the Marine Biological Laboratory at Port Erin, in the Isle of Man, in return for which one of the tables in the Laboratory is reserved solely for the free use of those students in the Zoological Department of the University who wish to study Marine Zoology, or pursue some branch of research. During the occupation of the table each worker will be entitled to the use of microscopes, re-agents, including a specified allowance of methylated spirit, and other apparatus, and of the boats, dredges, tow-nets belonging to the laboratory, so far as is compatible with the claims of other workers and with the routine work of the station.

Facilities will also be given to workers to make their own collections of marine organisms.

Students wishing to avail themselves of the privilege are requested to apply to the Professor, from whom further information may be obtained.

Vacation Reading.

For a list of books suggested, see page 470.

REQUIREMENTS FOR DEGREES.

Intermediate Examinations in Science and in Arts :—
Course I in the first year.

B.Sc. Degree :—

- I. Zoology as a Subsidiary Subject : Course II in the second year.
- II. Zoology as a double subsidiary subject ; Course II in the second and third years.
- III. Zoology as a Principal Subject ; Course II in the second and third years, and Course III in the third year.

*B.A. Degree :—*Course II.

M.Sc., D.Sc.—Students who have taken the degree of B.Sc., and who desire to proceed to the higher University degrees of M.Sc. and D.Sc., may confer with the Professor as to the choice of a subject for the thesis (M.Sc.) or (D.Sc.).

TIME TABLE.

ZOOLOGY.	Mon.	Tues.	Wed.	Thurs.	Fri.	Sat.

BOTANY.

Professor : GEORGE S. WEST, D.Sc. ; M.A. (Cantab.),
A.R.C.S., F.L.S.

Lecturer and Demonstrator : JESSIE S. ELLIOTT, D.Sc.

Honorary Curator of }
Fungus Herbarium : } W. B. GROVE, M.A.

Course I.

(*VEGETABLE BIOLOGY.*)

Lecture Days.—Tuesdays at 4.30 and Fridays at 4.

Laboratory.—The course will be illustrated by practical work in Morphology, external and internal, and Physiological experiments, at the following *alternative* times, viz., in the Winter and Spring Terms, Wednesdays 10.15 to 12.30, *or* Saturdays 10.30 to 1 ; in the Summer Term, Fridays 2.30 to 5, *or* Saturdays 10.30 to 1. Some of these laboratory periods, especially those in the Summer Term, may be spent in the Experiment House at the Botanical Gardens, Edgbaston.

FEE : Lectures and Laboratory, £3 3s.

The morphology of the Seed ; Germination ; the external morphology of the Seedling. The physiology of germination ; the general nature of the reserve food-stuffs ; the relations of the seedling with external conditions and natural forces ; the theory of Irritability. Growth to exhaustion, and the general conditions of active life and self-nutrition.

— The general morphology of the Plant Body, and the principal modifications in form and distribution of the vegetative members, Root, Shoot, and Leaf.

— The Living Principle of the plant—Protoplasm ; the Cell, and its principal modifications for special purposes ; evolution and distribution of the Tissues, considered especially from a biological standpoint.

- The Leaf as a bio-anatomical study ; epidermis, vascular bundles, ground-tissue, intercellular spaces.
- The internal morphology of the Stem, in its chief modifications ; the results of cambial activity ; the secondary protective tissues, Cork and Bark. The Root.
- The Bud ; the principal characteristics of increase in length in shoot and root.
- The phenomena of climbing, and illustrations of special powers of movement.
- The elementary facts in the Nutrition of the plant, including the nature and sources of the raw materials of food, and the constitution of the soil ; Absorption and the Transpiration current ; the nature and functions of Chlorophyll ; the broad principles of metabolism, and the distribution, storage, and utilisation of its products. Respiration.
- Nutrition without chlorophyll, and special fermentative changes, illustrated by Yeast, Bacteria, Moulds, and *Pythium*. Degrees of Parasitism in Flowering Plants. Insectivorous Plants.
- Reproduction. Asexual and Sexual, further illustrated by *Plowococcus*, *Spirogyra*, *Vaucheria*, *Fucus* and *Agaricus*. The primary divisions of the Vegetable Kingdom, viz. — Thallophyta ; Bryophyta (illustrated by a moss-plant) ; Pteridophyta (a fern plant, *Selaginella*) ; and Spermatophyta (flowering plants).
- The general character and structure of the reproductive organs in Spermatophytes ; pollination, and its methods fertilisation ; the development of the seed and the fruit ; seed protection and dispersal ; the natural spread of plants, and its limitations.
- The Flower, and its chief modifications in structural plan, as illustrated in the following Natural Orders of the British Flora, viz.:—Ranunculaceae, Cruciferae, Violaceae, Caryophyllaceae, Leguminosae, Rosaceae, Umbelliferae, Compositae, Scrophularineae, Labiatae, Cupuliferae, Liliaceae, Gramineae ; and the description of plant specimens in semi-technical language.

Botanical Excursions. A few will be arranged for Wednesday and Saturday afternoons in the Summer Term, and will be concerned with the Local Flora, especially in its relations with environment.

Course II.

(GENERAL COURSE.)

Lecture Days.—Mondays and Fridays at 9.30, Tuesdays and Thursdays at 11.30; or other, if more convenient, hours.

Laboratory.—Six hours weekly, with two extra hours in the Summer Term. More time should be given by students taking Botany as a principal or double subsidiary subject.

FEE : Lectures and Laboratory, £6 6s

A. *Life History and Classification.*

The outlines of morphology, external and internal, embryology, and phylogenetic relationships of the chief groups of plants, and their most important sub-divisions, will be studied by the aid of the following selected examples, which, so far as possible, will be dealt with in Laboratory and the Field as well as Lecture Room.

Thallophyta.

PROTOTHALLOPHYTA.

- i. Flagellata.
- ii. Myxomycetes.
- iii. Schizomycetes (Bacteria).

ALGÆ.

- i. Cyanophyceae.
- ii. Peridineae.
- iii. Bacillarieae (Diatoms).
- iv. Chlorophyceae. (a) Isokontae

Protococcales.
Siphonales.
Siphonocladiales.
Ulvales.
Schizogoniales.
Microsporales.
Chaetophorales.
Conjugatae.
Oedogoniales.
Chloromonadales.
Confervales.

- v. Phaeophyceae. (a) Phaeosporeae
- (b) Fucaceae
- (c) Dictyotaceae.

Laminaria.
Fucus.

- vi. Rhodophyceae

Batrachospermum.
Sacheria, Chondrus,
Callithamnion, Poly-
siphonia, Delesseria,
Corallina, etc.
Chara, Nitella.

CHARACÆ.

FUNGI.

- A. Phycomycetes (a) Archimycetes
(b) Zygomycetes
(c) Oomycetes
- B. Eumycetes.
 - i. Hemiascomycetes (a) Exoasceae
(b) Saccharomyceteae
 - ii. Ascomycetes.
 - (a) Pyrenomycetes Erysipheae, etc.
 - (b) Discomycetes. Pezizeae, etc.
[Laboulbeniaceae.]
 - iii. Hemibasidiomycetes. (a) Ustilagineae.
(b) Uredineae, etc.
 - iv. Basidiomycetes.
 - (a) Hymenomycetes Agaricineae.
Polyporeae, etc.
 - (b) Gasteromycetes Lycoperdeae, etc.
[Lichenes.]

Bryophyta.

- i. Hepaticae (a) Ricciaceae
(b) Marchantiaceae *Marchantia*.
(c) Jungermanniaceae
(d) Anthocerotaceae
- ii. Musci (a) Sphagnaceae *Sphagnum*.
(b) Andreaeaceae
(c) Bryaceae *Funaria, Polytrichum*

Pteridophyta.

- i. Filicales A. Eusporangiatae *Botrychium*.
B. Leptosporangiatae
(a) Filices *Pteris, Osmunda*.
(b) Hydropterideae *Pilularia*,
Equisetum.
- ii. Equisetales
- iii. Psilotales.
- iv. Lycopodiales (a) Lycopodiaceae *Lycopodium*.
(b) Selaginellaceae *Selaginella*.
(c) Isoëtaceae *Isoëtes*.

Spermatophyta (Phanerogams).

- i. Gymnospermae (a) Cycadales
(b) Ginkgoales
(c) Coniferales *Pinus, Cupressus*.
(d) Gnetales

- ii. Angiospermae
 Monocotyledones
 Dicotyledones.

Pulaeobotany.—The elements of the distribution of the chief groups of plants in time.

Field Botany.—In addition to the general morphology, &c., of the Phanerogamia, the course will include the characters and relationships of the most important Natural Orders in the British Flora and their centres of extra-British distribution ; and the chief sub-orders of the following : Ranunculaceae, Rosaceae, Cupuliferae, Coniferae ; the description of plants (not necessarily British) in technical language ; the origins of the British Flora.

B. Physiology and Experimental Morphology. [DR. ELLIOTT.]

The stability of the Plant Body.

Aeration.

Nutrition ; the processes of absorption of water and dissolved substances, and their distribution ; Photosynthesis ; Root-pressure ; Transpiration.

The metabolic processes. Respiration.

The phenomena of growth and movement. Irritability ; the transmission of stimuli, and the mechanism of movement.

In the Laboratory the most important of the above phenomena will be experimentally studied, in the main qualitatively.

SPECIAL COURSES.

Course II A and II B.

The following Special Courses of Lectures, open to students in their second or third years, will be delivered in the Spring and Summer Terms respectively, on Tuesdays at 2.30 p.m. (or other time by arrangement).

FEE for each Course, 10s. 6d.

A. The Fungus-Diseases of Plants. [DR. ELLIOTT.]

To include Club-Root (Finger-and-Toe). Bacterial Diseases. Black Scab of Potatoes. Mildews, downy and powdery. Damping-off of Seedlings; Leaf Curl; Bladder Plums; Witches' Brooms. Larch Canker. Ergot. Leaf-Blotches. Rust and Smuts. Root Rot and Heart-wood Rot of Trees. Dry Rot of Timber.

B Plant Distribution upon a Physiological Basis (Oecology). [PROFESSOR WEST.]

The influence on vegetation of the various factors which affect plant life. Xerophytes, Hygrophytes, Holo-phytes, etc. Insular Floras.

Plant formations and plant guilds.

Vegetation of the temperate, tropical, and arctic zones.

The mountain regions of vegetation and the climatic factors which determine them. Alpine Floras.

Course III.

Course III students who are taking Botany as a principal, or double subsidiary subject, and other botanical students by arrangement, will have two lectures per week. The times of these lectures will be arranged so as to suit all those attending.

The subjects dealt with will include :—

Special Oecology.

Advanced Morphology.

Palaeobotany.

Third Year Laboratory. Students who make Botany a Principal Subject and have taken the General Course in their second year, should devote as much time as possible to practical work in the Laboratory and in the field.

Micro-chemistry and the practice of modern histological methods will also be studied.

FEE : Lectures and Laboratory, £8 8s.

For Vacation Reading, see page 471.

BOTANICAL LABORATORY.

The Laboratory is open daily from 10 to 5, for the purpose of study or research. In connexion with it is an *Experiment House* in the Botanical Gardens of the Birmingham Botanical and Horticultural Society, Edgbaston, in which some of the work in Vegetable Physiology and Experimental Morphology is done.

FEE : £3 3s. od. per term.

The Herbarium includes the following very valuable Special Collections :—

The "Holmes" Collection of Algae.—About 13,000 specimens ; made by E. M. Holmes, F.L.S. ; purchased and presented (through W. H. Wilkinson, F.L.S.) by Wm. A. Cadbury.

Mr. Holmes' Library of Works upon Algae has also been purchased, by subscription, and placed with this Collection.

The "Plowright" Collection of Fungi.—About 9,000 specimens ; made by Chas. B. Plowright, M.D. ; purchased and presented by a group of donors.

The "Larbalestier" Collection of Lichens.—About 7,000 specimens ; made by Chas. du Bois Larbalestier, M.A., F.L.S. ; purchased and presented by Wm. A. Cadbury.

The "Horrell" Collection of Mosses.—About 15,000 specimens ; made by E. Chas. Horrell, F.L.S. ; purchased and presented (through Thos. H. Russell, F.L.S.) by a group of donors.

To these Mr. Horrell has recently added, by gift, his *Research Collection of Sphagnaceae* (Bog-Mosses), about 10,000 specimens.

Botanical Gardens, Edgbaston. Students attending any of the Botanical classes can obtain from the Professor a card of admission to these Gardens.

REQUIREMENTS FOR DEGREES.

Intermediate Examination in Science :—Course I.

B.Sc. Degree. Botany as a Principal Subject :—
Courses II and III, together with the Special Courses.

Botany as a Single Subsidiary Subject :—Course II.

Botany as a Double Subsidiary Subject :—Course II, with the extended laboratory practice of Course III, together with the short Special Course IIA.

Intermediate Examination in Arts :—Course I.

B.A. Degree. Botany as a Principal Subject only. In second year, Course II ; in third year, Special Courses IIA and IIB, with complete revision and slight extension of Course II laboratory work.

TIME TABLE.
(LECTURES ONLY.)

BOTANY.	Mon.	Tues.	Wed.	Thurs.	Fri.
Course I.	4.30	4.0*
Course II. †	9.30	11.30	...	11.30	9.30

Course III. (Special Courses)	By arrangement.				
Laboratory	Daily, 10.0 to 5.0.				

* In the Summer Term the Friday lectures in Course I may not be given.

† The times stated for these lectures may be altered by arrangement.

‡ Spring and Summer Terms.

GEOLOGY

(with **PHYSIOGRAPHY** and **GEOGRAPHY**).

Professor : CHARLES LAPWORTH, M.Sc. ; LL.D. (Aber.),
F.R.S., F.G.S.

Senior Lecturer on Geology and Geography : THEODORE
GROOM, M.A.(Cantab.), D.Sc. (Lond.), F.G.S., F.R.G.S.

Lecturer : F. RAW, B.Sc. (Lond.), F.G.S.

Special Lecturer in Petrology : F. RAW, B.Sc. F.G.S.

Course I.

Junior Course.

DR. GROOM.

Edmund Street, Lectures.—Mondays, Wednesdays and
Fridays, at 9.30 throughout the Session.

Laboratory.—Mondays, Wednesdays and Fridays at
10.30.

Edgbaston, Lectures.—Tuesdays and Thursdays at
9.30 throughout the Session.

Laboratory.—Tuesdays and Thursdays at 10.30.

FEE :—£5 5s.

PHYSICAL GEOLOGY.

GENERAL CHARACTER of the simple rock types, clastic and
crystalline.

ORIGIN, CHARACTERS AND CLASSIFICATION OF THE SEDI-
MENTARY ROCKS. — Denudation by weather, rivers,
glaciers, and the sea ; deposition of sediments, and
structures resulting therefrom, stratification, lamination,
etc. ; consolidation and cementation. Lithology and
Classification of the chief types ; breccia, conglomerate,
grit, sandstone, clay, shale, limestone, coal, salt,
gypsum.

ORIGIN, CHARACTERS AND CLASSIFICATION OF THE IGNEOUS
ROCKS.—Volcanoes ; their action and the rocks pro-
duced by them. Minerals : quartz, feldspars, mica, augite,
hornblende, olivine, calcite, salt, serpentine. Textures
of the igneous rocks. Chief types of volcanic rocks ;
rhyolite, trachyte, obsidian, pitchstone, pumice, andes-
ite, basalt ; clastic volcanic rocks. Chief types of
plutonic rocks ; granite, syenite, diorite, gabbro.

STRUCTURES AND ARRANGEMENT OF THE SEDIMENTARY
ROCKS.—Folds, faults, cleavage planes, joints ; mineral

veins ; geological formations and systems ; geological maps and sections.

THE FOLIATED AND ALTERED ROCKS.—Gneisses, schists, quartzite, slate, marble ; contact and dynamic metamorphism.

STRATIGRAPHICAL GEOLOGY.

INTRODUCTORY.—The laws and generalizations of *Stratigraphy* and *Palæontology* : *Fossils*, their mode of petrifaction, and uses in Geology : The order of superposition : The Geological Record.

THE GEOLOGICAL SYSTEMS.—The sequence, lithology, and distribution of the Geological Systems in England and Wales.

THE Eozoic Era.—General physical characters and relationships of the *Pre-Cambrian* Rocks.

THE PROTOZOIC ERA.—General characters of the rocks and fossils of this era : Outlines of the classification of the formations and organic remains of the *Cambrian*, *Ordovician* and *Silurian* Systems in Britain.

THE DEUTOZOIC ERA.—Chief characteristics of strata and organic remains of British rocks of this era : The *Devonian* or Old Red Sandstone Period : the *Carboniferous* System of Britain ; its main divisions and fossils ; chief British coalfields and their economic products : The *Permian* Rocks, and their peculiar phenomena.

THE MESOZOIC ERA.—Physical features of the *Triassic* Rocks of Britain and Germany : British salt producing districts ; The *Jurassic* Formations and their ironstones, building stones, and most abundant fossils ; The *Cretaceous* Rocks, conditions of their deposition and life.

THE CAINOZOIC ERA.—Contrasts between Mesozoic and Cainozoic life : Chief divisions and zoological features of British *Tertiary* Rocks : Crust disturbances during Tertiary time.

THE GLACIAL AND POST-GLACIAL EPOCHS.

LOCAL GEOLOGY.

At least six Saturday Geological Excursions during the Session ; and one Lecture weekly on the Geology of the Birmingham district during the Summer Term.

TEXT BOOKS RECOMMENDED :—WATT'S *Geology for Beginners* ; LAPWORTH'S *Intermediate Text Book of Geology* ; HATCH'S *Mineralogy* ; LAPWORTH and others, *Geology of the Birmingham District* ; LAKE and RASTALL'S *Text Book of Geology*.

Course II A.
Senior Course.

MR. RAW.

Lectures and Laboratory—

Edmund Street, Tuesdays, Wednesdays, Thursdays,
10.30 and 11.30 ; or by arrangement.

Edgbaston, Wednesdays and Fridays at 10.30 and
11.30.

FEE : £4 4s.

(1) PETROLOGY.

The description and determination by physical and microscopical tests of the chief rock-forming minerals ; study and recognition in hand specimens, and microscope slides of the chief rock-types ; practical determination of rock-textures. Characteristics and distribution of the chief rock-types of the British Isles.

(2) STRATIGRAPHY.

The geological formations of Britain as shown in their typical areas, and their distribution in the British Islands generally ; their lithology, sub-divisions, fossils, correlation and economics : geology and physiography of special areas occupied by them. The physical geography and vulcanicity of the different periods.

(3) PALÆONTOLOGY.

Fossils, their preservation, sequence and affinities ; structure, classification, and distribution of the most important fossil forms.

(4) TECTONIC GEOLOGY.

The study and interpretation of geological structure as shewn on maps and sections of any scale ; the relationships of structure and lithology to relief, drainage and economics ; the drawing of sections across maps, etc.

(5) FIELD GEOLOGY.

A detailed study of a definite area in the Midlands, considered as a type ; the characters and development of its different rock-formations ; their relationships and economics. One day in each week in the summer term is devoted by the class to mapping the selected area in the field, or to Laboratory work connected therewith.

(For II A, 2, 3, 4 Mining Students substitute II B 1, 4, 5, 6 ; and Engineering Students II B 1, 2, 4, 5).

TEXT BOOKS RECOMMENDED :—LAPWORTH'S *Intermediate Geology* ; HATCH'S *Petrology* ; SIR A. GEIKIE'S *Text Book of Geology* ; J. GEIKIE'S *Structural and Field Geology* ; JUKES-BROWN'S *Stratigraphical Geology* ; OR LAKE AND RASTALL'S *Text Book of Geology*.

Course II B.
Applied Geology.
PROFESSOR LAPWORTH.

Lectures and Laboratory, etc.—Hours by arrangement.
All day Fridays in the Summer Term

FEE : £4 4s.

STRUCTURAL GEOLOGY.

1. LITHOLOGICAL GEOLOGY.—The lithology and distribution of the geological formations and subformations of Britain, and their bearing upon the relief and drainage of the country, its building materials, roads, railways, and canals, mineral products, water-yield, and upon the industries and distribution of the population generally.
2. GRAPHICAL GEOLOGY.—The construction of geological maps and sections from given data; the determination of the position, extent and relations of coal seams and other strata of economic value; dislocations, veins, etc.; interpretation of detailed maps and sections.
3. GEOLOGICAL SURVEYING.—The working out and description of geological structure by each student from his own observations in the field, and the construction of an original geological map of the area selected.

ECONOMIC GEOLOGY.

4. WATER SUPPLY.—Overground supplies, drainage areas, reservoir sites; underground supplies, springs, wells, drainage areas; effects of rock structure and surface configuration; contamination, etc.
5. BUILDING MATERIALS.—Distribution of building materials; stone, clays, slate, cements; ornamental stones, road metals.
6. FUELS.—The geological distribution of the coal bearing rocks and associated formations; position and succession of the coal seams; the coalfields, visible and hidden, their structure and correlation; geological distribution of petroleum-yielding rocks, &c.
7. ORE DEPOSITS.—Distribution and association; the chief metalliferous minerals; nature and structure of the chief kinds of ore deposits; the chief ore-bearing districts in Britain and elsewhere.

TEXT-BOOKS RECOMMENDED. — LAPWORTH'S *Intermediate Geology*; JAS. GEIKIE'S *Structural and Field Geology*; GIBSON'S *Geology of Coal and Coal Mining*; WOODWARD'S *Geology of Water Supply*.

LABORATORY CLASSES AND PRACTICAL WORK.

In connexion with the foregoing Courses, Practical classes are held in the Geological Laboratory, either at hours alternating with the lecture hours, or upon such days and hours as are found most convenient to the students. The instruction given and work done have reference to the actual study and examination of the minerals, rock-specimens and fossils noticed in the Lectures; the methods of collecting and determining rocks and fossils; the interpretation and drawing of geological maps, sections, etc.; the drawings of figures and diagrams of crystals, minerals, rocks and fossils; the study and interpretation of microscopic slides, etc.

During Course I the work is mainly devoted to the study of hand specimens of the more important minerals, rocks, etc.; the drawing of crystal and mineral structures and typical fossils; the study, determination, and illustration by means of geological sections, etc., of the order and distribution of the geological systems in England and Wales, particularly as shown on maps of the $\frac{1}{25}$ inch scale; contour lines, and their relations to drainage, outcrop, etc.

During Course II (A and B) the work has reference to the microscopic study of minerals, rocks, etc.; the construction of geological maps and sections from given data; the determination of the extent of underground courses of coal seams, waterbearing rocks, and the like; the working out of the results obtained from personal survey in the field; and the reading and interpretation of published geological maps on all scales, and their application for economic purposes.

Persons not attending Lectures, but wishing to work in the Geological Laboratory and Museum, can do so at all times when open, on payment of a terminal fee of £2 2s., or for two hours weekly, 10s. 6d. each term. Such students will be encouraged and assisted in the prosecution of their private studies or original work.

GRADUATE COURSES.

Course III A.

BIOLOGICAL GEOLOGY (PALÆONTOLOGY).

DR. GROOM.

Lecture and Laboratory hours by arrangement.

FEE : £4 4s.

1. GENERAL PALÆONTOLOGY.

The nature and preservation of fossils ; the general succession of life as revealed by the geological record ; the imperfection of the record ; a special study of the hard parts of each of the principal classes of the invertebrata and cryptogamia ; the structure, classification and range of the chief families and their most important genera ; a general knowledge of the fauna and flora of the geological systems.

2. DETAILED PALÆONTOLOGY.

A detailed study of one of the fossil orders of the invertebrata or cryptogamia ; or of the fauna or flora of some one geological system and its divisions.

Course III B.

PETROLOGICAL GEOLOGY (MINERALOGY AND PETROGRAPHY).

MR. RAW.

Lecture and Laboratory.—Hours by arrangement.

FEE : £4 4s.

1. MINERALOGY.

Form and structure of minerals ; nature of crystalline form ; systems of crystalline form ; isomorphism ; pseudomorphism ; Chemical composition of minerals ; Classification of minerals ; Description and determination of minerals by microscopic, chemical, and physical tests ; the use of convergent and plane polarised light.

2. PETROGRAPHY.

Classification and determination of rocks by microscopical and physical means in hand specimens and rock-slides; study of the occurrence and distribution of rocks in Britain and the typical foreign localities; principles underlying the genesis and classification of rocks; dynamical and thermal metamorphism of rocks.

Course III C.

*HIGHER STRATIGRAPHY, PALÆONTOLOGY AND
PETROLOGY.*

PROFESSOR LAPWORTH.

Lecture days and Laboratory hours by arrangement.

FEE for each term :—£2 2s.

This Course is projected for candidates for the degree of M.Sc., and for those who desire to study in detail the Historical, Petrological, or Biological aspects of Geology. The Course extends over one year, the student taking up the several sections of the subject in sequence, and accompanying each stage by a study of the books and publications in the University Library, and of the illustrative series of fossils and rocks in the University Museum. During the year the pupil prepares a Thesis upon some selected subject in Geology, Petrology, or Palæontology.

POST GRADUATE COURSES.

Course IV.

Research Work

IN GEOLOGY AND PALÆONTOLOGY.

PROFESSOR LAPWORTH.

FEE for each Term : £2 2s.

Advanced students who have completed their systematic University Courses, those who have obtained the

degree of M.Sc., and are preparing for the Doctorate, and occasional geological students, British or Foreign, studying some special branch of Geology or Palæontology, work in the Museum and Laboratory during term time, under the direction of the Professor and Lecturers, with use of the collections and microscopes.

The chief subjects at which such students may work include (1) Graptolites, Trilobites, Brachiopoda, &c., British and Foreign; (2) Geological Surveying; (3) Zonal Geology; and (4) Petrography.

The large collections of rocks and fossils in the Geological Museum from the older rocks, the range and variety of the geological formations in the Birmingham District, and the proximity and availability of the classical geological ground of the West of England, afford research students especial opportunities and facilities for the prosecution of original work.

For Vacation Reading, see page 472.

REQUIREMENTS FOR DEGREES.

B.Sc. Degree.

1. Geology as the *principal* subject: Course I in the first year; Course II A in the second year, or such parts of Course II A and II B as shall be previously determined.

2. Geology as a *subsidiary* subject:—

(a) One year, Course I.

(b) Two years, Course I and Course II A or B, or equivalents.

(c) *B.Sc. Degree in Mining.* Course I. in the second year; parts of Courses II A and II B (see page 248) in the third year.

(d) *B.Sc. Degree in Engineering.* Course I in the second year; parts of Courses II A and II B in the fourth year (see page 248).

*B.A. Degree.*Geology as a *subsidiary* subject :—

(a) One year, Course I.

(b) Two years, Course I and Course II, etc. (see B.Sc. Degree).

TIME TABLE.

Elementary Economic Geology.**MR. RAW.**

This Course is projected for those who are unable to attend a complete systematic Course in Geology, but who are desirous of knowing the principles and practice of the science in so far as they can be utilised in business, and in professional and everyday life.

The Course will commence with a section dealing with the fundamental facts and principles of Geology. This will be followed by sections dealing with Geology as applied to water-supply, sanitation, agriculture, &c., and a further group of sections dealing with the application of geology to architecture, mining, &c.

Section I must be taken by all; Sections I and II by Brewing Students and Candidates for the Degree in Public Health. The remaining sections are optional.

Each Section will include about ten lectures and ten demonstrations; two hours a week, during the Winter and Spring Terms.

FEE for each Section :—£1 IS.

Winter Term—By arrangement.

- I. THE OUTLINES OF GEOLOGY.—The rocks and rock-formations; geological maps and sections, their interpretation and uses.
- II. GEOLOGY AND WATER SUPPLY.—
 - (a) Overground waters and their action and employment; drainage, sanitation, water supply, reservoirs.
 - (b) Underground waters and water supply, water-bearing rocks and formations, springs, wells, hard and soft waters.

Spring Term.—By arrangement.

- III. GEOLOGY AND ARCHITECTURE.—Chief British building stones, their characters and distribution; fire-clays; brick-clays; cements; building sites; road metals.
- IV. MINING GEOLOGY.—Fuels of Britain; the coal-fields; coal and coal-mining, &c.; ores and ore-bearing formations; chief ore-bearing districts of Britain and the Colonies.

(This Economic course may not be held separately unless a sufficient number of students apply, the subjects being covered by parts of Courses I and II.)

AFTERNOON CLASSES.

I. ELEMENTARY COURSE.

PROFESSOR LAPWORTH.

A course of about thirty lectures (10 in each Term) is delivered on the

Elements of Geology.

These Lectures are of a popular and untechnical character, and present a summary of the chief principles, methods, and conclusions of the Science of Geology. They are illustrated by a series of diagrams, rock specimens, and fossils. This course is intended for beginners in geology, for amateurs, for those persons of leisure who desire a knowledge of the outlines of the science, and for those who intend to join the Summer Excursion Class.

Admission to the first lecture free.

WINTER TERM.

Physical Geology.

Lecture Hour.—Tuesdays, at 3.0 p.m.

FEE : 10s. 6d.

TEXT BOOKS RECOMMENDED.—WATTS : *Geology for Beginners* (Macmillan). LAPWORTH : *Intermediate Text Book of Geology* (Blackwood). JUDD : *The Student's Lyell* (Murray).

SPRING TERM.

Historical Geology.

Lecture Hour.—Tuesdays, at 3.0 p.m.

FEE: 10s. 6d.

ADDITIONAL TEXT BOOK RECOMMENDED.—JUKES-BROWNE ;
The Building of the British Isles (Bell).

SUMMER TERM.

Local Geology and Excursion Class.

GEOLOGY OF THE BIRMINGHAM DISTRICT.

The main object of this Section is to afford the student a practical knowledge of the geological structure of the neighbourhood of Birmingham and of the Midlands generally. The various geological formations found within thirty miles of Birmingham are described in a series of lectures, illustrated by typical rocks and fossils.

Lecture Hour.—Tuesdays, at 2.30 p.m

FEE for the Term :—10s. 6d.

TEXT BOOK RECOMMENDED.—LAPWORTH, WATTS, and HARRISON : *A Sketch of the Geology of the Birmingham District.*

GEOLOGICAL EXCURSIONS.

At least six Saturday Excursions will be taken by the members of the Class during the session to the more important geological localities in the district, and the visible phenomena studied in the field. FEE for the Excursions, for members of the Elementary Class, 10s. 6d. ; for non-members, £1 1s.

As a general rule the Excursions will take place on Saturday after 1 p.m. A few whole-day excursions may be made by arrangement with the members of the class.

PHYSIOGRAPHY.

Intermediate Physiography.

See Physical Geography below.

GEOGRAPHY.

Senior Lecturer: THEODORE GROOM, M.A. (Cantab.),
D.Sc. (Lond.), F.G.S., F.R.G.S.

Lecturer: F. RAW, B.Sc. (Lond.), F.G.S.

Course I.

INTERMEDIATE.

DR. GROOM AND MR. RAW.

Wednesdays at 12.30 and Thursdays at 3.30, and
a third hour by arrangement.

FEE, £3 3s. od.

Physical.

ATMOSPHERE.—Weather, its local and regional variation ;
weather charts, storm warnings, and weather forecasts.
Climates, their causes and present and past distribution.
Magnetic phenomena ; variation of the compass.

HYDROSPHERE.—Form of the ocean floor, and its relation
to that of the continents. Deep water temperatures
and currents. Distribution of life in ocean waters.
Abysmal and deep sea deposits. The tides.

LITHOSPHERE.—The composition and arrangement of the
materials of the earth-crust. The rock formation.
Crust movements, earthquakes and volcanoes, and
their effects. General relief of the land, and its causes ;
plateaux, mountains, plains, and valleys, and their
origin.

LANDSCAPE.—Origin and development of landscape features.
Form and development of rivers and river basins.
Form and development of coast lines.

BIOLOGICAL GEOGRAPHY.—Distribution of terrestrial life
Characteristics and relations of the different biological regions.

Political.

MAN.—The races of mankind, modes of existence, grades of civilisation, modes of government, industries and commerce.

EUROPE.—Inter-relations of relief, contour and drainage ; distribution of climates, floras, and faunas ; natural and cultivated productions. Distribution of people as regards race, nationality, and language ; chief countries and their centres of population and industry.

Outlines of the geography of France, Germany, Italy, Russia, together with one of the following :—

- (1) Asia : (a) Asia in general ; (b) India ; (c) China ; (d) Japan.
- (2) Africa : (a) Africa in general ; (b) Egypt ; (c) British Africa.
- (3) America : (a) America in general ; (b) British North America ; (c) United States.
- (4) Australasia : (a) Australasia in general ; (b) Australia ; (c) New Zealand.

Practical.

The reading and use of topographical maps on the 6in., 1in., and $\frac{1}{2}$ in. scale ; measurement of distances, directions, and areas ; conversion of scales ; representation of relief, drainage, and human works ; tracing of watersheds and drawing of sections to scale.

The reading of the thermometer, barometer, compass, etc.

Making of maps and plans, (a) by pacing and compass, and (b) by plane table.

Outdoor study of the topography of some special part of the Birmingham District and its causes.

Map projections, mode of construction, and special uses of each.

General application of maps and graphs.

Course II.

CERTIFICATE.

DR. GROOM AND MR. RAW.

Thursdays 3.30, and by arrangement.

PHYSICAL AND POLITICAL Geography of Europe.

Practical Geography, as in the Intermediate Course.

FEE : £3 3s.

Course II.

COMMERCIAL.

DR. GROOM.

The Principles of Geography, with special reference to their application to Commerce.

Lectures.—Wednesdays at 12.30 and Thursdays at 3.30, or by arrangement.

FEE for the Course : £3 3s.

General.

(TO BE TAKEN IN THE ORDINARY CLASSES.)

MOVEMENTS OF THE EARTH and their effects in length of day seasons, latitude and longitude, local time.

THE ATMOSPHERE ; temperature, winds, rain, climate.

THE LAND AND WATER ; distribution of land and water, extent and character of coast lines.

(1) Water : currents and tides.

(2) Land : general relief of the continents, mountains, plateaux, valleys, plains, rivers, and lakes.

Special.

MINERAL PRODUCTS OF ECONOMIC VALUE.—Distribution of rocks and soils, building and road-making materials, clays, fuels, ores, mineral manures.

ORGANIC PRODUCTS OF ECONOMIC VALUE.—Food materials and their distribution, textiles, skins, timber, etc.

Man in relation to commerce, race, languages, customs, governments.

The Commercial Geography of areas specially selected to suit the requirements of the students.

Practical Work.

Study and interpretation of maps.

TEXT BOOKS RECOMMENDED.—LYDE'S *Commercial Geography* ; HERBERTSON'S *Commercial Geography* ; CHISHOLM'S *Commercial Geography* ; ADAMS' *Commercial Geography* ; BARTHOLOMEW'S *Atlas of Commerce*.

HUMAN ANATOMY AND ANTHROPOLOGY.

Professor : PETER THOMPSON, M.D., Ch.B. (Vict.)

Demonstrators { T. YEATES, M.B., C.M. (Edin.), B.Hy.,
D.P.H., (Durham).
LEWIS GRAHAM, M.B., B.S. (Lond.),
M.R.C.S.
VIOLET A. P. COGHILL, M.B., Ch.B. (Edin.)

Hon. Demonstrators : W.E. BENNETT, M.B., Ch.B.; F.R.C.S.

J. JAMESON EVANS, M.D.; M.D., C.M. (Edin.), F.R.C.S.

Special Lecturer in Osteology: THOMAS YEATES, M.B.,
C.M., B.Hy.

The courses in Human Anatomy will be found fully described on page 528. The following information relates to candidates taking the above subject for the B.Sc. examination.

I.—In Human Anatomy the candidate must have pursued the entire medical course for two Winter Sessions and one Summer Session, as detailed in the regulations for medical degrees. He must also produce evidence that he has dissected the whole body at least once.

II.—In Anthropology the candidate must have attended the following courses of lectures :—

- (i) The course on Embryology.
- (ii) A course of lectures and practical instruction in Physical Anthropology. This course will include a general review of the province of Anthropology. Zoological and Anthropological characters of Man. Physical measurements on the living subject. Cranial and other skeletal measurements.

FEES for these Courses :—

I. For the two Winter and one Summer Sessions	£26	5	0
Incidental Fees	3	18	9
II. For the Courses detailed under this section	4	4	0

PHYSIOLOGY.

Professor : E. W. WACE CARLIER, M.Sc. ; M.D. (Edin.),
F.R.S.E.

Lecturer : (Vacant).

Course I.

The courses prescribed in the Faculty of Medicine under II and IV.

Course II.

The courses prescribed in the same Faculty under I and V. The syllabus of V is here appended :—

Advanced Practical Physiology.

Mondays and Thursdays, or Tuesdays and Fridays, from 2.30 to 4.30, during the whole Winter Session.

FEE for the Course: £6 6s., including an incidental fee of £1 1s.

The Course will include the more advanced problems of experimental physiology, histology and physiological chemistry. The experimental part includes the physiology of muscle, nerve, heart, circulation, respiration, central nervous system, and organs of sense and voice. The chemical section includes the analysis of organic substances found in the body, the chemical and spectroscopic examination of the blood and its derivatives, the chemistry of the digestive products and the results of their activity. The histological part consists in the practice of the more advanced and complicated methods

of histological research and of the results obtained by their use.

Students desiring to prosecute research or other independent work in the laboratory will be allowed to do so *at the discretion of the Professor* on the payment of a fee of 2 guineas, including an incidental fee of £1 1s., for each period of three months.

REQUIREMENTS FOR DEGREES:

B.Sc. Degree :—

- (1) Physiology as a Principal Subject : Students must take Course I as above in their first year, and Course II in their second year.
 - (2) Physiology as a Single Subsidiary Subject : Courses I and IV of the Medical Syllabus.
-
-

ENGINEERING.

GENERAL INTRODUCTION.

The full courses extend over four years, and lead to the degree of Bachelor of Science in Engineering. Candidates for the degree must be matriculated before entering the courses.

Candidates for the degree, who, before entrance to the University, have passed the first Engineering Examination (or an Examination recognised by the University as equivalent under the conditions specified on page 138), will be allowed to enter the second year, and will be eligible for the degree in three years, instead of four.

Students who are unable to take a full course, or who have not been matriculated, will be admitted to the classes as far as room permits, and on leaving the University will receive a certificate stating the courses they have taken and their position in the examinations; *but before entering, such students are required to pass an entrance examination in Mathematics, and in either Experimental Mechanics or Chemistry up to the matriculation standard.*

Students, without taking a systematic course, may be admitted to any special course, provided that they can satisfy the Professor concerned that their previous knowledge is such as to enable them to follow with advantage the instruction given.

REQUIREMENTS FOR DEGREES.

The courses for the first year are the same for all branches of Engineering, but after the first year students must take up definitely one of the branches, Mechanical, Civil, or Electrical Engineering. The time-tables for the classes in all subjects taken by Engineering students are appended. Full details of the various Engineering courses will be found in the syllabuses of Mechanical, Civil, and Electrical Engineering, and of the Science courses in the syllabuses of the respective subjects.

First Year.

FOR ALL STUDENTS OF ENGINEERING.

- (a) Engineering—Lectures, Course I.
Drawing.
Workshop.
 - (b) Mathematics—Course I (Pure) ;
or, for more advanced students—
Course II (Pure), and
Course I (Applied).
 - (c) Physics—Lectures, Course I and Laboratory.
 - (d) Chemistry—Lectures, Course I (A) and Laboratory.

MECHANICAL ENGINEERING.

THE UNIVERSITY, EDGBASTON.

Chance Professor : F. W. BURSTALL, M.Sc. ; M.A.
(Cantab.), M.I.C.E., M.I.M.E.

Lecturer : R. C. PORTER, M.Sc., A.M.I.C.E.

Demonstrator : W. E. FISHER, D.Sc.

Lecturer on Machine Design ; F. J. BROSCOMB, B.Sc.,
A.M.I.M.E.

Assistant Lecturer on Machine Design : W. G. WISHART,
B.Sc.

The endowment of the Chance Chair of Mechanical Engineering forms part of a gift of £5,000 towards the support and equipment of the Mechanical Engineering Department by the late Sir James Timmins Chance, Bart.

The training throughout the course is largely practical and experimental in its character ; the University workshops, consisting of forge, foundry, machine shop and pattern-making shop, are very extensive, and equipped with the most modern tools.

In the later part of the course attention is directed to experimental work in the Engineering Laboratories, which are fitted with modern appliances for demonstration of the principles underlying engineering practice.

The University Power Station constitutes the heat engineering laboratory, in which the experimental work on steam and gas engines is carried out. The boiler room contains two water tube boilers of different patterns, two marine boilers, a locomotive boiler, a gas fired super-heater, four feed pumps of various designs, a feed heater, etc. One of the boilers is fitted with a mechanical stoker for the purpose of comparison with ordinary hand-fired furnaces. The engine-room contains two high-speed steam engines of different designs, a triple-expansion marine engine, a steam turbine, four different types of condensers, a two-stage air compressor, two gas engines of different types, and an oil engine, which latter drives an ammonia refrigerating plant.

The size of the plant is sufficient for obtaining satisfactory results, the steam engines having a total output of 400 h.p., and the gas engines of 160 h.p., while the boilers can evaporate 25,000 lbs. of water per hour. Every engine has its own electric generator, and artificial loads are provided for absorbing the current when it is not required for lighting purposes. Attached to the Power Station is a Mond gas generating plant, large enough to gasify five tons of coal per day, and produce 30,000 c. ft. of gas per hour.

The whole University being dependent on this Power Station for lighting, heat, and power, students can learn by actual experience the work involved in running such a station.

On account of the importance and responsibility of working in this laboratory, no student who is not an undergraduate will be allowed to take a course there unless he previously passes a special examination to show that his general engineering knowledge is sufficient to ensure that he can do so with profit.

The Foundry is 50 feet long and 25 feet wide, and is equipped with an ample supply of boxes, tools, etc., besides an over-head travelling crane for handling heavy moulds, and a mortar mill for preparing the sand. A drop-bottom cupola provided with an electric blower is placed just outside the Foundry for melting the iron, while brass is melted in a gas-fired furnace; gas is also used for the core-drying stove.

The Drawing Office is capable of accommodating 120 students. It is 50 feet wide and 100 feet long, and furnished with suitable tables, each fitted with an independent electric light, drawers and lockers for storing students' drawings and instruments, and modern vertical drawing tables for the use of senior students. It is also equipped with a set of sectional models of machine parts. Drawing boards of suitable dimensions are supplied for students, but the student must provide for himself a set of standard instruments and materials, particulars of which will be given by the Lecturer.

Adjoining the Drawing Office is the Blue Print Room, where students receive instruction in blue printing, and other methods of the rapid reproduction of drawings. It is fitted with a modern electric blue printing machine, developing baths, and drying arrangements.

The Machine and Fitting Shop together have a floor space of 7,500 square feet, and are equipped with modern plant, including standard lathes, grinding machines, horizontal and vertical milling machines, planing and shaping machines, and boring machines; and a large assortment of small tools, micrometers, limit gauges, etc. There are also in this department specially constructed tools for the demonstration of the use of high speed steels. Students must provide certain standard small tools, particulars of which will be given by the Instructors.

The Pattern Shop has a floor space of 2,500 square feet, and is equipped with standard hand and power wood working tools, including power, planing, and thicknessing machines, band, circular, and dimension saws, lathes, hand trimmers, and a large assortment of general hand wood-tools. Students must provide certain standard small tools, particulars of which will be given by the Instructor.

The Smithy is the same size as the Foundry, and contains twelve hearths supplied with air blast by an electric blower, and a three-hundredweight power hammer. Oil tanks, air blast, etc., are also provided for hardening and tempering tool steel.

LECTURE COURSES.

First Year.

Course I.

Mondays and Fridays 12.30 throughout the Session.

WINTER TERM.

MR. BROSCOMB.

FEE: £4 4s.

Elementary Principles of Machine Design.—Drawing instruments; construction and use of scales; measuring

appliances used in general engineering work : types of fastening, screws, bolts, nuts, etc.

SPRING AND SUMMER TERMS.

DESCRIPTIVE COURSE.

MR. PORTER.

During the Spring Term the Lectures will include the description of tools used in Engineering, and will be illustrated by a large collection of lantern slides.

For the Summer Term the Lectures will deal with steam boilers, steam engines, and gas and oil engines.

Hand Tools for Wood and Iron.—The plain lathe, engine lathe, slide rest, screw cutting, self-act and cross traverse, large lathes, special lathes (such as the capstan lathe), milling machine, planing machines, shaping machines, slotting machines, drilling machine, sensitive and multiple drills, grinding machines, boring machines.

Types of Boilers and Boiler Fittings.—Cornish, Lancashire, vertical, locomotive, marine, water tube, feed heaters, economizers, super-heaters.

Steam Engine parts.—The cylinder, slide valve, piston, stuffing box, kinds of packing, crosshead, guides, connecting rod, crank shaft, eccentric, bearings, lubrication, flywheels, cocks and valves.

Types of Steam Engines.—Mill engine, locomotive, marine, high speed, pumps and pumping engines, duplex pumps, feed pumps, centrifugal pumps.

Gas and Oil Engines.—Otto cycle, valves, governors, ignitors, Priestman oil engines, Hornsby oil engine, Diesel motor.

Second Year.

Course II.

APPLIED MECHANICS.

MR. WISHART.

Tuesdays and Thursdays, 12.30, and Saturdays at 10.30, throughout the Session.

FEE : £6 6s.

The lectures on Tuesdays and Thursdays will be on Graphics, according to the following syllabus :—

(a) GRAPHICAL MENSURATION.—Areas of polygons closed curves, and surfaces. Volumes.

Vectors.—General properties, rules for addition and subtraction, position vectors.

Mass Centres, by vectors and other constructions. Points, lines, surfaces, and solids. Moment of Inertia.

(b) GRAPHICAL STATICS.—Derivation of vector and link polygons, and conditions of equilibrium using these. Supporting forces. Force diagrams for roofs and girders. Diagrams of bending moment and shearing force. Maximum bending moments and shearing forces for rolling loads. Arches and chains in equilibrium. Problems in hydrostatics.

The Lectures on Saturdays will be on Solid Geometry : —points, lines and planes, projection of solids, interpenetration of solids, and development of surfaces, isometric projection.

Exercises, Tuesdays, 2.30 to 5.

FEE : £3 3s.

Third Year.

Course III.

MACHINE DESIGN.

MR. BROSCOMB.

Wednesdays at 11.30.

FEE : £2 2s.

General Principles.—Properties of materials. Straining actions. Stress, physical constants for ordinary materials, factors of safety, working stress for dead and live loads.

Fastenings, Screws.—Standard forms and dimensions of threads, multiple threaded screws. Screw bolts, studs, set screws.

Keys and Cotters.—Forms of keys. Taper and dimensions. Gib and cotter joint. Special precautions to be taken with alternating stresses, methods of adjustment and fastening.

Riveted Joints.—Proportions of rivets, proportions of joints. Shearing resistance of rivets and tenacity of plates before and after riveting, calculation of pitch. Arrangements of groups of rivets in ties, etc. Graphic method of designing joints. Efficiency of joints.

Boilers.—Thickness of shell, junction of plates, stays angles.

Shafting and Couplings.—Strength of shafts, twisting moment, and transverse loads, variation in twisting moment.

Calculations for shafts to resist twisting and combined bending and twisting. Mean and maximum twisting moments.

Course IV.

HEAT ENGINES.

PROFESSOR BURSTALL.

Mondays and Fridays at 11.30, Spring Term.

FEE : £2 2s.

The laws of heat, properties of air, specific heat, properties of steam, latent heat. The Carnot cycle for air and steam ; Rankine cycle for saturated and superheated steam ; comparison of actual and perfect engines. Reversed heat engines on air, ammonia, and carbon dioxide.

Elementary theory of the internal combustion engines ; calculation of temperature.

Testing of steam and gas engines, indicators, brakes ; working out of engine tests and analysis of results.

Course V.

MECHANICAL ENGINEERING.

MR. PORTER.

Mondays at 10-30 and Fridays at 9-30 throughout the Session.

FEE : £4 4s.

General theory of friction, static and kinetic ; applications to brakes, earthwork, bearings, pivots, transmission of power by belts, ropes and friction couplings. Fluid friction ; applications to skin resistance of ships and bearings. Lubrication.

Teeth of wheels, cycloidal and involute. Helical teeth, bevel wheels, screw and worm wheels, skew bevel wheels : epicyclic and variable gears.

Valve gears, Zeuner diagrams, cut-off valves, link gears, radial gears, trip gears.

Governors : isochronism, stability, and inertia. Watt governors, loaded governors, spring loaded governors, wheel governors.

Fourth Year.

Course VI.

MECHANICAL ENGINEERING.

PROFESSOR BURSTALL.

Mechanical and Electrical Engineers, Tuesdays, Wednesdays, and Thursdays at 11.30.

FEE : £6 6s.

Advanced theory of the heat engine, entropy diagrams for saturated and superheated steam, behaviour of steam

in the cylinder, clearance wire drawing, plotting of engine tests on the entropy diagram ; discharge of steam through nozzels, turbines. Theory of the gas and oil engine, properties of producer gases ; working out of gas engine tests.

Theory of the air compressor, different forms of compression, types of air motors, theory of reheating.

General principles of refrigerating machinery.

Transmission of power by air, water, gas. Cost of power. Effect of load factor.

Advanced machine design. Properties of stress and strain, composition of stresses, ellipse of stress, deflection and shear of beams, strength of cylinders, stability of chimneys, strength of crank shafts, connecting rods, effect of repeated loads, working loads.

LABORATORY COURSES.

Third Year.

HEAT LABORATORY.

SPRING TERM.

The Class is divided into two sections, meeting respectively on Tuesdays and Thursdays, 2 to 5.

FEE : £4 4s.

The first two meetings will be devoted to lectures on Engine and Boiler Testing and the methods of deducing the results, casting up the heat balance, etc.

Tests will then be made on the Babcock, Niclausse, and locomotive boilers, and on the Willans, Belliss, and McLaren engines.

Fourth Year.

HEAT LABORATORY.

Mechanical and Electrical Engineers.—Fridays, 9-30 to 5.

FEE : £12 12s.

The course will include the experimental study of all the forms of heat engines.

Attention will be directed to the steam consumption of the slow speed engines, the quick revolution engines, steam turbine, the economy of using superheated steam, the use of variable expansion and feed heating. Boiler trials will be made on the water tube and locomotive boilers with different kinds of coal.

Experiments on the efficiency of producers at different rates of working, and the influence of the regeneration will be made.

Comparison of slow speed and quick revolution gas engines, efficiency trials at various loads, influence of water cooling on barrel, cover, piston, exhaust valve, influence of scavenging.

Experiments can also be made on the Diesel oil engine and the refrigerating plant.

MACHINE DRAWING COURSES.

First Year.

Course I.

Wednesdays, 2 to 5.

FEE : £3 3s.

After a few exercises to familiarise the student with the use of scales and drawing instruments, he proceeds to make drawings of simple joints and machine parts. These drawings which are at first left in pencil are in every case made from dimensioned freehand sketches, which the student himself makes from a model.

Second Year.

Course II.

Thursdays, 2.30 to 5, and Saturdays, 11.30 to 1.

FEE : £5 5s.

The second year course is a direct continuation of that of the first year. The same methods are employed, but the models from which the drawings are made are more complex, and the student will eventually proceed to make drawings of complete machines, and also of parts of structures such as complex joints in girder or roof work, supports, foundations, etc.

Third Year.

Course III.

MACHINE DESIGN.

Electrical Engineers, Mondays, 2 to 5, Winter Term.

FEE : £3 3s.

Mechanical Engineers, Mondays, 2 to 5, Winter Term,
Fridays, 2 to 5, Session.

Civil Engineers, Fridays 2 to 5, Session.

FEE : £6 6s.

During the first and second years the student has only made drawings from existing machines, but in the third year his drawings are the results of calculations, wherever possible, deduced from strength considerations, and in other cases from empirical formulæ based upon approved practice. It is a course in practical design.

The course in general engineering will include lectures on machine design, and the drawings made will be based upon the substance of these lectures.

The course will include :—

Fastenings.—Bolts, nuts, keys, cotters, pipes and pipe joints, riveted joints, the Civil engineering students giving more attention to the joints that occur in constructional work, and the others to joints in boiler and similar work.

Machinery of Transmission.—Shafts, couplings, pulleys, bearings, belts, ropes, chains. Friction gearing spur and bevel wheels, helical and screw gearing.

After this may follow problems in which the strength considerations are more complicated, as in axles, journals, crank shafts, where bending and twisting moment diagrams are necessary.

In addition to the above, the Civil engineering students will take some simple designs bearing upon their special work, such as joists, trussed beams, bridge floors, culverts, and sewer sections.

Electrical engineering students will be required to make from patterns exact working drawings of details, and later on calculations and working drawings of complete electrical apparatus and machinery.

Fourth Year.

Course IV.

MACHINE DESIGN.

Mechanical Engineers.—Mondays 10.30 to 1, and Thursdays 2 to 5, Session ; Tuesdays 2 to 5, Summer Term.

Electrical Engineers.—Thursdays, 2 to 5, Session.

FEE : £10 10s.

In the fourth year students largely specialise in their design work, the designs being based upon the special lecture courses.

The designs will be of a more complex character, and in all cases at least one complete design from specification and plans will be required.

The Mechanical and Electrical engineering students will deal with the following :—

Cylinders for steam and gas engines. Valves and valve gears of various types. Governors, fly-wheels, etc. Complete engines and boilers. Factory arrangements. Machine tools.

WORKSHOP COURSES.

The Workshops are open from 10 to 5, Saturdays 10 to 1, to those who wish to take up Special Courses, at a fee of £8 8s. od. per term, or £22 1s. od. per session, for full time, or £5 5s. od. per term, or £12 12s. od. per session, for half time in any Workshop.

The fee for any portion of one term is at the rate of £1 11s. 6d. per hour per week per session.

MACHINE AND FITTING SHOP.

Instructors: W. R. CHURCHWARD and F. H. A. HALL.

In this department the course of instruction consists of a series of graduated exercises, both on machines and vice, arranged to familiarise the student with all cutting and fitting operations, and general methods of construction.

Exercises.—Vice work. Exercises in chipping and filing plane and curved surfaces, and finishing to gauge and surface plate.

Machine Work.—Plain turning in cast iron, wrought iron, steel, brass, screw-cutting, and chuck work, Milling, Planing, Shaping, and Drilling exercises. Finishing to Micrometer and limit gauge. General engineering practice.

PATTERN SHOP.

Instructor: V. O. CLARKE.

In this department the course of instruction consists of a series of graduated exercises, on lathe and bench, arranged to familiarise the student with cutting and jointing operations in wood, and general engineering pattern making. The students are only allowed to use the lathes and hand machines in this department, the other machines being dangerous; the uses of these machines are, however, fully demonstrated during the session.

Exercises.—Sawing, and parallel planing, halved, tenon, mortice, and dovetail joints, frame work. Lathe work and general engineering pattern making.

SMITHY.

Instructor: R. GODWIN.

Exercises in bending and shaping bar iron, welding, forging, rings and chains, forging chisels and tools, hardening and tempering of steel. Forging under the Power Hammer.

FOUNDRY.

Instructor: W. R. BATES.

Moulding in green sand, dry sand, and loam, core-making. Charging and working the Cupola. Mixing, melting, and casting iron, brass and gun-metal.

CIVIL ENGINEERING.

THE UNIVERSITY, EDGBASTON.

Professor : STEPHEN M. DIXON, M.Sc. ; M.A., B.A.I.
(Dub.), M.Inst.C.E.

Lecturer : JOHN PURSER, M.Sc. ; B.A., B.A.I.

Assistant Lecturers and Demonstrators :

ROBERT C. PANTON, B.A., B.A.I.
(Vacant.)

Special Lecturer in Town Planning :

RAYMOND UNWIN, F.R.I.B.A.

The courses of study in the department are carried on by lectures, workshop, drawing, laboratory exercises, and field work, the object being to give the student a thorough training, both theoretical and practical, in those subjects, a knowledge of which is necessary in the practice of the profession of Civil Engineering.

The Strength of Materials and Hydraulic Laboratories are in this department, and are equipped in the most complete manner for investigating the laws of elasticity and strength of materials and for experimental work in Hydraulics.

In the Strength of Materials Laboratory the equipment consists of the following apparatus :—A horizontal testing machine of 700,000 lbs. capacity for making tension, compression, and bending tests on full-sized structural members up to thirty feet in length ; a 200,000 lbs. vertical testing machine for tension and compression tests, and capable of testing beams sixteen feet long ; a testing machine of 112,000 lbs. capacity for tension, compression, and bending tests ; a 4,000 lbs. wire testing machine ; an impact testing machine ; a torsion machine, capacity 10,000 inch lbs. ; apparatus for measuring deflections of beams under various loads ; apparatus for testing to destruction brick and concrete

arches ; complete apparatus for testing cements, mortars, bricks, sewer pipes, building stones, reinforced concrete beams and slabs.

In the Hydraulic Laboratory experiments are made on the flow of water in pipes and open channels, efficiency of turbines and pumps, forms of orifices, and effects of various kinds of resistances. The equipment consists of a steel tank, four feet square and thirty feet high, for experiments on jets and flow of water under varying heads ; two steel measuring tanks, each of about two hundred and fifty cubic feet capacity ; a twenty h.p. duplex differential pump capable of dealing with 600 gallons per minute, and a maximum head of 250 feet ; a six inch centrifugal pump ; a three inch centrifugal pump ; a three inch Rees-Roturbo pump ; a nine h.p. Pelton wheel ; a double vortex turbine, two h.p. ; a Girard turbine, eight h.p. ; an eddy current brake ; a Froude water dynamometer ; hydraulic accumulator and three-throw pump ; weirs ; standard orifices and nozzles ; mercury gauges ; a venturi meter, 8 ins. ; a six-inch uniform meter and a two-inch standard meter.

In addition to the above equipment, two Experimental Channels, each 200 feet long, have been constructed outside the laboratory.

LECTURE COURSES.

Second Year.

Course VII.

LAND SURVEYING.

MR. PANTON.

Wednesdays and Fridays, 2 to 5, throughout the Session.

FEE : £9 9s.

The work of this course is carried on throughout the year by lectures, field work, and drawing, the time

devoted to it being six hours each week. The uses and adjustments of the various surveying instruments are discussed in the class room, and surveys are carried on in the field, while in the drawing office, plans, profiles, and contour maps are made.

Third Year.

Course VIII.

STRENGTH OF MATERIALS AND HYDRAULICS.

PROFESSOR DIXON.

(a) *Strength of Materials.*

Tuesdays and Thursdays at 10.30 during the Winter and Spring Terms.

FEE: £4 4s.

In this course the following subjects are discussed in class:—(a) Tension. Behaviour of materials in tension, stress-strain curves, elastic limit, yield point, and breaking load. Effects of impact and repetition of stress. Strength of pipes and thin cylinders. (b) Compression. Short struts, strength of long columns, Euler's formula and formulae derived from experiments. (c) Bending. Neutral axis, moment of resistance, moment of inertia, graphic methods. The design of beams and simple plate girders for various systems of loading. (d) Shear. Properties of shear, stress and strain, shear modulus, and strength of materials in shear. (e) Torsion. Strength and stiffness of shafts

(b) *Hydraulics.*

Tuesdays and Thursdays at 10.30 during the Summer Term.

A course of fourteen lectures in the third term, the subjects discussed being: General principles; the laws of flow of water and methods of measurement; hydraulic resistances; flow of water in pipes and channels.

Course IX.

RAILWAY AND HIGHWAY ENGINEERING.

PROFESSOR DIXON.

(a) Railway Work.

Wednesdays at 10.30 and 2 to 5, and Saturdays at 9.30 during the Session.

FEE : £10 10s.

Preliminary and location surveys. Curves for railways, tramlines, roads and sewers.

Setting out work, computations of quantities, excavation, tunnelling, permanent way, and construction and maintenance of streets and roads. In the drawing office the field notes taken during the survey carried out in the vacation are plotted, and detailed drawings are made of smaller railway structures.

(b) Masonry and Foundations.

The subjects discussed will be masonry materials, foundations, walls, culverts, arches.

(c) Structural Details.

Mondays 2 to 5, throughout the Session.

This course is a series of exercises in design to supplement courses on strength of materials and masonry. In it will be worked out details of a design of a right masonry arch, including abutments, foundations, centres, and bill of quantities, and also details and working drawings of a roof truss and a simple highway bridge.

(d) Railway Field Work and Drawing.

PROFESSOR DIXON, MR. PURSER and MR. PANTON.

Three weeks in Summer.

FEE : £5 5s.

The field work of this course is carried out in three weeks of the long vacation. During this time the work is conducted from a camp, and consists of preliminary and location surveys for a short line of railway. The work is carried on systematically and under strict supervision, and each student is required to work nine hours per day, the instrument men being required in addition to keep maps and profiles showing each day's progress.

Students wishing to take this Course must apply to Professor Dixon on or before the first Monday in May, as the number of students admitted to the Course is limited.

Fourth Year.

Course X.

THEORY OF STRUCTURES AND DESIGNING.

PROFESSOR DIXON.

(a) *Theory of Structures.*

Tuesdays and Thursdays, at 9.30 throughout the Session.

FEE: £4 4s.

A course of fifty lectures in the fourth year. The subjects discussed are:—Pressure of earth, ellipse of stress, design of retaining walls, hydrostatic and geostatic arches, Alexander and Thompson's method of the catenary. Masonry dams, tunnels. Design of plate girders and riveted and pin-connected trusses. Continuous girders, cantilevers, swing bridges, metal arches, with and without hinges. The work of these lectures is closely followed by that of the next course.

(b) *Designing.*

Tuesdays, Wednesdays, and Thursdays, 2 to 5.

FEE: £12 12s.

In this course the instruction given in (a) is supplemented by work in the drawing office. Students are required to make complete designs for the following engineering structures:—Winter Term, retaining walls and masonry arch; Spring Term, steel railway bridge; Summer Term, steel arch hinged at crown and springings. Besides these designs numerous graphical exercises illustrating the work of the lectures will be required.

Course XI.

HYDRAULIC ENGINEERING.

PROFESSOR DIXON and MR. PURSER.

FEE: £10 10s.

(a) Hydraulic Engineering.

Lectures.—Wednesdays at 9.30 and Thursdays at 10.30; Designing, Mondays 9.30 to 1, throughout the Session.

The work of this course is carried on by lectures and drawing, and treats of the following subjects:—

- (i.) Flow of water in pipes; sources, storage, and filtration of water; details of reservoir construction; distribution of water.
- (ii.) Flow of water: open channels; canals and rivers; river regulation; irrigation.
- (iii.) Principles of drainage; sewers and sewerage; various systems of sewage disposal.
- (iv.) Hydrographic surveying; tidal phenomena; waves and coast defence.

In connection with this course measurements are made on the flow of some river during the Easter vacation.

(b) Hydraulic Power Engineering.

Mondays and Tuesdays at 10.30, Summer Term.

Utilisation and transmission of water power. Pumps, Water wheels and turbines.

Course XII.

CITY AND GEODETIC SURVEYING.

MR. PANTON.

Saturdays, 9.30 to 12.30. Spring and Summer Terms.

FEE: £3 3s.

The course consists of a series of exercises in the field and drawing office, carried out by students in the fourth year.

Course XV.

CIVIC DESIGN AND TOWN PLANNING.

MR. RAYMOND UNWIN.

(a) Lecture Course.

Thursdays at 11-30 during Winter and Spring Terms.

FEE: £1 IS.

PART I.

THE DWELLING : Different classes, and sizes. Relation to size of plot ; number of houses to the acre. Relation to roads, aspect and frontage. Cost of land, roads, building, and effect on rent.

Considerations of health, social welfare, convenience, amenity and economic limitations.

THE WORKSHOP OR FACTORY : Relation to dwellings ;—requirements, services, aspect, etc.

THE MARKET, SHOP OR COMMERCIAL BUILDING : Conditions of locality, site, and access affecting success of business.

THE OPEN SPACE : Playground, park, reserved country. Definite purpose, desirable character, and location of each.

THE ROAD or means of communication between the units ; different kinds of roads ; requirements of traffic, various widths and characters, with cost and effect on price of adjacent land.

SITE PLANNING, or the disposition of these units on small areas of land.

Study of the site, its physical survey, its undulations, sub-soil ; its opportunities, economic and æsthetic.

Relations of roads to contours ; and effect on cost of roads and buildings. The spacing of roads to give economical development. Straight and curved roads ; the use and conditions of successful treatment of each. The architectural groupings of buildings in relation to site and roads.

The proper influence of architectural considerations in determining the form of the site plan.

PART II.

The relation of the Site Plan to the Town Plan.

Necessity for town extension plan to be based on careful study of existing town. Civic survey, including topography of region, survey of existing railway, waterway and other traffic facilities, of drainage, power and light, water and other services.

Comparison of different systems of Town Planning practised in former periods and in different countries ; Greek and

Roman, Mediæval, Renaissance, French, American, Modern German.

The Civic Centre and other minor centres ; their social, economic and architectural importance and their proper treatment.

The main framework in roads ; its character and relation to the centre and to probable lines of traffic.

Secondary series of roads, their relation to the main roads and minor centre points.

The Town Plan an expression of the needs of the citizens adapted to the nature of the site. Limits of natural development to which Town Design must conform.

The placing and grouping of the buildings architecturally and their harmonious relationship as creating the final effect.

(b) Office Work.

Thursdays, 2 to 5 during Winter and Spring Terms.

FEE : £4 4s.

In this course problems met with in the Practice of Site Planning and simple problems in Town Planning will be worked out in the Drawing Office, and surveys for Town Planning will be made in the Field.

Course XVI.

SOCIAL ORIGINS AND ECONOMIC BASES OF TOWNS.

MR. RAYMOND UNWIN.

The University, Edmund Street.

Thursdays at 5 during Winter and Spring Terms.

FEE : £1 1s.

LABORATORY COURSES IN STRENGTH OF MATERIALS AND HYDRAULICS.

Third Year.

PROFESSOR DIXON and MR. PURSER.

(a) Elementary Course in Strength of Materials.

Tuesdays, 2 to 5, Winter Term.

FEE : £3 3s.

This course is arranged for all engineering students, and the following series of experiments is made: measurements of centrifugal force, energy of rotation, the laws of friction, and the efficiency of machines, deflection of beams, wire testing, cement testing.

Fourth Year.

(b) Testing of Masonry and Timber.

PROFESSOR DIXON and MR. PURSER.

Mondays, 2 to 5, during Winter and Spring Terms.

FEE: £6 6s.

This course is arranged as a series of laboratory exercises for the course on masonry and foundations. A regular series of tests of cement is made according to the British and foreign standards, and concrete, bricks, building and paving stone, and timber are also tested.

(c) Advanced Laboratory Course in Strength of Materials.

Mondays, Wednesdays, or Fridays, 2 to 5, during the Winter Term.

FEE:—£3 3s.

This is a short course arranged for all engineering students, and in it the following work is carried on: systematic tests of various metals, tension and investigation of the elastic properties, compression tests, transverse tests of steel, cast iron and wood, strength and elasticity of various metals in torsion, impact tests.

(d) Laboratory Course in Hydraulics.

Mondays, Wednesdays, or Fridays, 2 to 5, Spring or Summer Term.

FEE:—£5 5s.

Flow of water through orifices and weirs ; tests of meters ; measurements of hydraulic resistance, pipes, bends, valves ; efficiency tests of various types of pumps and motors.

(e) Advanced Laboratory Course in Strength of Materials.

Fridays, 2 to 5, Summer Term.

FEE :—£5 5s.

This additional course, arranged for civil engineering students, is as follows : Investigation of influence of the proportions of a specimen on its strength and elongation in tension. Effects of rate of loading. Compression of wood, stones, and concrete. Elasticity on compression. Tests of struts. Hardness tests by indentation. Reinforced concrete joists and slabs. Concrete and brick arches.

(f) Elementary Course in Strength of Materials for Metallurgists.

Wednesday, 2 to 5, Summer Term.

FEE : £5 5s.

This is a special course of laboratory experiments on the properties of engineering materials and the methods of testing in common use.

Apparatus is provided for the bending of beams loaded in various ways, and for testing wires and cement. The 50-ton and 100-ton testing machines will be used for the usual commercial tests in tension, compression and bending, also testing in tension iron and various steels, and investigating the effects of heat treatment. Chains and ropes will be broken in tension, metals, stones, and bricks in compression, and standard cast-iron bars by bending. Torsion tests will also be made.

ELECTRICAL ENGINEERING.

THE UNIVERSITY, EDGBASTON.

Professor : GIBBERT KAPP, M.Sc. ; D.Eng., M.Inst.C.E.,
Past President Inst.E.E.

Lecturers : { E. J. KIPPS, M.Sc. ; M.Inst.E.E.
T. F. WALL, D.Sc.(Vict.), M.Eng., A.M.Inst.
C.E. ; A.M.Inst.E.E.

Assistant Lecturer and Demonstrator : GEORGE SHEARING,
B.Sc., A.M.Inst.E.E.

The course for Electrical Engineering students is the same as that for Mechanical Engineering students, for the first two years, and only differs in the third and fourth years in the increased time spent in the electrical engineering laboratory and on the design of examples of electrical machinery, apparatus and installations.

The Electrical Engineering Laboratory has two Sections, one for the Junior and one for the Senior students. The Junior Laboratory is on the upper ground floor, and covers an area of 3,500 sq. ft. Current (D.C., A.C., and Three Phase) is available at all the working tables, and besides the usual apparatus for the measurement of resistance, current, electromotive force, power, capacity, inductance, etc., special appliances designed and made in the department are provided for the investigation of the magnetic and electric properties of materials used in engineering. One room is fitted for work with ballistic galvanometers, and two other rooms are exclusively used for photometric work. One of these is fitted up with a Bunsen and "Flicker" photometer for glow lamps, and the other with a specially designed photometer for large arc lamps with Brodhun-Lummer photometer head. There is also a large collection of various types of electricity meters used in the commercial distribution of electricity, so that students can test them for accuracy in practical work. Parts of machines and apparatus of various kinds are exhibited in show cases.

The Senior Laboratory is on the lower ground floor, and covers an area of 7,000 sq. ft. It receives power in the form of 110 V.D.C. and 200 V. 30 frequency three-phase current from the University power station. As current of other kind is also required, the machinery installed is used not only for testing, but also to make the necessary transformations in the manner of a sub-station such as is practically used in the commercial supply of electricity.

There are also two storage batteries, one for 220 V. and 600 A.H., and one for 12 V. and 1200 A.H. capacity. These are placed in the cellar under the laboratory. The equipment consists of :—A 30 KW rotary converter, with auto transformer and adjustable booster for converting the three-phase supply into D.C. current of 220 V.

A D.C. motor generator for supplying D.C. current at any voltage up to 25 V. This set is fitted with an automatic regulator, so that when inserted into the discharge circuit of the battery, it keeps the voltage of this circuit nearly constant, whatever may be the demand for current at any time.

A pair of 30 KW D.C. dynamos coupled mechanically. From this set any voltage up to 500 V. may be obtained.

A 30 KW D.C. booster, taking 110 V. current from the power station, and producing the necessary voltage for charging the battery. A 30 KW D.C. to three-phase motor generator, taking on the motor side 220 V.D.C. current, and delivering on the generator side three-phase current at 50 frequency, and any voltage up to 250 V. A 30 KW motor generator, adapted for variable speed transforming D.C. into three-phase current or *vice versa*. The three-phase armature is arranged so that either mesh or star coupling may be used, the maximum voltage in the latter case being 300 V. A set of two D.C. motors and two two-phase alternators with their shafts in line, and arranged for mechanical coupling by magnetic friction clutches. From these machines two-phase currents at a variable frequency

up to 50 can be obtained. One of the alternators is fitted with a Joubert disc for the determination of the wave form.

All these machines are provided with special terminal and switch boards, to which their internal circuits are connected, so that students in making tests attach the instruments not to the machine itself, but to the terminals on the board, which are suitably labelled.

At the north end of the laboratory there are several test beds for machines of various kinds, among which may be mentioned three-phase non-synchronous motors, a D.C. crane motor, a tramway motor, a Winter-Eichberg single-phase motor, a Deri single-phase motor, a Schüler single-phase motor, a Rosenberg train lighting dynamo, a Westinghouse converter, and a special set of induction machines arranged to produce any desired phase difference between current and e.m.f. There are also a number of transformers. For the testing of motors, brakes (both of the eddy current and mechanical type) are used. For the testing of generators there are available banks of lamps capable of taking up a maximum power of 30 KW and a water load capable of taking current representing power up to 50 KW.

At the north end of this laboratory there is also a small workshop, in which the special apparatus for lecture demonstrations and apparatus for special tests are made. The laboratory is fitted with two travelling cranes.

For the purpose of verifying the accuracy of the commercial instruments used by the students in testing, there is fitted up at the south end a standardising room with potentiometer, having an accuracy of 1 in 100,000. In the same room is also an oscillograph.

All the laboratory circuits are connected with this room, so that any machine may be brought into connection with the oscillograph, or any instrument used outside may be connected with the standard in this room without having to be moved bodily. Telephonic communication is provided between the standardising room and the working places in the laboratory.

Advanced students are encouraged to take up some line of investigation of technical interest, for which the above equipment and a collection of standard instruments are available.

LECTURE COURSES.

Second Year.

Course I A.

MR. KIPPS.

Saturdays at 9.30 throughout the Session.

FEE : £2 2s.

This course is intended to serve as an introduction to Electrical Engineering, and to the more advanced Courses XIII. and XIV., which are attended by third and fourth year students. The lectures are descriptive in character, and deal with the fundamental principles underlying the applications of electricity to engineering. The action and construction of various types of electrical machinery and apparatus are explained. The course follows the subjoined syllabus.

Electro-chemical properties of the electric current and their uses in standard measurements, primary and secondary batteries.

Ohm's Law and its applications to the measurements made in electrical testing.

Electrical energy and power, electric heating.

Cables, their construction and use in electrical distribution.

Magnetism and Electro-magnetism and the principles underlying the construction of electrical measuring instruments, such as galvanometers, ammeters, etc., etc.

Electro-magnetic Induction, and the principles of action and construction of generators and motors.

Electrical production of Light, glow lamps, and arc-lamps.

Third Year.

Course XIII.

ELECTRICAL ENGINEERING.

PROFESSOR KAPP.

Civil, Electrical and Mechanical Engineers.—Tuesdays and Thursdays at 11.30, and Fridays at 10.30.

FEE : £6 6s.

One hour a week is devoted to the working out of simple electrical engineering problems.

Principles of Electric and Magnetic Action.—Elementary theory of potential. Lines of force. Electric and magnetic fields. Attractive force of magnets. Energy of magnetic field. Force between current and magnet and between two currents. Exciting force and resulting field. Applications to dynamos. Electrostatic attraction. Theory of electric images and its application to the determination of the capacity of aerial lines and cables. Absolute system of measurement. Relation between the electrostatic and electro-magnetic systems. Practical units. Induced E.M.F. and application to dynamos.

Continuous Currents.—Generation by mechanical, thermal, and chemical means. Energy of an electric circuit. Power of a circuit. Varying currents. Time constant.

Alternating Currents.—Vector diagrams. Generation by mechanical means. Frequency. Effective value. Form factor. Power. Power factor. Wattless currents. Self-induction and impedance. Application to choking coils. Natural frequency.

Materials.—Resistance. Specific resistance and temperature co-efficient of conductors. Heating of single conductors and coils. Magnetic quality of iron. Hysteresis and eddy current losses. Insulating materials. Construction of resistances.

Measurements.—Standards of resistance and E.M.F. Test-room instruments. Potentiometer. Shunted

amperemeters. Electricity meters. Ballistic galvanometer. Fluxmeter. Tests for conductivity, insulation, magnetic flux, self-induction and capacity. Magnetic tests of iron. Photometry.

Continuous Current Dynamos.—Simple forms of armature windings. Calculation of voltage. Field magnet windings. Compounding. Characteristics. Regulation. Motors for special purposes. Losses in dynamos. Efficiency.

Alternators.—Armature winding for single and poly-phase currents. E.M.F. curve. Calculation of effective E.M.F. Characteristics. Transformers. Elementary theory of synchronous and induction motors.

Installations.—Small isolated plant. Use of batteries. Parallel running of continuous current dynamos. Switchboards. Arrangement of generating plant. Short distance power transmissions by direct current. Cost of working.

Fourth Year.

Course XIV (i).

ELECTRICAL ENGINEERING.

PROFESSOR KAPP.

Mondays, Tuesdays, Wednesdays, and Thursdays, at 9.30.

FEE: £6 6s.

One hour a week is devoted to the working out of more advanced electrical engineering problems.

Design of Continuous Current Dynamos.—Armature windings. Commutation. Field winding. Commutating Coils. Heating and ventilation. Losses. Efficiency and its experimental determination. Mechanical construction. Types for special purposes.

Design of Alternators and Transformers.—Determination of the E.M.F. and current curves. Harmonic analysis. Armature winding. Heating and ventilation. Losses. Efficiency. Characteristics. Short circuit current. Drop. Mechanical construction. Parallel running. Hunting. Influence of damping coils. Theory of transformers. Core and shell types. Inductive and ohmic drop. Methods of cooling. Special designs for large output and high pressure. Mechanical construction.

Design of Alternating Current Motors.—Synchronous Motors and Converters. Induction Motors. Commutator Motors.

Continuous and Alternating Current Circuits.—Influence of capacity, and self induction. Resonance. Free and damped oscillations. Lightning protection. Protection against disruptive discharges. Design of long transmission lines.

Central Stations and Distribution of Current.—Selection of system. Arrangement of machinery and switch gear in Power House. Use of batteries. Boosters, Sub-stations. Electrical tramways and railways, Feeders and distributing mains. Cost of working. Meters and tariffs.

COURSE XIV (ii).

TELEGRAPHY AND TELEPHONY.

Dr. WALL.

Wednesdays at 10.30, Spring and Summer Terms.

FEE: £2 2s.

Batteries, needle instruments, simplex, duplex, and multiplex working, automatic telegraphy, submarine telegraphy, wireless telegraphy, microphones, receivers, telephone exchanges. (The lectures on telegraphy and telephony form a special course open to all students, but are not compulsory.)

ELECTRICAL LABORATORY COURSES.

Third Year.

Course XIII (A)

PROFESSOR KAPP, DR. WALL, and MR. SHEARING.

Electrical Engineers.—Thursdays and Fridays, 2 to 5

FEE : £12 12s.

Civil and Mechanical Engineers.—Thursdays, 2 to 5.

FEE : £6 6s.

Mining Students.—Thursdays, 2 to 5.

Fee : £6 6s.

Magnetic field of currents and magnets. Carrying capacity of wires. Fuse testing. Heating of wires and coils. Exact comparison of electrical instruments. Measurement of resistance and conductivity. Insulation resistance. Resistance of armature windings. Magnetic testing. Intensity of magnetic field in air-gaps of machines. Forces on currents in magnetic fields. Torque of motor at rest. Tests on arc and glow lamps. Meter testing and calibration. Capacity of storage cells at different rates of discharge. Tests on the characteristics of different kinds of direct current motors and dynamos. Efficiency. Separation of losses in electrical machinery. Speed regulation. Alternating currents, elementary tests. Power factor. Use of Watt-meter.

Fourth Year.

Course XIV (A).

PROFESSOR KAPP, DR. WALL and MR. SHEARING.

Electrical Engineers.—Mondays, 10.30 to 5, Session.

FEE : £12 12s.

Mechanical Engineers.—Wednesdays, 2 to 5, Winter and Spring Terms.

FEE : £6 6s.

The work in the Laboratory is arranged to give students an opportunity of testing practically the conclusions arrived at theoretically in the corresponding lectures. Students make accurate measurements on machines, transformers, batteries, cables and instruments, the tests being arranged to correspond with the requirements of practical work.

DRAWING AND DESIGNING.

Third Year.

Course XIII (B).

PROFESSOR KAPP AND MR. KIPPS.

Mondays, 2 to 5, and Wednesdays, 10.30 to 11.30.

FEE : £3 3s.

In the Winter term the work is the same as for Mechanical Engineers (Course III), and during the Spring and Summer terms students make drawings of parts of electrical machinery and apparatus.

Fourth Year.

Course XIV (B).

PROFESSOR KAPP AND MR. KIPPS.

Mechanical Engineers.—Tuesdays, 2 to 5, Winter and Spring Terms.

FEE : £4 4s.

Electrical Engineers.—Tuesdays, 2 to 5, Winter and Spring Terms. Tuesdays and Wednesdays, 2 to 5 ; Saturdays, 10 to 1, Summer Term.

FEE : £6 6s.

The work done in this course consists in the calculation, design, and preparation of working drawings of generators, motors, transformers, and other apparatus to definite specifications, and the design of complete installations.

For Electrical Engineering for Mining Students, see page 341.

COMBINED ENGINEERING COURSE.

The objects of this Course are to give a general and practical treatment of the subject so far as is required in works practice.

The subject of Engineering will rank as a single subsidiary subject, and will take up in all, if possible, twelve hours per week during one year, three hours of which will be devoted to Engineering Drawing. The remaining nine hours will be spent in lectures and laboratory practice in the Power Station, and in the Strength of Materials Laboratory.

SYLLABUS.

POWER STATION.—*Lectures*, Mondays and Fridays at 11.30 during the Spring Term. *Laboratory*, Tuesdays, 2 to 5 during the Winter Term. The testing and management of various types of boilers. The study of fuels for power purposes. The analysis of flue gases, and the measurement of high temperatures. The testing of steam engines and dynamos, and the comparison of high and low speed types. The testing of gas and oil engines, and the study of producers using both bituminous and anthracite coals. The testing of refrigerating plants of the ammonia type, and the testing of air compressors. The production and properties of liquid air. The flow of gases in pipes, and the use of anemometers, fans and blowers.

DRAWING.—Three hours weekly at times to be arranged. The making of drawings in plan, elevation and section, examples being chosen from the general type of machinery likely to be found in chemical works, such as shafting, couplings, pulleys, pumps, and steam plants. Towards the end of the Course attention will be devoted to the design of simple structures which are built up from plates, angles, and tees, such as tanks, holders, girders, etc.

STRENGTH OF MATERIALS AND HYDRAULICS.—*Lectures*, Tuesdays and Thursdays at 10.30. *Laboratory*, Tuesdays, 2 to 5 during the Summer Term. In the Strength of Materials Laboratories, tests will be made on the various kinds of metals that are used, such as steel, wrought iron, cast iron, bronzes and white metals in tension, compression and shear, together with impact tests. The testing of cements and mortars, and the study of reinforced concrete. In the Hydraulic Laboratory the testing of pumps, turbines, the flow of water through pipes, the measurement of large volumes of water, and the general properties of fluids.

FEE for the Course: £12 12s.

Under normal conditions of a Degree Course in Chemistry with Engineering as a subsidiary subject, the Engineering should be taken in the first year after Intermediate, but this arrangement is subject to alteration by special permission of the Faculty of Science.

METALLURGY.

THE UNIVERSITY, EDGBASTON.

Feeney Professor: THOMAS TURNER, M.Sc. ; A.R.S.M.,
F.I.C

Lecturer and Instructor in Assaying:

O. F. HUDSON, M.Sc. ; A.R.C.S.

Assistant Lecturer and Demonstrator:

HENRY IVOR COE, M.Sc.

Special Lecturer in Metallography: O. F. HUDSON, M.Sc.

The endowment of the Feeney Chair of Metallurgy was provided for by a legacy of £20,000 bequeathed by the late John Feeney, Esq., towards the encouragement and equipment of the Metallurgical Department.

The Department provides instruction for those engaged in or connected with the staple metal industries of this country, and also trains men who propose to follow a metallurgical career in the colonies or in any other part of the world.

The courses of study are intended to meet the requirements of—

1. Metallurgists, who devote the greater part of their time to metallurgy.
2. Metallurgical chemists, who specialize in chemistry.
3. Metallurgical engineers, who devote most of their time to engineering.
4. Mining and Geological students, who follow the courses prescribed in their respective departments.
5. Dental students.
6. Others interested in Metallurgy.

The courses of study include lectures, laboratory teaching, practical work in the smelting laboratories, and visits to works.

The instruction is given at the new buildings of the University, the postal address of which is The University, Edgbaston, Birmingham

The buildings occupied by the Metallurgical Department are in two separate portions, one situate in the main building, and the other in a self-contained block near the power house. The former comprises the lecture rooms, laboratories, and museums, while the latter includes the smelting laboratories. In the main building about 20,000 square feet of floor space is devoted to metallurgy. The department is chiefly placed on the main ground floor, on which there is a spacious and well-lighted suite of sixteen rooms, including elementary and advanced laboratories capable of accommodating sixty students at one time ; separate dry assay and balance rooms ; a lecture theatre, and advanced class room and library. There are also rooms devoted to ore sampling, metal preparing, pyrometry, metallography, and electro-metallurgy ; together with chemical stores, Professor's office, and Lecturers' private room. This portion covers 13,000 square feet, while upwards of 6,000 square feet on the first floor is devoted to museum and similar purposes. The separate smelting laboratory includes a steel section with a two-ton new form Siemens' furnace with electric hoist, crane, ladle, ingot pit and boiler. There is also a section of similar area devoted to the smelting of metals other than iron and steel, the plant in which includes a hand-fired reverberatory furnace, a Brückner roaster, a water jacketed blast furnace, a small bessemer converter, a cupellation furnace, a cyanide plant for gold ores, a chlorination equipment, and a filter press plant. Smaller rooms are employed as brass and steel foundry, and as an electric smelting laboratory respectively. Immediately adjacent are the power house, the iron foundry, the smith's shop, and the Mond gas plant of the Engineering Department.

LECTURE COURSES.

Course I (Junior).

MR. COE.

A Course of twenty lectures will be delivered on Saturdays at 10 during the Winter and Spring Terms. During the Winter and Spring Terms a Practical Class is also held in the Laboratory on Saturday mornings from 11 to 1 for Dental students, or on Tuesdays from 2 to 5 for others throughout the Session. This Course is intended to serve as an introduction to Metallurgy, and will also cover the ground required by students of Dentistry.

Syllabus.

PART I.

Physical, Mechanical, Chemical, and Electrical Properties of the Common Metals. Properties of Alloys. Melting, Casting, and Working of Metals. Varieties of Furnaces. Furnace Materials. Slags and Fluxes. Metallurgical Terms. Fuel. Gaseous Fuel. Gas Furnace.

PART II.

Preparation, Properties, and Uses of the following:—

Gold, Silver, Mercury, Copper, Tin, Zinc, Lead, Iron, Platinum, Iridium, Palladium, Cadmium, Bismuth, Aluminium, and Nickel, together with their chief alloys, and amalgams.

FEE for the Course: Lectures and Laboratory, £3 3s.

TEXT BOOKS RECOMMENDED.—HUNTINGTON and MACMILLAN'S *Metals* (Longman); SMITH'S *Dental Metallurgy*.

Course II (General).

PROFESSOR TURNER.

This Course is intended to give a general outline of the subject, and is attended by Metallurgical, Mining and Engineering students in their second year. The Lectures are delivered on Tuesdays and Thursdays at 11.30 throughout the Session.

Syllabus.

(a) INTRODUCTORY.—Physical, Mechanical, and Chemical Properties of Metals. Nature of Alloys. Metallurgical

Terms and Processes. Classification of Furnaces. Furnace Materials. Composition of Fire Clay. Manufacture and Testing of Fire-bricks and Crucibles. Slags and Fluxes. Composition and Character of Slags. Utilization of Slag. Calculation of Furnace Charges. Physical and Chemical Properties of Fuel. Principles of Combustion. Calorific Power and Intensity. Calorimeters. Pyrometers and Pyrometry. Gaseous Fuel. Preparation of Coke, Charcoal, and Patent Fuels. Electric Furnaces.

- (b) IRON AND STEEL.—Composition, Characters, and Preliminary Treatment of Iron Ores. The Blast Furnace. Details of Construction and Working. Furnace Burdens. Subsidiary Appliances. Theory of the Blast Furnace. Chemical and Mechanical Properties of Cast Iron. Foundry Practice. Manufacture of Wrought Iron. Chemistry of the Puddling Furnace. Properties of Wrought Iron. Manufacture and Properties of Steel. Puddled, Blister, Shear, and Crucible Steel. Bessemer and Siemens' Steel. The Basic Process. Other important Steel Processes. Chemical Composition and Mechanical Testing of different varieties of Iron and Steel.
- (c) METALS AND ALLOYS.—Production, Properties and Principal Alloys of Gold, Silver, Copper, Tin, Lead, Zinc, Aluminium, and Nickel. Heat Treatment of Alloys. Corrosion. Principles of Electro-Metallurgy. The more important Electro-Metallurgical Processes. The Microscopic Examination of Metals.

FEE for the Course : £4 4s.

Metallography.—A course of lectures will be delivered on Mondays at 4.0 during the Summer Term, by Mr. Hudson, which should be attended by all Metallurgical students in their second year. External students may also attend these lectures on paying a fee of 10s. 6d.

TEXT BOOKS RECOMMENDED.—ROBERTS-AUSTEN'S *Introduction to Metallurgy* (Griffin); TURNER'S *Iron* (Griffin). ROSE'S *Precious Metals* (Constable). DESCH'S *Metallography* (Longmans).

It will be necessary to assume that students taking this Course possess some knowledge of Chemistry and Physics.

Course III (Senior).

A Course of about sixty Lectures for senior students is given each session. The class will meet on Wednesdays at 12, and on Fridays at 10.30, also on Saturday mornings, during the Summer Term only, at 10.

PART I.—MR. HUDSON.

This portion of the Course will be delivered on Wednesdays and Fridays. The subjects to be dealt with may be somewhat modified to meet the requirements of the students who attend; the general outline will be as follows :—

1. Fuel; classification and properties, calorimetry, pyrometry, coke ovens, gas producers. Refractory materials; slags, their properties and constitution; calculation of furnace charges.
2. General properties of metals and alloys. Constitution of alloys. Microscopic examination of metals and alloys. Effect of heat-treatment.
3. Steel; influence of impurities, segregation, blowholes, fluid compression, heat treatment, microscopic examination; special steels; manganese, nickel, chromium, vanadium, tungsten steels, etc. High speed tool steels.
4. Metallurgy of gold and silver; chlorination and cyanide processes, treatment of complex gold and silver ores, refining. Metallurgy of lead; modern smelting practice, lime roasting, desilverisation of lead.

PART II.—MR. COE.

The Metallurgy of Copper. History, Properties, and Uses of Copper. Distribution of Copper Ores. Preliminary Treatment. Smelting practice. Pyritic Smelting. Converting and Refining. Arrangement of plant and furnace design.

FEE : £4 4s.

TEXT BOOKS RECOMMENDED.—COLLINS' *Silver* (Griffin); HARBORD'S *Steel* (Griffin); ROSE'S *Gold* (Griffin); LAW'S *Alloys* (Griffin); RICHARD'S *Metallurgical Calculations* (McGraw Publishing Co.); PETER'S *Principles of Copper Smelting* (Hill Publishing Co.); PETER'S *Practice of Copper Smelting* (Hill Publishing Co.); RUEER'S *Elements of Metallography* (Chapman and Hall).

Practical Metallurgy.

The course of study in the laboratories is designed with the object of teaching the properties of the materials used by the metallurgist, and the changes which take place during the production of metals and alloys.

Instruction is given in the properties of metals, alloys, ores, slags, and other metallurgical products ; in assaying ; in the reactions which underlie various metallurgical processes ; and in pyrometry and metallography.

All students work independently, and as far as practicable at the hours best suited to their arrangements. Special facilities will be offered to proprietors, managers, and others engaged in technical or professional work, who desire either to study the technology of their subject, or to work out improvements. Students may commence work in the laboratory at any time. Senior students are encouraged to undertake research work bearing upon their intended future avocations.

SYLLABUS OF PRACTICAL METALLURGY AND ASSAYING.

GENERAL COURSE LABORATORY.—PART I.

EXAMINATION OF FUEL.—Commercial Analysis, including Ash, Moisture, Sulphur, Coke, and Calorific Power.

FURNACE MATERIALS.—Examination and testing of fire-clay for plasticity, porosity, refractoriness, etc.

METALS AND ALLOYS.—Properties of Copper, Zinc, Tin, Lead, &c. Preparation of different varieties of Brass, Bronze, &c.

OXIDATION AND REDUCTION.—Experiments illustrating the use of oxidising and reducing agents in metallurgy. Lead Assay.

SLAGS AND FLUXES.—Experiments illustrating the composition, formation, and melting points of slags.

IRON ASSAY.—Assay of Iron Ores for Iron, Silica, Phosphorus, Moisture, and Loss on Ignition.

SILVER.—Determination of Muffle Temperatures. Experiments with Cupellation. Preparation of Silver Alloys. Assay of Silver Bullion and Silver Ores.

GOLD.—Assay of Gold Ores, Lemel, and Bullion.

TEXT BOOK.—TURNER'S *Introduction to Practical Metallurgy* (Griffin).

GENERAL COURSE LABORATORY.—PART II.

Students select from the following, among other, subjects of further instruction,

FUEL.—Complete Analysis of Coal, Coke, &c. Gas Analysis as applied to metallurgical operations.

PYROMETRY.—Measurements of High Temperatures.

CALORIMETRY.—Use of more accurate Calorimeters.

FURNACE MATERIALS.—Chemical and Physical tests of Clay, and other fire-resisting materials.

IRON AND STEEL.—Complete Analysis of Iron Ores, Cast Iron, Wrought Iron, and Steel, Preparation and Properties of various Irons, Steels, and Ferro-Alloys.

COPPER.—Assay of Copper Ores; Preparation, Properties, and Analysis of Brass, Bronze, German Silver, and other Copper Alloys.

TIN, LEAD, ZINC, ANTIMONY, NICKEL, COBALT, AND ALUMINIUM.—Assay of Ores and Analysis of Commercial Metals and of most important Alloys.

ELECTRO-METALLURGY.—Electro-deposition of Gold, Silver, Copper, Brass, and Nickel. Electro-refining of Metals, Electric Smelting.

MICROSCOPY.—Preparation of Samples and Examination of Metals under the Microscope. Photo-Micrography.

TEXT BOOKS RECOMMENDED.—BERINGER'S *Text Book of Assaying* (Griffin); BREARLEY AND IBBOTSON—*Analysis of Steel Works Materials* (Longmans); CAMPION'S *Iron and Steel Analysis* (Fraser, Asher and Co.); MACFARLANE—*Iron and Steel Analyses* (Longmans).

LABORATORY FEES : For three hours per week throughout the Session, £3 3s. od., and for each additional hour per week, £1 1s. od.

Smelting Laboratories.

Courses of Practical Work, extending over about six weeks in all, will be arranged during the Vacations, to enable students to take part in the working of the Siemens' furnace, the blast furnace, the gold and silver plant, the iron foundry, and other appliances. The plant will also be employed for teaching and experimental work throughout the session.

The above fees entitle the student to work in the Smelting Laboratories. The time to be so spent will be determined by the Professor, and it may be during term or in vacation as may be found necessary. As a rule not more than one-sixth of the student's time may be spent in the smelting laboratories without additional payment at the rate of one guinea per week. For students taking the smelting laboratory only the fee is 25s. per week, with a minimum of £5 5s., which includes entrance fee. The accommodation in this section is limited, and only such students will be admitted as are able to satisfy the Professor that their previous training has been such as will enable them to profit by the instruction.

For Engineering students the fee for the Practical Class throughout the session, three hours weekly, together with occasional work in the smelting laboratory, is £4 14s. 6d.

Gas, fuel, water, and ordinary reagents are supplied by the University, but students must provide themselves with a small set of Apparatus ; also with crucibles, and with materials when large quantities are required.

VISITS TO WORKS.

Excursions to Metallurgical Works are arranged throughout the Session. Such visits will usually be in connection with the University Metallurgical Society. The number and variety of Metallurgical industries in the district afford an unusually good opportunity of seeing important processes in operation.

TIME TABLE.

METALLURGY.	Mon.	Tues.	Wed.	Thurs.	Fri.	Sat.
Lectures—						
Course I.	10.0†
Course II. ...	4.0*	11.30	...	11.30
Course III.	12 0	...	10.30	10.0*
Practical Classes—						
Engineering Students	2—5
Junior Course	...	2—5
Dental Students	11—1†
Laboratory—open (For General and Senior Courses)	10—5	10—5	10—5	10—5	10—5	10—1

* Summer Term only.

† Winter and Spring Terms only.

REQUIREMENTS FOR DEGREES.

Candidates for the Degree of B.Sc. in Metallurgy must be matriculated students of the University before commencing their degree course, and must, after matriculation, attend the prescribed courses of study for at least three academic years.

The work for the first year, or Intermediate Examination, for those who propose to become Metallurgists, is as follows :—

Mathematics, Course I (Pure).

Physics, Lectures, Course I and Laboratory.

Chemistry, Lectures, Course I (A) and Laboratory.

Metallurgy, Junior Course, Lectures and Laboratory.

Surveying, Course I.

The subjects of the Second Year Metallurgical Course are as follows :—

Metallurgy. Lectures (General Course). Two lectures weekly.

Laboratory. At least twelve hours, by arrangement.

Applied Mathematics. Course I. Three hours weekly.

Engineering. Lectures. Course I. Two lectures weekly.

Lectures. Course IA. One lecture weekly.

Drawing. Three hours weekly.

Workshop. Three hours weekly.

Geology. Lectures (Course I). Two lectures and two hours laboratory, weekly.

Metal Mining. Course IIA.

The subjects of the Third Year's Courses for Metallurgists are as follows :—

Metallurgy. Lectures (Senior Course). Two or three hours weekly.

Laboratory. At least eighteen hours per week.

Engineering. Strength of Materials. Lectures, two hours weekly ; or Laboratory, three hours weekly.

Metal Mining. Courses IIIA and IIIB, Metal Mining Laboratory (See Syllabus of Mining.)

The following alternative course may be taken by students who desire to become Metallurgical Chemists :—

FIRST YEAR.

Mathematics, Course I (Pure).

Physics, Lectures, Course I and Laboratory.

Chemistry, Lectures, Course I (A and B) and Laboratory.

Metallurgy, Junior Course, Lectures and Laboratory.

Surveying, Course I.

SECOND YEAR.

Metallurgy. Lectures (General Course). Two lectures weekly.

Laboratory. At least twelve hours, by arrangement.

Applied Mathematics. Course I. Three hours weekly.

Engineering. Lectures. Course I. Two lectures weekly.

Lectures. Course IA. One lecture weekly.

Drawing. Three hours weekly.

Workshop. Three hours weekly.

Chemistry. Lectures (Course IIB). Advanced Inorganic Chemistry.

Laboratory. Six hours weekly, by arrangement.

THIRD YEAR.

Metallurgy. Lectures (Senior Course). Two or three lectures weekly.

Laboratory. Eighteen hours weekly, by arrangement.

Chemistry. Lectures (Course IIIB). Physical Chemistry.

Laboratory. Nine hours weekly, by arrangement.

Engineering. Strength of Materials. Lectures, two hours weekly; or Laboratory, three hours weekly.

Students must in addition afford satisfactory evidence that they have during their course of study regularly attended, for a period of at least equal to a University term, at some metallurgical establishment previously approved by the Professor. They will be expected to give full and accurate descriptions of the plant and of the processes in which they have taken part, and in the final examination marks will be awarded for this part of the work. Attendance can be conveniently made during University vacations, or in connection with the Vacation Courses in Metallurgy, attendance at which will be accepted for not more than two months of the required period.

Students who propose to take Metallurgy as a double subsidiary subject take the General Course Lectures and Laboratory in their second year; they take the Senior Metallurgical Lectures in their third year, and a portion of Practical Metallurgy (Part II) selected after consultation with the Professor under whom they are principally engaged. They are also recommended to take a Vacation Course in the Smelting Laboratory.

Mining and Geological students, and those who take Metallurgy as a single subsidiary subject, take the General Course Metallurgical Lectures, and also Practical Metallurgy (General Course, Part I) together with such portions of Part II as may be of special importance in any particular case. They are also recommended to take a Vacation Course in the Smelting Laboratory.

Engineering students take Metallurgy (Lectures, General Course) in their second year, and a Special Laboratory Class, which will meet on Wednesday afternoons from 2-5 throughout the Session.

Dental students take the Junior Course, Lectures and Laboratory.

Manufacturers or Managers of Works having vacancies are requested to apply to the Professor.

TIME TABLE OF FIRST YEAR COURSE FOR DEGREE IN METALLURGY.

SUBJECTS	CLASS HOURS.

MINING.

THE UNIVERSITY, EDGBASTON.

COAL AND METAL MINING.

Professor : JOHN CADMAN, M.Sc. ; D.Sc., M.Inst.C.E.,
F.G.S., etc.

Lecturer in Surveying and Coal Mining :
ALEXANDER CLUBB, B.Sc. (Glas.).

Lecturer in Metal Mining and Economic Mineralogy :
J. L. JEFFERY, A.R.S.M., M.Inst.M.M.

Lecturer in Mine Rescue Work :
PERCY ORMAND, M.Inst.M.E.

The time of the mining students at the University is not entirely devoted to theoretical work ; much of it is of a thoroughly practical character. There are occasional visits to the mines of the neighbourhood, and either a few weeks are devoted by the students each year, in company with a member of the staff, to the inspection and study of some group of British or Foreign mines, to a School of practical surveying at a mine, or arrangements are made for the students to have from two to three months' practical experience at a mine.

The courses have been so arranged as to meet the requirements of those who intend to become :—

- 1.—Practising and Consultative Mining Engineers ;
- 2.—Colliery Managers ;
- 3.—Managers of Metal Mines ;
- 4.—Petroleum Mining Engineers.
- 5.—Teachers of Mining ;
- 6.—Mine Surveyors ;
- 7.—Land and Estate Agents ;
- 8.—Landowners, owners of Collieries, and those generally interested in mines and quarries.

DIPLOMA IN MINING.*

Students who desire to obtain the Diploma in Coal Mining must take the three years' Course described on page 331.

They must further have practical experience in a mine for at least two months in each year, or have had a minimum of four months of such experience prior to entering on the Diploma Course.

B.SC. DEGREE IN MINING. †

Candidates for the B.Sc. Degree are required to be matriculated in the Faculty of Science before entering on the courses of study for the degree. After matriculation, students are required to attend courses of study in coal and metal mining and the allied sciences, for a period of at least three years, and to have had the practical experience of at least two months in each year or a minimum of six months of such experience prior to entering on the Degree Course.

CERTIFICATES OF COMPETENCY UNDER THE COAL MINES
REGULATION ACT.

The regulations for the Diploma in Mining, and the B.Sc. degree in Mining, of the University have been accepted by the Secretary of State for the Home Department as qualifying for part of the experience necessary to qualify for a First Class Certificate of Competency under the Coal Mines Regulation Act, 1911.

* Matriculation is not required for Diploma students.

† Candidates intending to take the Degree Course are advised to matriculate on leaving school, and to obtain twelve month's practical experience in a mine before entering on the Course.

COURSE IN METAL MINING.

Courses IIA and IIIA and IIIB have been specially drawn up to meet the requirements of students undergoing a training in metal mining, and those otherwise interested in the subject. In addition to these courses metal-mining students studying for the Diploma must take such portion of Courses I, II, and III as bear on their subject.

SUMMER SCHOOL.

A few weeks of each long vacation may be devoted to visiting and making a thorough inspection of the mines in some metalliferous or coal mining district, either in Britain or abroad, or to practice in mine surveying. The students are required to take detailed daily notes, and to furnish a full report upon the termination of the school. The fee for this practical course is £5 5s. od. The Summer School may take the form of two to three months' practical experience at a mine.

LABORATORY PRACTICE.

Laboratory practice is essential in the curriculum of the regular Mining Student, but advanced Laboratory practice is also designed for those who have already passed through a Mining course at other Schools.

The Laboratory Practice is made up as follows :

- (a) ECONOMIC MINERALOGY for second and third year students; examination of minerals, and blow pipe analysis.
- (b) COAL MINING LABORATORY for second and third year students. This work is carried on in the laboratory and experimental mine, and consists of :—Analysis of coals, and other fuels. Fractional distillation and examination of petroleums. Flash points, viscosity. Determination of the constituents of mine air. Testing of safety lamps. Determination of fire damp by the

flame. Ventilation Tests. Efficiency of fans—manometrical and mechanical determination of coefficient of friction ; efficiency of pumps. Mine timbering. Practice and use of mine rescue apparatus. Detection of mine gases, etc.

- (c) Dressing Practice for third year students. Construction and use of machines, crushers, stamps, Huntington mill, ball mills, rolls, conveyors, screens, classifiers, jigs, amalgamators, Wilfley and Frue Vanner Tables, etc., etc. Typical ores from various well-known mining districts, are treated in accordance with the particular mill practice. Experiments are also conducted for the determination of special methods of treatment. The scheme of laboratory practice is so designed to obtain independent results from each machine, and also collective results when running a complete mill test. The work for third year students in the Metallurgical laboratory is arranged to enable assays to be conducted concurrently with the ore dressing.
-

COURSES OF STUDY.

The following curriculum is provisional, and hereafter may be altered or extended as experience of the wants and requirements of mining students and the mining public may determine.

These mining courses comprise an education in the principles and practice of coal mining, metal mining, quarrying, mine surveying, plan making, and mining jurisprudence ; and, in connexion therewith, the students attend lectures and laboratory classes in the sciences allied to mining.

FIRST YEAR.

- 1.—Mathematics, Course I (Pure).
- 2.—Physics, Course I, and Physical Laboratory.
- 3.—Chemistry, Course IA, and Laboratory ; Course I (Metals) Tutorial.
- 4.—Mining, Course I. Surveying, Course I.
- 5.—Drawing, Course I. Workshop.

SECOND YEAR.

- 1.—Mathematics, Course I. (Applied).*
- 2.—Geology, Course I.
- 3.—Metallurgy and Metallurgical Laboratory.
- 4.—Engineering, Course I, Course IA. (Electrical), Workshop.
- 5.—Mining, Course II, Course IIA and Surveying, Course II Coal Mining Laboratory and Practical Mineralogy, Course I.

THIRD YEAR.

- 1.—Mining, Courses III, IIIA and IIIB, and Surveying, Course III. Mining Laboratory and Practical Mineralogy.
- 2.—Engineering Course VIII and Laboratory. Special Electrical Mining Course XIIIC, with Electrical Laboratory. Steam Engineering practice in the power station and workshop.
- 3.—‡Metallurgical Laboratory.
- 4.—Geology, Course II Applied Geology, Course IIIA and C. Special Mining Geology.

Metallurgical Students will take Courses IIA, IIIA., and IIIB.

* This course is not compulsory for Diploma students.

‡ Metal Mining Students take Metallurgical Laboratory 6 hours per week, Coal Mining and Diploma Students take Engineering Course VIII and Laboratory.

LECTURE, LABORATORY AND SURVEYING COURSES.

First Year's Course.

GENERAL MINING, COURSE I.

PROFESSOR CADMAN.

One lecture a week, on Thursdays, at 12.30 during the Session.

FEE :—£2 2s. od.

This course of about thirty lectures will be given during the session on Mining, which will follow the lines of the subjoined syllabuses.

Syllabus I.

OBJECTS AND CONDITIONS OF MINING.—Scope of the subject. Qualifications of a Mining Engineer.

PROSPECTING AND BORING.—Outcrops, surface indications, coal and other mineral deposits, costeaning, shoading, position of boreholes, various methods of boring, cost of boring.

BREAKING GROUND.—Sinking shafts, position, number, shape, and size of shafts, manner of sinking and securing shafts, sinking through running ground, various costs in connection with sinking.

UNDERGROUND DEVELOPMENT AND SYSTEMS OF WORKING.—Laying out a colliery underground. Preliminary operations in coal mines. Various systems of working coal seams. Coal cutting. Blasting. Timbering in colliery workings.

SURVEYING.

I.

MR. CLUBB.

Mine and Land Surveying and Plotting extending over three years.—Half of each of the first two years' Courses will be devoted to surveying in the field or underground, or to plotting surveys in the drawing office.

Besides the practical work in the field, underground, and in the drawing office, there will be lectures on the subject. Thursdays, 2 to 5.

FEE : £3 3s.

N.B.—Students are expected to be able to work with logarithms and to be conversant with elementary plane trigonometry.

Syllabus I.

THE OBJECT OF SURVEYING.—Qualifications of surveyor.

DIRECT MEASUREMENT OF DISTANCES.—Chains, Steel Tapes, measurement on slopes, correction for slope. Underground measurements. Simple chain surveying ; offsets ; ranging lines. Methods of booking and plotting.

THE MINER'S DIAL.—Construction ; limitations. Instrumental errors. Secular, annual, and diurnal variations of magnetic meridian ; magnetic storms. Determination of magnetic declination. Loose needle dialling ; method of booking. Loose needle dialling in presence of iron. Fast needle dialling ; principle of the vernier ; the three-stand method ; the one-stand method ; method of booking. The dial as a rough theodolite.

PLATTING DIAL SURVEYS.—By protractor ; by chords.

THE GERMAN DIAL AND MODIFICATIONS.

CALCULATION OF AREAS.—“ Give and take ” lines ; ruled paper method ; reduction to triangles ; use of planimeter. Assessing royalty dues.

CALCULATION OF VOLUMES.—Contour lines. Contents of reservoirs, heaps, embankments, etc.

LEVELLING.—Forms of levelling instruments ; their construction. Levelling staffs. Simple levelling ; compound levelling ; flying levels ; underground levelling. The plotting of section levels. Levelling steep drifts. Measurement of depths of shafts.

THEODOLITE.—Construction. Specifications for mine surveying purposes. Simple traversing, underground and surface.

MINE PLANS.—Their object. Coal Mines and Metalliferous Mines' Regulation Acts regarding plans. Construction of plans ; scales ; printing ; colouring, etc. The copying of plans by Process work.

GRADIENTS.—Rules regarding ; Problems relating to.

Second Year's Course,
GENERAL MINING.

II.

PROFESSOR CADMAN and MR. CLUBB.

One lecture a week, on Wednesdays, 12.30.

FEE : Lectures £2 2s.

A course of about thirty lectures will be given during the Session, which will follow the subjoined Syllabus.

TRANSPORT.—Underground and surface transport, haulage by hand, by horse, mechanical haulage, main rope, main and tail rope, and endless rope systems of haulage self-acting inclines, locomotive and electric haulage, ropes, surface transport, aerial ropeways, horse, steam and electric tramways.

WINDING.—Kibbles, skips, cages, ropes, pit-head frames, pulleys, guides, keps, onsetting and banking, surface arrangements. Winding engines, drums.

DRAINAGE.—Water levels, dams, underground pumping and pumps, pumping by ropes, steam, compressed air, electric and hydraulic pumps, surface pumps and pumping.

VENTILATING.—The atmosphere and mine gases. Natural ventilation. Furnaces, fans, and other ventilators, underground air-currents. Splitting and measuring air-currents.

LIGHTING OF MINES.—Safety Lamps.

SCREENING OF COALS—PREPARATION FOR THE MARKET
—Tipplers, types of screens, washing, coking.

METAL MINING COURSE.

II A.

MR. JEFFERY.

One lecture per week, on Monday, at 11.30.

FEE : £2 2s.

A course of thirty lectures will be given during the Session, which will have the following syllabus :—

Syllabus.*The working of Ore Deposits.*

Occurrence of minerals, veins and ore deposits of various kinds, rock-forming minerals, blasting and rock drilling, mining tools, cross-cutting and driving of levels, stoping, costs, timbering and supporting of excavations, various systems of working mineral veins and ore deposits, quarrying of slate and building stones.

COAL MINING LABORATORY.

Three hours a week throughout the Session, Wednesdays, 2 to 5.

FEE: £7 17s. 6d.

PRACTICAL MINERALOGY.*

MR. JEFFERY.

Wednesdays, 2 to 5.

FEE: £3 3s.

SURVEYING.

II.

MR. CLUBB.

Mondays, 2 to 5, throughout the Session.

FEE: £3 3s.

Syllabus.

CO-ORDINATES. Method of calculating; their value and accuracy.

THE THEODOLITE.—Methods of measuring angles; transit method; repetition; reiteration; deflection angles. Traversing underground and surface; methods of booking.

TRIANGULATION. — Choice of base-lines and stations. Measurement of base-lines; extension of short bases. The best shape of triangles. Measurement of angles. Fixing subsidiary points; the "three-point problem." Solution of triangles; calculation of co-ordinates; mode of plotting. Filling in details; plane table; prismatic compass and field sketching.

LEVELLING—

(a) GEOMETRICAL LEVELLING.—The dumpy; the Y-level; contouring by level. Sounding.

* Students are required to provide themselves with a blowpipe analyst set.

(b) **TRIGONOMETRICAL LEVELLING.**—By theodolite. By tacheometer; subtense method of measuring distances; the stadia; Reichenbach's formula; booking tacheometer readings; reduction of tacheometer readings; plotting; contouring by tacheometer; method of making complete survey by tacheometer.

(c) **PHYSICAL LEVELLING.**—The hypsometer, the mountain barometer; the aneroid.

CARRYING BEARING UNDERGROUND—In the case of adits. In the case of two vertical shafts. In the case of one vertical shaft; Weisbach's method; Gauss' method. Best shape of triangles. Replacing plumb-lines by pins; clamping plumb-lines; Schmidt's apparatus. Optical plumbing. In case of inclined shafts. Corrections in use of side telescope and top-telescope.

ADJUSTMENTS OF THEODOLITE.—Temporary adjustments. Permanent adjustments for line of collimation; for horizontal axis; for index error; for spirit levels. Makers' adjustments; testing centering, graduations, centricity of plates, etc.

ADJUSTMENT OF DUMPY AND Y-LEVELS.—Temporary. Permanent; collimation, top level adjustments.

DETERMINATION OF LATITUDE AND LONGITUDE.—By sun; by stars. "Dead reckoning." Solar attachment.

DETERMINATION OF AZIMUTH.—From Ordnance map, by sun, by pole-star, method of equal altitudes, "Alioth" method.

SETTING-OUT.—Maintaining gradient and alignment underground. Underground curves. Railway and drainage tunnels. Ranging railway curves. Miscellaneous metal mining problems.

BOREHOLE SURVEYING.—Necessity for borehole surveying, effects of deviation of the bore-hole on the dip, strike and depth. The stratameter, Nolten's, MacGeorge's, and Marriott's methods. Related problems.

Third Year's Course.

GENERAL MINING.

III.

PROFESSOR CADMAN.

One lecture a week on Wednesday, at 9.30.

FEE: Lectures, £2 2s.

A course of about thirty lectures will be given during the Session, which will follow the subjoined syllabus.

COLLIERY AND MINE MANAGEMENT.—Pumping, re-opening of drowned-out mines; special instances described. Colliery explosions. Mode of procedure in work of rescue and reclamation; special instances treated. Examination and Valuation of Mines and Mineral Properties. Mine Reports. Commercial considerations.

MINING JURISPRUDENCE.—Mining Laws and Regulations. Acts of Parliament relating to Mines. Ownership of Minerals, Royalties, Concessions, Leases, Dues, Foreign Mining Laws.

PETROLEUM MINING.—The Summer Term will be devoted to this subject. Exploration, prospecting and development of petroleum fields. Various methods of drilling employed. Description of the structure and development of various oil-fields. Laws relating to petroleum mining. Preparation of petroleum for the market, etc. *Laboratory, Thursdays, 2 to 5.*

Course III A.

MR. JEFFERY.

One lecture a week, on Monday, at 9.30.

FEE : £2 2s.

A course of about thirty lectures will be given during the Session, which will follow the accompanying syllabus.

Hydraulicng. Dredging. Means of Ascent and Descent of Mines. Pumping. Air Compressors. Sampling. Estimation of Reserves. Laying out of Surface Erections and Plant. Principles of Employment. Metaliferous Mines Regulation Act.

Course III B.

PROFESSOR CADMAN.

One lecture a week, on Thursday, at 9.30.

FEE : Lecture, £2 2s.

DRESSING OF MINERALS AND FUELS.

OBJECTS AND PRINCIPLES.

HAND SORTING.—Spalling, Picking, Picking Belts, Tables.

CRUSHING.—Rock-breakers, Rolls, Stamps, Disintegrators, Coal-breakers.

SIZING.—Sieving, Screens of various types, Hydraulic Sizing.

HYDRAULIC DRESSING.—Principals, Jigs, Coal-washers. Buddles, Blankets, Vanners.

PNEUMATIC DRESSING.

MAGNETIC SEPARATION.

APPLICATIONS OF METHODS TO SPECIAL CASES.—Coal Washing. Cleaning Iron Ores. Dressing of Lead, Copper-Zinc Ores. Tin Stamping. Gold Milling. Concentrating Silver Ores. Gem Washing. The Designing and Erection of Mineral Dressing Plant.

FOREIGN COAL AND METAL MINING.

COAL AND MINERAL DEPOSITS.—Methods of Classification. Various classes of Deposits, with illustrative typical examples of each. Chief coal and ore deposits of the world. Their mode of occurrence, distribution and importance.

WORKING OF COAL AND ORE DEPOSITS.—Special methods adopted in different parts of the world to meet special requirements. Brown coal, bituminous coal, the anthracites of America and elsewhere. Foreign metal mines.

Laboratory.—Wednesdays and Fridays, 2 to 5, and Tuesdays, 2 to 5, for Coal Mining Students only.

FEE : £12 12s.

PRACTICAL SURVEYING.

III.

MR. CLUBB.

Mondays 10.30 to 1.30.

During the third year students prepare a plan of a mine which forms part of the work for the Degree and Diploma. When the Summer School has consisted of surveying, this Course consists of making necessary calculations on the preparation of a plan of the mine at which the School was held.

Syllabus.

Practical work in use of instruments underground, and at the surface, and computation of results. Construction and adjustment of instruments.

FEE : £3 3s.

As part of the Final Examination in Surveying Students will be required to produce.

I. A plan of an underground traverse, with notes, to be produced at end of first year.

II. (a) A sectional levelling made in a mine, with notes.

(b) A surface survey, with notes, to be produced at end of second year.

Visits of Inspection to Mines.—There will be, whenever possible, visits to the coal mines in the neighbourhood, when much that has been treated by the Lecturer during the week will be emphasized by the practical demonstration then witnessed. These visits will be common to the students attending all or any of the mining courses. Students are required to write a report on the collieries visited.

† MINE RESCUE WORK.

MR. ORMAND.

A Course of lectures will be given during the Session upon Mine Rescue work, followed by practical instruction in the use of self-contained breathing apparatus.

Special syllabus may be obtained on application.

Time by arrangement.

AMBULANCE.

Courses will be arranged on Ambulance Work during each year and must be taken by Diploma and Degree Students.

† This Course to be taken by Degree and Diploma Students in Coal Mining.

ELECTRICAL ENGINEERING FOR MINING STUDENTS.

DR. WALL.

The Course consists of three lectures a week throughout the session, and one afternoon a week in the Electrical Engineering Laboratory. It deals with the fundamental principles of Electrical Engineering, and their application in the construction and use of the plant required in the electrical distribution of power, and in the lighting of mines, and follows the subjoined syllabus,

Lectures.—Tuesdays at 9.30 and 11.30 and Fridays 9.30 to 10.30.

FEE: £5 5s.

Laboratory.—Thursdays, 2 to 5.

FEE: £6 6s.

Fundamental Principles. Ohm's Law and its applications in electrical measurements. Electrical energy and power. Magnetism and Magneto-electric Induction. Self and Mutual Induction. The principles of alternating currents.

Cables. Feeders and Distributors and their construction and methods of laying and support. Faults and Fault-testing. Leakage-indicators. Insulation-testing. Continuity of Armouring and Earthing. Dangers of Shock. Electrolysis.

Generators and Transformers. The construction and principles of action of direct and alternating current generating and transforming machinery, including batteries and load equalizers. Their parallel operation. Size and approximate cost.

Motors. The construction and principles of action of direct and alternating current motors. Their suitability as to mechanical operation and safety in mines. Their applications to winding, haulage, pumps, fans, coal-cutters and drills.

Switch-gear, and accessory appliances used in the control and distribution of electrical energy.

Instruments of measurement, ammeters, voltmeters, wattmeters, integrating meters, etc.

Lamps, arc and glow lamps, and the limitations as to their use on the surface and underground.

Legislation. Coal Mines Regulation Act, Special Rules.

BOOKS RECOMMENDED FOR GENERAL READING.

TEXT BOOKS ON COAL MINING :—

A Text Book on Coal Mining (H. W. HUGHES).

Modern Practice in Mining (R. A. S. REDMAYNE).

Report to the Royal Commission on Mines, on the Ventilation of Coal Mines and methods of examining for Fire Damp
(JOHN CADMAN and E. B. WHALLEY).

Petroleum (BOVERTON REDWOOD).

LABORATORY —

The Investigation of Mine Air (C. LE NEVE FOSTER and J. S. HALDANE).

Methods of Air Analysis (J. S. HALDANE).

MINE SURVEYING :—

A Treatise on Mine Surveying (BENNETT H. BROUGH).

Mine Surveying (ARNOLD LUPTON).

Text Book of Topographical Surveying (CLOSE).

METAL MINING :—

Ore and Stone Mining (C. LE NEVE FOSTER).

Dressing of Minerals (HENRY LOUIS).

Ore Dressing (RICHARDS).

Gold Milling (HENRY LOUIS).

Ramsay Mineralogy, or Elements of Mineralogy (F. RUTLEY).

ELECTRICAL :—

Electricity in Mines (WALKER).

Electricity as Applied to Mining (LUPTON, PARR & PERKIN).

The following are recommended for reference :—

The Transactions of the Federated Institute of Mining Engineers.

„ „ *Institute of Mining and Metallurgy.*

„ „ *American Institute of Mining Engineers.*

Home Office Reports of H.M. Inspector of Mines.

Dana's Mineralogy.

Mine Owners or Managers having vacancies are requested to apply to the Professor.

PETROLEUM MINING.

With the rapid development of the petroleum industry in various parts of the world, including the British Colonies, a demand has arisen for men qualified to conduct this important branch of Mining. For some years the University of Birmingham has provided special courses in Petroleum Mining, and many of those who have taken advantage of the facilities thus afforded are now holding responsible positions in the industry. It is, however, felt that further action should be taken in this direction, and a syllabus to cover the course for the degree of B.Sc. (in Petroleum Mining) and a Diploma in Petroleum Mining has been prepared in consultation with Sir Boverton Redwood, Bart., D.Sc., Petroleum Adviser to the Admiralty, Home Office, and India Office, and Consulting Adviser to the Colonial Office.

The modern laboratories of the University are specially adapted to the requirements of a course of instruction in this branch of Mining, and it is the intention of the Department to provide installations of the percussion and rotary systems of drilling in the grounds of the University, in order that practical demonstration of boring operations may be given, and that an opportunity may thus be afforded to students for familiarising themselves with the appliances and methods of procedure.

B.Sc. DEGREE (PETROLEUM MINING).

Candidates for the B.Sc. degree are generally required to matriculate in the Faculty of Science before entering the course of study for the degree, but by special permission of the Faculty matriculation may be taken at the end of the first year.

COURSES OF STUDY.

The following curriculum is provisional and may be altered and extended to meet the requirements of the Petroleum Mining Students.

The course comprises an education in the Principles and Practice of Mining, Boring (in all its branches), Surveying and Bore Hole Surveying, Petroleum Mining Law, and the Transport, Storage and Refining of Petroleum, in connection with which the students will attend lectures and laboratory classes in the sciences allied to the subject.

FIRST YEAR. FEE: £30 10s. 6d.

Mathematics.

Physics.

Chemistry.

Surveying.

Engineering drawing and Workshop.

Mining I.

SECOND YEAR.

Chemistry.

Geology (including Field Geology).

Engineering Course I.

Petroleum Mining.

Surveying Course II.

Mining Laboratory (including fuel analysis and calorimetry).

Practical Mineralogy.

THIRD YEAR.

Surveying (including bore hole surveying) and Mining Laboratory (including the examination and analysis of petroleum).

Chemistry of Petroleum Refining.

Engineering, hydraulic and laboratory.

Engineering practice in the Power Station and Workshop.

Geology.

Special Petroleum Mining Geology (including Field Work).

COURSE OF INSTRUCTION IN MINING HYGIENE, ETC.

The following courses of lectures will be given during the Session :—

- (a) Four Lecture Demonstrations on First Aid to the Injured through Explosions, Fires, Inundations, Falls of Stone and Coal, with special relation to Fractures, Gas Poisoning, Drowning, etc., to be given by a Junior Surgeon nominated by the Faculty of Medicine.
- (b) Four Lectures on Mining Hygiene, with special relation to those Diseases to which Miners are particularly exposed, to be given by the Assistant Lecturer on Hygiene.
- (c) Four Lecture Demonstrations on the Elementary Physiology of Respiration and on Artificial Respiration, to be given by the Lecturer on Physiology.

FEE :—10/6. Free to composition students of third year.

BIOLOGY AND CHEMISTRY OF FERMENTATION.

Professor : ADRIAN J. BROWN, M.Sc. ; F.R.S., F.I.C.

Lecturer : THOMAS H. POPE, B.Sc. ; F.I.C.

This department of the University is founded to encourage research in all branches of knowledge connected with fermentation and the fermentation industries, and to provide courses of study in the technology of Malting, Brewing, and the fermentation industries generally.

The courses of instruction provided are :—

1. A Degree Course in the Biology and Chemistry of Fermentation.
2. A Diploma Course providing instruction in the principles of all subjects connected with Malting and Brewing, and the fermentation industries generally.
3. Certificate Courses for Brewers and for Maltsters who are unable to devote the time to study required for the Diploma Course.
4. Shorter Courses of lectures and practical work in the principles of Malting and Brewing.

DEGREE COURSE.

The Degree Course is suitable for those students who contemplate taking up Biological work in connection with such subjects as the Fermentation Industries, Agriculture, Bacteriology in connection with water supply and the treatment of sewage, &c. The course is also strongly recommended to students who contemplate qualifying as brewers' chemists. After taking the degree at the end of their third year of study, arrangements are made by which such students can take an advanced course of study in the Department of Brewing in their fourth year, following on which the Diploma in Brewing will be granted. The Degree Course is also suitable for students who are candidates for the Associateship of the Institute of Chemistry in the branch of Biological Chemistry.

Requirements for the Degree of B.Sc. with Biology and Chemistry of Fermentation as a Principal or Double Subsidiary Subject.

Candidates are required to matriculate in the Faculty of Science before entering on the courses of study for the degree.

FIRST YEAR COURSE.

Candidates in preparation for the Intermediate Examination at the end of the first year are required to attend courses of study in Chemistry and Elementary Biology, and in either Mathematics or Physics.

SECOND AND THIRD YEAR COURSES.

After passing the Intermediate Examination, candidates are required to take Biology and Chemistry of Fermentation as a principal subject, and Chemistry as a double subsidiary subject ; or Chemistry as a principal subject, and Biology and Chemistry of Fermentation as a double subsidiary subject.

SECOND YEAR COURSE.

1. Biology and Chemistry of Fermentation. Vegetable Physiology and Morphology, with special reference to the Fungi, (Course II Botany and the Special Course IIA, taken in the Botanical Department).
2. Chemistry.

THIRD YEAR COURSE.

1. Biology and Chemistry of Fermentation.
 - (a) Lectures and practical work, comprising a study of the Carbo-Hydrates and the special methods employed in their examination ; and of the Proteins and their products of decomposition.
 - (b) Lectures and practical work, comprising a study of Enzymes and their actions.
 - (c) Lectures and practical work, comprising a study of the Micro-Organisms of Fermentation—their culture, classification, morphology, physiology, and chemical actions.

FEE, £12 12s. 0d.

2. Chemistry.

The third year course may also be taken as a single subsidiary subject for the degree of B.Sc. in Pure Science.

DIPLOMA COURSES.

The Diploma Courses extend over a period of three years. In the first year Elementary Inorganic Chemistry, Physics, and Botany are taken, with a modern language as an optional subject; but this course of study is subject to alteration according to the student's previous education.

The second year's course includes advanced Chemistry, both inorganic and organic, with an extended course of laboratory work, practical elementary Bacteriology, Engineering, and a short course of lectures on Geology.

The third year's course consists of lectures on the Technology of Brewing, and practical work in the Brewing Laboratory.

SPECIAL DIPLOMA FOR GRADUATES.

Graduates who have taken the degree of B.Sc. with the Biology and Chemistry of Fermentation as a principal subject may obtain a Special Diploma in the Technology of Brewing after a further course of study of one year in the Department.

CERTIFICATE COURSES AND SHORTER COURSES.

Certificate Courses and shorter courses of instruction in the technology of brewing and the fermentation industries generally are also arranged.

For full information regarding the Diploma Course in Brewing and the shorter courses of study the student is referred to the special syllabus of the School of Brewing.

The Laboratory of the Department is open from 9.30 a.m. to 5.30 p.m. for special study and research work, under the direction of Professor Adrian Brown, to whom applications should be made.

FACULTY OF ARTS.

Syllabuses of Courses.

LATIN.

Professor : E. A. SONNENSCHN, M.A. ; D.Litt. (Oxon.).

Lecturer : C. D. CHAMBERS, M.A. (Oxon.).

The University Courses in Latin for the ordinary B.A. degree (Courses I, II, III.) are designed to embrace a study of representative masterpieces of Latin literature which will be treated as literary wholes and from a literary point of view. These Courses bring the student into contact with typical specimens of Latin literature in the fields of epic, lyric, and didactic poetry, and of historical and philosophical prose, and thus provide a basis for the historical and comparative study of literature. At the same time the grammatical and philological study of Latin and the practice of composition are maintained and developed, mainly in connexion with the prose works selected under each course.

Course IV is reserved as an advanced and specifically linguistic course, in preparation for the M.A. Examination. The subjects read in this course are varied from year to year in accordance with the needs of students.

VACATION READING.—Students will find it of great advantage to read during the Vacation some at least of the books recommended for study in preparation for Courses I—III.

Course I.

THE EPIC (WITH SOME LIVY).

Mondays and Thursdays, at 2.30.

FEE : £2 12s. 6d.

SUBJECTS : (1) Virgil, *Aeneid* IV and VI, with a literary study of the *Aeneid* as a whole.

(2) Selections from Livy.

BOOKS RECOMMENDED :

Virgil : *Aen.* I—VI, edited by Page (Macmillan's Classical Series).

Latin Literature, by Mackail (Murray).

Professor Sonnenschein's *Latin Grammar* (Parallel Grammar Series).

Students are recommended to read in preparation for Course I :—

Books I—VI of the *Aeneid* of Virgil in the verse translation of Rhoades (Longman).

MACKAIL, *Latin Literature* (Murray)—the literature of the Augustan Age (pp. 91—155).

OMAN, *Seven Roman Statesmen* (Arnold).

Course II.

LYRIC POETRY (WITH SOME TACITUS).

Tuesdays and Thursdays, at 3.30.

FEE :—£2 12s. 6d.

Subjects—(1) Select lyrics of Horace and Catullus.

(2) Selections from Livy.

BOOKS RECOMMENDED :

Horace : *Odes*, edited by Page (Macmillan's Classical Series) or by Gow (Pitt Press) ; Students taking Latin as a principal subject for the B.A. are recommended to get the whole works of Horace, edited in one volume, by Page, Palmer, and Wilkins (Macmillan) ; Translations : verse, by De Vere (Bell), or Select Odes in W. Scott's *Canterbury Poets*.

Catullus : Select Poems, edited by Simpson (Macmillan's Classical Series) ; Translation : verse, by Martin (Blackwood).

Students are recommended to read in preparation for Course II :—

Select Odes of Horace, translated in verse by DE VERE (W. Scott's Canterbury Poets).

Catullus, translated in verse by MARTIN (Blackwood).

MACKAIL, *Latin Literature* (Murray)—the chapters on the literature of the Republic (pp. 1—90)

Course III.

DIDACTIC VERSE AND PROSE.

Tuesdays and Thursdays, at 2.30.

FEE :—£2 12s. 6d.

SUBJECTS : (1) Horace, *Select Satires or Epistles*.

(2) Selections from one of Cicero's philosophical works.

(3) Juvenal, *Select Satires*.

(4) Selections from Seneca.

BOOKS RECOMMENDED :

Horace, complete works, by Page, Palmer and Wilkins (see Course II), or *Satires* alone by Palmer, and *Epistles* alone by Wilkins (Macmillan's Classical Series) ; Translation of the *Epistles* in verse, by Conington (Bell).

Juvenal, edited by Strong (Clarendon Press), or Duff (Pitt Press).

Selections from Seneca, edited by Summers (Macmillan's Classical Series).

Students are recommended to read in preparation for Course III :—

HORACE'S *Satires and Epistles*, translated in verse by CONINGTON (Bell).

MACKAIL, *Latin Literature* (Murray)—the literature of the Empire (pp. 171—286).

SENECA, *Morals*, a selection from his prose translated by
CLODE (Camelot Series, published by W. Scott).

Course IV.

ADVANCED COURSE ON LANGUAGE.

Mondays, Tuesdays, Thursdays and Fridays, at 3.30,
or by arrangement.

FEE :—£5 5s. od.

The subjects of the Course will be chosen with a
view to the M.A. Examination, and will include several
plays of Plautus, with a study of Old Latin metres
and grammar.

Composition Sets.

Sets will be formed for the practice of Latin Composi-
tion of various stages of difficulty, and will meet at the
following hours :—Set 1 (*a*) Tuesdays, at 2.30 ; (*b*) Wed-
nesdays, at 3.30 ; Set 2, Fridays, at 2.30 ; Set 3,
Fridays, at 3.30. More advanced students will be taken
separately, at hours to be fixed at the commencement of
the session.

BOOKS RECOMMENDED :

For Set 1 : *Third Latin Reader and Writer*, by
Dix (Swan Sonnenschein & Co.).

For Sets 2 and 3 : *Latin Prose Composition*, by
Hardie (Arnold).

FEE : £1 11s. 6d.

REQUIREMENTS FOR DEGREES.

Intermediate Arts Examination : Course I.

Ordinary B.A. Examination :

- (i) When Latin is a principal subject : Courses II
and III in successive years.

- (ii) When Latin is a subsidiary subject: *either* Course II *or* Course III.

M.A. Examination :

All candidates for the M.A. degree in Latin will be examined in the four following subjects :—

- (i) Composition.
- (ii) Unseen translation.
- (iii) Selected authors (see below).
- (iv) Latin literature and philology.

Candidates who offer Latin alone will be required to show a special knowledge of *four* Latin authors, to be selected by themselves and approved by the University. Candidates who offer Latin together with another subject will be required to show a special knowledge of only *two* Latin authors.

The subject of the dissertation required for the M.A. degree should be selected in consultation with the Professor as early in the session as possible.

SCHOOL OF CLASSICS.

For regulations relating to the School of Classics, see page 186. For the first examination in the School the following courses are recommended : Course II and Course III.

Special arrangements will be made for composition. Students of the School are also recommended to join the Reading Circle of the Birmingham and Midlands Branch of the Classical Association.

TIME TABLE.

LATIN.			Mon.	Tues.	Wed.	Thurs.	Fri.
Course I.	2.30	2.30*	3.30*	2.30	...
Course II.	3.30	...	3.30	2.30*
Course III.	2.30	...	2.30	3.30*
Course IV.	3.30	3.30*	...	3.30	3.30

* Composition.

GREEK.

Professor : E. A. SONNENSCHIN, M.A. ; D.Litt. (Oxon.).

Lecturer : ST. GEORGE STOCK, M.A. (Oxon.).

The University Courses in Greek for the ordinary B.A. Degree (Courses I, II, III) are designed to embrace a study of representative masterpieces of Greek literature, which will be treated from a literary point of view and with reference throughout to their background of Greek life and art. In the Advanced Course (Course IV) there is a fuller treatment of the historical and archæological questions arising in connexion with the subject matter of the books read.

VACATION READING.—Students will find it of great advantage to read during the Vacation some at least of the books recommended for study in preparation for the several degree courses.

Course I.

HISTORICAL AND ORATORICAL PROSE.

Mondays at 4.30 and Thursdays at 3.30.

FEE :—£2 12s. 6d.

SUBJECTS—(1) Thucydides, I. 24-end.

(2) Demosthenes, *First Philippic and Olynthiacs*.

BOOKS RECOMMENDED :

Thucydides, text by Stuart Jones, Clarendon Press
Vol. I.

Demosthenes, *Philippic Orations*, Part I, containing the *First Philippic* and the *Olynthiacs*, edited by Sandys (Macmillan).

Professor Sonnenschein's *Greek Grammar* (Parallel Grammar Series).

Students are recommended to read in preparation for Course I:—

BURY'S *History of Greece*, for Beginners (Macmillan).

BUTCHER'S *Demosthenes*, in "Classical Writers," edited by

J. R. Green (Macmillan).

JEFF'S *Primer of Greek Literature* (Macmillan).

Course II.

THE DRAMA, WITH HISTORICAL OR ORATORICAL PROSE.

Tuesdays and Thursdays at 2.30.

FEE:—£2 12s. 6d.

SUBJECTS: (1) Æschylus, *Prometheus*, with a literary study of the Greek Drama.

(2) Select Orations of Lysias.

BOOKS RECOMMENDED:

Æschylus, *Prometheus*, edited by Haines (Swan Sonnenschein and Co.). Translation: The Seven Plays of Æschylus, translated in verse by Campbell (Kegan Paul).

Students are recommended to read in preparation for Course II:—

ÆSCHYLUS, *The House of Atreus* (translation of the *Oresteia*), by Morshead (Kegan Paul).

Balaustion's Adventure, by ROBERT BROWNING (Smith, Elder and Co.).

The Student's Manual of Greek Tragedy, edited by Verrall (Swan Sonnenschein & Co.).

Course III.

THE EPIC, WITH PHILOSOPHICAL, PROSE AND LITERARY CRITICISM.

Mondays at 2.30 and Tuesdays at 3.30.

FEE:—£2 12s. 6d.

- SUBJECTS : (1) Homer, *Iliad*, XXIV, with a literary study of the *Iliad* as a whole.
 (2) Plato, *Apology* and *Ion*.
 (3) Aristophanes, *Frogs*.

BOOKS RECOMMENDED :

Homer, *Iliad*, XIII—XXIV, edited by Monro (Clarendon Press).

Plato, *Apology* and *Ion*, edited by St. George Stock (Clarendon Press).

Aristophanes, *Frogs*, edited by Merry (Clarendon Press).

Students are recommended to read in preparation for Course III :—

HOMER, *Iliad*, translated by Leaf, Lang, and Myers (Macmillan).

MURRAY'S *Rise of the Greek Epic* (Clarendon Press), and JEBB'S *Development of Greek Poetry* (Macmillan).

PLATO, *Crito*, *Gorgias*, and *Phædo*, translated by JOWETT (Clarendon Press).

MURRAY'S *Euripides* (containing translation of the *Hippolytus* and *Bacchæ*, and of ARISTOPHANES' *Frogs*).

The Greek View of Life, by G. L. DICKINSON (Methuen).

Course IV.

ADVANCED COURSE.

Two hours weekly, by arrangement.

FEE : £2 12s. 6d.

The subjects of study in this course will be chosen with a view to the M.A. Examination.

SUGGESTED SUBJECTS : (1) Pindar, *Pythian Odes*, with Pausanias, Book X. (2) Aristophanes, Select Plays. (3) Demosthenes, *Private Orations*.

BOOKS RECOMMENDED :

Pindar, *Olympian and Pythian Odes*, edited by Gildersleeve (Macmillan) ; Translations : verse, by Morice (Kegan Paul) ; prose, by Myers (Macmillan).

Aristophanes, text of complete works by Hall and Geldart (Clarendon Press); Translation in verse by J. H. Frere (Routledge), or by B. B. Rogers (Bell).

Demosthenes, Select Private Orations, by Paley and Sandys (Pitt Press).

Composition Sets.

Sets will be formed for the practice of Greek Composition of various stages of difficulty, and will meet on Fridays, at 3.30 and 2.30 (or at hours to be arranged). More advanced students will be taken separately at hours to be fixed at the commencement of the session.

FEE :—£1 1s. 6d.

REQUIREMENTS FOR DEGREES.

Intermediate Arts Examination : Course I.

Ordinary B.A. Examination :

- (i) When Greek is a principal subject : Courses II and III in successive years.
- (ii) When Greek is a subsidiary subject : *either* Course II *or* Course III.

M.A. Examination :

All candidates for the M.A. Degree in Greek will be examined in the four following subjects :—

- (i) Composition.
- (ii) Unseen Translation.
- (iii) Selected authors (see below).
- (iv) Literature and Philology.

Candidates who offer Greek alone will be required to show a special knowledge of *four* Greek authors to be selected by themselves and approved by the University. Candidates who offer Greek together with another subject will be required to show a special knowledge of only *two* Greek authors.

The subject of the dissertation required for the M.A. degree should be selected in consultation with the Professor as early in the session as possible.

SCHOOL OF CLASSICS.

For regulations relating to the School of Classics, see page 186. For the first Examination in the School the following courses are usually recommended : Course II and Course III.

Special arrangements will be made for composition. Students of the School are also recommended to join the Reading Circle of the Birmingham and Midlands Branch of the Classical Association.

TIME TABLE.

The hours put down in this Time Table are suggested times only, and are subject to alteration by arrangement at the beginning of the session.

GREEK.	Mon.	Tues.	Wed.	Thurs.	Fri.
Course I	4.30	3.30	3.30
Course II	2.30	...	2.30	4.30

ENGLISH LANGUAGE AND LITERATURE.

Professor : E. DE SÉLINCOURT, M.A. ; D.Litt. (Oxon.)

Lecturer : M. MACMILLAN, D.Litt. ; M.A. (Oxon.).

Assistant Lecturer : GORDON HISLOP, M.A.

Course I.

PROFESSOR DE SÉLINCOURT, DR. MACMILLAN AND
MR. HISLOP.

A. *English Literature.*

Mondays, 10.30 ; Tuesdays, 11.30.

The general history of English Literature from 1625-1775, with a study of the following texts :—

MILTON : *Paradise Lost* I, II.

ADDISON : *Sir Roger de Coverley Essays ; Essays on Milton.*

JOHNSON : *Lives of Dryden, Pope and Addison.*

PALGRAVE'S *Golden Treasury*, Books II and III.

The English Parnassus (Clarendon Press), pp. 125-252.

B. *English Language.*

Fridays, at 9.30.

1. Elementary Old English, with a study of Cook's *First Book on Old English* (VII ; X-XII). (First Term.)
2. Elementary Middle English, with a study of Chaucer's *Prologue to the Canterbury Tales*, *Knight's Tale* and *Nun's Priest's Tale*. (Second Term.) Chaucer will be studied from a literary as well as from a linguistic point of view.
3. A short sketch of the History of the English Language. (Third Term.)

FEE :—£4 4s.

Course II.

PROFESSOR DE SÉLINCOURT, DR. MACMILLAN AND
MR. HISLOP.

A. *English Literature.*

Tuesdays and Thursdays, at 11.30.

The general history of English Literature from
1625-1775, with a study of the following texts:—

BROWNE: *Religio Medici*.

MILTON: *Paradise Lost* I-IV, *Samson Agonistes*, *Areopagitica*.

DRYDEN: *Absalom and Achitophel*, *MacFlecknoe*, *Preface to Fables*.

POPE: *Essay on Criticism*; *Satires and Epistles*.

ADDISON: *Essays on Milton*.

SWIFT: *Battle of Books and Tale of a Tub*.

JOHNSON: *Lives of Cowley, Milton, Dryden, Pope, Addison Swift, Gray*.

PALGRAVE'S *Golden Treasury*, Books II and III.

B. *English Language.*

Fridays, at 11.30.

SWEET'S *Anglo-Saxon Reader* (8th Ed.) VI-X, XV.

MORRIS and SKEAT'S *Specimens of Early English*, Part I,
pp. 40-50; 172-193.

CHAUCER: *Tales of Prioress, Sir Thopas, Clerk and Squire*.

FEE:—£4 4s.

Course III.

PROFESSOR DE SÉLINCOURT AND DR. MACMILLAN.

A. *English Literature.*

Tuesdays and Thursdays at 11.30.

The history of English Literature from 1625-1775, with a study of the texts prescribed for Course II. A general but first-hand acquaintance with the main authors of the period will be expected.

B. *English Language.*

Wednesdays, at 10.30.

Sweet's *Anglo-Saxon Reader*, XVI, XXI, XXIV, XXV;
Morris and Skeat's *Specimens of Early English*, Part
II (I, IV, XI, XV, XVI);

Chaucer, *Minor Poems* (ed. Skeat), V-XX.

FEE :—£4 4s.

Course IV.

PROFESSOR DE SÉLINCOURT, PROFESSOR MUIRHEAD AND
DR. MACMILLAN.

Mondays, 11.30; other hours to be arranged.

FEE :—£3 13s. 6d.

- A. The history of English Literature from the time of Chaucer to the present day.

This work, being chiefly of the nature of revision, is not systematically undertaken in Course IV, but an attempt will be made to fill in the more serious gaps left by the students in their reading when they were attending Courses II and III.

- B. Old and Middle English Texts, with a history of English Literature before Chaucer.
C. Germanic Philology.
D. Shakespeare, with a study of the *Sonnets*, and five selected plays (A Midsummer Night's Dream, Richard II, Othello, Much Ado About Nothing, Cymbeline).
E. English Literature studied in relation with Latin, French, or German Literature.
F. The special study of the Eighteenth Century
G. The History of Philosophy in England in the Eighteenth Century, with special reference to Berkeley.

VACATION READING.—The subjects for Vacation Reading in English are the texts recommended in connexion with the various courses.

REQUIREMENTS FOR DEGREES.

Intermediate Arts Examination : Course I.

B.A. Degree :

Students who take English as a principal subject at the B.A. Degree Examination are required to attend Courses II and III in successive years. Students who take English as a subsidiary subject may select *either* Course II *or* Course III.

M.A. Degree : Course IV.

Students who desire to take the M.A. Degree in English alone are required to pass an examination in sections A and F of Course IV, and in two other sections selected from sections B, C, D, E, G.

Students who select English as *one* of the subjects for the M.A. Degree are required to pass an examination in two of the above sections, of which A is compulsory.

SCHOOL OF MODERN LANGUAGES.

Students who select English as a subsidiary subject are required to pass an examination in sections A, and two other sections of Course IV.

SCHOOL OF ENGLISH LITERATURE.

For regulations relating to the School of English Literature, see page 187.

TIME TABLE.

ENGLISH.	Mon.	Tues.	Wed.	Thurs.	Fri.
Course I.	10.30	11.30	9.30
Course II.	11.30	...	11.30	11.30
Course III.	11.30	10.30	11.30	...
Course IV. *	11.30
Informal Instruction	{ 9.30 to 11.30	...	{ 9.30 to 11.30	...

* Other hours to be arranged.

FRENCH LANGUAGE AND LITERATURE.

Professor : HENRI CHATELAIN, M.A.; agrégé de grammaire; docteur ès lettres.

Lecturer : PAUL DEMEY, licencié ès lettres.

Assistant Lecturer : F. A. HEDGCOCK, docteur ès lettres.

Assistant for French Conversation : MDLLE. JEANNE LEPETIT.

Course I.

A.—PREPARATION FOR INTERMEDIATE EXAMINATION.

FEE: £3 13s. 6d.

The Course is divided into Sections A α , A β , which meet simultaneously as follows:—

(1) Tuesdays, 3.30: Prose Composition, Free Composition, Exercises on Grammar of Modern French (Accidence and Syntax).

French Prose Composition, third Edition, by E. WEEKLEY (London, W. B. Clive, 3s. 6d.).

(2) Mondays, 3.30, and Fridays, 11.30: Reading, oral translation, grammatical and literary explanation of the following works:—

PETIT DE JULLEVILLE, *Morceaux choisis des auteurs français* (XVIII^e et XIX^e siècles, Paris, Masson, in-16, cart., 2f.)

BEAUMARCHAIS, *Le Barbier de Séville* (Dent, 1s. 6d.).

H. DE BALZAC, *La Peau de Chagrin* (Paris, Flammarion, cart., 1f.).

Les Cent meilleurs poèmes de la langue française (Gowans and Gray); outlines of French versification.

Outlines of French Literature in the 18th and 19th centuries; Comparison of classicism with romanticism.

(3) CONVERSATION CLASS (by arrangement); Reading, elocution, elements of modern phonetics, differences between English and French pronunciation and elocution.

Prescribed book: GALANDY ET V. BALAINAC, *Vocabulaire analogique*, Cours moyen (Paris, Delagrave, in-12, 1f. 40).

Conversations and discussions on social life and civilisation in the 18th and 19th centuries; comparison of life and institutions before and after the French Revolution.

La Société française du XVIII^e siècle par P. BONNEFON (Paris, Arm. Colin, in-12).

ALB. MÉTIN, *Cours d'instruction civique* (Paris, Masson et Cie., in-16, cart., 1f. 50).

Questions on Mondays' and Fridays' lectures.

B.—PREPARATION FOR GOVERNMENT
CERTIFICATE

(Day Training College Students).

I.

MUSIC. COURSE III.

Two hours weekly.

FEE: For the whole course, £2 12s. 6d.; for course A and B 1, £1 11s. 6d.; for course B 2 and B 3, £1 11s. 6d.

A.

Critical Analysis of the following works:—

- Bach: Mass in B minor. (B. & H.)
 Wagner: "Tristan und Isolde." (B. & H.)
 Strauss: "Ein Heldenleben." (Leuckart.)

B.

(1) *Choral Music* as exemplified in the work of the following composers, with particular reference to the undermentioned works:—

- Palestrina:—Missa: "Dies sanctificatus." (B. & H.)
 Handel: "Israel in Egypt." (Novello.)
 Bach:—Motet: "Sing ye to the Lord." (B. & H.)
 Cornelius: "O Death, thou art the tranquil Night." (Novello.)
 Brahms: "Schicksalslied." (Simrock.)
 Elgar: "The Dream of Gerontius." (Novello.)

(2) *The Opera.*

- Mozart: "Die Zauberflöte." (B. & H.)
 Gluck: "Iphigenia in Aulis." (Novello.)
 Meyerbeer: "The Huguenots." (Boosey.)
 Rossini: "The Barber of Seville." (Novello.)
 Wagner: "Lohengrin." (B. & H.)
 Strauss: "Salome." (Fürstner.)
 Debussy: "Pelléas et Mélisande." (Durand.)

(3) *The Symphony.*

- Haydn: in D. (London.) Op. 98. No. 1. (B. & H.)
 Mozart: in C. (Jupiter.) K. 551. "
 Beethoven: in E flat. (Eroica.) Op. 55. "
 Schubert: in C. No. 7.
 Berlioz: Fantastic. Op. 14.
 Tchaikowsky: in B Minor. Pathetic. Op. 74. (Donajowski.)
 Brahms: in C Minor. Op. 68. (Simrock.)

The following books are recommended for general reading :

- Wagner: On Conducting. Trans. E. Dannreuther.
(Reeves.)
Newman: Gluck and the Opera. (Dobell.)
Weingartner: On the Performance of Beethoven's Symphonies. Trans. J. Crosland. (B. & H.)
Parry: Style in Musical Art. (Macmillan.)

II.

PRINCIPLES OF METRE AND PROSODY.

A course of ten lectures to be delivered by Professor Sonnenschein during the Winter and Spring Terms, on alternate Mondays, at 4.30 p.m.

FEE: 10s. 6d.

III.

AN ARTS COURSE.

(See note at end of Syllabus.)

REQUIREMENTS FOR THE DEGREE OF B.MUS.

Candidates for the Degree of B.Mus. must have passed the Matriculation Examination or one of the examinations accepted in lieu of it. They must also have passed an examination in the Rudiments of Music, viz.: that of the Midland Institute School of Music, that of the Associated Board, or that of the Royal Society of Arts (higher certificate).

FIRST MUSIC EXAMINATION :

- i. Music, Course I, A and B.
- ii. Acoustics

iii. Harmony and Counterpoint up to four parts. The classes (two hours weekly) are held at the Midland Institute School of Music.

iv. Test of powers of playing upon some musical instrument, *e.g.*, Organ, Pianoforte, or some orchestral string or wind instrument. The tuition (one hour weekly) is given at the Midland Institute School of Music.

v. Another degree course in the Faculty of Arts. See note at end of Syllabus.

SECOND MUSIC EXAMINATION :

i. Music, Course II, A and B.

ii. Harmony and Counterpoint up to eight parts, and the analysis of Fugue. The classes (two hours weekly) are held at the Midland Institute School of Music.

iii. Another course in the Faculty of Arts. See note at end of Syllabus.

THIRD MUSIC EXAMINATION :

i. Music, Course III, A and B.

ii. Principles of Metre and Prosody.

iii. Another degree course in the Faculty of Arts. See note at end of Syllabus.

iv. The composition of an unaccompanied choral work in not less than four parts, occupying not less than five minutes in performance; and in addition, either

- (a) A symphonic work for full orchestra, with or without a solo instrument, occupying not less than fifteen minutes in performance; or
- (b) A vocal and instrumental work including Solos and Choruses, with orchestral accompaniment, occupying not less than twenty minutes in performance; or

- (c) A piece of Chamber Music for at least three instruments, occupying not less than thirty minutes in performance.

NOTE.—Of the three additional courses in the Faculty of Arts, one must be English Literature (Course II or Course III), and one other must be a course in a Modern Foreign Language, preferably French or German.

Regulations for the Degree of D.Mus. will be issued later.

TIME TABLE.

COURSE.	Mon.	Tues.	Wed.	Thur.	Fri.
Course I.—					
A...	3.0
B...	3.0
Harmony	3.0
Counterpoint	3.0
Acoustics (Spring Term only)	12.0
Course II.—					
A...	4.0
B...	4.0
Harmony	4.0
Counterpoint	4.0
Course III.—					
A... ..	3.0
B...	3.0
Metre and Prosody (Winter and Spring Terms)	4.30

SOCIAL STUDY.

TRAINING FOR PUBLIC AND SOCIAL SERVICE.

COMMITTEE:

W. J. ASHLEY, Ph.D., *Professor of Commerce, Chairman.*

J. ST.G. HEATH, M.A., *Lecturer in Economics at the Woodbrooke Settlement.*

A. W. KIRKALDY, M.A., *Professor of Finance.*

*Miss M. CÉCILE MATHESON, *Warden of the Birmingham Women's Settlement.*

J. H. MUIRHEAD, LL.D., *Professor of Philosophy.*

*Miss ELIZABETH NEWCOMB, *Organiser of Social Work at the Woodbrooke Settlement.*

*Miss HELEN NEWILL, *Head of the Diocesan Training Home.*

*The Rev. H. S. PELHAM, M.A., *Head of Cathedral House.*

JOHN ROBERTSON, M.D., *Medical Officer of Health of the City of Birmingham.*

Miss ROSE SIDGWICK, M.A., *Lecturer in History.*

*FRANK TILLYARD, M.A., *Lecturer in Commercial and Industrial Law.*

*Sub-Committee for Practical Work.

THE CITY OF BIRMINGHAM AID SOCIETY:

(*Organising Secretary*—G. A. NUTT, B.A.,
145, Great Charles Street),
and

THE BIRMINGHAM CHARITY ORGANISATION SOCIETY:

(*Secretary*—Miss M. LAMB,
293a, Broad Street),

provide the necessary opportunities for office work
(see Regulations page 420).

ADVISORY BOARD :

The Rev. SIDNEY M. BERRY, M.A.
 R. H. BEST.
 ARTHUR BRAMPTON, J.P.
 EDWARD CADBURY.
 T. A. CASH.
 R. J. CURTIS.
 Councillor NORMAN CHAMBERLAIN, M.A.
 The Very Rev. W. MOORE EDE, D.D.
 (Dean of Worcester).
 Miss F. GODFREY.
 JOHN T. HOMER.
 Alderman JOHN HENRY LLOYD, M.A.
 Professor LOFTHOUSE.
 Miss E. H. MAJOR.
 The Rt. Rev. MONSIGNOR PARKINSON, D.D.
 Councillor GEORGE SHANN, M.A.
 A. H. D. STEEL-MAITLAND, M.P.
 The Rt. Rev. HENRY RUSSELL WAKEFIELD, D.D.,
 (Bishop of Birmingham.)
 The Rt. Hon J. W. WILSON, M.P.
 The Rev. F. LUKE WISEMAN, B.A.
 Miss G. T. YOUNG, M.A.

And One Representative from each of the following Organisations:

The National Union of Women Workers
 (Birmingham Branch).
 The Parents' National Educational Union
 (Birmingham Branch).
 The Birmingham Trades Council.
 The Co-operative Union : Midland Section.
 The Workers' Educational Association
 (Midland Area).
 The Women's Employment Bureau.
 And the Members of the Committee.

A Committee, consisting of teachers in the University of Birmingham and of representatives of various institutions in the city, has been formed to provide a course of systematic instruction, combined with practical training, for those who propose to engage in public and social service. It has in view the needs especially of the following classes :—

- (1) Those who desire to prepare themselves for the duties of elected or co-opted members of local governing bodies.
- (2) Those who desire to engage as officials in national or municipal administration (*e.g.*, poor law, sanitation, housing, labour exchanges, child care, insurance, &c).
- (3) Those who desire to take part in philanthropic work, whether as volunteers or as official secretaries and organisers of guilds of help, charity organisation societies, &c.
- (4) Those who desire to act as "social secretaries" and "welfare workers" in factories.
- (5) The clergy and church workers of the several denominations.
- (6) The officials of trade unions, co-operative societies, friendly societies, and similar organisations.

The programme of instruction and training can be accomplished, by students who have already had some practical experience, during the course of one academic year, beginning in October. But in the case of many students it will be advisable to spread the programme over two academic years. Those who have had no practical experience are advised to put themselves into communication with one of the Members of the Practical Work Sub-Committee six months or more before entering the University, and to arrange to undertake during the interval some volunteer work of a suitable nature in their own neighbourhood. Candidates for the diploma, who are under the age of twenty, are required to obtain the permission of the Committee before entering upon the training.

THE SOCIAL STUDY DIPLOMA.

The requirements for the Diploma fall under three heads:—

- I. University Courses.
- II. Visits of Observation.
- III. Practical Work.

I. UNIVERSITY COURSES.

WINTER TERM.

- (1) Industrial History. Professor ASHLEY. Thursdays, at 11.30 a.m. Fee—10s. 6d.
- (2) Local Government. Miss SIDGWICK. Weekly at 4.30 p.m. Day to be arranged. Fee—10s. 6d.
- (3) Sanitation and Hygiene. Dr. ROBERTSON. Wednesdays, at 5.45 p.m. And six Demonstrations on Saturdays, at 2.30 to 5 p.m. Fee—£1 1s.

SPRING TERM.

- (4) Elementary Economics. Professor KIRKALDY. Thursdays, at 11.30 a.m. Fee—(for the Spring and Summer Terms)—£1 1s.
- (5) Industrial Legislation. Mr. TILLYARD. Tuesdays at 3.30 p.m. Fee—(for the Spring and Summer Terms)—£1 1s.
- (6) Social Philosophy. Professor MUIRHEAD. Mondays at 5.30 p.m.; and Discussion Class on Tuesdays at an hour to be arranged. Fee—(for the Spring and Summer Terms)—£1 11s. 6d.

SUMMER TERM.

- (4) Elementary Economics (*continued*). Professor KIRKALDY. Thursdays, at 11.30 a.m.
- (5) Industrial Legislation (*continued*). Mr. TILLYARD. Tuesdays at 3.30 p.m.
- (6) Social Philosophy (*continued*). Professor MUIRHEAD. Mondays, at 5.30 p.m.

The Committee has the power of accepting, in lieu of any *three* of the above courses, courses of study of the same subjects pursued elsewhere, if it is satisfied that such courses have been of substantially the same character and standard.

In addition to the Class Fees, all students pay a Membership Fee, (Men £1 11s. 6d. per session, 12s. 6d. per term; Women £1 6s. 0d. per session, 10s. 6d. per term) admitting to the use of the Library and of the Club Rooms.

The Examinations in Courses 1-3 will take place at the end of the Winter Term; those in Courses 4-6 at the end of the Summer Term in connection with the Degree Examinations. Examination Fee, before entering the Summer examinations, £1.

II. VISITS OF OBSERVATION.

Some twenty visits will be paid to institutions, etc., of interest to social students (by kind permission of the several authorities). About eight of these visits will be paid in the Winter Term, eight in the Spring Term, and four in the Summer Term; usually on Thursday afternoon. Their general scope is indicated by the following classification:—

- I Administration. (a) POOR LAW. Workhouse, Infirmary. Receiving House for Children. Cottage Homes. Epileptic Colony. (b) EDUCATION. Infant and Elementary Schools. Kindergartens. Schools for Defective, Blind, Deaf, Crippled and Delicate Children. Home for Defective Children. Technical and Art Schools. (c) JUSTICE. Children's Court. Remand Home. Reformatory and Industrial Schools.
- II Sanitation and Hygiene. Housing Improvements. Hospitals (General and Special). Elementary Schools, (Hygiene and Domestic Teaching).
- III Industrial Conditions. Factories. Home Industries and Domestic Workshops. Labour Exchange.

Students will be required to attend the visits arranged, unless exemption has been granted by the Committee on the ground of previous experience.

Unless otherwise provided for, students will be required to pay these visits under the direction of Miss Matheson (Warden of the Women's Settlement), who will also arrange for the necessary explanations as to the administration of the Poor Law and of the laws affecting children.

FEE: £1. 1s.

Institutions which desire to arrange an independent series of visits for their own students will furnish the Committee with a schedule of their proposed arrangements at the beginning of each term.

All students are required to write brief accounts of the visits, and notes of the accompanying explanations; and the note books containing them must be sent, before the June examination, to the Member of the Practical Work Sub-Committee under whom they are working.

III. PRACTICAL WORK.

The following list is intended to indicate the general character of the practical work of which students can gain experience in Birmingham :—

A. Office Work.

This includes Correspondence and the preparation and filing of systematic Records (use of Case-papers, Indexing, Mutual Registration, etc.); and attendance at Case Committees.

B. Visiting.

This includes Visiting in connection with such agencies as the City Aid Society and the Charity Organisation Society for the purpose of investigation; as well as Systematic Visiting for other purposes.

Under the latter head may be grouped *Occasional* Visiting, in connection with (a) Care Committees, (b) the Country Holiday Fund, (c) Provident Dispensaries; and *Continuous* Visiting in connection with (a) Provident Collecting, (b) District Visiting, (c) Child Care and After-Care, (d) Rent Collecting.

C. School and Club Work.

Definite work as a regular helper in an approved school club, class, guild of play or other meeting.

The Practical Work of candidates for the Diploma must include some experience under the head A, and some experience under at least one of the heads B and C

The arrangements for this purpose will be made by the individual Members of the Practical Work Sub-Committee (for whom see p. 415); and Candidates for the Diploma will be required to state upon their Entry

Forms the Member of the Sub-Committee under whom they propose to place themselves. They are requested to call upon the Chairman of the Committee, if possible during the week preceding the beginning of the Winter Term.

The Members of the Practical Work Sub-Committee will report to the Committee each term on the work of the students under their charge; and no student whose reports have been unsatisfactory will be awarded the Diploma.

Students who have already had practical experience in the administration of the poor law; in 'welfare' work in factories; in the office work of trade unions or friendly societies; in the duties of health inspectors or visitors; or in any of the branches of work outlined above, will be exempted from such parts of the Practical Requirements as, in the opinion of the Committee, are unnecessary in their particular cases.

In order to encourage the attendance of suitable students of limited means, it is proposed to offer three Bursaries of £10 each. Applications for these Bursaries should be accompanied by a confidential statement as to previous career, aim of study, and means, addressed to the Chairman of the Committee, on or before the third Monday in September.

The Fees for all the required classes, &c., together with the Membership and Examination Fees, amount to £9 8s. for men, and £9 2s. 6d. for women. If the course is spread over more than one year, the Candidates will pay the several Class and Examination Fees as they are incurred, and a Membership Fee per term of 12s. 6d. for men and 10s. 6d. for women.

HIGHER DIPLOMA.

Candidates who have satisfied all the requirements for the ordinary Diploma with a high degree of credit may be granted a Higher Diploma after a second year of study.

With the consent of the Social Study Committee, persons who have already taken, with a high degree of credit, courses similar in general character and range to those required for the ordinary Diploma, may become candidates for the Higher Diploma. Unless they have already fulfilled, to the satisfaction of the Committee, the requirements for the ordinary Diploma with regard to Practical Work, they will be required to do so while working for the Higher Diploma, and for this purpose to place themselves under one of the Members of the Practical Work Sub-Committee (for whom see p. 415).

Candidates will be required to submit to the Committee a Thesis embodying the results of an original investigation into economic or social conditions, conducted during the period of study under the direction of some Member of the Committee, and the general supervision of the Chairman. They must also take two of the following University courses (unless exempted by the Chairman on the ground of previous studies):

- (1) **Advanced Economics.** Professor ASHLEY. Once a week during the Spring and Summer Terms. Days and hours to be arranged. FEE—£1 IS.
- (2) **Public Finance.** Professor KIRKALDY. Mondays, at 12.30 p.m. FEE—£1 11s. 6d.
- (3) **Methods of Statistics.** Professor ASHLEY. Fridays, at 11.30 a.m., during the Spring and Summer Terms. FEE—£1 IS.
- (4) **Political Philosophy.** Mr. J. W. HARVEY. Two hours weekly during the Winter and Spring Terms. Days and hours to be arranged. FEE—£2 2s.
- (5) **Housing and Town Planning.** Mr. RAYMOND UNWIN. Once a week during the Winter and Spring Terms. Days and hours to be arranged. FEE—£1 IS.

It should be noticed that the above courses will not all be available every year; and reference should be made on this point to the Syllabus of the subject.

Candidates for the Higher Diploma will pay the fees for the courses selected, together with the Membership Fee of £1 11s. 6d. for men, and £1 6s. for women, and an Examination Fee of £2 on sending in their Thesis.

FACULTY OF COMMERCE.

The purpose of the Faculty of Commerce is to furnish a systematic training, extending over a period of three years,* for students who look forward to business careers. In planning the courses of instruction two objects have been kept in view—(1) the combination of liberal culture with utility; and (2) a due regard for the different requirements of different branches of commercial life. Certain parts of the curriculum are believed to be serviceable for all classes of business men, and are therefore prescribed for all students in the Faculty. In other parts a large freedom of choice is allowed, in accordance with the prospects, interests and aptitudes of individual students.

Two main alternatives are presented :—(1) Students who expect to be engaged in the *commercial* conduct of *manufacturing* and similar businesses will naturally desire to combine with the specifically commercial courses, and with a certain amount of linguistic study, some attention to the scientific and technical subjects which most nearly touch the business in which they are interested. Under the arrangement set forth in detail below, they can devote, if they so choose, about one-third of their time to work in Applied Science; (special attention is called to the paragraph on *Engineering Practice*, page 430). And a similar choice will often be expedient for those who are likely to be concerned in the commercial management of collieries and other mines, or of agricultural undertakings, as well as for those who propose to enter upon business life in Australia, Canada, or S. Africa. (2) Students, on the other hand, who expect to be ultimately engaged in the work

* Two in the case of approved Graduates of other Universities. See p. 432.

of a *merchant*, in the narrower sense of the word, will usually prefer (after due provision has been made for the strictly commercial courses) to enlarge their knowledge of foreign languages, and to gain access, in this and other ways, to a wider range of economic, financial, and administrative studies. A like choice, with the necessary modifications in detail, may be appropriate for those who are likely to be occupied in railway or shipping management, in stockbroking or financial houses, in consular or municipal service, in the employment of Chambers of Commerce, as accountants, or as masters on the "modern sides" of schools. But in every case the choice among the several optional subjects will only be made after the student has had the opportunity of consultation with the Dean of the Faculty.

Students who have been matriculated in the University, and have acquitted themselves with credit in the requisite class work and examinations, will be admitted to the degree of Bachelor of Commerce. Students may matriculate on passing the Matriculation Examination of the University, or on producing evidence that they have passed one of the examinations which the University accepts in lieu thereof. A schedule of the exempting examinations is given in the Regulations for Matriculation.

Every candidate presenting himself at the Matriculation examination must pass in *five* subjects at one examination, viz. :—

- (1) English History and Literature.
- (2) Mathematics.
- (3) (4) and (5) Three subjects (of which one must be a language), chosen from the following list :—
 - (a) Latin.
 - (b) Greek.
 - (c) French.
 - (d) German.
 - (e) Italian.

- (f) Spanish.
- (g) Higher Mathematics.
- (h) Experimental Mechanics.
- (i) Chemistry.
- (j) Geography.
- (k) Botany.
- (l) Animal Biology.
- (m) Geometrical Drawing.

Any candidate who so desires may offer himself for examination in four subjects from the above list (*a—m*), although he will need to pass in three only.

The requirements in the several subjects will be found in the Regulations for Matriculation.

But although a large freedom is allowed in the choice of subjects to be offered at the Matriculation Examination, those who look forward to entering the office of a merchant are *strongly recommended* to make at any rate a beginning with the study of two modern foreign languages while they are at school. They will do well to make such a beginning even though they should ultimately choose to offer one or both classical languages at the Matriculation Examination. If only one modern language can be studied at school, German is recommended: the other languages included in the syllabus of the Faculty of Commerce are French, Spanish, and Italian.

Similarly, those who anticipate the career of a manufacturer, especially in the direction of the engineering or allied trades, are urged to give special attention at school to Mathematics; and to acquire an elementary knowledge, before coming to the University, of one at least of the two subjects, Chemistry and Physics.

It should be understood, however, that the best general preparation at school for the work of the Faculty of Commerce is a good all-round education. This should always include some practice in simple narrative and argumentative composition in English.

It is unwise for boys who desire a higher commercial education to leave school before they can pass an examination qualifying for Matriculation. And even after passing such an examination, students may be too immature to benefit by a training which calls for the constant exercise of judgment. It may, in this case, be well for them to spend a preliminary year in a workshop or counting-house. The same plan may properly be recommended in some instances to students who look forward to entering businesses in which early practical experience is desirable. *It is, however, often possible to get valuable practical experience in the office or workshop during the vacations.*

All new students who propose to enter upon the curriculum leading to the degree of Bachelor of Commerce, are required to call upon the Dean of the Faculty at the University, on the morning of any day between September 26th and September 28th, or on September 30th, between 10 a.m. and 1 p.m., to inform him as to their previous training, and to consult him as to their choice of studies. Lectures will begin on Tuesday, October 1st. Students unavoidably prevented from meeting the Dean at those times are requested to communicate with him by letter on, or as soon as possible after, September 28th, to arrange an interview.

Students of the Second and Third Years are required to see the Dean on the morning of October 1st.

Before any person will be permitted to register in the Office of the Secretary for any course under the Faculty of Commerce, he will be required to produce a card signed by the Dean, or by the teacher in charge of the particular course.

The intention of this rule is to give every student an opportunity to obtain the advice of the teachers of the Faculty before committing himself by registration.

Curriculum for the Degree of B.Com.

Candidates for this degree are required to have attended the following courses of study, and to have passed the University Examinations thereon at the end of each of the three years. There will be a *vivâ voce* examination in foreign languages in each year; and at the end of the third year in the commercial and legal studies of that year. Candidates may offer themselves for the whole or any part of the Examination in any year. Only matriculated students will be admitted to University Examinations (in which External Examiners co-operate with the University staff). The class examinations, to which non-matriculated students will be admitted, will be conducted by the University staff alone. The scope of the several courses will be learnt from the syllabuses which follow the curriculum; and (in the case of courses in Languages, History, Mathematics, Science—Pure and Applied, and Philosophy) from those in the announcements of the Faculties of Arts and Science.

FIRST YEAR.

1. Commerce I.
2. Accounting I.
3. General Economics I.
4. The Commerce Seminar.
5. A Modern Language (German, Spanish, French, Italian, or,—in the case of foreign students,—English).
6. A Science applicable to Manufacture
Or
A second Modern Foreign Language.
7. An approved Course selected from any of the Departments under the charge of the Faculties of Science or Arts.

[Requirements 6 and 7 may be satisfied by the Courses set forth under *Engineering Practice*, 1st year, page 430.]

SECOND YEAR.

1. Commerce II.
2. Accounting II.
3. General Economics II *or* Methods of Statistics.
4. Economics of Transport *or* Public Finance.
5. Elementary Commercial Law.
6. The Commerce Seminar.
7. A Modern Foreign Language.
8. A Science applicable to Manufacture
Or
A second Modern Foreign Language.
9. An approved Course selected from any of the Departments under the charge of the Faculties of Science or Arts.

[Requirements 8 and 9 may be satisfied by the Courses set forth under *Engineering Practice*, 2nd year, page 430.]

Regulations as to First and Second Year Courses.

Commercial Courses Proper.—For these see the syllabuses below.

General Economics II and Methods of Statistics will be given in alternate years; and the same is true of Economics of Transport and Public Finance. Candidates in their second year are required to take the courses given in that year.

Languages.—Every candidate for the Degree of B.Com. must attend, in accordance with the requirements in the above lists, three full courses in one modern Foreign Language, one in each of the years of the curriculum. The minimum requirement for the degree in the language selected is the passing of the Matriculation and Intermediate Arts Examination, as well as of the examination in Commercial Literature and Correspondence. The higher standard reached by those students who are also able to pass the language examination of the Second Year in Arts will be recorded on the degree diploma.

Besides this, every candidate for the degree will be allowed (under Requirement 6 in the first year, 8 in the second, and 9 in the third), to choose between a Course in Science appropriate to a business career, and a Course in a second Foreign Language. If he is especially interested in the language or literature of either of the two foreign countries he may, if he so choose, take a further advanced course under Requirement 7 in the first year, and 9 in the second.

Pure and Applied Sciences.—The intention of the choice here allowed is to enable a student, if he so desires, to give a considerable proportion of his time to the scientific study which is likely to be of service to him subsequently.

A student who wishes to become a technical *expert* will enter the Faculty of Science: the opportunities afforded in the Faculty of Commerce are only such as are desirable for one who will be engaged mainly in the *commercial* management of a business. Such a student may, under Requirement 6 in the first year, and 8 in the second (and under Requirement 9 in the third year), take one of the courses rendered available by the time table in any scientific subject definitely associated with manufacture. This course must, as a rule, consist of at least three hours of lectures per week, or their equivalent in laboratory or workshop hours; two laboratory or workshop hours being reckoned for this purpose equivalent to one lecture hour. He may, under Requirement 7 in the first and 9 in the second year, take an additional scientific course, such as may be suitable in conjunction with the other in the judgment of the Dean; this course also to consist of not less than three hours of lectures a week or their equivalent. When both these choices are made, the total number of hours required, viz., six, may be divided between two courses in such a way as may be most advantageous or convenient. If more lectures in the Faculty of Science are taken than seven a week in the first and second years, and four in the third year, an addition will be made to the composition fee.

Any course, however, under the Faculty of Science may be taken to satisfy Requirement 7 of the first and 8 of the second year, without any purpose of business utility, and simply as an element in a general education, if the other requirements of the curriculum are at the same time satisfied.

Engineering Practice.—In conformity with the rules of the preceding paragraphs, the following choice of courses is recommended to commercial students who look forward to entering manufacturing businesses in which a general acquaintance is desirable with engineering practice :—

1st Year. *Physics I*, lectures and practical class (Properties of Matter, Heat, Light, Sound, Magnetism, Electricity, Electro-Magnetism).

Machine Drawing, 3 hours weekly.

2nd Year. *Engineering I*. (Elementary Principles of Machine Design ; Tools and Machines in common use ; the Steam Engine, and the chief types of Boilers ; Gas and Oil Engines).

Machine Drawing, 2 hours weekly.

Workshop, 3 hours weekly.

3rd Year. *Power Station*, (training and practical experience in the use of Prime Movers generally) 2 hours weekly.

Workshop, 3 hours weekly.

Courses under the Faculty of Arts.—Under Requirement 7 in the first, and 9 in the second year, there is complete freedom of choice among courses rendered available by the time table, subject only to the condition that the number of lectures a week must not, as a rule, be less than three. In suitable cases two shorter courses may be taken instead of a longer one.

But every student is asked to consult with the Dean before making his choice, and he is urged to make a selection only after a careful consideration of his intellec-

tual interests. Unless he has a valid reason for some other choice, he is *strongly recommended* to take in the first year the course on *General European History (Modern Times)*, and in the second year that on *British Institutions*; while in many cases a course in *English Literature* will also be very advisable.

Courses in Art and in the Metal Crafts.—Requirements 6 and 7 may be satisfied by taking, in the first year, courses on *Historic Ornament in the Metal Crafts*, and on *Drawing and Modelling*, at the Vittoria Street School, and *Metal-lurgy I.* at Edgbaston; and, in the second year, Requirements 8 and 9 may be satisfied by a continuation of the before-mentioned courses at the Vittoria Street School, together with an approved selection from among the *Process* courses at the same school.

THIRD YEAR.

1. Commerce III.
2. Accounting III.
3. Technique of Trade, including Banking and Exchange.
4. Public Finance *or* Economics of Transport.
5. Methods of Statistics *or* General Economics II.
6. Advanced Commercial Law and Industrial Law.
7. The Commerce Seminar.
8. A Modern Foreign Language.
9. A Science applicable to Manufacture

Or

A second Modern Foreign Language

[Requirement 9 may be satisfied by the Courses given under *Engineering Practice*, 3rd year, page 430 *supra*.]

Regulations as to Third Year Courses.

Commercial Courses Proper.—For these see the syllabuses below.

Public Finance and Economics of Transport will be given in alternate years; and similarly Methods of Statistics and General Economics II. Candidates in their third year are required to take the courses given in that year.

Languages.—The work in this year will deal with Commercial Literature and Correspondence. The object of this course will be not only to give facility in the conduct of correspondence, but also, by accustoming the student to the perusal of typical examples of foreign commercial, financial, statistical, and industrial literature, to enable him to keep abreast for the future with important economic developments in other countries.

Students will be allowed to select the course in Commercial Literature and Correspondence only in those languages in which they have reached the proficiency demanded at the Intermediate Examination.

Pure and Applied Sciences.—See the regulations of the First and Second Years.

Courses in Art and in the Metal Crafts.—Students who have taken the courses at the Vittoria Street School in their first and second years, may satisfy the Requirement 9 by continuing, at the same school, the course in *Drawing and Modelling*, together with that in selected *Processes*.

Admission of Graduates from other Universities.

Graduates, or persons who have passed degree examinations of other Universities or institutions of University rank, who present evidence satisfactory to the Faculty of Commerce that they are qualified to pursue a special course of study prescribed by the Faculty, are allowed to matriculate and enter the University and to become candidates for the Degree of B.Com. after *two* years of study or research, provided that they satisfy the Faculty at the end of their first year that their work is of sufficiently high quality. In all such cases, candidates for the degree will be required to present a thesis on an approved subject.

The two years must ordinarily be spent in the University of Birmingham, but under exceptional circumstances the second year may, with the sanction of the Faculty, be spent elsewhere, provided that the occupations or studies of the second year are of a suitable Commercial or Economic character. Students availing themselves of this privilege will be required to present on or before May 2nd, a thesis (two type-written copies), on an approved subject and to offer themselves for examination in prescribed subjects.

Admission of Students from other Institutions.

The Senate has the power of recognising attendance and examinations at other institutions of university rank as exempting from the whole or part of the first year's requirements for the degree. But the Faculty of Commerce will only recommend the Senate to exercise this power where the courses already taken form a suitable combination with courses in this Faculty. In all cases where a candidate for the degree is exempted from a year of attendance, he will be required to present a thesis on an approved subject

Foreign Students.

1. Foreign students, who propose to enter the University of Birmingham, are desired to communicate with the Dean of the Faculty of Commerce, and to furnish him with particulars as to their previous training, in time to receive an answer before it is necessary for them to leave their country.

2. Foreign students will be admitted to Matriculation without further examination on producing evidence satisfactory to the Registrar that they have attained in the schools of their own country a standard of general education substantially equivalent to that demanded by the Matriculation Examination of the University of Birmingham.

3. Foreign students who are unable to satisfy the above requirement will be permitted to attend the

lectures if they are qualified to benefit by them, without passing any examination at entrance. But if they desire to proceed ultimately to the Degree of B.Com., they must pass the Matriculation Examination. They will, however, be allowed, in suitable cases, to offer their native language in lieu of the prescribed English. Candidates who propose to offer other languages than French, German, Italian, and Spanish, at the July examination, are requested to communicate with the Registrar before April 21st; if at the September examination, before June 17th. They will still be required to satisfy the examiners in another language, and will be allowed to offer for that purpose any one of the following :—English, French, German, Spanish, Italian, Latin, Greek.

4. Foreign *graduate* students may, under suitable conditions, be admitted to the Degree of B.Com. within two years after their Matriculation. The Ordinance on this subject will be found above.

5. All foreign students are required to reside in lodgings on the Secretary's list, and to give notice in the office of any change of address.

M.Com. Degree.

Bachelors of Commerce may be admitted to the Degree of M.Com. after a further course of training extending over not less than one academic year. They will be required (1) to present a thesis showing powers of independent investigation and judgment, and (2) to pass such examination on subjects within the scope of the Faculty of Commerce as the Faculty may determine in each case. Candidates devoting one year only to the necessary preparation will be required to give their whole time to study either in the University of Birmingham or (on the approval of the Faculty) in some other University or institution of University character. Candidates may, however, extend their preparation over two or more years; and, in this case, service in manufacturing, commercial, or financial establishments,

for a minimum period of two years, may (with the permission of the Faculty) be accepted in lieu of the period of study in a University, provided that the service is of such a kind, in the judgment of the Faculty, as to be suitable for the purpose.

Forms of entry may be obtained from the Registrar, and should be returned to him, together with two type-written copies of the thesis presented, on or before May 2nd.

Fees.

The Composition Fee for the whole curriculum of instruction is £21 10s. 6d. for the first year, and £24 13s. 6d. for the second and third years. This includes the Membership Fee of £1 11s. 6d. Graduate or advanced students proceeding to the Degree of B.Com. in two years pay the fees of the second and third years.

The other fees are as follows:—

	£	s.	d.
Matriculation	2	0	0
Matriculation by virtue of any of the examinations accepted in lieu of the Matriculation Examination of this University	1	0	0
First Examination	2	0	0
Second Examination	2	0	0
Third Examination	4	0	0
Admission to the Guild of Graduates	0	10	0
M.Com. Examination... ..	5	0	0

Non-Matriculated Students.

Each of the classes in the Faculty of Commerce is open to all persons who are capable of taking advantage of the instruction offered, whether they have matriculated or not; and pass-certificates will be granted to non-matriculated students at the end of each session on the results of the class examinations in each course.

The conditions of admission in the case of non-matriculated students are identical with those for similar students in the Faculties of Science and Arts. They include

Registration in the Secretary's office, and the payment of Fees for the particular courses selected (given below with the several syllabuses), together with a membership fee.

But although only students who have been matriculated can, as a rule, become candidates for the degree of Bachelor of Commerce, the Senate has power to recognise the attendance of non-matriculated students at courses of study as part of the qualification for a degree.

HOURS OF LECTURES.

The hours assigned in the following syllabuses to the several courses are altogether provisional. Owing to the wide range of choice allowed in the requirements for the degree of B.Com., it will often be impossible definitely to arrange the hours before the beginning of term.

Syllabuses of Courses.

COMMERCE AND FINANCE.

Professor of Commerce : W. J. ASHLEY, M.Com. ; M.A. (Oxon.), Hon. Ph.D. (Berlin), late Fellow of Lincoln College, Oxford.

Professor of Finance : A. W. KIRKALDY, M.Com. ; M.A., B.Litt. (Oxon.).

Assistant Lecturer : HERBERT HEATON, M.A. (Leeds).

Commerce.

COURSE I.—FIRST YEAR.

PROFESSOR ASHLEY.

The Industrial and Commercial Organisation and Resources of the British Empire ; with particular regard to the great self-governing Colonies and to India.

Tuesdays and Fridays, at 9.30.

FEE : £4 4s.

COURSE II. SECOND YEAR.

MR. HEATON.

The Industrial and Commercial Organisation and Resources of the United States, Germany, Russia, France, Italy, South America, &c. (Winter and Summer terms, Professor Kirkaldy; Spring term, Professor Ashley.)

Mondays and Fridays, at 2.30.

FEE : £4 4s.

The two foregoing courses will set forth the modern development and the structure and position of industry and trade to-day in the leading countries of the world. This will involve a consideration of geographical position and natural resources on the one side, and, on the other side, of the recent economic history, of the present supply and organisation of capital and labour, and of the state of the mechanical arts.

Commercial History and Commercial Geography will be largely introduced ; but they will be treated in relation to one another, and in close connection with the consideration of underlying economic causes.

COURSE III. THIRD YEAR.

PROFESSOR ASHLEY.

Business Policy, in its main principles, as indicated by industrial and commercial experience.

Mondays and Wednesdays, at 11.30.

FEE : £5 5s.

The course will deal with such topics as the following : The Institutions of Trade ; the Legal Organisation of Business Undertakings ; Price and Cost ; Cost Accounts ; Commercial Cycles ; Credit ; Methods of Sale ; the Scale of Manufacture ; the Scope of Manufacture ; Combination and Amalgamation ; the Location and Laying-out of Works ; Methods of Remuneration ; Hours of Labour ; Staff Organisation ; Questions of Manufacturing Policy ; Methods of Industrial Finance.

General Economics.

COURSE I.—FIRST YEAR.

PROFESSORS ASHLEY AND KIRKALDY.

Thursdays, at 11.30.

FEE: £1 11s. 6d.

A. Industrial History (Professor Ashley). — The lectures of the first term will be devoted to a sketch of the economic history of England, both as an important part of the general history of the nation, and as a necessary introduction to the analysis of present-day economic conditions.

B. Elementary Economic Analysis (Professor Kirkaldy). — In the second and third terms the nature of such modern phenomena as are indicated by the terms Capital, Rent, Wages, Profit, Interest, etc., will be analysed; and most of the topics will be briefly considered which are usually treated of in text-books of Political Economy.

Either part of the Course can be taken separately.

FEE for *A*, 10s. 6d.; for *B*, £1 1s. 0d.

COURSE II.—SECOND or THIRD YEAR.

Advanced Economic Analysis.

PROFESSOR ASHLEY.

Once weekly during the Spring and Summer Terms.
Days and hours to be arranged.

FEE: £1 1s.

This course will deal with the problem of Distribution as treated by modern economists, and will give special attention to the writings of Adam Smith, Ricardo, Marx, Jevons, and Böhm-Bawerk.

[Given in 1913-14.]

Economics of Transport.

SECOND or THIRD YEAR.

PROFESSOR KIRKALDY.

Wednesdays, at 12.30.

FEE:—£1 11s. 6d.

The course will give an outline survey of the various means of transportation, with a more particular treatment of railways—their development and organisation. The forces influencing railway rates will be considered; and the attempts of various governments to control or manage railways will be explained and criticised. Some attention will also be given to ocean freights; as well as to canals and other means of internal communication.

[Given in 1913-14.]

Public Finance.

SECOND or THIRD YEAR.

PROFESSOR KIRKALDY.

Mondays at 12.30.

FEE: £1 11s. 6d.

This course will treat of Public Expenditure, Public Revenue and Public Credit, as illustrated especially in the national, county, and municipal experience of Great Britain. It will discuss the principles and methods of Taxation, and the methods of contracting and extinguishing Debt; and it will include a comparison with foreign systems of raising revenue.

Students will examine the last British Budget, and will read a number of the more important Budget speeches of recent decades.

The course is recommended to students who propose to enter, or are already engaged in, municipal or banking service.

[Given in 1912-13.]

Technique of Trade.

(INCLUDING BANKING AND EXCHANGE)

THIRD YEAR.

PROFESSOR KIRKALDY.

Tuesdays and Fridays, at 12.30.

FEE: £4 4s.

This course will deal with the organisation of the great staple markets and commercial institutions at home and abroad, the chief technical terms, and the most important mercantile documents. It will include an account of the English Banking System as compared with those of the United States and Germany; and it will explain the mechanism of the Money Market and of Foreign Exchange.

A *Special Course* of 10 lectures on *Practical Banking* will be given by Professor Kirkaldy in the Spring Term of 1913, on Wednesdays, at 6 p.m.

A *Special Course* of 10 lectures on *English Composition and Banking Correspondence* will be given by Mr. Tillyard in the Winter Term of 1912, on Tuesdays, at 6 p.m.

FEE for each Course :—10s. 6d.

These courses are given in connection with the Institute of Bankers. They cannot be taken in lieu of any of the required courses for the degree of B.Com.; but they may be prescribed to candidates for the degree for purposes of preliminary study or revision.

Statistics.

SECOND or THIRD YEAR.

PROFESSOR ASHLEY.

Fridays, at 11.30, during the Spring and Summer Terms.

FEE : £1 1s.

This course is intended to serve as an exposition of the statistical methods most commonly employed rather than as a description of mere results. The chief governmental statistics of Great Britain dealing with trade and manufactures will be examined; and an attempt will be made to indicate, after a consideration of the mechanism for securing information employed in each case, the extent to which the results are of value, and the way in which they might be rendered more serviceable. [Given in 1912-13.]

The Commerce Seminar.

PROFESSORS ASHLEY AND KIRKALDY.

Secretary : MR. HEATON.

THROUGHOUT THE THREE YEARS ; Saturdays, 9.45 to 11.15.

FEE : £4 4s. each Session.

The purpose of the Seminar is to train students in independent investigation and reasoning ; and the attendance of all candidates for the degree of B.Com. is compulsory. A subject is assigned some weeks beforehand to each member of the Seminar. He consults the literature of the subject and makes such inquiries as the Professor may suggest ; and then prepares a paper, which is read in the Seminar, and there criticised. Incidentally an effort is made to give the members of the Seminar some practice in the art of clear and vigorous exposition and to accustom them to the preparation of terse and business-like reports.

ACCOUNTING.

PROFESSOR CHARLES E. MARTINEAU, M.Com ; M.A.
(Cantab.), F.C.A.

COURSE I. FIRST YEAR.

Wednesdays, at 11.30.

FEE : £1 11s. 6d.

This course provides systematic instruction in the elements of book-keeping by Double Entry ; but, like the more advanced courses, it aims at providing the students with a sound knowledge of the science of accounting, rather than at training them in the craft of keeping books. The course comprises a description of all the usual subsidiary books, dealing separately with non-trading, trading, and manufacturing concerns ; the posting of the Ledger or Ledgers ; the extraction of the Trial Balance ; and the preparation therefrom of the periodical Balance Sheet, and of Trading and Profit and

Loss Accounts. The distinction between Capital and Revenue, between Fixed and Floating Assets, and the nature of Accounts generally will also be fully dealt with.

COURSE I. A.

FEE : 10s. 6d.

The Professor of Mathematics (Dr. Heath) will, from time to time, give during the Winter Term a short course of lectures on the Theory of Compound Interest, Annuities and Sinking Funds, together with an explanation of the construction and use of Interest, Annuity, Life and Sinking Fund Tables. Opportunity will also be taken in connexion with this course to give some training in rapid arithmetical methods. The course is recommended for Accountants, Surveyors and Actuaries, but is not obligatory on students in the Faculty of Commerce.

Students who desire to take this course are requested to inform the Dean on or before September 21st.

COURSE II.—SECOND YEAR.

SECTION A, Wednesdays, at 9.30.

FEE : £1 11s. 6d.

This course deals with the more advanced problems arising on the application of the principles of Accounting to practical business, and includes *inter alia* an explanation of the following matters :—The Sectional Balancing of Ledgers in a large undertaking ; the formation of Periodical Accounts ; and Systems of Internal Check designed to avoid or detect errors in the book-keeping and loss from fraud. The nature and scope of staff and professional audits will also be considered.

The course further comprises a survey of the chief matters of importance in connection with Company Accounts, with special reference to the problems arising in connection with new companies, the general principles underlying assessment for Income Tax, and the preparation of Accounts for Income Tax Returns and Appeals and for claims for the return of Income Tax overpaid.

The principal difficulties arising in connection with Partnership Accounts, and the most fruitful causes of dispute between partners will also be considered.

Attention will be given during this course to the Double-Account System, and to the various methods in use for provision against the Depreciation of Plant, Machinery, and other Wasting Assets.

Such questions as Reserves, Reserve Funds, Sinking Funds, Profits, Goodwill and the like will be discussed, with the object of making students familiar with their value not merely for the purposes of periodical Balance Sheets, but also for providing that prompt information which is essential for the due success of business undertakings.

Students may be exempted, with the consent of the Dean of the Faculty, from such parts of this course as are too special or technical for their individual requirements.

SECTION B, Fridays, at 10.30.

FEE: £1 11s. 6d.

This course will be utilised to deal at greater length with some of the more important subjects comprised in Section A; and it is especially designed to meet the requirements of those students who, for want of practical experience, may find it difficult to follow the course of instruction there given.

COURSE III. THIRD YEAR.

Fridays, at 9.30.

FEE: £4 4s.

The course will begin with a discussion of Statistical Accounts and of Head Office and Branch Accounts, illustrating the method of centralising the book-keeping of branches.

Departmental Book-keeping and Accounts, Stock and Stores Accounts, and advanced Costing and Cost

Accounts, suitable for various undertakings, will also be dealt with.

Attention will be called to the several possible systems of Costing, and the merit and weaknesses of each; the varying circumstances to be borne in mind in particular businesses when constructing a system; and the necessary limitations of Cost Accounts.

Typical published Balance Sheets will be examined, and students will be instructed in their interpretation.

The course will also include an outline of the distinctive features of the accounts of different classes of undertakings connected with the various leading industries, while the special characteristics which mark the accounts of Local Authorities will also be included.

It embraces also an explanation of the salient features in connection with Executorship accounts, and of accounts arising from the Insolvencies of individuals and of companies, as well as in connection with the Reconstruction of companies. These latter questions will be discussed from the point of view of the Creditors.

Card and Loose-leaf Ledgers will be dealt with, together with other labour-saving devices of recent introduction.

Accounting IB (Engineering and Mining Students).

Tuesdays, at 10-30, at Edgbaston.

The greater maturity of the Engineering and Mining Students in the last year of their course permits of their taking more rapidly the whole of the instruction given to the first year students in the Faculty of Commerce (see page 441). The third term is devoted to such parts of the second and third year courses as are of special importance to Engineers and Miners; such as Depreciation, Reserves and Sinking Funds, Goodwill, Cost Accounts, Statistical Returns, etc.

COMMERCIAL LAW.

Lecturer : FRANK TILLYARD, M.Com. ; M.A. (Oxon.) ;
Barrister-at-Law.

Elementary Commercial Law.

SECOND YEAR.

Once a week ; day and hour to be arranged.

FEE : £1 11s. 6d.

This course consists of general introductory lectures on the elements of (a) the law of persons, including agency, partnership, and incorporated trading companies, (b) the law as to bank notes, cheques, bills of exchange, and other negotiable instruments, and (c) the law of contracts.

Advanced Commercial Law.

THIRD YEAR.

Tuesdays, at 2.30, during the Winter term ; and
Thursdays, at 2.30, throughout the year.

FEE : £2 2s.

This course deals with the Law of Bankruptcy, the Sale of Goods Act, the Carriage of Goods, the Bills of Exchange Act, the Partnership and Company Acts, and the Law of Goodwill and Trade Marks.

Industrial Legislation.

THIRD YEAR

Tuesdays, at 3.30, during the Spring and Summer term.

FEE : £1 1s.

This course deals with the law of master and servant (including the acts relating to the payment of wages and to fines, etc.), employers' liability for accidents, and the legal position of trade unions. It treats also of the factory and public health acts, and of their administration, so far as they relate to works, of trade boards, and of compulsory insurance.

†Spring and Summer Terms.

‡Winter Term.

SCHEME FOR COURSE FOR JOURNALISTS.

The University has instituted the following scheme of instruction for Journalists, until such time as a full degree course in one of the Faculties, with the technicalities of journalism as one of the subsidiary subjects, can be instituted.

Journalists of the neighbourhood are advised to attend University lectures for five hours a week for two years, and to take the usual terminal examinations. In that case the University would issue a certificate at the end of the period, setting out the nature of the courses of instruction followed, together with the results of examinations. Candidates would be admitted to any of the existing courses of lectures in the University, but the following group of subjects is recommended as specially suitable for journalists :

1. English Literature. Two hours a week.
2. General European History. Three hours a week for one and a half terms.
3. A course in Modern Languages. French or German.
4. Commerce I.
5. General Economics I.
6. Public Finance.
7. The Social Study Course.
8. Some Science Subject.

A composition fee of five guineas per annum will be charged for the full course of five hours per week, and no additional charge will be made for examinations. If such students desire to use the University Club a membership fee of £1 11s. 6d. will be charged in addition.

Professor de Sélincourt has been appointed to act as general adviser of the students of Journalism, and students intending to join the course should communicate with him.

EXHIBITIONS, SCHOLARSHIPS, PRIZES, &c.

Entrance Exhibitions.

Two Entrance Exhibitions, not exceeding in value the sum of £25 each, will be awarded on the results of the Intermediate Examinations in June, 1913, provided that a proper standard is reached by the external candidates, but otherwise they will be given to the best candidates at the Matriculation Examination in July. Candidates for the Exhibitions must be under the age of nineteen years on the first day of the examination. The Exhibitions will be tenable at the University during the Session immediately following the Examination, provided that the exhibitioner becomes a matriculated student of the University and attends courses leading to a degree, and will be paid solely in the form of remission of fees.

Fentham's Trust Exhibition.

An Exhibition, not exceeding in value £75 a year, tenable for three years, will be awarded on the result of the Matriculation Examination in July, 1915, to a candidate who has for a period of five years resided in the City of Birmingham.

Further information respecting the award of the Exhibition and forms of entry may be obtained on application to the Secretary, George Fentham's Charity, Blue Coat School, Birmingham.

University Exhibitions.

Two exhibitions, not exceeding in value the sum of £30, tenable for one year, are awarded on the results of the Intermediate Examinations in Science and Arts on the nomination of the Faculties concerned. The exhibitions are tenable during the University Session immediately following the examinations, and will be paid solely in the form of remission of fees.

The exhibition in the Faculty of Science may be renewed for a second year upon receipt of reports of satisfactory progress. An exhibition held by a student in Engineering may be renewed for a third year, on the recommendation of the Faculty of Science.

In the Faculty of Arts, an exhibition tenable during the student's third year will be awarded on the result of the Second Year Arts Examination.

Special Exhibitions in the Faculty of Arts.

Two University Exhibitions not exceeding in value the sum of £30 tenable for one year are awarded to students in the specialised Schools of the Faculty of Arts. One of these exhibitions is awarded on the results of the first year's examination, and the other on the results of the second year's examination in the various specialised schools. The exhibitions are tenable during the University Session immediately following these examinations, and are paid solely in the form of remission of fees.

Sands-Cox Scholarship.

The Sands-Cox Scholarship, of the value of £42, is awarded to the Candidate amongst those entering as students of the Faculty of Medicine in the month of October, who shall have obtained the highest marks at the Matriculation Examination in the previous month

of July or First Medical Examination in the previous month of June, provided that--

- (a) No Candidate shall be elected whose age exceeds nineteen on the first day of the examination.
- (b) No Candidate shall be elected who shall not have attained to a position in the first class, and satisfied the Examiners that he has shown sufficient merit for the award.
- (c) The payment shall be made in two annual instalments, and in the form of remission of fees.
- (d) The second instalment shall not be paid until the scholar presents a certificate from the Dean, showing that his first year's work has been satisfactory.

Candidates desirous of competing for this Scholarship should notify the Registrar when entering for the First Medical Examination.

City Scholarships.

The University will offer for competition on the results of one of the Intermediate Examinations (Science, Arts and First Medical), held in June, or on the Matriculation Examination held in July next, fifteen Entrance Scholarships, tenable for four years at the University, giving free admission to the Degree Courses in any Faculty, to candidates who apply for them on the ground of inability to pay University class fees. Competitors may further apply for an annual grant towards maintenance (which will in no case exceed £30), on the ground that they are unable to avail themselves of such Scholarships without a maintenance grant in addition.

There will be no fees for the examination, but if any candidate wishes to take advantage of it for the purpose of matriculating, or as part of the qualification for a degree, or for any other purpose, the usual fee of £2 must be paid subsequently.

Scholars will be required to pay the usual annual membership fee of £1 11s. 6d., and the fees for all University examinations leading to degrees, but lecture and laboratory fees will be remitted.

Candidates must be resident within the boundaries of the city, and have been resident for at least one year, and must have been pupils in one of the schools in that area.

Any scholar who has not passed a qualifying matriculation examination, but who has sat for one of the Intermediate Examinations for the purpose of this competition, must complete the Matriculation Examination in the following July or September.

Competitors will be arranged in order of merit, and must reach such a standard as, in the opinion of the University, offers a reasonable prospect of a successful or distinguished career. Confidential reports on the whole school career of candidates, from the Heads of their various schools, will also be taken into consideration in recommending for Scholarships.

Candidates who have satisfied the examination test of proficiency must be prepared to offer evidence as to means and family circumstances, and to answer such enquiries as shall be deemed necessary by the City Education Committee, who will report as to how far candidates have fulfilled the conditions as to means, and as to what (if any) annual grant for maintenance would be appropriate in each case.

The continuance of each Scholarship from year to year will depend upon satisfactory attendance, conduct and progress of the Scholar.

Forms of application for these Scholarships with or without maintenance grants may be had from the Registrar of the University, and when filled up should be returned to him with birth certificate and a letter of recommendation from the Head of the last school attended, on or before April 21st for the Intermediate Examinations, or June 10th for the Matriculation Examination.

Theodore Mander Scholarship.

A fund raised by private subscription organised by the Citizens of Wolverhampton to establish a memorial of the late Mr. Samuel Theodore Mander, Mayor of Wolverhampton, has been devoted to the foundation of a Theodore Mander Scholarship. The Scholarship, of the value of about £24 per annum, is open to sons and daughters of burgesses of Wolverhampton, and is tenable at the University of Birmingham. The Scholarship is awarded upon the results of the Intermediate or Matriculation Examinations to be held in June and July respectively, and preference will be given to candidates desirous of attending courses in connexion with or preparatory to Degrees in Science or Commerce, but it is not open to students who are already in attendance at the University. The Scholarship is tenable for two or three years, according to the length of time necessary to obtain a degree in the Faculty chosen. The date of the next Examination may be obtained on application to the Registrar.

Polytechnic Bursaries.

Two Bursaries, of the approximate value of £45 each for three years, will be awarded on the result of the Matriculation Examination in July, 1915, to candidates who have for a period of five years resided in the city of Birmingham, or any of the following parishes, viz., Yardley, Castle Bromwich, Erdington, Aston Manor, Handsworth, Smethwick, Halesowen, Northfield, King's Norton, and the incomes of whose parents (if alive) do not together exceed the sum of £150 per annum, or who, if their parents or either of them be deceased, are in receipt of an income of not more than 15s. a week. Candidates are required to satisfy the Standing Committee appointed by the Founders that they belong to the class of persons for whom the Scholarships were intended. Forms of application may be obtained from the Secretary of the Birmingham Trades Council.

Jabez Lones Bursary.

The income from a fund raised as a memorial to the late Alderman Jabez Lones, of Smethwick, is devoted to the provision of a Bursary tenable at the University by persons who have been resident in Smethwick for at least twelve months, and have been students in the Smethwick Technical School for at least one session. In the first instance, the Bursary is awarded for one year, but may be renewed for two further years provided that the work and progress of the student holding the Bursary are satisfactory. The Bursary is awarded by the University on the results of the Matriculation or Intermediate Examination, subject to confirmation by the Smethwick Town Council. The annual value of the Bursary is about £13.

Candidates desirous of competing for this Bursary should notify the Registrar when entering for the Examination.

Heslop Memorial Scholarship.

A Scholarship of the annual value of about £25, in commemoration of the long and valuable services rendered to the city of Birmingham by the late Dr. Heslop, was founded in 1885, by private subscription. The Scholarship is open to all candidates who have been pupils in any of the schools on the foundation of King Edward VI. in Birmingham for not less than two years immediately preceding the award of the Scholarship. The Scholarship is awarded by the University in alternate years on the results of the Intermediate Examinations in Science and Arts, and is tenable for two years at the University. The next award will be made in June, 1913. The Scholarship is paid solely in the form of remission of fees.

The Ascough Scholarship.

A Scholarship of the value of about £36, founded by the daughters of the late Mr. Jesse Ascough, in memory of their father, will be awarded to the candidate who is most distinguished in Chemistry at the Intermediate Science Examination held in June. Candidates may take the part of the Examination which relates to Chemistry for the purpose of competing for the Scholarship, without taking the whole of the Intermediate Examination. The Scholarship is tenable for one year, but may be renewed for a second and third year at the discretion of the Faculty of Science. The Scholarship will be paid in three terminal instalments, and it shall be competent for the Faculty at any time to withhold further payments if the conduct, diligence, or progress of the scholar is regarded as unsatisfactory. Forms of entry may be obtained from the Registrar of the University, and should be returned duly filled up on or before May 5th.

Birmingham Municipal Technical School Scholarship.

A Scholarship, in the form of remission of fees, and tenable for three years, is offered each year to Evening Students of the Birmingham Municipal Technical School. Candidates must have been regular students of the Birmingham Municipal Technical School for a period of at least two years, and must have passed the Intermediate Examination before entering the University, and if they have not previously passed a qualifying Matriculation Examination must satisfy the Examiner in the additional Matriculation subjects at the same time. They would then be able to complete their Science Degree at the end of three years of study in the University.

The Intermediate Science or Engineering Examination of London will be accepted as the equivalent of the Birmingham Examination.

Forms of entry for the Examination may be obtained from the Registrar of the University, and should be returned duly filled up on or before April 21st.

The Wiggin Metallurgical Scholarship.

A Wiggin Metallurgical Scholarship (founded by Messrs. Henry Wiggin and Co.) of the value of about £37 10s. per annum, tenable for two years, will be awarded annually to the candidate who does best at the June Intermediate Science Examination (Pure or Applied Science) if there is a candidate of sufficient merit. Wiggin Metallurgical scholars are required to proceed to the degree in Metallurgy.

If there is no candidate of sufficient merit, there will be a special examination (including Metallurgy) held in September, open to members and non-members of the University. The successful candidate shall pursue a course of study for two years under the direction of the Professor of Metallurgy.

George Henry Marshall Scholarship.

The George Henry Marshall Scholarship in Classics, of the value of £40 per annum, payable by terminal instalments, tenable for three years, is awarded on the results of the June Intermediate Arts examination,

Successful candidates are required to enter the School of Classics.

Special papers will be set in Latin and Greek, and candidates will be required also to qualify for a pass in one Modern Language; English Language, Literature and History; and *either* Mathematics *or* Logic.

The date of the next Examination may be obtained on application to the Registrar.

Applications, containing a list of three or four books in Latin and Greek offered for examination by candidates, should be sent to the Registrar not later than April 21st.

Birmingham Education Committee Scholarships.

Five Major Scholarships of the annual value of £50 each for three years, are awarded by the Education Committee of the City of Birmingham on the results of the Matriculation Examination or one of the higher Examinations, viz., the Intermediate Science or Arts Examinations, and the First Examination in Engineering, Metallurgy, or Mining. Candidates must reside within the City of Birmingham and have attended a Primary or Secondary School for not less than two years.

Information respecting the conditions under which the Scholarships are awarded may be obtained on application to the Secretary, Birmingham Education Committee, Edmund Street, Birmingham.

Piddock Scholarship.

A Scholarship of the annual value of £25, tenable for not more than three years at the University of Birmingham is awarded by the Piddock Trustees on the results of the Matriculation Examination or one of the higher Examinations, viz., Intermediate Science or Arts Examinations and the First Examination in Engineering, Metallurgy, Mining, or Medicine.

Candidates must be under 17 years of age, and must have passed not less than two years in some public Elementary School (other than a Board or Council School) in the City of Birmingham.

Further information respecting the conditions under which the Scholarship is awarded may be obtained on application to the Solicitors to the Trustees, Messrs. Lee, Musgrove & Co., 18 Newhall Street, Birmingham.

William Cooke and Company Scholarship.**REGULATIONS.**

1. This Scholarship of the annual value of £21 has been presented to the University by Messrs. William Cooke and Co., Ltd., the Tinsley Steel, Iron and Wire Rope Works, Sheffield.

2. The Scholarship will be awarded on the result of a biennial examination, the details of which are given below.

3. The Scholarship will be awarded only to students who intend taking the Mining Diploma, and is tenable for two years.

4. Those eligible for the Scholarship are :

(a) Mining students articulated to Mining Engineers, Colliery Managers, or Colliery Proprietors, whose mines or offices are situated within the area which is educationally under the control of the University of Birmingham.

(b) Other persons actually employed underground or who have been so employed for a period exceeding three years at a Colliery in the area mentioned in Section 4 (a), provided that in both cases the applicant has attained the age of 18 years, and that he intends as soon as he is properly qualified to present himself for the Colliery Manager's First Class Certificate of Competency to manage a mine.

5. Regular attendance at lectures and classes and examinations is compulsory.

6. The scholarship may be withdrawn at any time on account of irregular attendance, failure to pass examinations, or bad behaviour.

EXAMINATION.

1. The date of the next examination may be obtained on application to the Registrar.

2. The examination will be conducted partly by means of printed papers and partly by means of a *viva voce* examination.

3. The subjects in which candidates will be examined are :—

- (1) (a) English History—History of the English People, *either* (1) 829–1603, *or* (2) 1603–1900.
 - (b) English Literature.
 - (2) Mathematics (Arithmetic, Elementary Algebra, Geometry.)
 - (3) Experimental Mechanics (Statics, Hydrostatics, Dynamics), *or*
Chemistry (Elementary Inorganic.)
 - (4) Elements of Coal Mining.
 - (5) Geology (Elementary, Physical, and Palæontological.)
-

The Dudley Scholarship

A Scholarship of the value of £30 per annum, given by the Dudley Education Committee, will be awarded by that Committee to a candidate from that district who is qualified to enter the Faculty of Commerce in the University, in October, 1913.

Birmingham Chamber of Commerce Scholarship.

A Scholarship in the Faculty of Commerce of the value of £40 per annum has been founded by the Birmingham Chamber of Commerce. It is tenable for three years if the student's progress is satisfactory. The election is made on the nomination of a Committee of the Chamber of Commerce, which includes the Professors of Commerce and Finance in the University. A new election will be made in September, 1913.

University Scholarships.

Four University Scholarships of the value of £50 a year, tenable for one year after passing the examination for the Degree, may be awarded on the nomination of the Faculties of Science and Arts. These scholarships will carry with them free admission to lectures and laboratories in preparation for the Master's Degree.

Holders of these Scholarships are required to pay the University Membership Fee.

Research Scholarships.

In addition to the Priestley and Bowen Research Scholarships, about four Research Scholarships of the value of £50 a year, tenable for one year, may be awarded on the nomination of the Faculties of Science and Arts. The Scholarships will carry with them free admission to the Library and Laboratories of the University for the purposes of research. They will be held subject to the progress and good conduct of the holders, at the discretion of the Faculty concerned.

Holders of these Scholarships are required to pay the University Membership Fee.

Applications should be sent to the Registrar on or before the 31st of May.

Bowen Scholarships in Engineering.

(Founded by the late T. Aubrey Bowen, of Melbourne.)

Two Scholarships of the value of about £96 each, tenable for one year (except as hereafter mentioned), are awarded annually.

The objects of these scholarships are to encourage research in the scientific portions of engineering. The scholarships will be held under the condition that the holder devotes his whole time to research as a student in the University of Birmingham.

Candidates must have spent three years in the Engineering Department of a University College; preference will be given to candidates who hold an Engineering degree.

In each year two scholarships will be offered, tenable for one year, but in special cases where the scholar has shown considerable capacity for research work, the scholarship may be extended for a further year. The scholarships will be paid in three instalments, and in the event of a scholar's attendance, diligence, or progress being at any time unsatisfactory, the subsequent instalments may be withheld.

The University Fee payable by Bowen Scholars will be £30 for the year, payable in three sums of £10 each, this sum to include the use of the ordinary apparatus and materials, as well as the purchase of such special apparatus and materials as the Professor shall consider desirable.

Forms of Application may be obtained from the Registrar, and should be returned, supported by details of educational training and references to former teachers and others, on or before the 31st of May.

Priestley Scholarships in Chemistry.

(Founded by the late T. Aubrey Bowen, of Melbourne.)

Three Scholarships of the value of about £96 each, tenable for one year (except as hereafter mentioned), are awarded annually.

The object of these scholarships is to encourage and afford greater facilities for the higher study of chemical science at the University. As far as possible this higher study will take the form of original experimental or theoretical investigation in some branch of Chemistry, pure or applied, to be carried on in the Laboratories of the University, under the direction of the Professor of Chemistry.

In the selection of candidates for these scholarships, preference will naturally be given to present or past students of the University, although outside candidates bearing the necessary credentials will also be eligible. As a general rule only such candidates as have passed through an approved three years' course of study in chemistry and the allied sciences will be accepted.

Under ordinary circumstances the scholarships will be tenable for one year, but the power is reserved of re-nominating for a second or third year in the event of such a course being considered desirable as tending to promote the object which the foundation of these scholarships has in view.

Priestley Scholars will be regarded as ordinary students of the University, and must conform to all the general rules of the University as well as to the special ordinances of the Chemical Department. The scholarships will be paid in three instalments, and in the event of a scholar's attendance, diligence, or progress being at any time unsatisfactory, the subsequent instalments may be withheld.

The University Fee payable by Priestley Scholars will be £30 for the year, payable in three sums of £10 each, this sum to include the use of the ordinary apparatus and chemicals, as well as the purchase of such special apparatus and chemicals as the Professor shall consider desirable.²

At the close of his year's tenure of the scholarship, or at any time previous thereto that the Professor may think fit, a scholar shall present the results of his work in the form of a thesis, the arrangements for the publication of which shall be left to the discretion of the University authorities.

Forms of Application may be obtained from the Registrar, and should be returned, supported by details of educational training and references to former teachers and others, on or before the 31st of May.

Bowen Scholarship in Metallurgy.

(Founded by the late T. Aubrey Bowen, of Melbourne.)

A Scholarship of the value of about £96, tenable for one year, is awarded annually.

This scholarship will be held on precisely similar terms to those laid down above for chemistry, the work engaged on by the scholar having a direct or theoretical bearing on some department of metallurgy. As the prosecution of this work may from time to time entail the visiting of

works for the purpose either of personal observation or actual experiment, the Professor will be empowered to authorise the expense of such visits being either wholly or in part defrayed out of the above-mentioned fee paid by the scholar.

Forms of Application may be obtained from the Registrar, and should be returned, supported by details of educational training and references to former teachers and others, on or before the 31st of May.

The Corbett Scholarship.

(Founded by the late John Corbett, of Impney, Droitwich.)

The Corbett Scholarship, of the value of about £28 a year, payable in the form of remission of fees, is tenable for one year, and is awarded to the student who is recommended to the Senate as the most promising and distinguished student in Mathematics at the end of his or her second year after registration.

Science Research Scholarship.

Awarded by the Royal Commissioners for the Exhibition of 1851.

The Royal Commissioners for the Exhibition of 1851 annually place at the disposal of the University the nomination to a Science Scholarship of the value of £150 a year, tenable for two years, the continuation for the second year being dependent on the work done in the first year being satisfactory to the Scientific Committee appointed by the Commissioners. The student nominated must have studied in the University for three years at least, and must undertake to devote himself to scientific research or the application of scientific knowledge to industries. The Scholarship may be held at any University at home or abroad, or in some other properly-equipped institution to be approved of by the Commissioners. The nomination of candidates by the University is subject to revision by the Commissioners, and the privilege of nomination may be withheld by them at any time.

Applications should be made to the Registrar on or before the 1st of January.

Government Aid towards the Instruction of Science Teachers.

In accordance with a minute adopted by the Right Honourable the Lords of the Committee of Her Majesty's Most Honourable Privy Council on Education, June, 1881 (Science Form, No. 1, 126), their Lordships are prepared to pay three-fourths of the fees for courses of laboratory instruction, as stated below, for a limited number of Teachers engaged in Science Teaching, on condition that satisfactory reports of their progress (to be ascertained by examination), and of their conduct, be received at the end of the Winter, Spring, and Summer Terms.

Applications for this privilege must be made to the Secretary, Board of Education, Whitehall, London, S.W., not later than the 31st August.

The selection of the applicants will rest with the Board of Education.

The fees for two days a week for the Session, from October to June, are :—

*For the Chemical or Metallurgical	£	s.	d.
Laboratories	9	9	0
*For the Physical Laboratory	9	9	0
*For the Biological Laboratories	7	7	0

NOTE.—One-fourth of the fee for the whole Session must be paid by the student on entrance, under the usual conditions of the University. The remaining three-fourths of the fee will be paid by the Board of Education, in equal instalments, at the commencement of each term, subject, however, to the right of the Board to withhold payment of the second and third instalments should the reports not be satisfactory.

The Sunderland Scholarship.

A Scholarship of the value of £50 per annum, tenable for three years on the annual recommendation of the Faculty of Commerce, will be awarded triennially, if a suitable candidate presents himself. A new election will be made in September, 1913.

PRIZES.

The Karl Dammann Memorial Prize.

The "KARL DAMMANN MEMORIAL PRIZE," of the value of about £5, founded by a friend of the late Dr. Karl Dammann, the first Professor of German Language and Literature in Mason College, is awarded annually to the student who is recommended to the Senate as the most promising and distinguished student in German at the end of his or her second or third year after registration. The prize is given in the form of works in the German language.

Fiedler Prize in German Literature.

The "FIEDLER PRIZE IN GERMAN LITERATURE," of the value of £5, given by Mrs. John Meyer, in recognition of the work done by Professor H. G. Fiedler, in his Special Courses on German Literature, is awarded annually to the student who is recommended by the Professor of German Language and Literature as the most distinguished student in German Literature of at least two years' standing after Matriculation. The Prize is given in the form of works in the German language. No student will be allowed to hold this Prize and the Karl Dammann Memorial Prize in the same year.

The Panton Geological Prize.

The "PANTON PRIZE," of the value of Two Guineas—founded by Mrs. Panton in memory of her husband, the late G. A. Panton, Esq., F.R.S.E.—is awarded to a student in the classes of Local Geology for the best Essay upon a Geological subject to be previously approved by the Professor.

The essays should be sent to the Registrar on or before September 1st

Annie Deakin Prize.

The "Annie Deakin Prize," founded in memory of the late Miss Annie Deakin, of Handsworth, by friends and former pupils of her School, of the value of about £1 5s., is awarded annually to the woman who passes the July Matriculation Examination with the highest distinction among those candidates who declare their intention of becoming teachers in Secondary Schools.

Bunce Prize.

The "BUNCE PRIZE," of the value of about £3, founded by the late J. Thackray Bunce, is awarded annually on the result of the Second Year Arts and Intermediate Arts examinations held in the month of June, £2 being given as a prize in books to the best student in Course II in English Literature, and £1 as a prize in books to the best student in Course I in English Literature.

Churton Collins Prize.

The Churton Collins Prize, of the value of about £3 10s., founded in memory of the late Professor Churton Collins, is awarded annually to the best student in English Literature amongst the third year candidates who offer both English Literature and Latin or Greek as a principal subject for the B.A. Degree

Muirhead Prize.

A prize of the annual value of about £3 is awarded by the Faculty of Arts, on the report of the Internal and External Examiners on the result in Philosophy as taken at the final Bachelor's examination by students who have studied Philosophy for two years during their Degree course.

Gladstone Memorial Prize.

The Committee of the Gladstone Memorial Fund offers annually to students of the University a prize of Books, of the value of £5, for an Essay on a subject connected with History, Political Science, or Economics.

Candidates are recommended to consult the Professors of History and Commerce as to the proposed subject for the essay.

The essays should be sent in to the Registrar on or before May 31st.

Austin Prize.

A prize of the value of about £2, founded in memory of the late Mr. W. H. Austin, M.A., Lecturer in Mathematics, is awarded annually to the student of the highest merit in Pure Mathematics at the Examination for the B.Sc. or B.A. degree.

MEDALS.

The Heslop Memorial Medal.

The "HESLOP MEDAL," provided out of the proceeds of a bequest to the College by the late Thomas Pretious Heslop, M.D., is awarded annually by the University, on the recommendation of the Senate. The medal, together with a prize in the form of books or instruments, will be awarded each year for the best dissertation accepted for the M.Sc. Degree.

The Constance Naden Medal.

The "CONSTANCE NADEN MEDAL," founded by Surgeon Lieut.-Colonel R. Lewins, M.D., in memory of the late Miss Constance Caroline Woodhill Naden, is awarded annually by the University, on the recommendation of the Senate. The medal, together with a prize in the form of books or instruments, will be awarded each year for the best dissertation accepted for the M.A. Degree.

HUXLEY LECTURESHIP

A Huxley Lectureship of the value of £20 per annum has been endowed as a token of profound esteem on the part of the founder for the character of the late Professor Huxley, F.R.S., and in memory of his life and work. A lecture open to all members of the University without payment is delivered in the Winter term of each Session.

HUXLEY LECTURERS.

- 1904.—Professor Sir Michael Foster, K.C.B., F.R.S.
 - 1905.—Professor E. B. Poulton, F.R.S.
 - 1906.—Sir Archibald Geikie, LL.D., F.R.S.
 - 1907.—Professor J. J. Thomson, F.R.S.
 - 1908.—Major Ronald Ross, C.B., F.R.C.S., D.Sc.,
LL.D., F.R.S.
 - 1909.—Professor William Bateson, M.A., F.R.S.
 - 1910.—Professor Percy Gardner, Litt.D., LL.D.
 - 1911.—Professor Henri Bergson, Member of the
Institute, Collège de France.
 - 1912.—Professor John Jolly, D.Sc.
-

VACATION READING.

FACULTY OF SCIENCE.

MATHEMATICS.

- A. H. WHITEHEAD, *Introduction to Mathematics*, 1s.
 C. L. DODGSON, *Euclid and His Modern Rivals. Pillow Problems.*
 H. H. TURNER, *Modern Astronomy.*
 W. W. R. BALL, *Mathematical Recreations and Problems. A Short History of Mathematics.*
-

PHYSICS.

Students about to enter Course I may read :—

- TYNDALL'S *Sound.*
 S. P. THOMPSON'S *Light, Visible and Invisible.*
 SEDLEY TAYLOR'S *Sound and Music.*

Those about to enter Courses II and III may read some of the following :—

- PERRY'S *Spinning Tops.*
 BOYS' *Soap Bubbles.*
 ROTCH'S *Sounding the Ocean of Air.*
 BALL'S *Time and Tide.*
 NEWCOMB'S *Astronomy.*
 NEWALL'S *The Spectroscope and its work.*
 CLERKE'S *System of the Stars.*
 HALE'S *Stellar Evolution.*
 THOMSON'S *Electric Discharge in Gases.*
 LODGE'S *Electrons.*

Or students may prefer to read some parts of the Text Books suitable for the different Courses.—See the Syllabuses for the Courses in Physics.

CHEMISTRY.

A. Students intending to enter for the First Year's Course may profitably read :—

- KIPPING and PERKIN'S *Inorganic Chemistry.*
 DOBBIN and WALKER'S *Chemical Theory for Beginners.*
 HOLLEMAN'S *Inorganic Chemistry.*
 ALEX. SMITH'S *General Inorganic Chemistry.*
 SENTER'S *Inorganic Chemistry.*

B. Students intending to enter for the Second Year's Course may profitably read :—

OSTWALD'S *Foundations of Analytical Chemistry*.

OSTWALD'S *Principles of Inorganic Chemistry*.

SEETER'S *Physical Chemistry*.

WADE'S *Organic Chemistry*, especially the introductory chapters and those relating to the fatty compounds.

FENTON'S *Outlines of Chemistry*.

C. Students intending to enter for the Third and Fourth Years' Courses may profitably read :—

WADE'S *Organic Chemistry* (revision).

HOLLEMAN'S *Organic Chemistry*.⁵

COHEN'S *Organic Chemistry for Advanced Students*.

WALKER'S *Introduction to Physical Chemistry* (revision).

NERNST'S *Theoretical Chemistry* (3rd edit.), or VAN'T

HOFF'S *Lectures on Theoretical and Physical Chemistry*.

LACHMAN'S *Spirit of Organic Chemistry*.

ERNST V. MEYER'S *History of Chemistry*.

FINDLAY'S *Phase Rule*.

LEHFELDT'S or LE BLANC'S *Electro-chemistry*

STEWART'S *Recent Advances in Organic Chemistry*.

STEWART'S *Recent Advances in Inorganic and Physical Chemistry*.

ZOOLOGY.

FIRST YEAR.

F. W. GAMBLE'S *The Animal World* (Williams and Norgate).

F. W. GAMBLE'S *Animal Life* (Smith, Elder and Co.).

E. B. POULTON'S *The Colours of Animals* (International Science Series).

A. R. WALLACE'S *Darwinism*, (Macmillan and Co.).

A. MILNES MARSHALL'S *Lectures on Darwinian Theory* (David Nutt).

T. J. PARKER and W. A. HASWELL'S *Text-book of Zoology* (Macmillan and Co.).

L. DONCASTER'S *Heredity* (Cambridge Univ. Press).

SECOND YEAR.

CHARLES DARWIN'S *The Origin of Species* (John Murray).

CHARLES DARWIN'S *Descent of Man* (John Murray).

R. H. LOCK'S *Recent Progress in the Study of Variation, Heredity and Evolution* (John Murray).

T. H. MORGAN'S *Experimental Zoology* (Macmillan and Co.)

W. BATESON'S *Mendel's Principles of Heredity* (Cambridge University Press).

- J. ARTHUR THOMPSON'S *Heredity* (John Murray).
 R. C. PUNNETT'S *Mendelism* (Macmillan & Co.).
 A. R. WALLACE'S *Island Life* (Macmillan and Co.).
 A. R. WALLACE'S *The Malay Archipelago* (Macmillan and Co.).
 H. N. MOSELEY'S *Notes by a Naturalist on H.M.S. Challenger* (John Murray).
 CARL SEMPER'S *Animal Life* (International Science Series).
The various volumes of The Cambridge Natural History (Macmillan and Co.).
 ARTHUR WILLEY'S *Amphioxus and the Ancestry of Vertebrates* (Macmillan and Co.).
 E. B. WILSON'S *The Cell in Development and Inheritance* (Macmillan and Co.).
 W. H. FLOWER and R. LYDEKKER, *An Introduction to the Study of Mammals, Living and Extinct* (A. and C. Black).
 A. MILNES MARSHALL'S *Vertebrate Embryology* (Smith, Elder and Co.).
 A. SMITH WOODWARD'S *Vertebrate Palæontology* (Cambridge University Press).

The Professor will be glad to advise students in their choice of books.

BOTANY.

(1) *After Matriculation and before entering the University:*

FIELD BOTANY, with the aid of GROOM'S *Elementary Botany* (Bell and Sons), or HENSLOW'S *How to Study Wild Flowers* (Religious Tract Society).

LUBBOCK'S *Flowers, Fruits, and Leaves* (Macmillan's "Nature" Series).

(2) *At the end of First University Year.*

FIELD BOTANY, using HOOKER'S *Students' Flora of the British Isles* (Macmillan). As a convenient book for the pocket, HAYWARD'S *Botanist's Pocket Book* (Bell and Sons).

LUBBOCK'S *British Wild Flowers in relation to Insects* (Macmillan's "Nature" Series).

COULTER'S *Plant Relations* (Appleton, New York).

THOS. BELT'S *The Naturalist in Nicaragua* (Bumpus).

N.B.—It is essential that Students who propose to carry on their botanical studies beyond Course I should utilise their first Summer vacation for Field Botany. Satisfactory progress is impossible if limited to the short Summer term of their second year.

(3) *At the end of Second University Year.*

FIELD BOTANY, using HOOKER'S *Students' Flora of the British Isles* (Macmillan).

SACHS' *History of Botany* (Clarendon Press).

J. REYNOLDS GREEN'S *History of Botany*, 1860-1900.

BOWER'S *The Origin of a Land Flora* (Macmillan).

Darwin and Modern Science (Camb. Univ. Press).

GEOLOGY.

PRELIMINARY READING.

MILLS' *Realm of Nature* (Macmillan), or

HUXLEY'S *Physiography*, new edition by Gregory.

LYELL'S *Principles of Geology*, 2 vols. (Murray).

FIRST AND SECOND YEAR READING. All students.

GEIKIE'S *Text-book of Geology*, 2 vols. (Macmillan), or

JUKES-BROWN'S *Stratigraphical Geology* (Stanford).

DWERRYHUSE'S *Geological and Topographical Maps and their Interpretation*.

SECOND YEAR. Applied Geology.

GIBSON'S *Geology of Coal-mining* (Arnold).

THOMAS AND MACALLISTER'S *Geology of Ore Deposits* (Arnold)

WOODWARD'S *Geology of Water Supply* (Arnold).

HOWE'S *Building Stones* (Arnold).

PHILLIPS'S *Ore Deposits*.

SECOND YEAR. Pure Geology.

CHAMBERLIN AND SALISBURY'S *Geology*, 3 vols.

JUKES-BROWN'S *Building of the British Isles* (Stanford).

SUESS'S *Face of the Earth*, English edition, 4 vols. (Oxford Press).

HARKER'S *Natural History of Igneous Rocks* (Macmillan).

DE LAPPARENT'S *Traite de Geologie*, last edition.

FACULTY OF ARTS.

The Vacation Reading in the Faculty of Arts will be found in the syllabus of the various subjects in that Faculty.

Dr. C. L. BOULENGER, M.A., *Secretary.*

REGULATIONS.

I. AREA AND SUBJECTS.—Courses of Lectures on Literature, History, Economics, Law, Languages, Education, Physics, Chemistry, Zoology, Botany, Metallurgy, Mining, Geology, Art, Music, and Architecture, are available for evening delivery within a reasonable distance from Birmingham, *i.e.*, in centres from which return to Birmingham on the same night after the Lecture is possible. In some cases the Lecturer may be available for afternoon Lectures, or for evening Lectures at such a distance as to involve return next morning.

2. BUSINESS CONDITIONS.—In making arrangements for the provision of a Course of Lectures the following conditions must be complied with :—

- (a) Arrangements can only be made with the duly authorised Secretary of a Local Committee, specially formed for this or some cognate purpose, or with the Executive of some Public Authority or Institution.
- (b) This Committee or Public Body must guarantee the Lecture Fee, together with the other expenses referred to hereafter.
- (c) A suitable Lecture Room must be provided together with any appliances which may be needed for the illustration of the Lectures, other than those brought by the Lecturer ; *e.g.*, blackboard, means for suspending diagrams, tables for apparatus, lantern, etc. ; and the expenses defrayed locally.

3. LECTURES.—A course usually consists of ten or twelve lectures, and can be delivered at any convenient time either before or after Christmas.

4. TEACHING METHOD.—Each lecture lasts for about an hour, and is preceded or followed by a class, which is open to all who have taken tickets for the Course. The method of the class is conversational. It is specially intended for the assistance of the more systematic students, bringing the Lecturer into personal relations with them, so that he may be able to clear away any difficulties they may have felt, to enter more fully into matters which appear to require amplification, or to advise them as to their further study. As a rule one or two questions for home answering are set at the close of each lecture, and bearing upon its subject. The answers will be examined by the lecturer, and discussed in the class. Up to a maximum number of twenty-five the reading of these home papers is included in the

lecture fee ; above that number a small fee is charged *per capita*. The lecturer can also be asked questions in writing, and will answer them in class.

5. SYLLABUS.—A syllabus of each course of lectures, showing the scope and method of treatment, will be issued prior to the commencement of the course, and the lecturer will indicate therein the books or portions of books which he considers it desirable that the students should read.

6. EXAMINATION.—Where desired, a written examination will be held at the conclusion of a course by a specially-appointed examiner ; a pass-list will be issued, the names of those who have passed with special credit being duly distinguished ; and, for courses of not less than ten lectures, certificates will be awarded, on the combined results of the weekly papers and the final Examination. The examiner will also be prepared to adjudicate upon any prize which may be offered in connection with a course. The Committee of Senate of the University will be prepared to report upon or award any Scholarship or Exhibition which may be offered in connection with a course or system of courses.

7. COST.—The cost of a course of lectures is made up of the following items :—

- (a) A lecture fee, which includes travelling expenses, examination fee, and cost of syllabus, viz. :—
For a course of six lectures, £26 5s., eight lectures, £32 10s. od., ten lectures, £40, twelve lectures, £45. Certain lecturers rank as " Junior Lecturers," and in their case the fee is subject to a reduction of one-fifth. For distances beyond a certain maximum, or when the lecturer is required to stay the night, and private hospitality is not provided, a small *pro rata* addition will be made to these fees. For courses

longer than twelve lectures, or for two immediately consecutive courses upon the same subject, special terms will be arranged. For conjoint courses a slightly higher fee is charged.

- (b) The cost of the carriage of any apparatus for illustrating the lectures, a small sum for the use of apparatus, and excess charges upon home papers, if any.
- (c) Local expenses, consisting of advertising, hire and lighting of hall, attendance, provision of lantern, etc.

The Secretary will be glad to confer with local secretaries as to proposed courses ; or, free of cost, to visit local centres for the purpose of advice or consultation, or for the arrangement of courses or systems of courses, with special application to local needs.

All communications should be addressed to

The Secretary,

Birmingham University Extension,

THE UNIVERSITY,

BIRMINGHAM.

THE WORKERS' EDUCATIONAL ASSOCIATION.

The object of the Workers' Educational Association is to provide opportunities of higher education, more particularly in History, Economics and Philosophy, to working men and women, who are unable to attend the University in the daytime.

In 1908 the University granted the use of a common room and lecture room to the W.E.A., at the same time opening the University in the evening in order to make them available for the purposes of the Association.

During the sessions 1908-9 and 1909-10 the Social Study Committee of the University arranged for the Association lectures and classes on History, Economics, Social Philosophy and Sanitation and Hygiene, together with two series of popular lectures on " Famous Birmingham Men " and " Birmingham Institutions."

In 1910 a Joint Committee, consisting of an equal number of nominees from working-class organisations and from the Senate of the University, was appointed, which proceeded at once to appoint Mr. Gerard Collier, M.A., as Tutor of three Tutorial Classes under the scheme of the Association. A Tutorial Class is restricted to 30 students, who are required to pledge themselves to attend for three Winter Sessions of 24 weekly meetings each, and to write an essay once a fortnight. Two of these classes were conducted at the University and one at Derby. In addition to these a third Tutorial Class was formed at the University and other Classes at Dudley, Northfield, and Stirchley, which were taught by members of the staff of the University and other qualified Tutors nominated by the Joint Committee.

In the Session 1911-12 the general management and finance of the Tutorial Classes in the Birmingham

district was taken over by the Education Committee of the City Council, but on the occasion of the grant being made from the City rates to the University, a recommendation was attached that the University should maintain the Tutorial Classes organised by the Joint Committee, and also appoint in addition to Mr. Collier a certain number of Junior Lecturers who should devote part of their time to the work of the Association. The recommendations were accepted by the University, and the whole management of the Tutorial Classes in the Birmingham area has been resumed by the Joint Committee.

The Committee now consists of the following members :

Nominated by the University—

SIR OLIVER LODGE, F.R.S. (*Chairman*).

Professor J. H. MUIRHEAD, LL.D.

Professor A. W. KIRKALDY, M.A.

Professor T. TURNER, M.Sc.

FRANK ROSCOE, M.A.

The Right Rev. HENRY RUSSELL WAKEFIELD, D.D.
(*Bishop of Birmingham*).

H. G. WOOD, M.A., *Treasurer*.

Nominated by Working-class Organisations—

G. B. SPRAY (Birmingham Trades Council).

Councillor T. MANSELL, J.P. (South Staffs. Miners' Federation).

J. TAYLOR, J.P. (Midland Trades' Federation).

C. A. W. SAXTON, (Midland Co-operative Union).

H. M. JOINER (Midland Adult School Union).

J. CUTHBERTSON, J.P. (Midland District W.E.A.).

T. W. PRICE (Midland District W.E.A.).

To be appointed (Midland Co-operative Women's Guilds).

Joint Secretaries : J. ST. G. HEATH, M.A., and
T. W. PRICE.

Under the administration of the Committee there falls

- (1) The conduct of Tutorial Classes at the University, and at Derby, Dudley, Burton-on-Trent, West Bromwich, Stirchley. A class is also proposed at Northfield.
 - (2) The arrangement of Preparatory Classes at the University and at Saltley, Redditch and Claverdon.
 - (3) The arrangement of short courses of lectures of a pioneer character in various districts of Birmingham.
 - (4) The arrangement of Lectures of a popular kind at the University on Wednesday evenings. These are open only to members of the Workers' Educational Association and societies affiliated to it.
-

SYLLABUS OF LECTURES AND CLASSES FOR SESSION 1912-1913.

TUTORIAL CLASSES.

1. At the University—

- (a) ECONOMIC THEORY. THE HON. GERARD COLLIER, M.A.
- (b) ECONOMIC HISTORY. THE HON. GERARD COLLIER, M.A.
- (c) ETHICS. L. H. GREEN, B.A.

2. In Greater Birmingham—

- (a) Stirchley. ECONOMICS. F. TILLYARD, M.A.
- (b) Northfield (in process of arrangement). ENGLISH CONSTITUTIONAL HISTORY. F. ROSCOE, M.A.

3. In other Towns—

- (a) Derby. ECONOMIC THEORY. THE HON. GERARD COLLIER, M.A.
- (b) Burton-on-Trent. INDUSTRIAL HISTORY. THE HON. GERARD COLLIER, M.A.
- (c) Dudley. ENGLISH LITERATURE. IVOR B. JOHN, M.A.
- (d) West Bromwich. INDUSTRIAL HISTORY (to be appointed).

PREPARATORY CLASSES.

1. At the University—
ENGLISH LITERATURE. GORDON HISLOP, M.A.
2. In Greater Birmingham—
Saltley. INDUSTRIAL HISTORY. HERBERT HEATON, M.A.
3. In other Towns—
(a) Redditch. ECONOMICS. (To be appointed).
(b) Claverdon. (To be selected).

FEES.—The fees for the Tutorial and Preparatory Classes will be 2/- a session for each course.

PIONEER COURSES.

Short Courses of five or six lectures each on English Literature and on Economic subjects will be given by the Assistant Lecturers in as many as possible of the following districts: Hands-worth, King's Norton, Aston, Bearwood, Small Heath, and King's Heath.

POPULAR WEDNESDAY EVENING LECTURES.

A Course of Eight Lectures on "Great Reformers" will be delivered in the large theatre of the University on Wednesday evenings in the Winter Term. Fee for the Course, 1/-.

A Course of Eight Lectures on "Modern Inventions and Discoveries" will be delivered in the large theatre of the University on Wednesday evenings in the Spring Term. Fee for the Course, 1/-.

Admission to these lectures will be confined to members of the Workers' Educational Association, and of organisations affiliated to it.

CLASSES, ETC., ARRANGED BY THE W.E.A.

The Council of the Birmingham W.E.A. has, in addition to the above, arranged the following classes, to be held at the University:—

THEORY OF MUSIC. Tutor, MRS. KIRKALDY. Fee, 2/-.
ELOCUTION. (To be arranged).

WOMEN'S CLASSES—

- (a) ENGLISH POETRY (Tennyson). Miss M. A. HOLLINGS, M.A. Fee, 1/-.
- (b) INDUSTRIAL HISTORY. (To be appointed). Fee, 1/-.

Further information may be had from the Secretary of the W.E.A., Mr. T. W. Price, The University, Edmund Street.

STANDING COMMITTEES, BOARDS, &c.

LIBRARY COMMITTEE.

The Vice-Principal (*Chairman*).
 The Principal
 Professor C. R. Beazley (*Secretary*).
 Professor E. Wace Carlier.
 Professor H. L. Chatelain.
 Professor S. M. Dixon.
 Professor A. W. Kirkaldy.
 Professor Priestley Smith.
 Professor G. S. West.
 The Librarian (Mr. W. H. Cope).

BOARD OF MANAGEMENT OF THE BREWING SCHOOL.

Principal Sir Oliver Lodge.
 Vice-Principal R. S. Heath.
 Mr. Edward Ansell.
 Mr. Archibald S. Bennett.
 Mr. W. W. Butler.
 Mr. John E. Chambers.
 The Lord Walter Hervey.
 Sir J. C. Holder, Bart.
 Mr. T. Watson Loviband.
 Mr. Frank Wilson.
 Mr. W. R. Wilson.
 Professor Adrian J. Brown.
 Professor F. W. Burstall.
 Professor P. F. Frankland.
 Professor C. Lapworth.
 Professor R. F. C. Leith.
 Professor J. H. Poynting.
 Professor G. S. West.
 Mr. Geo. H. Morley (*Secretary*).

SECONDARY EDUCATION BOARD.

The Principal (*Chairman*).
The Vice-Principal.
Professor W. J. Ashley.
Professor Gilbert Barling.
Professor C. R. Beazley.
Professor A. Hughes (*Secretary*).
Professor C. Lapworth.
Professor J. H. Muirhead.
Professor J. H. Poynting.
Professor E. de Sélincourt.
Professor E. A. Sonnenschein.
Professor T. Turner.
Professor G. S. West.
Sir George Kenrick.
Councillor J. North, J.P.
Mr. H. H. Bemrose, M.A., J.P.
Mr. J. K. Bourne.
Mr. W. A. Brockington, M.A.
Mr. T. Burbidge, J.P.

Professor A. W. Kirkaldy.

Professor J. H. Muirhead.

Professor T. Turner.

H. G. Wood, M.A.

F. Roscoe, M.A.

FACULTY OF MEDICINE.

There are two Sessions in the academical year, and students may commence their studies at the beginning of either, but are recommended to enter at the commencement of the Winter Session. A student can, however, enter at any time during the Sessions.

THE WINTER SESSION begins on the 1st of October, 1912, and terminates on the 15th of March, 1913.

THE SUMMER SESSION commences on the 15th of April, 1913, and terminates on the 28th of June, 1913.

The Dean's Office is open daily, and all information may be obtained there. The Dean attends during Term daily at 11 o'clock, and at other times by appointment. During vacations information may be obtained by letter.

REGISTRATION.—The Dean of the Medical Faculty will be present in the Dean's Office to confer with Parents or Guardians and to enrol Students for the Winter Session on Monday, September 30th, 1912, from 10 a.m. to 1-30 p.m., and at the same hours on Tuesday, the 1st of October. After October 1st the Dean will register Students between the hours of 9-30 and 11-30 a.m. only. He may, however, be seen at other times by appointment.

Students are strongly urged to enrol with the Dean before the actual opening of each Session. In this way they save much time and are enabled at once to profit by continuous and uninterrupted attendance at Lectures.

The Registration of Students for the Summer Session will commence on Monday, the 14th April, 1913, from 10 a.m. to 1-30 p.m., and will be continued at the same hours on Tuesday, April 15th. After April 15th the Dean will Register Students between the hours of 12 and 1-30.

All Fees are payable in advance (*i.e.*, at the beginning of the Session on account of which they are due), at the Secretary's office in the University. Cheques should be drawn in favour of Mr. George H. Morley.

All the Courses, Scholarships, Degrees, and Diplomas in the University are open to students of both sexes.

Students, on entrance, are required to produce a testimonial or such other evidence of good character as shall be satisfactory to the Dean, and to sign an engagement that they will conform to such regulations as have been or may be made for the maintenance of order in the University.

Students intending to take lodgings in Birmingham or the vicinity are requested to place themselves in communication with the Secretary.

FACULTY OF MEDICINE.

TIME TABLE FOR THE M.B., Ch.B. CURRICULUM.
1912-1913.

FIRST YEAR.

SUBJECT.	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.

Midwifery—Tutorial	5.0

All Students are requested to take notice that they must attend **at least two-thirds** of the lectures and practical classes of each course, and that the Schedules of those who do not observe this regulation will not be signed. They must attend the class examinations in Chemistry, Physics, and Biology, and are advised to attend also all other class examinations.

*These classes are compulsory for Students in the Fourth Year.

REGULATIONS FOR MEDICAL AND SURGICAL DEGREES.

The University confers the degrees of Bachelor and Doctor of Medicine (M.B. and M.D.) and of Bachelor and Master of Surgery (Ch.B. and Ch.M.). The course for the Bachelors' degrees extends over five years from the date of registration with the General Medical Council.

As a rule the first four of these years must be spent in the University, but the Senate has power of recognising attendance at another University as part of the attendance qualifying for these degrees and of recognising examinations passed at such other universities as exempting from the examinations in Chemistry, Physics, and Elementary Biology. In the case of such students at least three years must be spent in attendance upon classes at the University. The fifth year may be spent at any other school or schools of medicine recognised by the University.

Candidates are allowed to enter for the First Professional M.B., Ch.B. Examination (Chemistry, Physics and Biology) before commencing residence in the University, provided that they have already passed the Matriculation Examination or some Preliminary Examination accepted by the University in lieu of its Matriculation, such candidates to be eligible for the Final Examination for M.B., Ch.B., on producing evidence that they have been registered Medical Students by the General Medical Council for a period of five years.

Candidates for the above degrees must have complied with the following regulations :—

They must have passed (a) the Matriculation Examination of the University in Chemistry or Experimental Mechanics, English Language, Literature and History; Latin; Mathematics; and one other foreign language; or (b) some other examination recognised as equivalent to the Matriculation.

A Matriculation Examination will be held on the 9th of September, 1912, and succeeding days, for the convenience of students desiring to commence their medical studies in October. Entries for this examination must be sent to the Registrar of the University prior to August 6th.

The Matriculation Examination is held in July and September in each year, and the Regulations for the same will be sent on application to the Registrar.

For the present the University will recognise any one of the following examinations, in lieu of its own Matriculation, in the case of Medical Students, provided always that such examination shall have included the subjects of English, Latin, Mathematics, Chemistry or Experimental Mechanics or some other branch of Experimental Physics, and any one of the following: Greek, French, German, or any other modern foreign language; and that all the subjects have been passed at one examination.

- (a) The Previous Examination of the University of Cambridge, if it includes the "additional subjects."
- (b) Responsions of the University of Oxford, excepting Mathematics.
- (c) The Preliminary or Matriculation Examination of a recognised University.
- (d) The Higher Certificate of the Oxford and Cambridge Examinations Board.
- (e) The Oxford or Cambridge Senior Local Examination.

Candidates must pursue the regular curriculum of study, and pass the prescribed examinations, subject to the following regulations:—

- (a) The Winter Session includes the Winter and Spring Terms, and the Summer Session corresponds with the Summer Term as set down in the Calendar.

- (b) At the end of each course of lectures or practical instruction, the student must obtain the signature of his teacher in the schedule book, which he will be required to lodge with the Registrar when entering his name for an examination.
- (c) This certificate must contain a statement that the student has attended to the satisfaction of the Professor, Lecturer, or Hospital Teacher not less than two-thirds of the lectures, practical classes, or clinical instruction, of which the course consists, together with such class examinations or other exercises as each teacher may prescribe in connection with his own course. In cases of illness, duly certified, the Dean has a discretionary power to relax the rule as to the attendance at two-thirds of the lectures.
- (d) For the subjects included in the First Medical Examination, Medical students must conform to the regulations of the Faculty of Science in the matter of class examinations and term work, and the marks given for terminal work will be dealt with by the Board of Examiners in the same manner as in the examinations of the Faculty of Science. In the subjects of all the subsequent Medical Examinations, Class Examinations will be held at the discretion of each Professor but at least once in each Term and students are strongly recommended to attend these. No particular standard of marks will be exacted, but the students' class and examination work may be submitted to the Examiners at the University Examination and taken into consideration by them.
- (e) The classes and examinations in the University must be taken out in the order and

during the years specified in the Time Table, unless the student shall have received written permission from the Dean to vary the order of his study. In no case will students be permitted to enter upon Hospital study, other than that set down for the second year, until the Second Examination shall have been passed.

- (f) In each examination, except the first, third, and fourth, the student will be required to pass in *all* the subjects set down for that examination; failure in any one subject will entail the loss of the examination.
- (g) The First, Second, Third, and Fourth Medical Examinations take place in the month of June in each year, but Supplementary Examinations for Referred Candidates may also be held in the month of September. Students are in general required to take the ordinary Examinations in June, but in cases of illness or in other special circumstances the Dean of the Faculty may at his discretion allow students to postpone their Examinations until September. Students who fail at the June Examination may be allowed, at the discretion of the Board of Examiners, to present themselves for re-examination in the following September. Students who pass in the practical examination in a subject at the June Examination may be excused the practical examination in such subject in the following September, at the discretion of the Board of Examiners. The Board of Examiners may require a candidate who has failed at an examination to attend during a second year courses of Practical or Theoretical Study or both, in the subject or subjects in which he has failed.

- (h) The Final Examination takes place in June and December in each year. In the case of failure in the final examination, the student will be required, before being re-admitted to examination, to produce a certificate as evidence of six months further attendance on clinical work at some recognised hospital or hospitals.

Note.—Every candidate will be required to produce a certificate of having been registered as a medical student by the General Medical Council before admission to the Second Medical Examination.

COURSE OF INSTRUCTION FOR DEGREES IN MEDICINE AND SURGERY.

First Year.

ANATOMY.—One course of lectures during the Winter Session, with practical work extending over the same period.

CHEMISTRY.—One course of lectures and practical work during the Winter Session, with a second course, accompanied by practical work during the Summer Session.

Note.—Students are strongly recommended to study Elementary Chemistry before entering on this course.

PHYSICS.—One course of lectures accompanied by practical work, extending over the Winter and Summer Sessions.

ELEMENTARY BIOLOGY.—A course of lectures during the Winter and Summer Sessions, with practical work extending over the same period.

At the end of the First Summer Session students will be eligible for the First Examination, viz., Chemistry, Physics and Elementary Biology.

Students may present themselves for *all* or *any two* of these subjects. In either case the candidate must pass in two subjects in order to secure credit for any part of the Examination,

Note.—Students who have passed the Intermediate Examination for Degrees in Science in these subjects will be exempt from further examination in them.

Second Year.

ANATOMY.—One course of lectures during the Winter Session, and one during the Summer Session, with practical work extending over the same period.

Note.—The certificate in Anatomy must show that the student has dissected the entire body *at least* once.

PHYSIOLOGY.—One course of lectures accompanied by practical work during the Winter Session, and a course of practical work during the Summer Session. Before commencing this course students will be required to provide themselves with a microscope subject to the regulations on page 517.

HOSPITAL.—Attendance on special Surgical Tutorial Classes will be required on Saturday mornings during the Winter and Summer Sessions.

At the end of the Second Summer the student who has passed the First Examination and who has duly followed the above courses will be eligible for the Second Examination, viz., Anatomy and Physiology. Students must present themselves for both of these subjects, and a candidate must pass in the two subjects in order to secure credit for the Examination.

Third Year.

SURGERY.—One course of lectures during the Winter Session.

PATHOLOGY.—One course of lectures and practical work during the Winter Session, with a course of practical work during the Summer Session. Before attending this course the student will be required to add to his microscope the additional parts mentioned in the regulations on page 517.

MATERIA MEDICA.—One course of lectures, with a practical course of instruction in Pharmacy during the Winter Session (January to March) and the Summer Session.

500 REGULATIONS FOR MEDICAL AND SURGICAL DEGREES.

HOSPITAL.—The course of instruction as set down in the Regulations for Hospital work must be followed. (See page 564.)

At the end of the Summer Session the student who has passed the Second Examination and who has been duly certified may present himself for the Third Examination in Pathology and Bacteriology and Materia Medica and Practical Pharmacy.

Candidates for this Examination are required to take the whole of the subjects—viz., Pathology and Bacteriology, and Materia Medica and Pharmacy—together at one Examination. Candidates may pass in one group of subjects—viz., Pathology and Bacteriology, or Materia Medica and Pharmacy—provided they obtain a reasonable standard of marks in the group in which they fail.

Fourth Year.

MEDICINE.—One course of lectures during the Winter Session.

SURGERY.—One course of lectures during the Winter Session.

HYGIENE AND PUBLIC HEALTH.—One course of lectures during the Winter Session.

MIDWIFERY.—One course of lectures during the Winter Session.

FORENSIC MEDICINE AND TOXICOLOGY.—One course of lectures during the Winter and Summer Sessions accompanied by practical work in both subjects during the Summer Session.

THERAPEUTICS.—One course of lectures during the Winter Session.

MENTAL DISEASES.—One course of lectures during the Summer Session.

HOSPITAL.—The course of instruction as set down in the Regulations for Hospital work must be followed. (See page 564.)

At the end of this year the student who has passed the Third Examination and who has been duly certified for the courses prescribed for the fourth year will be eligible to present himself for the Fourth

Examination. Candidates for this Examination are required to present themselves in all three subjects, viz. :—(a) Forensic Medicine and Toxicology ; (b) Public Health ; and (c) Therapeutics. Candidates may pass in any *two* subjects, provided they obtain a reasonable standard of marks in the third subject in which they fail.

Fifth Year.

MEDICINE.—One course of lectures during the Winter Session.

DISEASES OF WOMEN.—One course of lectures during the first half of the Winter Session.

SURGICAL AND MEDICAL ANATOMY.—One course of lectures extending over three months during the Winter Session.

OPERATIVE SURGERY.—One course of practical instruction during the Winter Session.

OPHTHALMOLOGY.—One course of lectures during the Winter Session.

HOSPITAL (GENERAL CLINICAL).—The course of instruction as set down in the Regulations for Hospital work must be followed. (See page 564.)

FEVER HOSPITAL.—A course of instruction extending over not less than three months.

Note.—The certificate must include a statement that the student has personally taken notes of not less than six cases of fever.

ASYLUM PRACTICE.—A course of instruction extending over not less than three months.

Note.—The student must present to the examiners at the time of examination at least four properly filled up certificates of lunacy drawn up by himself after personal examination of insane patients, and notes of two cases taken by himself, both to be certified by his teacher.

VACCINATION.—The student must follow the course laid down by the instructions of the Local Government Board. (See page 594.)

In addition to evidence that the above courses have been duly completed, the student will, on presenting

himself for the final examination, be required to produce the following additional certificates :—

- (a) Of having attained his twenty-first year.
- (b) Of having during his third and fourth years performed the duties of clerk and dresser according to the rules laid down in the regulations for Hospital work.
- (c) Of having attended during at least twelve months the demonstrations given in the *post-mortem* room of a recognised Hospital, and of having acted for three months as *post-mortem* clerk.
- (d) Of having attended during three months the practice of an Obstetric Department or Hospital recognised by the University or of having attended not less than twenty cases of labour, the first five at least of which shall have been conducted under the personal supervision of a registered practitioner, and of having continued such attendance throughout the puerperal period.

Note.—All students commencing their Medical studies on or after October 1st, 1909, will be required to conform to the regulations, as defined below, for instruction in Practical Midwifery :—

I. Every student before commencing the study of Practical Midwifery is required to have held the offices of Clinical Medical Clerk and Surgical Dresser at a recognised Hospital, and to have attended a course of lectures on Surgery and Midwifery in the University.

II. Every student is required *either*—

To have regularly attended the indoor practice of a Maternity Hospital (see page 591), recognised by the University, for a period of three months; and, after having received therein practical instruction in the conduct of labour, under the personal supervision of a Medical Officer, to have conducted twenty cases of Midwifery under official Medical supervision; or *alternatively*,
To have conducted not less than twenty cases of labour, subject to the following conditions :—

That he has, during one month, given regular

daily attendance upon the indoor practice of a recognised Maternity Hospital; and that he has therein conducted cases of labour under the personal supervision of a Medical Officer of the Hospital, who shall, when satisfied with the student's competence, authorise him to conduct outdoor cases, under the supervision of a Medical Officer of a Hospital, Infirmary, Maternity Charity, or Dispensary approved by the University.

Note.—No certificate that the student has conducted the above-mentioned twenty cases of labour will be accepted, unless it is given by a member of the staff of a Hospital, Infirmary, Maternity Charity, or Dispensary recognised by the University.

- (e) Of having, during at least three months, received in either a General or Special Hospital, recognised by the University, Clinical Instruction in the Diseases peculiar to Women, and performed the duties of a Gynæcological Clerk for a period of three months.

Note.—The student must present to the examiners, at the time of his examination, notes of at least six cases of this character taken by himself and certified as such by the teacher from whom he received his instruction.

- (f) Of having, during at least three months, received in either a General or Special Hospital, recognised by the University, Clinical Instruction in Ophthalmology.

Note.—The certificate must state that the student has received personal instruction in the detection and correction of errors of refraction.

- (g) Of having received practical instruction in the administration of Anæsthetics.

Students who have passed the Fourth Examination, on presenting the above certificates, will be eligible to enter for the Final Examination in Medicine, Surgery, Midwifery, and Diseases of Women, Ophthalmology, and Mental Diseases.

On passing this examination the student will be permitted to proceed to the Degrees of Bachelor of Medicine and Bachelor of Surgery.

DEGREES OF M.D. AND Ch.M.

At the end of one year from the date of having passed the Final M.B., Ch.B. examination the candidate will be eligible to present himself for the higher degrees of either Doctor of Medicine or Master of Surgery or both.

Candidates for either of these Degrees will be required to comply with the following Regulations:—

For the Degree of M.D.

Every candidate for this degree shall present a Thesis embodying observations in some subject embraced in one of the departments of the medical curriculum enumerated below, and in addition he will be required to pass a general examination in Principles and Practice of Medicine. It will be in the power of the Board of Examiners to exempt a candidate whose Thesis is of exceptional merit from any part of these examinations.

Note.—Theses, which must be either printed or type-written, should be lodged with the Registrar not later than May 2. Two copies must be presented, one of which will be returned to the Candidate.

A Thesis may be presented in any of the following departments of study:—

- (a) Anatomy, including Comparative Anatomy.
- (b) Physiology.
- (c) Human or Comparative Pathology.
- (d) Bacteriology.
- (e) Pharmacology.
- (f) Therapeutics.
- (g) Medicine.
- (h) Mental Diseases
- (i) Preventive Medicine or Public Health.
- (j) Toxicology.
- (k) Legal Medicine.
- (l) Midwifery.

For the Degree of Ch.M.

Candidates are required to comply with the following Regulations :—

1. Every candidate shall present a Thesis embodying observations in some subject embraced in one of the departments of the medical curriculum enumerated below. In addition the candidates will be required to pass a general examination in Principles and Practice of Surgery, and to perform operations on the Cadaver.

Note.—Theses, which must be either printed or type-written, should be lodged with the Registrar not later than May 2. Two copies must be presented, one of which will be returned to the Candidate.

2. It will be in the power of the Board of Examiners to exempt a candidate whose Thesis is of exceptional merit from any part of these examinations.

3. The candidate may be examined in that department of the medical curriculum from which the subject of his Thesis is chosen, and the Examiners may require to see the notes of original observations on which the Thesis is based :—

- (a) Surgery.
- (b) Pathology.
- (c) Bacteriology.
- (d) Gynæcology.
- (e) Ophthalmology.

The Fee for either of these Examinations is Ten Pounds.

COMBINED COURSE FOR SCIENCE AND MEDICAL DEGREES.

Students in the Faculty of Medicine, by devoting six years to study in the University instead of five years, may obtain a degree in Science (B.Sc.) in addition to their medical degrees. The course of study for the first year is that prescribed for the Intermediate Science

Examination in Physics, Chemistry and Biology. After passing the Intermediate Science Examination, students must during the following two years devote themselves entirely to the study of Anatomy (including Anthropology) and Physiology, taking one of these subjects as a principal subject, and the other as a double subsidiary subject for the degree of Bachelor of Science. Candidates who have passed the degree examinations in these subjects will be excused the first and second Medical Examinations, and can enter on the final three years' curriculum for medical degrees.

ADMISSION OF GRADUATES OF OTHER UNIVERSITIES.

Graduates in Medicine of other Universities who have taken at least three years of their curriculum in the Birmingham Medical School are admitted to the Examination for the Degree of M.D. or Ch.M. on presenting evidence of having been engaged for at least one year in post-graduation study either in a laboratory of the University or in a Hospital associated with the University and approved of by the Medical Faculty, or partly in both such places.

Graduates in Medicine of other Universities who are not past students of the Birmingham Medical School are admitted to the Examination for the Degree of M.D. or Ch.M. under the following regulations:—

- (1) They must possess a degree of a British or Colonial University recognised for registration by the General Medical Council and approved of by the Senate of the University.
- (2) They must have been engaged, to the satisfaction of the Faculty, in post-graduation study for a period of not less than two years either in research work in a laboratory of this University, or in special study whilst holding an appointment approved of by the Faculty in one or more of the Hospitals associated with the University.

REGULATIONS FOR DEGREE AND DIPLOMA IN PUBLIC HEALTH.

General Conditions.

1.—All Candidates must be registered under the Medical Act.

2.—The Examinations will be held in the months of March and June, and will consist of two parts. No Candidate will be allowed to pass Part II. until he has passed Part I.

3.—Candidates may enter for Parts I. and II. separately or at the same time.

4.—The Examination in each part will be written, oral and practical.

5.—Candidates intending to present themselves for either part of the Examination must give notice in writing to the Registrar of the University, on the date prescribed.

6.—The Fee for each part of the Examination is £5.

Conditions of Admission to the Examinations for the Diploma in Public Health.

Candidates registered under the Medical Act on or *before* the 1st of January, 1890, will be allowed to sit for examination on producing certificate of registration.

Candidates registered under the Medical Act *after* the 1st of January, 1890, must conform to the following Regulations :—

The Curriculum for the Degree or Diploma in Public Health must extend over a period of not less than nine calendar months.

Candidates will be admitted to examination in Part I. on producing evidence of having received, after obtaining a registrable Qualification, during six months, practical instruction in Hygienic Chemistry, Bacteriology, and the Pathology of the Diseases of Animals transmissible to Man.

Candidates must produce evidence of having worked in the Laboratories for at least 120 hours in Practical Hygienic Chemistry and at least 120 hours in Practical Bacteriology.

NOTE.—Graduates in Medicine of the University of Birmingham, or past students who have taken out the whole of their Curriculum in the Birmingham Medical School may attend the required instruction in Chemistry and Bacteriology either in this or in some other University, University College, or Medical School in Great Britain or Ireland. (Officers of R.A.M.C., see page 510.)

Other candidates must attend the special courses of instruction in Chemistry and Bacteriology required for the Diploma in the Laboratories of the University of Birmingham.

Candidates will be admitted to examination in Part II. on producing evidence:—

EITHER (I.) That, after obtaining a registrable Qualification, they have, during six months, been diligently engaged in acquiring a practical knowledge of the duties, routine and special, of Public Health Administration, under the personal supervision of

(a) In England and Wales, the Medical Officer of Health of a County or of a single or combined Sanitary District having a population of not less than 50,000, or a Medical Officer of Health devoting his whole time to Public Health Work; or

(b) In Scotland, a Medical Officer of Health of a County or Counties, or of one or more Sanitary Districts having a population of not less than 30,000; or

(c) In Ireland, a Medical Superintendent Officer of Health of a District or Districts having a population of not less than 30,000; or

(d) In the British Dominions outside the United Kingdom, a Medical Officer of Health of a Sanitary

District having a population of not less than 30,000, who himself holds a registrable Diploma in Public Health; or

(e) A Medical Officer of Health who is also a Teacher in the Department of Public Health of a recognised Medical School; or

(f) A Sanitary Staff Officer of the Royal Army Medical Corps having charge of an Army Corps, District, Command, or Division, recognised for this purpose by the General Medical Council; or

(g) An Assistant Medical Officer of Health of a County, or of a single Sanitary District having a population of not less than 50,000, provided the Medical Officer of Health of the County or District in question permits the Assistant Officer to give the necessary instruction and issue certificates.

Certificates under Section I. must include testimony that the candidate has attended under the supervision of the person certifying on not less than 60 working days.

OR (II.) That he has himself held for a period of not less than three years an appointment as Medical Officer of Health of a Sanitary District within the British Dominions, and having a population of not less than 15,000.

NOTE.—The period during which the Candidate has been engaged in acquiring practical knowledge of his duties under Section I. may be reduced to three months, to include an attendance on at least 30 working days.

Provided that the candidate

(i.) Produces satisfactory evidence that he has attended a course or courses of instruction in sanitary law, vital statistics, epidemiology, school hygiene, and other subjects bearing on Public Health Administration, given by a Teacher or Teachers in the Department of Public Health of a recognised Medical School; or

(ii.) Produces evidence that he has been a resident Medical Officer in a Hospital for Infectious Diseases containing not less than 100 beds, during a period of three months.

Every Candidate must also produce evidence that, after obtaining a registrable Qualification, he has attended at least twice weekly during three months the practice of a Hospital for Infectious Diseases recognised by the University at which he has received instruction in the Methods of Administration.

Methods of Administration shall include the methods of dealing with patients at their admission and discharge, as well as in the wards, and the Medical Superintendence of the Hospital generally.

In the case of a Medical Officer of the Royal Army Medical Corps, a certificate from a Principal Medical Officer under whom he has served, stating that he has during a period of at least three months been diligently engaged in acquiring a practical knowledge of Hospital Administration in relation to Infectious Diseases, may be accepted as evidence.

Officers of the Royal Army Medical Corps who have studied Chemistry and Bacteriology at the Staff College, and pursued the further course of study approved by the General Medical Council in December, 1911, will be admitted to the Examination for the Diploma in Public Health, whether they have previously been students of the Birmingham School or not.

List of the Districts and Commands that have been recognised by the General Medical Council under Section I. (f) :—

Aldershot.
Salisbury Plain.
Southern and South-Eastern.
Western.
Dublin and Belfast.
Cork.
Chatham and Woolwich.
Home.
Eastern.
North-Eastern and North-Western.
Scottish.
Gibraltar Command.
Malta Command.

The following Indian Divisions
viz. :—

1st (Peshawar).
2nd (Rawalpindi).
3rd (Lahore).
4th (Quetta).
5th (Mhow).
6th (Poona).
7th (Meerut).
8th (Lucknow).
9th (Secunderabad).
Burma.

DEGREE IN PUBLIC HEALTH.—Graduates in Medicine of this University may become candidates for the degree of Bachelor of Science in Public Health, by conforming

to all the requirements laid down for candidates for the Diploma in Public Health, and, in addition, they must have attended a three months' course of Geology in the University.

Past students of the Birmingham School of Medicine who have taken out their entire curriculum, or at least three years of the same therein, and have obtained a degree in Medicine in any British University are eligible for the Bachelorship in Science in Public Health on the same terms as graduates in Medicine of the University of Birmingham.

The Examination for the Degree is not the same as that for the Diploma, and a considerably higher standard of knowledge will be exacted at the former, which includes also a written examination in Geology.

The whole of the instruction, with the exception of out-door Sanitary work (which may be taken with Dr. Bostock Hill) required for the Degree and Diploma in Public Health can be taken out in the University.

COURSES OF INSTRUCTION.

Sanitary Chemistry.

Note.—This instruction is given at the University Buildings, Edgbaston.

B.Sc. or Diploma in Public Health.—The Laboratory Course, which includes Oral Instruction, extends over six months (not less than six hours weekly. Times by arrangement). For Syllabus of Course see page 535.

Advanced Bacteriology.

This Class begins on Tuesday, October 8th, at 3.30 o'clock, and meets on Tuesdays, Wednesdays, and Fridays of each week until the end of March, each meeting occupying two hours. In addition there are special meetings in sections according to arrangement. This Course qualifies for the various Diplomas and Degrees in Public Health of this University and other Bodies. It consists of lectures, demonstrations, laboratory instruction, and practical work in Bacteriology, especially in relation to diseases, public health, its application to various industries, the disposal of sewage, etc. For Syllabus see page 547.

Hygiene and Public Health.

In the latter half of the Winter Session, commencing in January, a Special Course of Lectures for candidates for Degrees and Diplomas in Public Health is given on Sanitary Engineering, Law, and Statistics, on Mondays at 3 p.m.

Geology.

B.Sc. in Public Health.—The course in Geology is given in the Winter Session, the class commencing at the beginning of October, and meeting two hours weekly by arrangement.

SYLLABUS OF THE COURSE.

I.—Outlines of Geology.

Prevailing types of rocks; their physical characters, mineral and chemical composition and modes of origin.

Structures of rocks: folds, faults, &c.; representation in geological maps and sections and the interpretation and uses of these.

Arrangement of rocks: the rock formations of Britain, their structural arrangement and distribution, and their special characteristics.

II.—Geology in relation to Sanitation and Water Supply.

The disposal of rainfall overground and underground. Overground waters; their natural actions and their use and storage: drainage, sanitation, water-supply, reservoirs.

Underground waters; how they are contained in and flow through rocks; dependence of this upon rock texture and structure; composition of underground waters as affected by the texture, structure and composition of the rock through which they have passed; water-supply from springs, wells, borings; the water-bearing characters of the rock formations of Britain.

	FEES—				£	s.	d.
Sanitary Chemistry	8	8	0
Bacteriology	5	5	0
Incidental Fee...	3	3	0
Geology	2	2	0
Public Health Lectures	2	2	0

Syllabus for the Examinations.

PART I.

1.—Physics in their application to Health, and with reference to Ventilation and Heating. Water Supply and Sewerage.

2.—Chemistry in its relation to Air, Water, Food, Soil, and Sewage.

3.—Microscopical Examinations of Air, Water, Food, Articles of Clothing, Parasites, &c.

4.—Bacteriology in relation to Sanitary Work.

The Examination in Part I. consists of *two* written papers, and a viva voce—in Public Health; a Practical in Bacteriology (which may include a viva voce); a Practical in Hygienic Chemistry (which may include a viva voce), and an Examination in Practical Microscopy.

PART II.

1.—The Origin, Pathology, and Prevention of Disease; with special reference to Infectious Disease.

2.—Effects of Unwholesome Air, Water, and Food.

3.—Diseases of Animals in relation to the Health of Man.

4.—Influence of occupation.—Unhealthy Trades.

5. Influence of Climate.

6.—Sanitary Administration in relation to requirements of Houses and other buildings, Sanitary Engineering.

7.—Construction, Arrangement, and Management of Hospitals.

8.—Statistics in relation to Health.

9.—Sanitary Law, including Bye-laws, Orders and Regulations.

10.—Duties of Sanitary Officers.

The Examination in Part II. consists of *two* written papers and a viva voce in Public Health, and a Practical and Oral Examination in Outdoor Sanitary Work. Candidates for the Degree of B.Sc. in Public Health will be examined also in Geology.

UNIVERSITY FEES.

MEDICAL FACULTY.

Membership Fees.

Composition Students on entering pay a Membership Fee of £5 5s., which admits them to the University for five years. At the expiration of this period they may, at the discretion of the Dean, be called upon to pay the membership fees demanded from occasional students.

Occasional or Class Students are required to pay £1 11s. 6d. for each Academic Year during which they are in attendance at the University. The Membership Fee for Three Months' Attendance is 12s. 6d.

Class Fees.

Students wishing to do so can pay for each class as they take it, the following table showing the fees for each course:—

	£	s.	d.
Anatomy Lectures (1st Winter)	6	6	0
Practical Anatomy (1st Winter)	5	5	0
Anatomy Lectures (2nd Winter)	6	6	0
Practical Anatomy (2nd Winter)	5	5	0
Anatomy and Practical Anatomy (one Summer) ...	3	3	0
Physiology	6	6	0
Physiology, Practical	4	4	0
Medicine	6	6	0
Surgery	6	6	0
Chemistry	4	4	0
Chemistry, Practical	3	3	0
Elementary Biology	5	5	0
Physics	5	5	0
Materia Medica and Pharmacy	2	2	0
Pathology	4	4	0
Pathology, Practical	4	4	0
Therapeutics	4	4	0
Forensic Medicine and Toxicology	4	4	0
Public Health	3	3	0
Operative Surgery	2	2	0
Lunacy and Mental Diseases	2	2	0
Ophthalmology	1	1	0
Applied Anatomy	1	1	0
Midwifery	4	4	0
Diseases of Women	2	2	0
	<u>£101</u>	<u>17</u>	<u>0</u>

Note.—Composition Students desiring to repeat any course will be required to pay a half fee for such course,

Composition Fee.

The COMPOSITION FEE, £85, is inclusive and payable in one sum, or in two instalments of £42 10s. each at the commencement of the first and second years of studentship. This fee covers all the courses necessary for the Degrees of this and other Universities and the ordinary qualifications of the Licensing Boards. It does not include, however, courses for Public Health Diplomas, nor those for the Preliminary Scientific Examination of the University of London, nor the additional courses required for the Fellowship of the Royal College of Surgeons, and other such higher diplomas and degrees. It is not a *perpetual* fee, and students allowing their courses to fall into arrear, without having previously obtained the written permission of the Dean to do so, are liable to the forfeiture of the unused portion of their Composition Fee.

Incidental Fees.

Composition students taking courses for the first time are not required to pay these fees; any Composition Student desiring to repeat a practical course will have to pay the full incidental fee as well as the half-fee for attendance. Class Fee Students are required to pay the incidental fee as well as the class fee.

	£	s.	d.
Dissecting Room (each Winter)	1	11	6
Dissecting Room (each Summer)	0	15	9
Practical Physiology	2	2	0
Practical Pathology	1	11	6
Practical Pharmacy	0	10	6
Operative Surgery	0	10	6
Practical Forensic Medicine and Toxicology ..	0	10	6

Note.—All these sums are payable to the Secretary.

Total Cost.

For the convenience of those desiring to ascertain the total cost of obtaining the degrees of Bachelor of Medicine and Bachelor of Surgery, the following table has been drawn up. It presumes that the student enters by the Composition system and makes no allowance for failures at examinations. No allowance is made either

for the cost of books, instruments, etc., or for private tuition, should such be required.

	£	s.	d.	£	s.	d.

*Physiology—for F.R.C.S. (3 months)	3	3	0

* Including Incidental Fee.

Microscopes.

It is essential that every well-educated medical man should possess his own microscope. Students will, therefore, be required to provide themselves with a satisfactory instrument before attending the course of Practical Physiology. Before attending the Practical Course in Pathology, they will be required to add a higher power lens and such other accessories as are necessary for the study of Bacteriology. Students can provide themselves with instruments, but in that case each instrument will have to be submitted to the Professor of Physiology, and its further accessories to the Professor of Pathology, and no student will be permitted to use in class an instrument which has not been approved by the Professor. The instrument recommended by the Faculty is the Delepine pattern microscope, manufactured by Messrs. Swift and Son. Students desiring to do so, can procure this instrument through the University by paying the sums set down below, in the Dean's office. All students, not already possessing a suitable instrument, are advised to follow this course, since they will obtain a substantial reduction in price by so doing. Moreover, all instruments purchased in this way will have been carefully examined by the Professors of Physiology and Pathology, so that the purchaser will be certain that he is obtaining a first-class microscope. The price of the microscope with the parts necessary for the Course of Practical Physiology will be £8 11s. od., and this sum must be paid at the commencement of the second winter. The accessories necessary for the Course of Practical Pathology will cost in addition, £5 6s. 6d., and this sum will have to be paid at the commencement of the third winter. These sums include the charge for engraving the student's name on the various parts of the instrument.

Examination and Admission Fees.

The fees payable before a student is admitted to any of the examinations are set down below. Such fees

cannot be returned, but candidates are allowed to repeat any examination upon payment of £1, except for the M.D., the Final M.B., Ch.B., and the Diploma in Public Health, the referred fees for which are as follows:—M.D., £5; Final M.B., Ch.B., £2; Diploma in Public Health, £3 for each part.

REGULATIONS TO BE OBSERVED BY STUDENTS.

1.—Students on applying to enter any class are required to sign a declaration that they will observe the Ordinances of the University and conform to such regulations as have been or may be made for the maintenance of order in the University and in the classes they attend.

2.—Students who have passed the Matriculation examination or an examination accepted by the University as the equivalent of the Matriculation are eligible to become candidates for Degrees in the University. Such candidates are required to sign the Register of Matriculated Students, and after registration become Undergraduates of the University. Undergraduates enjoy the status of Membership of the University and are entitled to the privileges of the Guild of Undergraduates. Undergraduates are required to wear academic dress when in attendance upon University lectures, etc. Students who are not Undergraduates are not entitled to wear academic dress.

3.—Students are not permitted to be in the building before 8.45 a.m., nor after 7 p.m., unless attending classes or the meetings of some University Society.

4.—All students are required to conduct themselves in a quiet and orderly manner whilst in the building, not only during lecture hours, but on entering and leaving the building.

5.—Smoking is prohibited. Students are not permitted to loiter about in the corridors or front hall.

6.—Card playing is prohibited in any part of the University.

7.—Students committing any damage to the building, or property, will be required to pay for making good the same, and may be excluded from attendance at the University until payment is made.

8.—Students are required to attend punctually and regularly at the lectures and classes for which their names are entered.

9.—When students have been absent it is desirable that they should report the cause of their absence to the Dean on their return to the class. In the event of illness or unavoidable absence notice should be sent to the Dean as soon as convenient.

ATTENDANCE AND SCHEDULES.

I.—Before attending any class, students must obtain a form from the Dean, which they must *at once* present to the Secretary, paying at the same time any fees which may be due. Students are, however, particularly requested to notice that the form which they obtain from the Dean must be lodged at once with the Secretary whether any fees are payable at the same time or not. Until this is done no credit can be given for attendance upon any course.

II.—Students, whether composition or occasional, who have taken out all the classes for which they have paid, must understand that they have no further *right* to use the University Class-rooms, Library, or the Club

Rooms. But all Composition Students can obtain permission from the Dean to use the Museums and Library, etc. The Dean will issue cards to such students each Session, and the cards may be required to be produced at any time. It must be distinctly understood that such cards are held subject to the good conduct of the student, and that the Dean may at any time cancel any student's card.

Occasional students can receive similar cards on paying the terminal Membership Fee.

III.—Students must obtain the necessary signatures to their Schedules immediately after the conclusion of the several courses.

IV.—No Student's Schedule will be signed unless he shall have attended at least *two-thirds* of the lectures given in the course.

V.—Should any student desire to obtain credit for lectures from which he has been absent on account of illness, he must apply to the Dean, and lodge a medical certificate in the Dean's office on his return to work.

VI.—All students may be required to attend an Examination before their Schedules are signed for *any* Examination of *any* examining body.

VII.—Schedules for *all* Examinations must be left in the Dean's office *at least two days* before they are required. The student's name and address must be filled in in ink, and the date of attendance on the several courses of lectures filled in in pencil. Schedules will not be attended to unless the above rules are carried out.

VIII.—Schedules sent in during vacations may be much delayed. Students should, therefore, obtain all necessary signatures before the last day of each term.

Students and others desiring information on any subject connected with the Medical Curriculum can obtain the same by applying at the Dean's Office in the University Medical Buildings

SCHOLARSHIPS AND PRIZES.

SANDS-COX SCHOLARSHIP.

The Sands-Cox Scholarship, of the value of £42, is awarded annually to the Candidate amongst those entering as students of the Faculty of Medicine in the month of October, who shall have obtained the highest marks at the Matriculation Examination in the previous month of July.

Provided that —

- (a) No Candidate shall be elected whose age exceeds nineteen on the first day of the examination.
- (b) No Candidate shall be elected who shall not have attained to a position in the first class, and satisfied the examiners that he has shown sufficient merit for the award.
- (c) The payment shall be made in two annual instalments, and in the form of remission of fees.
- (d) The second instalment shall not be paid until the scholar presents a certificate from the Dean, showing that his first year's work has been satisfactory.

Candidates desirous of competing for this Scholarship should notify the Registrar on entering for the Examination.

SYDENHAM SCHOLARSHIPS.

1. One or more Scholarships of the value of £42 each will be offered annually.
2. The Scholar or Scholars will be elected by vote of the Council on the recommendation of the Faculty of Medicine.
3. The Scholarships are limited to the orphan sons of legally qualified Medical Men on entrance as first year students of the University.
4. The orphan sons of former students of the Birmingham Medical School will have a priority of election.

5. No Sydenham Scholar will be elected whose age exceeds 23 years on the day of election.

6. The Scholarship may be held for three years, subject to good behaviour; and one-third of the Scholarship will be paid annually.

7. Written application for a Sydenham Scholarship should be addressed to the Dean of the Medical Faculty on or before the 3rd of October in each year, and the candidate is required to furnish such evidence of eligibility as the Dean may consider necessary.

QUEEN'S SCHOLARSHIPS.

Queen's Scholarships of the value of £10 10s. each are allotted annually, on the recommendation of the Examiners, to the students taking the first place and obtaining "*first-class*" marks at the second, third, fourth, and final University Examinations respectively held in June.

In the Third Examination the Scholarship is awarded to the Student obtaining the highest first-class marks in Pathology and Bacteriology, provided that such student passes at the same examination in the subjects of Materia Medica and Practical Pharmacy.

INGLEBY SCHOLARSHIP.

Two Ingleby Scholarships, founded in memory of the late Dr. Ingleby, formerly Professor of Midwifery in the Queen's College, are offered annually to the candidates who obtain at the June Final Examination the highest marks in the subjects of Midwifery and Gynæcology, provided that the Candidates are placed in the "*First Class*" in the aforementioned subjects. The Scholarships are open to students who have completed two years of their curriculum in the Medical Faculty of the University.

RUSSELL MEMORIAL PRIZE.

This prize was founded by students of the Queen's College in memory of the late Dr. James Russell, formerly Honorary Physician to the General Hospital.

It is a prize of books awarded annually to the student who, not being of more than six years' standing as a student of the School of Medicine of the University, shall pass the best examination in the subject of Nervous Diseases. Entries for this Examination must be sent to the Dean, in writing, on or before June 1st.

THE WALTER MYERS TRAVELLING STUDENTSHIP.

In memory of his son, Dr. Walter Myers, who died of yellow fever when making an investigation of that disease for the Liverpool School of Tropical Medicine, his father, Mr. George Myers, of Birmingham, has founded and endowed a travelling studentship in the University of Birmingham. Holders of this studentship, which will be awarded early in October in each year, must be under the age of thirty years, and must possess the degrees in medicine and surgery of the University of Birmingham. They must also possess the degree of B.Sc., which must have been obtained either at the University of Birmingham or London, or at either of the Universities of Oxford or Cambridge, should such degree be obtainable at either of those Universities. They must study for a year at one of certain Universities in Germany, and any papers that they may publish must appear under the name of the Walter Myers Studentship. The studentship, which will be of the value of £150, will only be awarded should a candidate of sufficient promise present himself. The subjects in which the student may pursue investigations are pathology or clinical medicine, combined with pathological research. The studentship may be prolonged over a second year, but at a diminished stipend. The Deed of Foundation of the studentship is printed in the calendar, from which further particulars may be obtained.

Applications for this studentship must be sent in to the Dean of the Medical Faculty on or before September 1st.

GEORGE HENRY MARSHALL SCHOLARSHIP.

The George Henry Marshall Scholarship in Ophthalmology of the value of £10 is awarded or expended from time to time in the form of grants towards the expenses of research, the publication of original papers, the purchase of apparatus or books, or in such other way as the Medical Faculty may consider best, any instrument, book, or other object so purchased being the property of the University.

Any past or present Student of the Medical Faculty of the University or member of the staff of the Medical School or of any affiliated Hospital, may apply for assistance of the kind above mentioned, provided the object in view be connected with research in Ophthalmology.

Applications must be made to the Dean of the Medical Faculty, in writing, on or before the 1st of October.

WILLIAM RICHARDS MEMORIAL PRIZE.

This prize, value £3 3s., which belongs to and is adjudicated upon by the University Medical Society, is awarded to the student member of the Society who shall send in the best paper during the year, such paper to be read at a meeting of the Society.

ENTRANCE SCHOLARSHIP FOR DENTAL STUDENTS.

This Scholarship, of the value of £37 10s., is offered annually.

It is awarded to the student who, entering for the Dental Degree of the University in October, or having entered not earlier than the previous April, shall pass the best examination in the subjects studied during his apprenticeship.

Candidates must be under the age of twenty-one years.

Application for admission must be sent to the Dean on or before October 12th.

CLINICAL PRIZES.

The University Clinical Board offer annually the following Prizes:—

Senior Medical Prize	Gold Medal.
Senior Surgical Prize	Gold Medal.
Midwifery Prize	Gold Medal.
Junior Medical Prize	Silver Medal.
Junior Surgical Prize	Silver Medal.

The Examinations for the above Prizes will be held at the end of each Summer Session.

Regulations for these Prizes will be found on page 578.

THE LIBRARY.

Librarian: W. H. COPE.

The Library is open daily during the Session from 9 a.m. to 6 p.m., except on Saturdays, when it is closed at 1 p.m. It is closed at 5 p.m. during the vacation.

LOCKERS FOR BOOKS, &c.

Lockers are provided in the hat and coat room of the Medical Department, to enable students to preserve their books and papers in safety. Each student will be supplied with a key, upon which a deposit of two shillings and sixpence will be charged. The key must be delivered up on or before the last day of the Session for which payment has been made, or the deposit will be forfeited.

UNIVERSITY CLUB

(Great Charles Street).

The accommodation consists of a reading and debating room, which can also be used for meetings, dances, and other social purposes; writing room, and dining room where meals and refreshments at popular prices are procurable throughout the day. There is also a games room and a billiard room fitted with two tables. A bath room, dressing rooms, and cycle accommodation are also provided.

Women students are provided with club rooms, including dining and tea rooms.

At the new buildings at Edgbaston a common room and dining room have been provided, and a separate reading room for women. All students are members of the club both at Edmund Street and at Edgbaston, by virtue of their membership fees.

All members of the University Court of Governors and Council, all Professors, Lecturers and Demonstrators of the University, all present and past students of the University and Medical School, and all members of the Honorary and Resident Staffs of the Hospitals in connection with the University, are eligible as members. Entrance fee, half-a-guinea.

Annual subscription, £1 1s.

Full particulars as to membership, and copies of the rules, can be obtained from the Hon. Secretary.

Syllabuses of Courses.

ANATOMY.

Professor: PETER THOMPSON, M.D., Ch.B. (Vict.)

Demonstrators: { T. YEATES, M.B., C.M., B.Hy.
LEWIS GRAHAM, M.B., B.S.,
M.R.C.S.
VIOLET A. P. COGHILL, M.B., Ch.B.
(Edin.).

Hon. Demonstrators: { W. E. BENNETT, M.B., Ch.B.,
F.R.C.S.
J. JAMESON EVANS, M.D., C.M.
(Edin.), F.R.C.S.

Special Lecturer in Osteology:

THOMAS YEATES, M.B., C.M., B.Hy.

I.—Descriptive Anatomy.

The *First Year's Course* includes a general account of the main systems of the body and a more detailed description of the Skeleton. The lectures are delivered during the Winter Session on Tuesdays at 9.30 a.m., and on Fridays at 10.30 a.m.

The *Second Year's Course* is partly given during the Winter, partly during the Summer Session. In the *Winter*, lectures are delivered at 12 o'clock on Mondays, Tuesdays, Wednesdays, and Thursdays, and in the *Summer* on Mondays, Wednesdays, and Fridays at 10 o'clock.

All these courses are accompanied by Demonstrations and Classes specially arranged to follow up the instruction given in the Lecture Theatre.

The Course of Lectures on *Human Embryology* is given during the second Winter Session, on Tuesdays at 3 p.m.

II.—Practical Anatomy.

The Dissecting Room is open during term time from 9 a.m. to 5 p.m., except on Saturdays, when it is closed at 1 p.m. One or more of the Staff of the Department is always in charge of the room and ready to help students finding themselves in any difficulty with their parts.

There is a separate Dissecting Room for Women Students in charge of Dr. Coghill.

Special instruction in Anatomy is given to Students reading for the Primary Fellowship. Fee: Five guineas.

NOTE.—All students, whether referred at examinations or otherwise, requiring further instruction in Anatomy must dissect unless excused by the Professor.

The Museum, which is open to all students, contains a large collection of specimens and models.

III.—Medical and Surgical Anatomy.

A Course of Lectures and Demonstrations for students in their fifth year will be given on Applied Anatomy on Mondays, Wednesdays, and Fridays, from October to December inclusive, at 2 p.m.

IV.—Anatomy for Dental Students.

The Human Anatomy part of the Dental curriculum includes two Summers' and one Winter's dissections, commencing in the first Summer, and two Summer Courses of Lectures. The Lectures in the first Summer are delivered at 2 p.m. on Mondays, Tuesdays, and Thursdays, and those in the second Summer on Mondays, Tuesdays, and Thursdays at 12 o'clock noon.

SYNOPSIS.

The Bones.

The general anatomy of the osseous system, including the classification, the structure, development, and uses of bones. The axial and appendicular skeleton. A precise knowledge of the bones of the head and neck. Identification of all the bones (excluding carpus and tarsus).

Joints.

Classification of joints, and examples illustrating each type, Temporo-mandibular joint. Joints of the spine; clavicle. shoulder, elbow and wrist.

Muscle and Fasciæ.

The naked-eye anatomy and classification of muscles. Modes of attachment. The general anatomy of the muscles of mastication, deglutition, and respiration. The fasciæ of the upper limb and of the head and neck.

Circulatory System.

The general anatomy and development of the heart, its structure, relations, and the arrangements of its cavities and valves. Pericardium. The anatomy of the principal arteries and veins of the body. The position, course, relations, and distribution of the vessels of the head and neck.

The Lymphatics.

The general principles underlying the lymphatic circulation. The lymphatic glands and vessels of the head and neck. The thoracic duct.

Nervous System.

The main divisions of the brain. Naked-eye anatomy of the spinal cord. Course, relations, and distribution of the cranial nerves. Mode of formation and distribution of a typical spinal nerve. The cervical and brachial plexuses. The sympathetic nervous system.

Organs of Special Sense.

The Eye.—Structure of the eyeball, intrinsic and extrinsic muscles. The eye-lids, the lachrymal apparatus.

The Nose.—The nasal fossæ. The accessory cavities of the nose. The nasal mucous membrane, including vascular and nervous supply.

The Ear.—An elementary knowledge of the external, middle, and internal ear. The Eustachian tube.

The Face and Neck.

The triangles of the neck; their boundaries and contents. Lips, mouth, tongue, palate, tonsils, pharynx, œsophagus, and salivary glands. Larynx, trachea, the thyroid body. A brief sketch of the derivatives of the pharynx from the developmental point of view.

Thoracic and Abdominal Viscera.

Their structure, general arrangement, and relations.

PHYSIOLOGY.

Professor: E. W. WACE CARLIER, M.Sc. ; M.D. (Edin.),
F.R.S.E.

Lecturer: (Vacant.)

I.—Systematic Physiology.

A Course of Lectures in Physiology will be delivered at 10.30 a.m. each day, except Saturday, throughout the Winter Session. It will consist of 100 lectures.

The Course will comprise :—

- (1) General Chemistry of the Animal Body.
 - (2) Structure, Chemistry and Physiology of the Cell and of the Simple Tissues.
 - (3) Muscle and Nerve.
 - (4) General Nutrition, including circulation of the blood and lymph, respiration (voice and speech), alimentation, nutrition of the tissues, internal secretions, excretion and the minute structure of the organs concerned.
 - (5) Animal Heat, its production and regulation.
 - (6) Dietetics.
 - (7) Reproductive System.
 - (8) The Senses and Sense Organs.
 - (9) The Central Nervous System, its structure and functions.
-

II.—Physiology for Dental Students.

A Course of Lectures of a less advanced kind for Dental students will be delivered on Mondays, Wednesdays, and Fridays, at 12.30 o'clock throughout the Winter Session.

The Course will comprise:—

1.—*Elementary General Chemistry of Animal Body.*

Proteins, Fats, Carbohydrates, Salts.

2.—*Histology.*

Minute structure of the tissues and organs of the body, with special reference to structures found in the mouth and adjacent parts, including salivary glands.

3.—*Principles of General Nutrition.*

(a) Blood.—Composition and uses. Coagulation. Arterial and venous blood. Chemistry and combinations of hæmoglobin, blood gases.

(b) Heart and Blood Vessels.—General plan of systemic, pulmonary, portal, renal and cerebral circulations. Cardiac cycle. Control of heart and vessels by nervous system. Blood pressure. The pulse.

(c) Lymph.—Composition. Production. Function.

(d) Respiration.—Mechanism of respiration. Control by nervous system. Inner and outer respiration. Changes of blood and air. Interchange of gases. Dyspnœa and death by suffocation.

(e) Alimentation.—Muscular and nervous mechanisms of mastication, deglutition, peristalsis, defæcation, and vomiting. Chemistry of simple foods: bread, meat, milk, fat. Saliva and salivary digestion. Gastric juice and gastric digestion. Pancreatic and intestinal juices and intestinal digestion. Absorption from the alimentary canal and destination of absorbed materials.

(f) Functions of Liver.—Glycogen. Bile.

(g) Metabolism in general. Internal secretions.

(h) Excretion by Kidney, Skin, Liver, Lungs. Urine.—Its composition and variation. Sources and meaning of its components.

4.—*Animal Heat.*

Maintenance and regulation of body heat. The normal temperature.

5.—*Muscle and Nerve.*

Mode of action of contractile tissues and relation to nerves. Voluntary and involuntary muscular contraction. Tetanus. Rigor mortis. Nerve impulse. Measurement of its velocity.

6.—*Elementary Physiology of Central Nervous System and of the Sense Organs.*

Eye.—Component parts of eyeball. The eye as an optical instrument. Accommodation. Formation of image on retina. Vision.

Ear.—General structure. Mode of conduction of sound vibrations. Audition.

Taste and Smell.

Common Sensation.—Touch, pain, heat and cold, pressure and muscular sense.

Brain, etc.—General plan of cerebro spinal and sympathetic systems. Arrangement of fibres and cells in central nervous system. Nerve centres and their uses. Action of various kinds of nerves. Reflex action.

7.—*Effects of Anæsthetics upon*

Sensation, reflex action, heart, circulation, respiration, and excretion.

III.—Elementary Physiology.

A Course of Lectures on Elementary Physiology can be given during the Winter Session to meet the requirements of School Teachers and others, if desired.

IV.—Practical Physiology.

The Course will extend over one Summer and one Winter Session.

A. HISTOLOGY.—This Class will meet in the Physiological Laboratory every day, except Saturday, throughout the Summer Session from 11 to 1. Each student will have the use of a microtome and will be supplied with all reagents, but he will be expected to furnish himself with a microscope (see page 517), slides, cover-glasses, a razor and other sundries.

Each student will prepare and study microscopical specimens of most of the tissues and organs of the body, and will receive practical instruction in the use of the microscope and in elementary technique.

B. EXPERIMENTAL PHYSIOLOGY.—The Class will meet in the Physiological Laboratory on Thursday of each week from 2 to 4 during the first half of the Winter Session.

Each student will perform the simpler experiments, illustrating the physiology of muscle, nerve, heart and reflex-action, and will receive practical instruction in the use of the sphymograph, cardiograph, stethograph, laryngoscope, and ophthalmoscope.

The student must supply himself with a dissecting case. This course will be repeated on Fridays if necessary.

C. PHYSIOLOGICAL CHEMISTRY.—This Class will meet in the Physiological Laboratory on Thursday of each week during the second half of the Winter Session from 2 to 4.

Each student will perform the qualitative and quantitative analyses of the urine in its normal and abnormal conditions with special reference to clinical work, with additional practical exercises on the chemistry of the proteins, carbohydrates, food stuffs and their digestion, blood and bile. This course will be repeated on Fridays if necessary.

V.—Advanced Practical Physiology.

SEE FACULTY OF SCIENCE.

The Physiological Laboratory is open daily, except Saturday, during both Summer and Winter Sessions from 10 a.m. to 5 p.m. for the prosecution of original research. Application to be made to the Professor.

VI.—Dental Histology.

A Combined Lecture and Practical Course on Dental Histology is held during the Summer Session. (For Syllabus see page 619.)

CHEMISTRY.

Mason Professor: PERCY F. FRANKLAND, M.Sc. ; Ph.D. (Würzburg), B.Sc. (Lond.), LL.D. (St. And.), Sc.D (Dub.), F.R.S.

Assistant Lecturers: { HAMILTON MCCOMBIE, M.A. (Aber.), B.Sc. (Lond.), Ph.D. (Strasb.), A.R.C.S., A.I.C.
C. K. TINKLER, D.Sc., B.Sc. (Wales).
J. E. COATES, M.Sc. (Wales).

Assistant Lecturers and Demonstrators: { EDWARD P. FRANKLAND, M.Sc., B.A. (Cantab.), Ph.D. (Würz.).
ERNEST VANSTONE, M.Sc. (Wales).
(Vacant).

Special Lecturer on Physical Chemistry: J. E. COATES, M.Sc.

Lecture Course on General Inorganic Chemistry.

The Lectures are delivered at 9.30 a.m. on Mondays, Wednesdays, and Thursdays during the Winter Session.

Some of the above meetings of the class will be devoted to tutorial work. Attendance at the tutorial meetings of the class is compulsory, as is performance of the exercises set by the Professor.

In connection with this course a class dealing specially with the metallic elements will be held on Wednesdays at 11.30 a.m., and a tutorial class at 11.30 a.m. on Thursdays during both Sessions. Attendance at these classes is compulsory, unless the student has been exempted by the Professor. No fee.

Lecture Course on Organic Chemistry.

The Lectures are delivered at 9.30 a.m. on Mondays, Wednesdays, and Thursdays, during the Summer Session.

Candidates for the First Medical Examination may be required to show knowledge of any of the subjects set forth in the following Syllabus :—

I. GENERAL.

Nature of chemical change. Elements and compounds. Chemical affinity and the modes of chemical action. Regularities exhibited in the formation of compounds. Indestructibility of matter. Laws of constant, multiple, and equivalent proportions. Atomic theory. States of matter. Properties of Gases. Kinetic theory. Molecular theory. Avogadro's hypothesis. Atomic and molecular weights. Vapour density, isomorphism, atomic and molecular heats.

Chemical nomenclature, formulæ, equations. Valency. Solution. Osmotic pressure. Electrolysis. Ionic theory. Acids, bases, and salts.

Thermo-chemistry. Energy, its transformation and conservation. Liquefaction of Gases.

II. SPECIAL.

Hydrogen. Oxygen. Ozone. Allotropy. Water; physical properties, natural waters. Hydrogen peroxide. Nitrogen; circulation of, in nature. The Atmosphere. Compounds of nitrogen with hydrogen; oxides of nitrogen; oxyacids of nitrogen; halogen compounds of nitrogen.

Carbon, its circulation in nature. Coal. Oxides of carbon. Hydro-carbons; methane, ethylene, acetylene. Combustion, flame, and luminosity.

Coal-gas, producer-gas, water-gas, oil-gas. Artificial illumination.

Chlorine and the halogens. Their compounds with hydrogen, their oxides, and oxyacids.

Sulphur; compounds with oxygen, hydrogen, and carbon; oxyacids of sulphur.

Phosphorus; compounds with hydrogen, and oxygen; oxyacids of phosphorus. Arsenic, antimony, and bismuth; comparison of their properties and compounds with those of phosphorus and nitrogen.

Boron and silicon, and their more important compounds.

Classification of the Elements. Periodic law.

METALS.

Occurrence, modes of isolation, and general properties of the following metals, and their more important compounds:—Sodium, potassium, barium, strontium, calcium, magnesium, iron, chromium, aluminium, zinc, manganese, nickel, cobalt, mercury, copper, bismuth, cadmium, lead, tin, silver, and gold.

TEXT BOOKS.—Kipping and Perkin's Inorganic Chemistry, Alexander Smith's Inorganic Chemistry, Holleman's Inorganic Chemistry.

III. ORGANIC CHEMISTRY.

Analysis of Organic compounds. Formulæ. Isomerism. Structure.

Hydro-carbons. Paraffins, Ethylene, Acetylene. Halogen derivatives. Chloroform. Iodoform.

Alcohols. Fermentation. Ether. Aldehydes. Chloral. Fatty Acids. Fats, Soap, and Saponification. Glycerine. Glycol. Oxalic acid. Succinic acid. Tartaric acid. Lactic acid. Citric acid.

Carbohydrates.

Cyanogen-compounds and Amines.

Urea, Glycocoll, Uric acid.

Aromatic compounds. Benzene, Phenol, Aniline, Benzoic acid, Salicylic acid.

TEXT BOOK.—Remsen's Organic Chemistry.

Practical Chemistry.

The Class meets at 2 p.m. on Mondays and Wednesdays during the Winter Session, and on Mondays, Tuesdays, Thursdays, and Saturdays during the Summer Session.

The practical work in the laboratory is intended to supplement the instruction given in the lectures, and to make the student personally familiar with the preparation of pure substances, and with the elements of qualitative and quantitative analysis.

General Chemistry for Dental Students.

Lectures: Tuesdays and Thursdays, at 11.30 a.m., throughout the Winter Session.

Laboratory: Mondays, Tuesdays, and Thursdays, at 2 p.m. during the Winter Session.

Synopsis of the Course.

INORGANIC CHEMISTRY.

General Elementary Principles of Chemistry :—

Simple substances. Mixtures. Chemical compounds. Laws of chemical combination. Atomic theory. Meaning and use of chemical symbols. Equations and simple calculations.

General characters of the chief types of inorganic matter, as illustrated by the following :—

Hydrogen and oxygen. Combustion. Oxidation and Reduction. Oxides. Acids. Bases. Salts. Ozone. Composition and properties of water. Nature of solutions. Osmotic pressure. Electrolysis. Rain, river, and spring water. Properties of hard and soft waters. Hydrogen peroxide.

Nitrogen.—The atmosphere. Methods of determining its composition. Ammonia and ammonium salts. Oxides of nitrogen. Nitric acid. General characters of nitrates and nitrites.

Carbon.—Allotropic forms. Carbon dioxide. Carbonates. Carbon monoxide. Carbon disulphide.

Halogens.—Chlorine. Hydrochloric acid. Hypochlorous acid. Sodium hypochlorite. Bleaching powder. Potassium chlorate. Bromine. Iodine. Hydrobromic and hydriodic acids.

Sulphur.—Allotropic forms. Hydrogen sulphide. Sulphur dioxide and trioxide. Sulphurous and sulphuric acids. General characters of sulphates and sulphites. Sodium thiosulphate.

Phosphorus.—Allotropic forms. Phosphorus pentoxide. Orthophosphoric acid.

Borax and boric acid. Silica and silicic acid.

The metals with their compounds, as enumerated below, excluding metallurgical processes :—

Aluminium, antimony, arsenic, barium, bismuth, calcium, copper, iron, lead, magnesium, manganese, mercury, potassium, silver, sodium, tin, zinc.

The more important oxides, sulphides, and salts of these metals with the acids already mentioned.

Potassium permanganate and potassium chromates.

ORGANIC CHEMISTRY.

Ultimate organic analysis as regards carbon, hydrogen, and nitrogen. Determination of empirical formulæ and molecular weight. Homologous series. Isomerism.

The general character of the chief types of organic compounds, as illustrated by the following members of the various classes :—

Methane. Ethane. Ethylene. Acetylene.—Chloroform. Iodoform.—Methyl and ethyl alcohols. Ethyl ether.—Formic and acetic aldehydes.—Chloral.—Formic and acetic acids and their salts.—Ethyl acetate.—Acetamide. Cyanogen. Hydrocyanic acid. Cyanides.—Urea and its synthesis.—Lactic, oxalic, and tartaric acids. Oxalates and tartrates.—Glycerol.—Fats and Saponification.

Benzene.—Phenol.—Benzoic aldehyde.—Benzoic and salicylic acids.

PRACTICAL CHEMISTRY.

(a) QUALITATIVE ANALYSIS: INORGANIC AND ORGANIC.

The analysis of simple salts and of mixtures of two metals and one acid selected from substances included in the following lists:—

Metals.—Sodium, potassium, ammonium, calcium, barium, magnesium, zinc, iron, aluminium, copper, silver, lead, mercury, bismuth, tin, antimony, arsenic.

Acids.—Hydrochloric, hydrobromic, hydriodic, nitric, carbonic, sulphuric, phosphoric, acetic, oxalic, tartaric, and hydrocyanic acids.

(b) SIMPLE VOLUMETRIC ANALYSIS.

The estimation of the strength of solutions of potassium or sodium hydrates by standard sulphuric acid, and of dilute hydrochloric or nitric acids by standard sodium hydrate.

The estimation of solutions of oxalic acid by standard potassium permanganate.

(c) PREPARATIONS.

The preparation of the following compounds in a well-crystallized condition:—

Ammonium chloride. Lead iodide. Ammonium oxalate. Nitrates of potassium, barium, and lead. Copper sulphate. Ferrous sulphate. Lead acetate. Acid tartrate of potassium. Tartar emetic.

Sanitary Chemistry.

Laboratory Course, including Oral Instruction.

B.Sc. or Diploma in Public Health.—The Course extends over six months (not less than six hours weekly), and is given at the University, Edgbaston, at hours fixed by arrangement with the class.

Synopsis of the Course.

Practical Instruction:

The use of the balance.

The methods of volumetric analysis, including the preparation of standard solutions, alkalimetry and acidimetry. Kjeldhal's method for the determination of nitrogen.

The analysis of water, including the estimation of total solids (lime, magnesia, sulphates, chlorides, nitrates and nitrites, ammonia and poisonous metals); determination of temporary and permanent hardness, including the preparation of standard soap solution; organic impurities, acidity and alkalinity.

The detection of polluting gases.

Estimation of the amount of carbon dioxide in air.

Simple methods of eudiometry.

Analysis of milk, butter, beer.

Acidity of vinegar.

Determination of Urea.

Estimation of cane and grape sugars.

Microscopic examination of starches, muscular fibre, and the fibres of wool, cotton, and silk.

Oral Instruction:

Use of atomic and molecular weights.

Types of chemical change.

Physical and chemical properties as illustrated by hydrogen, oxygen, nitrogen, water, ammonia, nitric oxide, carbonic anhydride, nitric acid, sulphuric acid.

Acids and bases. The use of indicators.

Volumetric analysis. Gasometric analysis.

Chemical changes induced by micro-organisms and enzymes.

Fermentation, putrefaction, and nitrification.

Carbon compounds:—

Significance and use of constitutional formulæ.

Outlines of the nature and relations of the principal types of organic compounds:—

Hydrocarbons, alcohols, aldehydes, ketones, acids, esters, ethers, amines, amides.

Fats and carbohydrates.

Phenols and aromatic acids.

FEE :—£8 8s.

PHYSICS.

Mason Professor: J. H. POYNTING, M.Sc.; Sc.D. Cantab., D.Sc. (Vict.), F.R.S., late Fellow of Trinity College, Cambridge.

Lecturer: G. A. SHAKESPEAR, D.Sc.; M.A. (Cantab.), B.A., B.Sc. (Lond.).

Assistant Lecturers: { G. BARLOW, D.Sc. (Birm., Lond. and Wales).
H. B. KEENE, B.Sc. (Birm.).
E. E. FOURNIER D'ALBE, M.Sc. (Lond.), A.R.C.S.

Special Lecturer on Experimental Physics:

G. A. SHAKESPEAR, D.Sc., M.A.

During the Winter and Summer Sessions the Lectures will be on Mondays, Wednesdays, and Thursdays, at 10.30.

The Practical Class will be held in the Laboratory on Mondays from 11.30 to 1.30 in both Sessions.

Syllabus of Course.

Properties of Solids—

Sticking and sliding friction. Strains and stresses. Bulk strain and shear strain. Various kinds of permanent change of shape and rupture. Crystalline and amorphous solids.

Properties of Liquids—

Viscosity. Compressibility. Surface tension.

Properties of Gases—

Compressibility. Viscosity. Kinetic theory of matter. Diffusion, solution, osmotic pressure.

Heat—

Temperature. Mercury in glass thermometer. Determinations of high and low temperature. Expansion of solids and liquids. Circulation and convection in liquids. Expansion of gases at constant pressure and increase of

pressure at constant volume. Gas thermometers. Circulation and convection in gases. Movements of the atmosphere.

Quantity of heat. Specific heat and simple modes of measuring it.

Conduction of heat. Conductivity.

Heat a form of energy. The forms of energy and their transformations according to fixed rates of exchange. The conservation of energy. Joule's method of determining the mechanical equivalent of heat. The nature of heat on the kinetic theory of matter. Limitation in the amount of heat which can be transformed to work.

Change of state. Latent heat. Liquid vapour change. Evaporation. Boiling vapour pressure. Dependence of boiling point on pressure and explanation. Modes of measuring vapour pressure. Explanation of vapour pressure on the kinetic theory. Water vapour in the atmosphere. Hygrometers. Cloud. Fog. Dew. Solid-liquid change. Melting points. Change of volume on melting. Effect of pressure on melting point. Regelation.

Radiation. High and low radiating and absorbing powers. Comparison of properties of radiation from hot bodies and properties of light. Identification. The spectrum. Substances absorb the radiations which they can emit. Dark lines in solar and stellar spectra.

Light—

Light a form of energy. Rectilinear propagation. Shadows. Eclipses. Inverse square law. Simple photometers. Reflection, refraction, and dispersion. Velocity of light.

Light a form of wave motion. Illustrations of interference. The diffraction grating. Polarisation of light.

Mirrors. Prisms. Lenses. The eye. Simple forms of telescope and microscope.

Sound—

Sound arises from vibrating sources which send out longitudinal waves in air. Characteristics of the waves corresponding to loudness, pitch, and quality. Velocity of sound in air, and other media. Determinations of frequency. Resonance; its use to analyse sounds. Harmonics and upper partials. Quality.†

Transverse vibrations of strings. Vibrations of air in pipes.
Other vibrating sources.

Beats. Concord and discord. Combination tones

Magnetism—

Properties of magnets. The two poles ; their equality and inseparability. Magnetisation by induction. Methods of making magnets. Inverse square law. Magnetic fields and lines of force. The earth as a magnet. Declination, dip, and intensity.

Electricity—

The two kinds of electrification and simple modes of producing them. Conductors and insulators. The gold leaf electroscope. Electrification by induction. Frictional electrical machines. The electrophorus. The Wimshurst machine. The Leyden jar. Production and disappearance of the two electrifications always in equal quantities. The electric field, considered as the seat of electric strain, electric force, and electric energy. The inverse square law. Potential and capacity. Distribution on conductors.

Electro-magnetism—

Electric discharge and the magnetic effects accompanying it. Electro-magnetic waves. Electric current. Voltaic and storage cells. The magnetic properties of current circuits. The ampere. Galvanometers and ammeters. Electric motors. Ohm's Law. Resistance. The heat developed in the circuit. Joule's Law. The ohm. The volt. Electrolysis. Electro-chemical equivalents. The induction of currents. Lenz's Law and Faraday's Law. The dynamo. The induction coil.

Elementary Course on Experimental Physics.

This Course is held during the Winter Session.

Lectures: Tuesdays and Thursdays, at 10.30 a.m.

Laboratory: Fridays, 10 a.m. and 2.30 p.m.

Syllabus of the Course.

General Physics—

Units of length, mass, and time. Definitions of velocity momentum, acceleration, force, and work. The laws of motion. Gravitation. Distinctions between solids, liquids, and gases. Simple Hydrostatics. Laws of pressure of moving fluids in closed tubes. Specific gravities. Atmospheric pressure. Barometers. Air and water pumps. Siphon. Boyle's Law. Diffusion. Osmotic pressure. Dialysis. Capillary phenomena. Friction.

Heat—

Temperature and its measurement. Expansion of solids, liquids, and gases. Calorimetry. Specific heat. Heat of combustion. Change of state. Latent heat. Vapour-pressure, vapour-density, hygrometry. Conduction, convection, radiation. Relation between heat and work.

Light—

Laws of reflection and refraction. Mirrors and lenses. Images. Prismatic dispersion. The spectrum. Spectroscope. Microscope and telescope. Polarisation. Saccharimeter.

Sound—

Production and propagation of sound. Wave-length, velocity, pitch, loudness.

Electricity—

Electrification by friction and induction. Electrophorus. Condensers. Magnetism. Magnetic and heating effects of currents. Galvanometers. Electrolysis. Primary batteries. Accumulators. Measurement of electro motive force, current, and resistance. Ohm's Law. Induced current. Induction coil. Vacuum tubes. Röntgen Rays.

ELEMENTARY BIOLOGY.

Professor: F. W. GAMBLE, M.Sc.; D.Sc., F.Z.S., F.R.S.

Lecturer: C L. BOULENGER, D.Sc.; M.A (Cantab.), F.Z.S.

A Course of about Fifty Lectures will be given during the Winter and Summer Sessions of the first year.

Lecture Days.—Tuesdays and Fridays at 12.30 during the Winter Session, and Tuesdays and Fridays at 9.30 in the Summer Session.

Laboratory Days.—Tuesdays from 10.30 to 12.30 in the Winter Session, and Tuesdays and Fridays from 10.30 to 1.0 in the Summer Session.

SYLLABUS.

- A The anatomy and histology of the various systems of organs in the Frog, and the elementary physiology of the organs of digestion, circulation, and excretion. Structure of the various elementary tissues of the Frog. Epithelia, connective, muscular, and nervous tissues. The combination of tissues to form organs. Living and non-living matter. Distinctive properties of living matter or protoplasm.
- B. This part of the course will treat of the structure of the following typical animals viewed from a comparative standpoint —
Amœba, *Paramecium*, *Vorticella*, the freshwater (*Hydra*), Polype *Obelia*, the Earthworm (*Lumbricus*), the Crayfish (*Astacus*), the Dog-fish (*Scyllium*), and the general structure of the Rabbit (*Lepus*).
- C. The concluding lectures of the course will deal with the phenomena of reproduction. Asexual and Sexual Reproduction. Ova and Spermatozoa. Spermatogenesis. Fertilization and Segmentation of the ovum in *Amphioxus* and *Rana*. The development and larval history of the Frog. The development of the Chick.

MEDICINE.

Professor: R. SAUNDBY, M.Sc.; M.D. (Edin.),
F.R.C.P., LL.D.

Professor: A. H. CARTER, M.Sc.; M.D. (Lond.),
F.R.C.P.

Assistant: L. G. J. MACKEY, M.D. (Birm.), M.R.C.P.
(Lond.).

Lecture Days.—Tuesdays, Wednesdays, and Fridays,
at 3 p.m.

This Course extends over two Winter Sessions, and includes—

1. An explanation of the nomenclature and classification of disease. The principles of etiology, symptomatology, diagnosis, prognosis, and treatment of disease in general.
2. A description of special diseases, together with their causation, prevention, diagnosis, prognosis and treatment.
 - Specific Infectious Diseases.
 - Diseases of the Nervous System, Functional and Organic ;
of the Brain, Spinal Cord, and Peripheral Nerves.
 - Diseases of the Muscles.
 - Diseases of the Heart and of the Blood Vessels.
 - Diseases of the Respiratory System, Functional and
Organic ; of the Larynx, Trachea, Lungs, and Pleural
Sacs.
 - Diseases of the Digestive System.
 - Diseases of the Kidneys.
 - Constitutional Diseases.
 - The Intoxications, Sunstroke, Diseases of the Blood and
Ductless Glands.
 - Diseases due to Animal Parasites.
 - Diseases of the Skin.

The Course will be illustrated by specimens from the Pathological Museum, and by drawings, diagrams, and charts.

Written Class Examinations are held during each term, and all students are advised to attend them. Regular tutorial instruction is given by Dr. Mackey.

The Tutorial Classes (see Time Table) are compulsory for students in their Fourth Year, and optional for students in their Fifth and later years.

SURGERY.

Professor: GILBERT BARLING, M.Sc.; M.B., B.S.
(Lond.), F.R.C.S.

Professor: JORDAN LLOYD, M.Sc., M.D., Ch.B.; M.B.,
M.S. (Durham), F.R.C.S.

Assistant: LEONARD P. GAMGEE, F.R.C.S.

Lecture Days.—Tuesdays, Wednesdays, and Fridays,
at 4 p.m.

This Course, extending over two Winter Sessions, is devoted to a systematic consideration of the Principles and Practice of Surgery. It includes a complete description of—

1. General Principles, as illustrated by Repair and its aberrations.

Inflammation and its results.

The various forms of blood poisoning.

Tuberculosis. Syphilis.

Tumour formations, etc.

2. The Surgery of Special Regions as far as possible.

The Assistant to the Chair of Surgery gives tutorial instruction to Senior Students, and holds preparatory classes for the final Examination. Class Examinations are held during each term, and all Students are advised to attend them.

The Course will be illustrated by Specimens from the Pathological Museum, and by drawings, diagrams, and charts.

PATHOLOGY AND BACTERIOLOGY.

Professor: R. F. C. LEITH, M.Sc.; M.A., B.Sc., M.B.,
(Edin.), F.R.C.P.E.

Assistants: { C. J. LEWIS, M.D., D.Sc. (Edin.),
F.R.C.P.E.
J. SHOLTO DOUGLAS, M.A., M.D.
(Oxon.).
LAURENCE BALL, M.B., B.S., M.R.C.P.

Special Lecturer in Bacteriology } C. J. LEWIS, M.D.
of Public Health:

Lecturer in Pathology } J. SHOLTO DOUGLAS, M.D.
and Bacteriology:

Assistant Lecturer in Patho- } LAURENCE BALL,
logy and Bacteriology: } M.B., B.S.

Assistant Curators } J. T. HEWETSON, Ch.M., M.D.
of the Pathological } (Edin.), F.R.C.S.
Museum: } A. S. BARNES, M.D., D.Sc.,
 } M.R.C.P.
 } A. W. NUTHALL, Ch.M., F.R.C.S.
 } L. S. SEDGWICK, M.R.C.V.S.

A.—Ordinary Course for Medical Students.

This Course consists of two parts, viz. (1) a Systematic Course of Lectures on General Pathology and Bacteriology given in the winter term, and on Special Pathology given in the spring term, and (2) a Practical Course upon the same subjects, given partly concurrent with (1) and partly in the following summer term.

The Systematic Course.

The Lectures commence on October 1st, and are given daily, at 2 o'clock. They are fully illustrated by Macroscopic, Microscopic, and Lantern Preparations, and a Special Series of Demonstrations on Macroscopic Morbid Anatomy is also given weekly. The Lectures include:—

1. GENERAL PATHOLOGY AND BACTERIOLOGY:—

- (1) Altered conditions of the circulation.
- (2) Inflammation.
- (3) Retrogressive Disturbances of Nutrition.
- (4) Tumours.
- (5) Animal Parasites.
- (6) Pathogenic Bacteriology.

2. SPECIAL PATHOLOGY:—

The systematic study of the Etiology, Morbid Anatomy, and Histology of the diseases of the systems and organs of the body.

(a) —The Winter Practical Course.

This Course is intended to fit in with and illustrate as far as possible the subjects treated of in the Systematic Lectures. It will meet on Mondays and Thursdays, at 3, immediately after the lectures throughout both the Winter and Spring Terms, each meeting lasting two hours. Special attention will be given to Inflammation, Healing Processes, Tumours, Animal Parasites and Bacteriology.

(b) —The Summer Practical Course.

The Summer part of this Class commences on Friday, April 18th, at 2 o'clock, and meets on Monday and Friday of each week, each meeting occupying two hours. The Histological and other Methods of practical pathological investigation are studied, and the various diseased organs and tissues are examined in detail, both macroscopically and microscopically by each student.

Each student is supplied with all the necessary reagents and apparatus, but students must provide themselves with a microscope. (See Regulations, page 517.)

B.—Course of Advanced Bacteriology.

This Class begins on Tuesday, October 8th, at 3.30 o'clock, and meets on Tuesday, Wednesday and Friday of each week until the end of March, each meeting occupying two hours. In addition there are special meetings in sections according to arrangement. This Course qualifies for the various Diplomas and Degrees in Public Health of this University and other Bodies. It consists of lectures, demonstrations, laboratory instruction, and practical work in Bacteriology, especially in relation to disease, public health, its application to various industries, the disposal of sewage, etc.

It includes :—

- I. GENERAL.—Methods of Sterilisation. Preparation of Culture Media. Isolation and Cultivation of Germs. Methods of Examination, staining, etc., of Bacteria. The separation of their products, etc.

- II. SPECIAL.—The systematic study of the various pathogenic and the more important non-pathogenic bacteria in regard to cultural and morphological characters, methods of producing disease, antitoxin treatment and immunity. The examination of water, milk, foods, etc. Antiseptics and sterilisation in detail, etc., etc.

FEE :—Five Guineas.

INCIDENTAL FEE :—Three Guineas.

Members of this Course must provide their own microscopes (see page 517).

C—Course of Clinical Pathology and Bacteriology.

A Course suited to qualified medical men is given in the Summer Session, commencing on Thursday, April 17th. It meets twice or thrice weekly for about two months; hours of meeting, 3.30 to 5.30, or by arrangement. It is devoted to the pathological and bacteriological methods of practical importance in the diagnosis of disease in hospital or private practice. It includes demonstrations and practical work in—

Histological methods for the examination of tumours, pieces of tissue and uterine scrapings.

The examination of the urine, chemically and microscopically.

The examination of the gastric contents, for free HCl, for disintegrated blood, etc.

The examination of the sputum.

The examination of fluids obtained by puncture of serous and other effusions, by lumbar puncture, by puncture of echinococcal and other cysts.

The examination of the blood.

A short consideration of those bacteria commonly met with in pathological processes in man, *e.g.*, the Staphylococci and streptococci, the gonococcus, the pneumococcus, the typhoid bacillus and colon bacillus, the diphtheria bacillus and the tubercle bacillus.

Systematic explanations of these subjects, illustrated by lantern demonstrations, will also be given, in addition to the practical work of the Course.

FEE :—£3 3s.

INCIDENTAL FEE :—15s.

Members of this Course must provide their own microscopes (see page 517).

D.—Course of Veterinary Pathology and Bacteriology.

A Course suited to qualified veterinary practitioners will be given, if desired, in the Winter Session, commencing on Tuesday, October 8th. It will meet twice weekly till Christmas, from 4 to 6 p.m., or by arrangement. It will be devoted to a study of general and veterinary bacteriology and typical diseases. It will take up the same subjects as Course B, but have special reference to Veterinary Science.

FEE:—Four Guineas.

INCIDENTAL FEE:—One Guinea.

Members of this Course must provide their own microscopes (see page 517).

E.—Pathology and Bacteriology for Dental Students.

This Course begins on October 1st, and is continued daily at 2 o'clock for about three months. It consists of Lectures and lantern demonstrations upon the Principles of General Pathology and upon the structure, classification, and function of micro-organisms, especially those relating to the mouth, gums, teeth, and throat.

Practical Dental Bacteriology.—This Course is held in February on Mondays, from 3 to 5 p.m., and on Thursdays from 3 to 4 p.m. It includes practical work in the general principles of Bacteriology, in a few of the chief pathogenic bacteria of the body and, in detail, the bacteria of the mouth and teeth.

The Pathological and Bacteriological Laboratory is open daily from 9 a.m. till 6 p.m. for the prosecution of private research, under the direction of Professor Leith and his assistants, to whom applications should be made.

The Pathological Museum is open daily, from 9 a.m. till 6 p.m., under the direction of Professor Leith. Several type-written catalogues, containing descriptions and particulars of the specimens, are available for consultation.

HYGIENE AND PUBLIC HEALTH.

Professor: A. BOSTOCK HILL, M.Sc.; M.D., D.P.H.
(Camb.), F.I.C.

Assistant Lecturer in Hygiene: WILLIAM SISAM, M.D.,
B.Sc., (Public Health), D.P.H. (Camb.)

Lecture Day.—Mondays, at 3 p.m., during the Winter Session.

This Course will include instruction in Hygiene as required for the ordinary Pass Examination, and will also be specially adapted to the requirements of candidates for degrees and diplomas in Public Health and State Medicine. The Lectures will be illustrated by experiments, diagrams, and a complete set of models. In connection with the Department there is a collection of Sanitary Appliances open to all students attending this class.

The subjects treated will be as follows:—

Introductory, aim and scope of Hygiene, results already obtained.

Water supply—varieties of—quantity and quality of water. Diseases produced by bad water. Water Analysis.

Air and Ventilation, Impurities of Air, Standard of Purity, Heating and Lighting, Natural and Mechanical Ventilation, Appliances.

Food and Diet, Unwholesome Food, Adulteration of Food, Characteristics of good Meat, Fish, etc. Diseases of Animals in relation to the Health of Man.

The Soil in relation to Health.

The Dwelling and Sanitary appliances in connection therewith.

Drainage and Construction, Scavenging, Disposal of Sewage and Refuse.

Climate and Meteorology.

Infectious Diseases and Methods of Disinfection, Nature of Contagia, Immunity, Isolation, Quarantine, Vaccination. Statistics in relation to Health.

Offensive Trades.

In the latter half of the Winter Session, commencing in January, a Special Course for candidates for degrees and diplomas in Public Health is given on Sanitary Engineering, Law, and Statistics, on Mondays, at 3 p.m.

THERAPEUTICS.

Professor: SIR ROBERT M. SIMON, Kt., M.D.; B.A.,
M.D. (Cantab.), F.R.C.P.

Lecturer in Pharmacology and Assistant to the Chair:
W. A. POTTS, M.D.; M.A. (Cantab.), M.D., C.M.
(Edin.).

Lecture Days.—Tuesdays and Fridays, at 2 p.m.,
during the Winter Session.

SYLLABUS.

A. General Therapeutics.

Rest, Exercise (Massage, etc.), Habits, Nursing, Heat, Cold,
Personal Hygiene.

Diet

The Use of Drugs in disease.

Natural Mineral Waters, their efficacy and its rationale.

Short descriptions of illustrative Bathing and Drinking
Spas. Inhalation and Douching.

Climatology, Temperature, Humidity, Winds as they
affect Climate. Continental, Marine, and Mountain
Climates. Classification of the Chief Climatic resorts,
with illustrative descriptions of a few types.

B. Pharmacology.

An experimental course of twenty lectures.

Books.

Pharmacology. Dixon.

Diet. Hutchinson; Walker Hall, (Purin Bodies); Luff,
(Gout).

Mineral Waters and Spas. Hermann Weber.

Climatology. Huggard.

MATERIA MEDICA AND PHARMACY.

Lecturer: J. COOLE KNEALE, M.B., Ch.B.; L.R.C.P.
and S. (Edin.).

Demonstrator: F. R. GREENWOOD, M.B., Ch.B.; M.D.,
B.S. (Lond.), M.R.C.S.

Lecture Days.—Tuesdays at 3 p.m. during the
Winter Session (January to March), and Thursdays at
2 p.m. during the Summer Session.

Materia Medica comprises the subjects of Pharmacognosy and Pharmacy.

Instruction in Materia Medica is given in—

- (a) A Course of Lectures.
- (b) Practical Pharmacy Classes.
- (c) Tutorial Classes.

A.—Lectures on Materia Medica.

This Course includes the natural history, sensible and chemical properties and modes of administering remedies, ordinarily so-called. Such remedies consist of—

- Inorganic Substances.
- Chemical Products.
- Vegetable Substances.
- Animal Substances.

B.—Practical Classes.

Practical instruction is given in the following subjects, which cannot be satisfactorily taught in lectures, Wednesdays at 3 p.m. during the Winter Session (January to March), and Thursdays at 3 p.m. during the Summer Session.

- Pharmacy, or the processes for obtaining the Pharmaceutical preparations of drugs.
- Prescription Writing.
- Dispensing, or the making up of medicines in forms suitable for administration in disease.

Tutorial Classes.

These will consist of a recapitulation of the Lectures and Practical Classes.

Students have access to the Materia Medica Museum, where facilities are afforded for the practical examination of specimens.

The Museum contains (1) a collection of the official and officinal drugs, organic and inorganic; (2) a collection of drugs from all sources for lecture purposes; (3) a collection of the whole of the galenical preparations of the British Pharmacopœia; (4) a complete set of apparatus used in Pharmaceutical work.

MIDWIFERY AND DISEASES OF WOMEN.

Professor: EDWARD MALINS, M.Sc. ; M.D. (Edin.),
F.R.C.P.

Lecturer: THOMAS WILSON, M.D. (Lond.), Ch.M.,
F.R.C.S.

Assistant: C. E. PURSLOW, M.D. (Lond.), M.R.C.P.

Midwifery.

Lecture Days.—Mondays and Thursdays, at 4 p.m., during the Winter Session.

The Course comprises—The Physiological Anatomy of the pelvis and organs of generation in the female. The Physiology and development of the ovum and fœtus. The Physiology of pregnancy—the change effected by it; the diagnosis and the management of pregnancy. The Physiology and mechanism of labour. The conduct of normal labour. The Physiology and management of Child-bed. The newly-born Child—Feeding, etc. Obstetric Surgery. The Pathology of pregnancy. The Pathology of labour. The Diseases of Child-bed.

Diseases of Women.

Lecture Days.—Tuesdays and Fridays, at 4 o'clock, during the first half of the Winter Session, October to December.

SYLLABUS.

Physiology and pathology of the female organs of generation; symptoms of disease; methods of examination; principles of treatment.

Malformations of the external and internal organs.

Diseases and injuries of the vulva and vagina.

Inflammations, displacements and tumours of the uterus.

Cysts and tumours of the ovary, parovarium and broad ligament.

Inflammations of the genital tract, especially as it affects the

Fallopian tubes, ovaries, pelvic peritoneum and cellular tissue

New growths of the Fallopian tubes.

Hæmatocele and extra-uterine pregnancy.

Demonstrations.—The Assistant holds a class for instruction in Midwifery and Diseases of Women for students preparing for their final examinations, on Mondays, at 5 p.m., and more frequently when required, throughout the Winter and Summer Sessions.

FORENSIC MEDICINE AND TOXICOLOGY.

Professor: J. T. J. MORRISON, M.Sc.; M.A., M.B.,
B.C. (Cantab.), F.R.C.S.

Assistant: W. H. WYNN, M.D., M.Sc., M.R.C.P.

Lecture Days.—Thursdays, at 3 p.m., during the Winter Session, and Mondays and Thursdays, at 3 p.m., in the Summer Session.

Forensic Medicine.

The Course treats of the several branches of Legal Medicine necessary to the medical practitioner for his guidance in Medico-Legal Inquiries, and for giving evidence in civil and criminal causes in Courts of Justice.

SYLLABUS.

Historical outline of the legal and social relations of the Medical profession in England. Rise of physicians, surgeons, and apothecaries, and their Corporations. The first Medical Act, 1511; the Apothecaries' Act, 1815; the Medical Acts of 1858 and 1886. General Medical Council. The Medical Register.

The scope of Forensic Medicine. Legal responsibilities and duties of medical men. The process of law before Coroner, Magistrate, and Judge. Medical evidence.

The signs of death. Determination of the date of death. The causes of death, and particularly of sudden death. The post-mortem as a medico-legal inquiry. Exhumation.

Identification of the living and of the dead. Determination of age, sex, stature, and personal peculiarities.

Death by violent or unnatural causes—drowning, hanging, strangulation, suffocation, and smothering; wounds and mechanical injuries; extremes of temperature; explosives; electric shock; lightning stroke; starvation. Indications of accident, suicide, or homicide.

Wounds and other personal injuries ; question of accident or assault ; compensation claims in such cases.

Offences against chastity ; rape ; unnatural offences.

Criminal abortion. Live birth. Infanticide.

Malapraxis and malingering.

Lunacy certificates.

Life Assurance.

The Lectures will be supplemented by a practical Course of Laboratory work on Mondays at 4 p.m.

SYLLABUS

Human Blood : its microscopical, chemical, and spectroscopical features. Special characters of the blood of other mammals, birds, fishes, and amphibians.

Discrimination of stains resembling blood ; iron salts, vegetable colours, aniline dyes.

Seminal stains. Gonorrhœal pus.

Hair of man and domestic animals.

Fibres : cotton, linen, wool, silk.

Marks made by vitriol and other mineral acids.

Demonstration of the Fœtus at various ages.

Finger-prints and footmarks.

Toxicology.

This Course deals with poisons in their medico-legal, clinical, and pathological aspects. In the Lectures the following matters are discussed, viz. : laws relating to the sale of poisons ; classification, modes of action, and lethal doses of poisons ; antidotes—physical, chemical, physiological ; medico-legal procedure in non-fatal and fatal poisoning ; symptoms ; treatment ; detection and estimation of poisons ; and post-mortem appearances in fatal cases.

The Lectures are supplemented by a practical course of Laboratory work on Fridays, at 2 p.m.

MENTAL DISEASES.

Lecturer: PERCY T. HUGHES, M.B. (Edin.), D.P.H. (Lond.).

Lecture Days.—During the Summer Session, Tuesdays and Thursdays, at 2 p.m.

The Course will consist of an account of the various forms of Mental Disease, including their history, etiology, pathology, symptoms, and treatment. Illustrations of living examples, and pathological specimens will be utilised as far as possible. The medico-legal aspect of insanity will be included in the course.

OPERATIVE SURGERY.

Lecturer: GEORGE HEATON, M.A., M.B., B.Ch. (Oxon.), F.R.C.S.

A Practical Class in Operative Surgery, consisting of at least ten demonstrations, is held in the latter half of each Winter Session.

At these Classes the members are given general instruction in Operative Surgery; and the chief operations in Surgery are performed—under the superintendence of the Lecturer—on the Cadaver, viz. :—

Operations on Blood Vessels.

„ Joints.

„ Nerves.

Amputations.

Tenotomies.

Operations on the Head and Neck.

„ „ Thorax.

Abdominal Operations.

OPHTHALMOLOGY.

Professor: PRIESTLEY SMITH, M.Sc.; M.B., Ch.B.,
F.R.C.S.

Lecture Days.—Mondays and Wednesdays at 2 p.m.
during the Winter Session (January to March).

These lectures deal systematically with the nature and treatment of the principal diseases of the eye. The several parts of the subject are taken in the following order :—

Disorders of the Conjunctiva.

Disorders of the Cornea.

Disorders of the Uveal Tract : Iritis, Cyclitis, Choroiditis.

Injuries and Sympathetic Ophthalmia.

Glaucoma.

Cataract.

Disorders of the Retina..

Disorders of the Optic Nerves, Tracts, and Centres.

Refraction. Acuteness of Vision. Accommodation.

Hypermetropia. Myopia. Astigmatism.

Strabismus and other disorders of the Motor Apparatus.

Disorders of the Orbit and Lacrymal Apparatus.

In connection with this Course, Clinical demonstrations and practical instruction in the methods of examining the eye, are given in the Eye Department of the Queen's Hospital.

BIRMINGHAM UNIVERSITY CLINICAL BOARD.

INFORMATION CONCERNING HOSPITAL WORK.

THE GENERAL AND QUEEN'S HOSPITALS, BIRMINGHAM.

The Practices of these Hospitals are amalgamated for the purpose of Clinical Instruction which is carried on under the direction of the University Clinical Board. They present an almost unrivalled field for Clinical work, possessing more than **500 Beds**, treating annually upwards of **8,000 in-patients**, and **100,000 out-patients**, and as students spend part of their curriculum in each Hospital, they have every opportunity of acquiring a varied, full, and practical knowledge of their professional work.

The curriculum is adapted in the first place to meet the needs of the students of the Birmingham University, but it is also well adapted to the requirements of students preparing for the examinations of all other Universities and Licensing Bodies.

The advantages that the combined Hospitals offer to students do not cease with graduation, for there is probably no city in which students who have qualified have a larger number of Resident posts open to them.

At the GENERAL HOSPITAL there are:—

- A RESIDENT MEDICAL OFFICER, who is elected annually, and has a salary of £100 a year.
- A RESIDENT SURGICAL OFFICER, who is elected annually, but is eligible for re-election for three years, at a salary of £100 a year.
- A RESIDENT PATHOLOGIST, who is elected for a period of six months, and has a salary at the rate of £50 a year.

Three SURGICAL CASUALTY OFFICERS, who are elected for twelve months, and are eligible for re-election for a further similar period, at a salary of £50 a year.

Three HOUSE PHYSICIANS, who hold office for six months, are provided with board and residence, and have salaries at the rate of £50 a year.

Four HOUSE SURGEONS, who hold office for nine months, are provided with board and residence, and have salaries at the rate of £50 a year.

One HOUSE SURGEON to the Gynæcological, and one to the Ophthalmic, Aural and Skin Departments, each of whom holds office for six months, is provided with board and residence, and has a salary of £50 a year.

A RESIDENT MEDICAL OFFICER at the Jaffray Hospital, who is elected annually, but is eligible for re-election, and who receives £150 a year.

A RESIDENT MEDICAL ASSISTANT at the Jaffray Hospital, who is not necessarily qualified. He is provided with board and residence, and holds office for twelve months.

At the QUEEN'S HOSPITAL there are:—

Three House Physicians, who hold office for six months, and have salaries at the rate of £50 a year.

Three House Surgeons, who hold office for six months, and have salaries at the rate of £50 a year.

One Obstetric and Ophthalmic House Surgeon, who holds office for six months. Salary at the rate of £50 a year.

One Resident Dresser (post vacant on the first day of January, April, July, and October, who holds office for three months). Candidates for this appointment need not be qualified.

At the CHILDREN'S HOSPITAL.

One Resident Medical Officer.

One Resident Surgical Officer.

At the CITY WORKHOUSE AND WORKHOUSE INFIRMARY.

Five Resident Medical Officers.

At the BIRMINGHAM GENERAL and BRANCH DISPENSARIES.

Twelve Resident Surgeons.

At the BIRMINGHAM LUNATIC ASYLUMS.

Five Assistant Medical Officers.

At the CITY FEVER HOSPITALS.

Three Assistant Medical Officers.

At the BIRMINGHAM AND MIDLAND EYE HOSPITAL.

Four Resident Surgeons.

At the ORTHOPÆDIC AND SPINAL HOSPITAL.

Two Clinical Assistants (non-resident).

At the EAR AND THROAT HOSPITAL.

One House Surgeon, with a salary at the rate of
£70 per annum.

Four Clinical Assistants (non-resident).

At the MATERNITY HOSPITAL.

One House Surgeon, with a salary at the rate of
£50 per annum.

Besides the above-mentioned positions in Institutions in the City of Birmingham, there are numerous resident salaried appointments in the Hospitals in the immediate vicinity which are open to the students of the Birmingham Medical School.

Appointments are also open to Graduates in the Naval, Military, Indian Medical and Colonial Services.

HOSPITAL FEES.

THE COMPOSITION FEE for attendance for the full period required by the various examining bodies on the Medical and Surgical Practice and on the Clinical Lectures at both Hospitals is £42

N.B.—This payment can be made in four instalments of £8, £12, £12, and £10 each—the first on entrance at Hospital, the second at the commencement of the second year, the third at the commencement of the third year, and the fourth at the commencement of the fourth year at Hospital.

OCCASIONAL FEES FOR BOTH MEDICAL AND SURGICAL PRACTICE.

One Year's Attendance	£22 10s.
Six Months'	„	...	£14.
Three Months'	„	...	£10.

OCCASIONAL FEES FOR EITHER MEDICAL OR SURGICAL PRACTICE.

One Year's Attendance	£11 11s.
Six Months'	„	...	£7.
Three Months'	„	...	£5.
One Month's	„	...	£3 3s.

All Hospital fees must be paid at the time of registration to the Secretary of the University.

All schedules for Clinical work are signed by the Chairman of the Clinical Board, after being initialled by one of the Secretaries of the Board.

REGISTRATION OF HOSPITAL STUDENTS.

Students must register with the Secretaries of the University Clinical Board at the commencement of their second year, and of every succeeding year. Due notice will be given at the University and at the Hospitals of the days and hours of registration. Fees must be paid at the time of registration.

Students are, on first entering for their Hospital work, allocated in equal numbers to the General and the Queen's Hospitals respectively.

A student remains for one year at one Hospital, and in the next year passes to the other Hospital, and so on until his fifth year, when he may attend whatever classes he chooses at either Hospital, subject to the Regulations.

REGULATIONS FOR HOSPITAL WORK.

During the First year there is no Hospital Work.

SECOND YEAR.

Students must attend Hospital for three hours on Saturday mornings, when Medical and Surgical Tutorial Classes will be held and instruction given in Clinical Surgery.

THIRD YEAR.

Out-Patient dressing, three months.

In-Patient dressing, six months.

Clinical Lectures in Surgery.

Medical and Surgical Clinical Classes.

Medical Tutorial Classes (three months attendance will be required upon these before In-Patient dressing is commenced).

FOURTH YEAR.

In-Patient clerking, six months:

Clinical Lectures on Medicine.

Medical and Surgical Clinical Classes.

Post-mortem clerking, three months. Attendance at post-mortem examinations and demonstrations during the year.

FIFTH YEAR.

Clinical instruction in Medicine and Surgery.

Maternity Hospital, one month.

Clinical Midwifery (twenty cases).

Gynæcological clerking, three months.

Ophthalmology, three months.

Vaccination, six weeks.

Course in Anæsthetics. Attendance on three Lectures, and the administration of Anæsthetics in twenty cases.

Fever Hospital, three months.

Hospital for Mental Diseases, three months.

THE GENERAL HOSPITAL.

The Hospital contains 342 beds, and of these 327 are in daily use, upwards of 5,500 in-patients passing through the wards in the course of a year.

There are special wards for children, for gynæcological cases, and for septic and infectious cases, and in addition special beds reserved for eye and ear cases.

The out-patient hall has accommodation for some 500 or 600 patients, and some 62,500 out-patients are treated there annually.

The Post-mortem Department is in a separate building. It consists of a Mortuary with a small viewing room, a Post-mortem Room proper, and Laboratories for Bacteriology and Morbid Histology. In addition there are separate rooms in the main building, adjoining the various Medical and Surgical Wards for Clinical Pathology, and these are under the direction of special officers.

There are four operating theatres, all designed and fitted on the most modern lines.

* In connection with the Hospital is the Jaffray Suburban Hospital at Gravelly Hill. To this institution, which contains 56 beds, the chronic cases are transferred, when fit to be moved. This allows the main Hospital to be kept full of acute cases.

THE GENERAL HOSPITAL STAFF.

Consulting Physicians:

THE RIGHT HON. BARON ILKESTON, M.D., D.C.L., LL.D., F.R.C.P., P.C.
ROBERT SAUNDBY, M.D., LL.D., M.Sc., F.R.C.P.

Consulting Surgeon:

SIR THOMAS F. CHAVASSE, KNT., M.D., F.R.C.S.

Consulting Obstetric Officer:

EDWARD MALINS, M.D., F.R.C.P.

Physicians:

SIR ROBERT M. SIMON, KNT., M.D., F.R.C.P.
T. STACEY WILSON, M.D., F.R.C.P.
T. SYDNEY SHORT, M.D., M.R.C.P.
JAMES W. RUSSELL, M.A., M.D., F.R.C.P.

Surgeons:

GILBERT BARLING, M.B., B.S., F.R.C.S.
WILLIAM F. HASLAM, M.B., Ch.B., F.R.C.S.
GEORGE HEATON, M.A., M.B., B.Ch., F.R.C.S.
ALBERT LUCAS, F.R.C.S.

Obstetric Officer:

THOMAS WILSON, CH.M., M.D., F.R.C.S.

Ophthalmic Surgeon:

D. C. LLOYD-OWEN, M.D., F.R.C.S.I.

Aural Surgeon and Laryngologist:

F. W. FOXCROFT, M.D., C.M.

Physician in Charge of Skin Department:

A. DOUGLAS HEATH, M.D., M.R.C.P.

Assistant Physicians:

A. STANLEY BARNES, M.D., M.R.C.P.
WILLIAM H. WYNN, M.D., M.R.C.P.
J. E. H. SAWYER, M.D., M.R.C.P.
LEONARD G. PARSONS, M.D., M.R.C.P.

Assistant Surgeons:

LEONARD P. GAMGEE, F.R.C.S.
FRANK BARNES, M.B., M.S., F.R.C.S.
SEYMOUR BARLING, M.B., M.S., F.R.C.S.
E. MUSGRAVE WOODMAN, M.B., M.S., F.R.C.S.

Assistant Obstetric Officer:

H. BECKWITH WHITEHOUSE, M.S., F.R.C.S.

Visiting Pathologist:

J. SHOLTO DOUGLAS, M.A., M.D.

Clinical Pathologists:

W. H. WYNN, M.D., M.Sc. SEYMOUR BARLING, M.S., F.R.C.S.

Anæsthetists:

SYDNEY HAYNES, M.D. W. J. MCCARDIE, B.A., M.B., B.C.
R. H. ROLLINSON WHITAKER, F.R.C.S.

Surgical Photographers and Radiographers:

J. HALL EDWARDS, M.R.C.S. F. EMRYS-JONES, B.A., L.M.S.S.A.

Dental Surgeon:

R. H. ASTBURY, M.B., Ch.B., B.D.S., L.D.S.

Registrars:

DR. J. E. H. SAWYER (Medical) MR. E. MUSGRAVE WOODMAN (Surgical).

ARRANGEMENTS FOR CLINICAL TEACHING.

I.—MEDICINE.

THE MEDICAL WARDS are visited daily by the Physicians and instruction is given by them to the students who accompany them.

CLINICAL WARD CLERKS are appointed every three months for duty in the wards. They are aided by the House Physicians in note taking and in clinical diagnosis.

CLINICAL LECTURES on cases in the Hospital wards are delivered by one of the Physicians once every week, on Mondays, at 10.30 a.m.

SPECIAL CLINICAL CLASSES for Senior Students are taken on Tuesdays and Wednesdays, at 10.30 a.m., by one of the Physicians throughout term time.

The Assistant Physicians attend daily in the Out-patient Department and give clinical instruction.

SPECIAL CLINICAL CLASSES are held in the Out-Patient Rooms on Fridays, at 10.30, by Dr. Stanley Barnes, and on Thursdays by Dr. Wynn.

Medical Tutorial Classes.

A SENIOR TUTORIAL CLASS IN MEDICINE will be held by Dr. Sawyer on Wednesdays, at 12, in the second and third months of each term, for Students reading for the Final Examination.

JUNIOR TUTORIAL CLASSES IN MEDICINE will be held by Dr. Parsons on Saturdays, at 11.30 a.m., for Students in their first Hospital year.

A three months' course for Clerks and Dressers will be held by Dr. Parsons in the first term of the Winter Session on Tuesdays, at 12 o'clock.

II.—SURGERY.

The Surgical Wards are visited daily by the Surgeons, who give clinical instruction to students who accompany them.

Surgical In-patient Dressers are appointed every three months. They are attached in equal numbers to

each Surgeon, accompany him on his rounds, assist at the surgical operations, and, under the direction of the House Surgeons, dress the cases in the wards.

A CLINICAL LECTURE is delivered every Thursday morning during term time, at 9.30, by one of the Visiting Surgeons, on some case of interest in the wards.

SENIOR CLINICAL CLASSES are held on Monday and Friday mornings, at 9.30, during term time by one of the Surgeons.

A JUNIOR CLINICAL CLASS is held once a week, on Saturdays, by Mr. Haslam, Mr. Heaton, or Mr. Lucas, for students in their first year of attendance at Hospital.

SPECIAL CLINICAL CLASSES are held in the Out-Patient Rooms on Tuesdays, at 11.30, by Mr. Gamgee, and on Thursdays, at 11.30, by Mr. Frank Barnes.

Every day an Assistant Surgeon attends in the Out-Patient Department, and a specially-appointed officer in the Surgical Casualty Department. Dressers are appointed, who spend part of their time in the latter Department, where an immense number of accidents are attended to, and part in the Out-Patient Rooms, where the diagnosis and treatment of minor surgical ailments are taught.

Surgical Tutorial Classes.

A SENIOR TUTORIAL CLASS IN SURGERY will be held for students reading for their Final Examinations, by Mr. Seymour Barling, on Thursdays, at 12 o'clock.

A JUNIOR TUTORIAL CLASS IN SURGERY will be held by Mr. Woodman on Saturdays, at 10.30 a.m.

Surgical operations are performed daily from 10 to 1 in the three main Operating Theatres. The large experience to be gained from this source may be gathered from the fact that during each of the last two years nearly 4,000 operations were performed.

III.—THE SPECIAL DEPARTMENTS.

Gynæcology.

Dr. Thomas Wilson gives clinical instruction in the wards and in the Out-Patient Department, and a

Clinical Lecture is given once a month, on Mondays, at 10.30 a.m. Senior students are appointed as clerks every three months.

THE GYNÆCOLOGICAL TUTOR, Mr. Whitehouse, holds a class for senior students twice a week, at hours arranged at the beginning of each term.

Gynæcological out-patients are seen by Dr. Thomas Wilson at 10.30 a.m. on Wednesdays, and by Dr. Whitehouse on Wednesdays and Fridays at 10 a.m. Gynæcological operations take place in Theatre IV. on Mondays, Tuesdays, and Thursdays. Upwards of 250 of these are performed every year.

Aural and Laryngological Department.

This department is under the charge of Dr. F. W. Foxcroft, who attends twice weekly to see out-patients. Demonstrations of Diseases of the Ear and Throat are given every Friday, at 10.30 a.m., during term time.

Department for Diseases of the Skin.

The Department for the treatment of Diseases of the Skin is under the care of Dr. Douglas Heath, who attends twice weekly, on Tuesdays and Fridays, and gives demonstrations on Skin cases.

X Rays and Light Treatment Department.

This Department has recently been completely reorganised and thoroughly equipped with the latest and most up-to-date appliances, fittings and apparatus, for the investigation and treatment of disease by means of electricity. There is an installation for the treatment of Skin Diseases by the Finsen Rays. The Department is under the charge of Mr. Hall Edwards and Mr. Emrys-Jones, who attend daily at 11 a.m.

Ophthalmic Department.

Ophthalmic cases are seen on Thursdays by Mr. Lloyd Owen as out-patients. Cases requiring operation are admitted into beds in the Hospital specially reserved for such cases.

Dental Department.

There is an Out-Patient Dental Department, under the charge of Mr. R. H. Astbury, who attends on Wednesday and Saturday mornings. Students are given instruction in the manufacture of the various Dental appliances required after injuries and surgical operations.

Pathological Department.

This Department is under the charge of the Visiting Pathologist, who holds a class on Saturdays at 11 a.m. There are also two annually elected Clinical Pathologists, and a Resident Pathologist.

Students are appointed as clerks for periods of three months, and work in the Pathological Laboratories under the superintendence of the Visiting and Resident Pathologists.

Chemical and Bacteriological investigation of material from the wards is carried out by the Medical and Surgical Clinical Pathologists, who have a complete equipment for that purpose.

Anæsthetics.

Each term instruction classes in the Administration of Anæsthetics are held by one of the Anæsthetic Officers. After attending these, each student has the opportunity of administering anæsthetics under superintendence in a given number of cases, and thus of learning the methods practically.

THE QUEEN'S HOSPITAL.

The Hospital contains 170 beds, distributed in wards arranged for the treatment of accidents, and of urgent medical, surgical, gynæcological and ophthalmic cases; a special ward being reserved for children, and a roof ward for open-air treatment. During 1908 the in-patients treated numbered 2,685, and the out-patients 36,798.

The Out-Patient Consulting Rooms and Casualty Dressing Rooms are grouped conveniently around the Out-patient Hall.

The two Operating Theatres are well lighted and thoroughly well appointed.

A department for Radiography, duly installed with the necessary apparatus, is conducted by the Medical Radiographer, who attends regularly for that purpose.

The Pathological Department is an isolated block, under the charge of the Pathologist, who is a member of the Honorary Staff. It comprises a post-mortem room, mortuary, and laboratories for bacteriology and general pathology.

There are clinical rooms adjacent to the wards provided with microscopes and other apparatus for routine clinical pathology.

THE QUEEN'S HOSPITAL STAFF.

Consulting Physicians:

SIR JAMES SAWYER, KNT., M.D., F.R.C.P., F.R.S.E.
 CORNELIUS W. SUCKLING, M.D., M.R.C.P.
 ALFRED H. CARTER, M.D., F.R.C.P.

Consulting Surgeons:

FRANK MARSH, CH.M., F.R.C.S.
 BENNETT MAY, B.S., F.R.C.S.

Consulting Ophthalmic Surgeon:

PRIESTLEY SMITH, M.Sc., F.R.C.S.

Physicians:

O. J. KAUFFMANN, M.D., F.R.C.P.
 DOUGLAS STANLEY, M.D., M.R.C.P.
 J. G. EMANUEL, M.D., M.R.C.P.

Surgeons:

JORDAN LLOYD, M.S., F.R.C.S.
 J. T. J. MORRISON, M.A., B.C., F.R.C.S.
 C. A. LEEDHAM-GREEN, CH.M., F.R.C.S.

Obstetric Officer:

C. E. PURSLOW, M.D., M.R.C.P.

Ophthalmic Surgeon:

WILFRID ALLPORT, M.B., B.S., F.R.C.S., Ed.

Physician for Out-Patients:

L. G. J. MACKEY, M.D., CH.B., M.R.C.P.

Surgeons for Out-Patients:

W. BILLINGTON, M.B., M.S., F.R.C.S.
 A. W. NUTHALL, CH.M., F.R.C.S.
 B. J. WARD, F.R.C.S.

Pathologist:

LAURENCE BALL, M.B., B.S., M.R.C.P.

Medical Radiographer and Photographer:

MR. F. EMRYS-JONES, L.M.S.S.A.

Days of Attendance for Out-Patients (9 a.m.)

Monday—Dr. Kauffmann, Mr. Morrison and Dr. Purslow.
Tuesday—Dr. Stanley, Mr. Lloyd and Mr. Allport.
Wednesday—Dr. Emanuel and Mr. Leedham-Green.
Thursday—Dr. Mackey, Dr. Purslow and Mr. Nuthall.
Friday—Dr. Mackey, Mr. Allport and Mr. Billington.

Casualty patients are attended on Tuesday and Friday by Mr. Nuthall; Wednesday and Saturday by Mr. Billington; and on Monday and Thursday by Mr. Ward.

ARRANGEMENTS FOR CLINICAL TEACHING.

I.—MEDICINE.

MEDICAL WARD CLERKS are appointed from the Third Year students for terms of three and six months. They are attached to one of the Physicians, who directs their studies and gives practical instruction to them and to all other students who accompany him on his Hospital rounds. The clerks are also instructed by the House Physicians in practical methods of diagnosis and in note-taking.

CLINICAL LECTURES are given in rotation by the Physicians on Thursday mornings, at 9.30.

CLINICAL CLASSES in the wards are conducted by the Physicians during term at 10.30 on Mondays, Tuesdays, and Fridays.

CLINICAL CLASSES are held in the Out-Patient Rooms on Thursdays and Fridays, at 12 noon, by the Physician for Out-Patients.

Medical Tutorial Classes.

A SENIOR TUTORIAL CLASS is held on Wednesdays, at 12, by Dr. Mackey, for Final Year Students.

JUNIOR TUTORIAL CLASSES are held on Tuesdays, at 12, for Third Year Students, and on Saturdays at 10.30 for Second Year Students, by the Junior Medical Tutor.

II.—SURGERY.

SURGICAL DRESSERS are appointed every three months for duty in the wards. They are allotted to one of the Surgeons for terms of three or six months; they accompany them, with other students, when they visit the Hospital to see their patients and give instruction; and they assist at operations. Under the supervision of the House Surgeons they prepare notes and dress such cases as may be assigned to them.

CLINICAL LECTURES are given in rotation by the Surgeons on Friday mornings, at 9.30.

CLINICAL CLASSES are held at 9.30 on Mondays, Tuesdays, and Thursdays.

CLINICAL CLASSES are held in the Out-Patient Room by the Surgeons for Out-Patients in rotation.

Surgical Tutorial Classes.

A SENIOR TUTORIAL CLASS is held on Mondays, at 12, by the Senior Surgical Tutor, Mr. Billington, and is intended for students in their final year.

A JUNIOR TUTORIAL CLASS is held on Saturdays, at 9.30, by the Junior Surgical Tutor, Mr. Nuthall, for students in their first hospital year.

III.—GYNÆCOLOGY.

CLERKS IN THE GYNÆCOLOGICAL DEPARTMENT are appointed every three months from the Senior students. They attend Dr. Purslow in his ward and Out-Patient Room, and assist at operations. It is part of their duty also to take notes under the direction of the House Surgeon.

CLINICAL LECTURES are given by Dr. Purslow on Wednesdays, at 9.30 a.m., during the first half of the Winter Session.

OUT-PATIENT CLINIC AND OPERATIONS.—Dr. Purslow attends at 9.30 a.m. on Mondays and Thursdays to see out-patients and to give instruction to students. Gynæcological operations are performed by him on Saturdays, at 9.30 a.m.

TUTORIAL CLASSES are held on Thursdays, at 11.30, by Dr. Purslow, during the second half of the Winter Session and during the Summer Session.

IV.—OPHTHALMOLOGY.

CLINICAL DEMONSTRATIONS are given by Mr. Priestley Smith and Mr. Allport on Wednesdays, at 9.30 a.m.

OUT-PATIENT CLINIC AND OPERATIONS.—Mr. Allport attends on Tuesdays and Fridays, at 9 a.m., to see out-patients and to give Clinical instruction to students. Operations on cases of eye disease are performed by him on Saturdays, at 11.30 a.m.

V.—PATHOLOGY.

CLERKS IN THE PATHOLOGICAL DEPARTMENT are appointed every three months, and under the direction of the Pathologist, make post-mortem examinations and carry out bacteriological, microscopical, and chemical work in the laboratories, and keep records.

DEMONSTRATIONS are specially given on Saturdays, at 12, by the Pathologist, Dr. BALL.

VI.—MIDWIFERY.

Midwifery cases are assigned for attendance in the Queen's Hospital Maternity District, under the supervision of the Honorary Obstetric Officer and the Obstetric House Surgeon.

Before attending practical midwifery, students must have passed their Anatomical and Physiological Examinations.

They must conform to the Queen's Hospital bye-laws which relate to the work of its Midwifery Department.

Students must apply in the first place to the Secretary of the University Clinical Board, who will furnish them with a "Clinical Midwifery Card," which shall be signed by the Obstetric Officer on the completion of the duties, and returned.

They shall not be engaged in Surgical Dressing, Post-mortem, or Dissecting Room work during the time of their attendance.

UNIVERSITY CLINICAL BOARD REGULATIONS.

Appointment of Resident Clinical Assistant at the Jaffray Hospital and Resident Dresser at the Queen's Hospital.

These posts are awarded by examination.

The Examinations are only open to students taking out the whole of the clinical course at the School of Medicine of the University of Birmingham.

The Resident Dresser at the Queen's Hospital is at liberty to attend lectures at the University in the afternoons. Students before competing must be certified for at least three months' in-patient clerking and three months' in-patient dressing, but they must not have exceeded the limit of the five years' curriculum. The possession of a recently-obtained qualification is not a bar to the holding of either of these appointments.

The Clinical Assistant at the Jaffray Hospital is also allowed time to attend lectures.

CLINICAL PRIZES.

The University Clinical Board offer annually the following Prizes :—

Senior Medical Prize	Gold Medal.
Senior Surgical Prize	Gold Medal.
Midwifery Prize	Gold Medal.
Junior Medical Prize	Silver Medal.
Junior Surgical Prize	Silver Medal.

The Examinations for the above Prizes will be held at the end of each Summer Session.

The SENIOR MEDICAL PRIZE will be open to students of not more than *six* years standing in the School of Medicine of the University. Every candidate must produce a certificate of having held the office of Clinical Clerk in either the General or the Queen's Hospital for a period of *six* months. The examination will include a paper of *four* questions on the Principles and Practice of Medicine; the examination of *two* or more living cases in the presence of the examiners; the examination of Urines; together with such additional evidence of a practical knowledge of Medicine as the examiners for the time being shall require.

The JUNIOR MEDICAL PRIZE will be open to third and fourth year students of the Medical School. Every candidate must produce a certificate of having held the office of Clinical Clerk in either the General or the Queen's Hospital for a period of *three* months, and shall deliver the notes of *two* medical cases which have been assigned to him for the purpose by the examiners during the Summer Session. The examination will include a paper of *four* questions on the Principles of Medicine; together with such evidence of a practical knowledge of the methods of physical examination, and of the names, uses and employment of instruments and apparatus as the examiners for the time being shall require.

The SENIOR SURGICAL PRIZE will be open to students of not more than *six* years' standing in the School of Medicine of the University. Every candidate must produce a certificate of having held the office of Surgical Dresser in either the General or Queen's Hospital for a period of *six* months. The examination will include a paper of *four* questions on the Principles and Practice of Surgery; the examination of *two* or more living cases in the presence of the examiners, together with such additional evidence of a practical knowledge of Surgery as the examiners for the time being shall require.

The JUNIOR SURGICAL PRIZE will be open to third and fourth year students of the Medical School. Every candidate must produce a certificate of having held the office of Surgical Dresser in the General or Queen's Hospital for a period of *three* months, and shall deliver the notes of two surgical cases which have been assigned to him for the purpose by the examiners during the Summer Session. The examination will include a paper of *four* questions on the Principles of Surgery, together with such evidence of the names, uses and methods of employment of common surgical instruments, bandages and apparatus, as the examiners for the time being shall require.

The MIDWIFERY PRIZE will be open to students of not more than *six* years' standing in the School of Medicine of the University. Every candidate must produce a certificate of having personally attended at least *twenty* cases of Midwifery, and also a certificate of having attended in the Gynæcological Department at either the General or the Queen's Hospital for *three* months. He shall deliver the notes of *two* cases which have been assigned to him for the purpose by the examiner during the Summer Session. The examination will include a paper of *two* questions on Diseases peculiar to Women, and *two* questions on the Principles and Practice of Midwifery, together with a practical examination of such a kind as the examiner for the time being shall determine.

GENERAL REGULATIONS.

Notice of intention to compete for the above Prizes must be communicated to one of the Secretaries of the University Clinical Board on or before the 10th day of May in each year.

In no case will any Prize be awarded unless at least *seventy per cent.* of the total possible number of marks be obtained.

A professional qualification obtained during the Summer Session *immediately* preceding these examinations does not disqualify a candidate.

INFORMATION FOR STUDENTS ATTENDING THE HOSPITALS.

1. The arrangements for Clinical Teaching are, as far as possible, conducted at both Hospitals on the same plan.

2. The recognised hours for Hospital attendance of students are from 9 a.m. to 1 p.m. daily.

3. The Teaching provided consists of :

- 1, Clinical Lectures in the theatre or lecture rooms ;
- 2, Clinical Instruction in the Wards : 3, Tutorial Classes ; 4, Pathological Demonstrations.

The first three forms are given by the Members of the Honorary and Assistant Staffs. The Tutorial Classes are conducted by Special Tutors selected for that duty.

4. Clinical Instruction is given in the Medical or Surgical Wards daily, but not during the hour set apart for the Clinical Lectures.

5. Registers of attendance on Clinical Lectures and Clinical Tutorial Classes are kept. Cards are supplied to Final year students, on which each individual attendance will be certified by the teacher.

6. During the First year of the Medical Curriculum, attendance at Hospital is not recognised.

During the Second year of the Medical Curriculum students should attend the Medical and Surgical Tutorial Classes at the Hospital once a week. [This

course is not compulsory on Candidates for the Diplomas of the English and Scotch Conjoint Boards, and will, under no circumstances, be reckoned as one of the years required by the Schedules of the above-mentioned bodies; all students are, however, strongly advised to attend this course during this year.]

During the Third year of the Medical Curriculum students should attend:

- a*, Clinical Lectures on Surgery; *b*, Medical and Surgical Clinical Classes; *c*, Surgical Dressing (including three months Out-Patient and six months In-Patient Dressing); *d*, Medical Tutorial Classes.

N.B.—These Tutorial Classes must be attended for three months before In-Patient Dressing is commenced.

(No student will obtain credit for this year of Hospital work unless he has previously passed his Anatomical and Physiological Examinations.)

During the Fourth year of the Medical Curriculum students should attend:

- a*, Clinical Lectures on Medicine; *b*, Medical and Surgical Clinical Classes; *c*, Medical Clinical Clerking for six months; *d*, Clinical Gynæcology; *e*, Post-mortem Clerking. The student must also attend Post-mortem Examinations and Demonstrations during the year.

During the Fifth year of the Medical Curriculum students should attend:

- * *a*, Clinical Instruction in Medicine and Surgery (during this year students are at liberty to attend these subjects at either Hospital; *b*, Clinical Ophthalmology (three months); *c*, Vaccination; *d*, Fever Hospital (three months); * *e*, Lunatic Asylum (three months); *f*, Maternity Hospital (three months); *g*, Clinical Midwifery (twenty cases); *h*, Gynæcological Clerking (three months); *i*, Instruction in Anæsthetics, consisting of attendance at three Lectures and the personal administration of Anæsthetics in twenty cases.

7. Students holding the appointments of Medical Clinical Clerk, or Surgical Dresser, are exempt from Clinical Classes in Medicine and Surgery on the days on which their services are required by the Officer under whom they are working.

* The subjects *a* and *e* must be attended during the final year.

8. The following Syllabus of Instruction is followed in the Tutorial Classes for Elementary Medicine and Surgery :

MEDICINE :

- (1) **The Thorax.** Surface Anatomy of Heart, Lungs, main vessels, etc.

The Circulatory System :—Physical Examination of the Heart and its neighbourhood ; Inspection and Palpation ; the position and character of the Apex Beat and the commoner causes of its displacement. Technique of Percussion, Superficial and Deep Cardiac Dulness. Auscultation ; normal Heart sounds ; abnormal Heart sounds and murmurs. The signs of Valvular Disease ; the signs of Pericarditis and Pericardial Effusion. The Pulse ; alterations in Disease ; the use of the Sphygmograph.

The Respiratory System ; Physical Examination of Lungs and Pleuræ ; Palpation and Percussion. Auscultation ; Characters of normal Breath sounds ; the Breath sounds in disease ; the Voice sounds in disease ; adventitious sounds and accompaniments.

- (2) **The Abdomen** ; Surface Anatomy of Abdominal Viscera. Methods and results of general abdominal inspection and percussion ; the signs of ascites ; the common abdominal tumours ; the Liver and Gall-bladder ; the detection of enlargement of the Liver and its commoner causes. The Spleen ; methods of detecting enlargement. The Kidneys ; the conditions which render them palpable. The Stomach ; methods of examination ; examination of Stomach Contents.

The Urine ; quality, colour, odour, density, and naked eye and microscopical characters in health and disease ; the methods of detecting sugar and albumen and other abnormal constituents ; the naked eye and microscopical examination of urinary deposits.

- (3) **The Nervous System**, Examination of. Clinical Examination of the Blood.

SURGERY : *Winter*—1, Bandaging ; 2, Strapping ; 3, Application of Splints ; 4, Minor Injuries ; 5, Wound Dressing and Wound Treatment ; 6, Hæmorrhage, Hæmostasis, Tourniquets ; 7, Artificial Respiration. *Summer*—8, Minor Operations ; Catheterisation, Plugging the Nares ; Hypodermic Injection, Removal of Foreign Bodies from the Eye, Ear, and Oesophagus ; 9, Shock, Fainting, Stings, Leeching, Counter-irritation ; 10, Surface Landmarks and Guides.

CLINICAL TEACHING FOR DENTAL STUDENTS.

All Dental Students in their First Hospital Year attend the Saturday morning Surgical Classes at one Hospital, and the Junior Medical Tutorial at the other. For the present year, 1912-13, they will attend the Special Junior Tutorial Class in Medicine held on Thursdays at 12.0 at the Queen's Hospital, and the Surgical Classes held at the General Hospital on Saturday mornings. Next year they will attend the Saturday morning Surgical Classes at the Queen's, and the Medical Class at the General Hospital.

Arrangements for the Instruction of Dental Students at the General and Queen's Hospitals.

FOR DENTAL STUDENTS IN THEIR FIRST HOSPITAL YEAR.

General Hospital:

Surgical Ward Class on Saturdays at 9-30 by the Surgeons.

Junior Tutorial Class in Surgery on Saturdays at 10-30, by the Surgical Tutor.

Junior Tutorial Class in Medicine on Thursdays at 12-0, by the Medical Tutor.

Queen's Hospital:

Ward Class on Saturdays at 9-30, by the Surgeons.

Junior Tutorial Class in Surgery on Saturdays at 11-30, by Surgeons to Out-Patients.

Junior Tutorial Class in Medicine on Thursdays at 12-0, by the Medical Tutor.

DENTAL STUDENTS IN THEIR SECOND HOSPITAL YEAR.

General Hospital:

Surgical Out-Patients, Wednesdays at 9-0 a.m., Fridays at 9-0 a.m.

The Students are expected to remain in attendance until the Out-Patients are disposed of.

Special Ward Class on Wednesday mornings at 10-30, by Dr. Stacey Wilson.

Queen's Hospital :

Surgical Out-Patients, Wednesdays at 9-0 a.m.,
Fridays at 9-0 a.m.

The Students are expected to remain in attendance until the Out-Patients are disposed of.

Senior Tutorial Class in Medicine on Wednesdays at 12-0, by Dr. Mackey.

GENERAL REGULATIONS.

1. Every student is required to register his name for Hospital Practice within fifteen days of the commencement of the Winter Session.

2. Students must attend twelve months alternately at the General and Queen's Hospitals, as directed at the time of registration, but during their final year they may attend at either or both Hospitals.

3. Students who enter for a term of six months or less may choose which Hospital they will attend.

4. All students registering for Hospital Practice are required to attend at least *two-thirds* of the Classes for which they register.

5. Students referred at their Final Examinations must register with the Secretaries of the University Clinical Board for any further attendance they may require.

THE UNIVERSITY CLINICAL BOARD.

Professor GILBERT BARLING, *Chairman*.

Professor PETER THOMPSON, *Dean*.

Professor Sir ROBERT SIMON.

Professor JORDAN LLOYD.

Professor J. T. J. MORRISON.

Mr. WM. F. HASLAM.

Dr. THOS. WILSON.

Dr. DOUGLAS STANLEY. } *Secretaries.*

Mr. WILFRID ALLPORT.

Clerk to the Board : E. B. LAWLEY.

ASSOCIATED HOSPITALS.

The undermentioned Institutions are open to the students of the University free (with the exception of the City Fever Hospitals and the City Asylum), under the following regulations.

That it be recognised that students attending such Hospitals do so upon the understanding that, except in the case of the City Fever Hospitals and the City Asylum, such attendance is in no way to supersede or be considered as equivalent to attendance at the General and Queen's Hospitals.

THE CITY ASYLUM, WINSON GREEN.

Medical Superintendent:

CECIL B. ROSCROW, L.R.C.P., L.R.C.S. (Edin.),
L.F.P.S. (Glas.).

This Institution is recognised by all the Universities and Licensing Bodies as a Hospital at which attendance may be made in the subject of Mental Disease. By the regulations of British Universities and other Bodies, such attendance may count towards the requisite period of Clinical study. Courses of instruction are given during the Winter Session *only*, viz., October to December and January to March, on Saturdays at 10 a.m., commencing on the first Saturday in the Term.

All students wishing to attend must make application at least one week previously.

The minimum number of attendances is *eight*, and no certificate will be granted unless that number has been attended.

A Fee of £3 3s. for three months' attendance has to be paid in advance to Mr. Roscrow, to whom application must be made for further information.

THE CITY FEVER HOSPITAL.

Lodge Road.

Medical Superintendent: H. M. CARGIN, M.B.,
Ch.B., (Edin.), D.P.H. (Liverpool).

This Institution is recognised by all the Licensing Bodies as a Fever Hospital at which attendances may be made.

Courses of Instruction are given during the Winter Session *only*, viz.: October to December and January to March, on Saturdays at 11.30 a.m., commencing on the first Saturday in the Term in October and January respectively.

Students attend for twelve consecutive weeks at the above-named institution.

The following Regulations have to be observed:—

1. Every student while within the gates of the Hospital shall be subject to the control of the Medical Superintendent, who has authority to suspend him from further attendance in case of breach of discipline.

2. He shall strictly adhere to the regulations made from time to time with regard to disinfection.

3. He shall not visit any ward except in the company of the Medical Superintendent or his deputy.

4. Registers are kept at the Hospital in which are entered the name of every student and the number of his attendances.

5. The minimum duration of any course of instruction is three months, the hours of attendance to be fixed by the Medical Superintendent.

6. A certificate, to be signed by the Dean of the Medical Faculty, shall be granted to each student when he shall have completed his course of study to the satisfaction of the Medical Superintendent.

7. The fee for each course is *Two Guineas* for the first three months, and *One Guinea* for each additional month or part of a month, payable in advance to the Secretary of the University.

8. These Rules apply also to qualified medical men who may desire to attend the Hospital for clinical instruction.

BIRMINGHAM AND MIDLAND EYE HOSPITAL.

Honorary Consulting Physician :

R. SAUNDBY, M.D., F.R.C.P., LL.D.

Honorary Consulting Surgeon :

D. C. LLOYD-OWEN, M.D., Ch.B., F.R.C.S.I.

Surgeons :

H. EALES, M.R.C.S.

E. W. WOOD-WHITE, B.A., M.D., B.Ch.

J. JAMESON EVANS, M.D.; C.M., F.R.C.S. (*Hon. Sec. to the Medical Board*).

Dental Surgeon :

W. T. MADIN, B.D.S., L.D.S.

Anæsthetist :

S. W. HAYNES, M.D.

Radiographers :

MR. HALL EDWARDS and MR. EMRYS-JONES.

This Hospital possesses 110 beds, and there is an average daily attendance of out-patients of 250.

This Institution is recognised by Universities and the Royal College of Surgeons, England, and Royal College of Physicians, London, as an Ophthalmic Hospital at which clinical instruction in Ophthalmology may be received. The Medical Staff give instruction on Refraction, Ophthalmoscopy, External Diseases of the Eye and Ocular Pathology at 9 a.m. daily, or at other times by arrangement. Students attending for a period of three months will be granted Certificates which will qualify for the University and Conjoint Board Examinations.

Post Graduate clinical instruction in Ophthalmology, with special reference to the requirements of Medical Inspectors of Schools, is given daily at 9 a.m., or at times arranged.

FEES :—Two guineas for three months ; three guineas for six months.

Days of Attendance :

MR. EALES - Tuesday and Friday.

MR. WOOD-WHITE - Monday and Thursday.

MR. JAMESON EVANS - Wednesday and Saturday.

Out-patients are seen daily at 9 a.m.

Operations daily at 11 a.m.

Further information may be obtained from the Hon. Secretary of the Medical Board.

THE ROYAL ORTHOPÆDIC AND SPINAL HOSPITAL.

Honorary Consulting Physician :

C. W. SUCKLING, M.D., M.R.C.P.

Honorary Consulting Surgeon :

WILLIAM THOMAS, M.B., F.R.C.S.

Honorary Surgeons :

WM. EDWARD BENNETT, M.B., Ch.B., F.R.C.S.
(*Hon. Sec. to the Medical Committee*).

FRANK BARNES, M.B., M.S., Lond., F.R.C.S.

CHAD WOODWARD, M.B., F.R.C.S. (Edin.).

Anæsthetist :

WALTER R. JORDAN, M.D. (Lond.).

Qualified Clinical Assistants :

DR. G. W. CRAIG.

DR. CUTHBERT HOUGHTON.

Days of Attendance. (Out-Patients.)

Mr. WM. EDWD. BENNETT Monday and Thursday,
at 2.30 p.m.

MR. FRANK BARNES ... Wednesday and Friday,
at 2.30 p.m.

MR. CHAD WOODWARD ... Tuesday, at 2.30 p.m.

Operations, Tuesday (Mr. Bennett), Thursday (Mr. Woodward), and Friday (Mr. Barnes), at 9 a.m.

Accommodation for 30 In-patients.

QUALIFIED CLINICAL ASSISTANTS are appointed annually at an Honorarium of Twenty-five Guineas.

Clinical Instruction is given by the Honorary Surgeons at the above-mentioned hours of attendance in the Out-patient Department and at the operations.

Further particulars may be obtained from the Secretary to the Medical Committee.

BIRMINGHAM AND MIDLAND EAR AND THROAT HOSPITAL.

Honorary Consulting Physician :

JAMES W. RUSSELL, M.A., M.D., F.R.C.P.

Honorary Consulting Surgeon :

WRIGHT WILSON, F.R.C.S.E.

Surgeons :

C. J. LEWIS, M.D.

WILLIAM LAMB, M.D., C.M., M.R.C.P.

Honorary Assistant Surgeons :

WILFRID GLEGG, M.D., C.M., M.R.C.P.E.

SEYMOUR JONES, F.R.C.S.

Days of Attendance :

Monday	-	-	Dr. LAMB	}	9.30 to 11 a.m.
Tuesday	-	-	Dr. GLEGG		
Wednesday	-	-	Mr. JONES		
Thursday	-	-	Dr. LEWIS		
Friday	-	-	Mr. JONES		

The Hospital has 41 beds in occupation.

A Resident House Surgeon is appointed every six months, at a salary of £70 per annum, and he is eligible for re-election. Rooms, Board and washing are provided in the Hospital.

Candidates for the post must possess a registered qualification in Medicine and Surgery, and will be required to devote their whole time to the service of the Hospital. There is ample time for reading. Further particulars may be obtained from the Secretary of the Hospital, Edmund Street.

Practical instruction and demonstrations are given to Practitioners and Medical Students from 9.30 a.m. to 12 noon daily.

Fees for attending the Practice of the Hospital :— Practitioners, one month, one guinea; three months, two guineas; Medical Students, free.

THE BIRMINGHAM AND MIDLAND FREE HOSPITAL FOR SICK CHILDREN.

Consulting Physicians :

CORNELIUS W. SUCKLING, M.D.
RICHARD J. DRURY, M.D. ANNIE E. CLARK, M.D.

Consulting Surgeons :

GEORGE ELKINGTON, M.R.C.S.
WILLIAM THOMAS, F.R.C.S.
JORDAN LLOYD, M.S., F.R.C.S.
GEORGE HEATON, F.R.C.S.

Consulting Ophthalmic Surgeon :

LLOYD OWEN, M.D.

Physicians :

WALTER R. JORDAN, M.D.
DOUGLAS STANLEY, M.D., M.R.C.P.
J. G. EMANUEL, M.D., M.R.C.P.

Surgeons :

L. P. GAMGEE, F.R.C.S.
C. LEEDHAM GREEN, F.R.C.S.
A. W. NUTHALL, F.R.C.S.

Physicians for Out-Patients :

LEONARD G. PARSONS, M.D., M.R.C.P.
LAURENCE BALL, M.B., M.R.C.P.

Surgeons for Out-Patients :

SEYMOUR BARLING, F.R.C.S.
BERNARD WARD, F.R.C.S.

Ophthalmic Surgeon :

J. MARTIN YOUNG, M.B., C.M.

Dental Surgeon :

C. H. HOWKINS, M.R.C.S., L.D.S.

Days of Attendance :

Monday - Dr. JORDAN, Dr. PARSONS and Mr. BARLING.
Tuesday - Dr. EMANUEL, Dr. L. BALL and Mr. C.
LEEDHAM-GREEN.
Wednesday Dr. STANLEY, Dr. PARSONS and Mr.
NUTHALL.
Thursday - Dr. JORDAN, Dr. BALL and Mr. WARD.
Friday - Dr. EMANUEL, Dr. PARSONS and Mr.
BARLING.
Saturday - Dr. BALL and Mr. WARD.

CLINICAL INSTRUCTION.—Ward classes are held once a week during term by the Physicians on the days and hours announced upon the Notice-boards of the University and Hospitals.

**THE MATERNITY HOSPITAL OF THE BIRMINGHAM
LYING-IN CHARITY.**

Physicians:

THOMAS WILSON, M.D. (Lond.), Ch.M. (Birm.),
F.R.C.S.

SWALLWOOD SAVAGE, M.A., M.B., B.Ch. (Oxon.),
F.R.C.S.

J. T. HEWETSON, M.D. (Edin.), Ch.M. (Birm.),
F.R.C.S.

W. A. POTTS, B.A. (Cantab), M.D. (Edin.).

J. FURNEAUX JORDAN, M.B., B.Ch. (R.U.I.), F.R.C.S.

F. EDGE, M.D., B.Sc. (Lond.), F.R.C.S.

There are 25 beds in the Hospital. The In-patients include cases of all kinds of complications of pregnancy and labour, and number about 350 annually.

Facilities are afforded to students for attending the practical work of the Hospital, and clinical instruction is given by the Honorary Physicians at such hours as may be arranged from time to time.

There is limited accommodation for resident women students, who are permitted under certain conditions to attend midwifery cases in the districts of the Charity, where 1,600 patients are attended annually.

Further particulars may be obtained from Dr. Thomas Wilson.

FEES:—Internal Students (women only), six guineas a month, including residence. External Students, two guineas a month.

THE BIRMINGHAM AND MIDLAND HOSPITAL FOR WOMEN.

Honorary Surgeons :

ANNIE E. CLARK, M.D., M.K.Q.C.P.I.
CHRISTOPHER MARTIN, M.B., F.R.C.S.
J. FURNEAUX JORDAN, M.B., F.R.C.S.
FREDERICK EDGE, M.D., F.R.C.S., M.R.C.P.
MARY D. STURGE, M.D.
JOHN T. HEWETSON, M.D., F.R.C.S.

Anæsthetists :

SARA WHITEFORD, M.B., B.S.
L. KIRKBY THOMAS, M.R.C.S., L.R.C.P.

The Hospital consists of an In-patient Department (60 beds) at Sparkhill, and an Out-patient Department at the Upper Priory.

The Medical Staff attend at the Out-patient Department, Upper Priory, on the following days at 2 p.m. :—

Monday	-	-	-	-	Mr. FURNEAUX JORDAN.
					Mr. HEWETSON.
Tuesday	-	-	-	-	Dr. EDGE.
					Dr. MARY STURGE.
Wednesday	-	-	-	-	Mr. CHRISTOPHER MARTIN.
					Mr. HEWETSON.
Thursday	-	-	-	-	Dr. ANNIE E. CLARK.
					Dr. EDGE.
Friday	-	-	-	-	Mr. FURNEAUX JORDAN.
					Dr. MARY STURGE.

Operations at the In-patient Department : 9 a.m. daily.

Clinical instructions will be given by the Hon. Surgeons at the above mentioned hours of attendance.

Further particulars may be obtained from the Secretary to the Medical Board—Dr. Annie E. Clark,

**THE FOLLOWING INSTITUTIONS ARE RECOGNISED BY
THE UNIVERSITY FOR GENERAL AND SPECIAL
CLINICAL INSTRUCTION.**

FOR GENERAL CLINICAL PURPOSES.

The General Hospital.

The Queen's Hospital.

FOR FEVERS.

The Birmingham City Hospital (Lodge Road).

FOR LUNACY.

Public Vaccinator.

Birmingham Teaching Station at 144, Hockley Hill.

*Regulations according to the Instructions of the Local
Government Board for 1912—1913.*

THREE COURSES OF INSTRUCTION WILL BE GIVEN:

1st.—Commencing the second Thursday in October.

2nd.—Commencing the third Thursday in January.

3rd.—Commencing the fourth Thursday in April.

The day of holding the class is subject to alteration, to meet the convenience of the class.

An attendance book is provided, wherein every attendance is registered by the signature of the pupil, with other details.

The course of instruction consists of at least six demonstrations and addresses.

The Class commences punctually at 1.30 p.m. each day, at which time the Register will be open.

FEE: £1 11s. 6d., payable to Dr. W. H. LINE, on entrance.

LIBRARY OF THE BIRMINGHAM MEDICAL INSTITUTE.

By the courtesy of the Committee of the Medical Institute, students of the Faculty of Medicine are admitted to read in the Library of the Institute under the following conditions:—

1. Admission is confined to—

- (a) 3rd, 4th, and 5th years' students.
- (b) 1st and 2nd years' students reading for higher examinations.
- (c) Sons of Members of the Institute, of any year, whether reading for higher examinations or not.

Classes *a* and *b* must apply to the Dean of the Medical Faculty for a card of recommendation, which they must send, together with their letter of application, to the Hon. Secs. of the Institute. Class *c* must apply direct to the Hon. Secs.

2. Students are only admitted to the Library Hall, and *not* to the Reading Room or the Smoking Room.

3. It is understood that the Hall is not to be used for the reading of text-books.

4. Each student will receive a printed ticket of admission from the Librarian. He must show this whenever required, and must get it renewed every year.

DENTAL DEPARTMENT.

THE DENTAL CURRICULUM.

The teaching of Dentistry is undertaken by the University, acting in association with the Birmingham Dental Hospital.

Special Courses of instruction are provided in connection with the Faculty of Medicine of the University for the whole of the Dental Curriculum.

The courses of instruction qualify not only for the Degrees and Diploma of the University of Birmingham, but for the Diplomas in Dental Surgery of all Licensing Bodies.

It is strongly recommended that students taking out their courses of study in the University of Birmingham should take the Dental Degrees or License of that University for which the University courses of study are specially designed; but students may, if they so desire, also prepare in this University for the examinations of other Licensing Bodies.

THE DENTAL CURRICULUM may be divided into (1) Preliminary Education, (2) Mechanical Dentistry, (3) Professional and Hospital Study.

PRELIMINARY EXAMINATION.—In order to be registered as a Dental Student, one of the preliminary examinations fulfilling the requirements of the General Medical Council must be passed. Students preparing for the Degree in Dental Surgery must pass the Matriculation Examination or its equivalent.

REGISTRATION AS A DENTAL STUDENT by the General Medical Council should be effected as soon as a recognised Preliminary Examination has been passed. Forms of Registration may be had on application to the Dean of the Medical Faculty at the University.

MECHANICAL DENTISTRY.—The student devotes two years to instruction in Dental Mechanics in the Mechanical Laboratory of the Dental Hospital, or under the direction of a Registered Dental Surgeon.

Any part of the period (two years) required for instruction in Mechanical Dentistry may be taken prior to registration, but this does not in any way lessen the period of professional study *which must be taken after registration as a Dental Student.*

Before admission to the Final Examination for a Diploma in Dental Surgery, the candidate must produce evidence of having been engaged in the acquirement of professional knowledge during four years, and for the degree of Bachelor of Dental Surgery during five years, subsequent to the date of registration as a Dental Student.

PROFESSIONAL AND HOSPITAL STUDY.—This part of the curriculum extends over at least two years, and comprises :—

(1) Lectures and Practical Classes in the Medical School;

(2) Special Dental Lectures and Dental Hospital Practice;

(3) General Hospital Practice.

Particulars relating to the course of instruction at the University may be had from the Hon. Secretary of the Dental Department at the University.

ENTRANCE SCHOLARSHIP FOR DENTAL STUDENTS.

1. One Scholarship is offered annually of the value of £37 10s.

2. It is awarded to the student who, entering for the Dental Degree of the University in October, or having entered not earlier than the previous April, shall pass the best examination in the subjects studied during his apprenticeship.

3. Candidates must be under the age of twenty-one years.

4. Application for admission, together with a certificate of birth, must be sent to the Dean of the Medical Faculty on or before October 12th.

CLINICAL INSTRUCTION.

The General and Queen's Hospitals offer every advantage for the study of general Surgery and Medicine, the arrangements for which are carried out under the direction of the Birmingham Clinical Board. Special classes for Dental students are held in Clinical Medicine and Clinical Surgery, and Tutorial Classes are arranged for Junior and Senior Dental Students at both Hospitals.

REGULATIONS FOR DEGREES IN DENTAL SURGERY.

1. The Degrees conferred by the University are those of Bachelor and Master of Dental Surgery (B.D.S. and M.D.S.).

2. All candidates for these Degrees must pass the same Matriculation Examination as that required from candidates for Medical Degrees.

3. The Degree of Bachelor of Dental Surgery is not conferred upon any candidate who has not obtained the License in Dental Surgery of the University, or from some body legally entitled to confer such qualification. The candidate is not eligible for the Degree until a period of twelve months has elapsed from the passing of his examination for the License in Dental Surgery. Of this period at least six months must be spent in the Dental Department of a General Hospital approved by the University.

4. *A.* In addition to the License in Dental Surgery the candidate must produce evidence that he has attended the Courses required by Medical Students of the University in the following subjects and passed the Examinations held in the same for Medical and Surgical Degrees :—

- (a) Chemistry, and Practical Chemistry.
- (b) Physics, and Practical Physics.
- (c) Elementary Biology.
- (d) Anatomy, and Practical Anatomy.
- (e) Physiology, and Practical Physiology.

B. That he has attended the following Courses, and passed the class examinations held in each of these subjects.

- (f) One Special Course of Lectures on Medicine.
- (g) One Special Course of Lectures on Surgery.
- (h) Pathology and Bacteriology.

C. That he has attended Courses, and passed the class examinations in :—

- (k) Dental Histology and Patho-Histology.
- (l) Comparative Dental Anatomy.
- (m) Dental Surgery and Prosthetic Dentistry.

D. That he has received instruction in the Clinical Examination of living cases at the Dental Department of a General Hospital for a period of not less than six months.

E. That he has received a course of practical instruction in the administration of the Anæsthetics usually employed in Dental Practice.

5. The Final Examination will deal with the subjects in Classes *C* and *D*.

6. On the expiration of twelve months from the date of passing the Examination for the Degree of Bachelor of Dental Surgery, the candidate will be eligible for that of Master of Dental Surgery.

7. For this Degree candidates will be required to submit a Thesis containing original work and investigation in some subject connected with Dentistry, which Thesis shall be submitted to examiners to be nominated by the Dental Advisory Board. The Degree will be awarded or withheld according to the report of these examiners.

REGULATIONS FOR THE DIPLOMA IN DENTAL SURGERY.

I.—In the Faculty of Medicine there is a Diploma in Dental Surgery, entitled Licentiate in Dental Surgery (L.D.S.), which is registrable in accordance with the Dentists Act, 1878 (41 to 42 Vict. xxxiii., Clause xviii.)

II.—The courses of study and the number and nature of the examinations qualifying for the Licentiate in Dental Surgery are prescribed by Regulations.

Regulations.

1. Candidates for the Diploma are required to pass such a preliminary examination as may from time to time be required by the General Medical Council for Registration as a Dental Student.

2. Candidates before admission to the Final Examination are required to furnish evidence (i.) of having attained the age of twenty-one years, and (ii.) of hav-

ing been engaged in professional study for a period of at least four years subsequent to the date of Registration as a Dental Student by the General Medical Council.

3. Candidates for the Diploma are required to present certificates of attendance upon the several courses of study prescribed by the University Regulations for attendance, and to satisfy the Examiners in four examinations, viz. :—

- (a) The First Examination.
- (b) The Second Examination.
- (c) The Third Examination.
- (d) The Final Examination.

First Examination.

4. Candidates before presenting themselves for the First Examination are required to furnish (i) a certificate of Registration as a Dental Student by the General Medical Council, and (ii) Certificates of having satisfactorily attended courses in the prescribed subjects for the First Examination, viz. :—

- (a) Chemistry, Lectures and Laboratory work (6 months).
- (b) Physics, Lectures and Laboratory work (6 months).

NOTE.—Attendance upon these courses may be made at any Institution recognised for this purpose by the University.

The Examination consists of one written Paper in Chemistry and one in Physics, and a Practical Examination in both subjects.

Candidates must present themselves in *both* subjects. A candidate may be allowed to pass in *one* subject provided he has obtained a reasonable standard of marks in the subject in which he fails.

Second Examination.

5. Candidates before presenting themselves for the Second Examination must have passed the First Examination, and are required to furnish Certificates of having served for a period of not less than two

years pupilage in Mechanical Dentistry, either with a Registered Dentist or in the Mechanical Laboratory of a Dental Hospital recognised for this purpose by the University, and of having attended in the University the following courses for the Second Examination:—

- (a) Dental Mechanics Lectures (3 months).
- (b) Dental Metallurgy Lectures and Practical (6 months).
- (c) Dental Materia Medica Lectures (3 months).

The Examination consists of a written paper in Dental Metallurgy and a practical and oral Examination in Mechanical Dentistry.

Candidates must present themselves in *both* subjects.

A Candidate may be allowed to pass in *one* subject provided he has obtained a reasonable standard of marks in the subject in which he fails.

NOTE.—At the Examination in Mechanical Dentistry, Candidates will be required to provide themselves with the following instruments, viz.:—

Wax Spatula, double-ended. Sculptors. Gouge and Handle. Vulcanite Files. Gold Files. Pliers, Pin-roughing and Bending, and Snipe-nose. Cutting Nippers. Broaches and Handles. Fret Saw. One Mellotte's Moldine Outfit. One Bunsen Burner (laboratory). Fine Saws. Chasers, Special. Blowpipe for Mouth, 12-inch. Solder Tweezers. Crown Holder. Shears, curved. Collar Pliers, N.P. Pin Nippers, plain. Rivetting Hammer. Dividers, 4½-inch.

The following instruments will be supplied by the Dental Hospital, viz.:—

Hammers for striking up plates. Horn Mallets. Ordinary casting materials and apparatus.

Third Examination.

6. Candidates before presenting themselves for the Third Examination must have passed the Second Examination, and are required to present certificates of

having attended in the University the following courses prescribed for the Third Examination, viz :—

- (a) Anatomy, Lectures (6 months).
- (b) Anatomy, Practical (12 months).
- (c) Physiology, Lectures (6 months).
- (d) Physiology, Practical Histology (3 months).
- (e) Human and Comparative Dental
Anatomy, Lectures (6 months).
- (f) Dental Histology, Practical (3 months).

The Examination consists of :—

A Paper and Oral Examination in Anatomy, a Paper and an Oral Examination in Physiology, a Paper in Dental Anatomy and Dental Histology, and an Oral Examination in Dental Anatomy and Dental Histology.

Candidates must present themselves in *all* subjects of the Examination.

A Candidate may pass in *two* subjects, *i.e.*, (a) Anatomy and Physiology, or (b) Dental Anatomy and Dental Histology, provided he has obtained a reasonable standard of marks in the subjects in which he fails.

Final Examination.

7. Candidates before presenting themselves for the Final Examination are required to have passed the Third Examination and to furnish certificates of having attended in the University, or in a Hospital recognised for the purpose by the University, courses of instruction in the subjects prescribed for the Final Examination, viz. :—

- (a) Medicine Lectures for Dental Students (6 months).
- (b) General Surgery Lectures for Dental
Students (6 months).

- (c) Dental Surgery, Lectures (6 months).
- (d) Dental Pathology and Bacteriology, Lectures (3 months).
- (e) Dental Pathology (Practical) (3 months).
- (f) Dental Bacteriology (Practical) (1 month).
- (g) Clinical Dental Surgery (6 months).
- (h) Practical instruction in the administration of the Anæsthetics usually employed in Dental Practice.
- (i) Clinical Medicine and Surgery (at a recognised General Hospital for twelve months).
- (j) The practice of a Dental Hospital or the Dental Department of a General Hospital recognised by the University for a period of two years.

The Examination consists of :—

A Paper in General Surgery and Surgical Diseases of the Mouth, a Paper and Oral Examination in Dental Surgery and Dental Pathology, a Practical Examination at the Dental Hospital.

NOTE.—Candidates may be examined :—

- (a) On the treatment of Dental Caries, and may be required to prepare and treat teeth by filling with gold or other material, by inlaying or by crowning, or to do any other operation in Dental Surgery.

(Candidates must provide their own instruments.)

- (b) On the Mechanical and Surgical treatment of the various irregularities of children's teeth.

Candidates must present themselves in *all* the subjects of the Examination, and failure in any one part of the Examination entails failure in all.

Examinations for the Diploma in Dental Surgery are held twice a year, viz., June and December.

REFERRED CANDIDATES.

Candidates referred at the L.D.S. Examinations are required, before being re-admitted for Examination, to take out additional instruction, for a period of at least three months, subsequent to the date of reference, in the subject or subjects in which they failed to satisfy the Examiners.

The referred instruction shall be of a practical nature in the subjects where practical work forms part of the course.

In Mechanical Dentistry, the referred instruction must be for a period of *six months*, under the conditions specified by regulations.

All Candidates referred at the Final Examination are required to attend additional instruction in Practical Dental Surgery at a recognised Dental Hospital for a period of at least *six months*, in addition to any further referred instruction which the Board of Examiners may require.

FEES.

DENTAL SCHOOL.

Membership Fees.

A Dental Student can enter either as a Composition or Occasional student, *i.e.*, he can pay his fees in two instalments or as he takes out his classes. Composition students pay a MEMBERSHIP FEE of £5 5s., once for all; occasional students pay £1 11s. 6d. for each academic year during which they may be in attendance upon lectures. The Membership Fee for Three Months' Attendance is 12s. 6d. The regulations in connection with the attendance of medical students (see page 519) apply also to the Dental Students, whose composition fee, however, covers normally three and not five years.

Microscopes.

For statement as to Microscopes, which applies only to students reading for Degrees and not to L.D.S. students, see page 517.

Composition Fees.

The Composition Fee for the courses required for the L.D.S. of the University, or any of the Corporations alone, is £60, payable in two annual instalments at the commencement of the first and second years; that for the courses required for the L.D.S. and the degree in Dentistry of the University is £75; that for the L.D.S. in combination with the M.R.C.S. and L.R.C.P. is £85; and that for the M.B., Ch.B., and B.D.S. is £95. All of these composition fees are payable in two annual instalments at the commencement of the first and second years.

Each of these fees covers the cost of the courses given at the University for the qualifications indicated, but does not include fees for Hospital teaching.

Incidental Fees.

These fees are intended to cover the cost of apparatus, material, etc., used in the various particular classes. They are governed by the same rules as those applying to medical students, and are payable to the Secretary.

All Students are requested to take notice that they must attend **at least two-thirds** of the lectures and practical classes of each course, and that the Schedules of those who do not observe this regulation will not be signed. They must attend the class examinations in Chemistry and Physics, and are advised to attend also all other class examinations.

Syllabus of Lecture Courses.

I. SPECIAL SUBJECTS.

DENTAL SURGERY AND PATHOLOGY.

Lecturer: F. E. HUXLEY, M.D.S., M.R.C.S., L.D.S.

Irregularities of the teeth and jaws; general principles of their correction.

Dental Caries, its causes and treatment.

Abrasion, erosion and fracture of teeth.

The dental pulp, its diseased conditions and their treatment.

Diseases of the gums and periosteum.

Alveolar abscess. Dental Cyst.

Diseases of the antrum.

Odontomes, and tumours of parts adjacent to the teeth.

Neuralgias and other reflex disorders.

DENTAL MATERIA MEDICA.

Lecturer: W. THOMPSON MADIN, B.D.S.; L.D.S., Eng.

The drugs and remedies used in dentistry generally.

New drugs as they appear.

Prescribing.

Composition of filling materials.

Anæsthetics: General and local.

DENTAL ANATOMY AND PHYSIOLOGY.

HUMAN AND COMPARATIVE.

Lecturer: JOHN HUMPHREYS, M.D.S., L.D.S.I., F.L.S.,
F.S.A.

The method and use of the study of odontology.

The general and minute structure and composition of the teeth, and their modifications in fishes, reptiles, and mammals.

The arrangement and uses of the teeth of man and typical animals.

Structure of the gum, periosteum, and dental pulp.

Development of the teeth.

Development of the jaws, alveoli, etc., and their anatomical relations.

Mastication and the oral secretions.

This course is fully illustrated by the large collection of skulls, teeth, etc., contained in the Museum, as also by microscopic preparations and drawings, and a series of lantern slides.

DENTAL HISTOLOGY AND DENTAL PATHOLOGY.

Lecturer: A. W. WELLINGS, B.D.S., L.D.S.

1.—DENTAL HISTOLOGY. (Lectures and Practical.)

The course will be held in the Physiological Laboratory on each Monday throughout the Summer Session, from 2 to 4 p.m.

The technique of microscopical preparation.

The structure and composition of Nasmyth's Membrane, enamel, dentine and cementum in man.

The comparative minute anatomy of the teeth.

The pulp and other soft tissues of the teeth and mouth.

The development of the teeth in man and in some of the lower animals.

II.—DENTAL PATHOLOGY. (Lectures and Practical.)

This course will be held in the Pathological Laboratory from February to March, during the Winter Session, on Tuesdays and Fridays, from 2 to 3 p.m.

Enamel, dentine, cementum—developmental defects and acquired pathological lesions.

Dental caries.

The dental pulp—hyperæmia, inflammation; injuries and degenerations.

Periodontal membrane,—Inflammatory conditions and tumours.

Pathological modifications of the muco-periosteum.

Oral tumours.

DENTAL MECHANICS.

Lecturer: A. E. DONAGAN, L.D.S. (Edin.), M.A.
(Cantab.)

Introduction and general principles of Prosthetic Dentistry.

Treatment of the mouth preparatory to the insertion of artificial dentures.

Materials used and methods employed in taking impressions of the mouth.

Casting in plaster and metal.

Methods of obtaining the correct articulation of the teeth.

Vulcanite work.

- (a) The preparation of dental rubber.
- (b) Artistic arrangement of teeth.
- (c) Flasking, packing, and vulcanizing.
- (d) Clasps and strengtheners.
- (e) Methods of weighing lower dentures.

Plate and tube work.

Combination work.

Cast metal dentures.

Continuous gum work and section blocks.

Varieties of crown and bridge work.

Mechanical treatment of Fractured Maxillæ.

The course will be fully illustrated by the exhibition of models, appliances, and diagrams.

DENTAL METALLURGY.

Feeney Professor: THOMAS TURNER, M.Sc., A.R.S.M.,
F.I.C.

Lecturer: O. F. HUDSON, M.Sc., A.R.C.S.

Assistant Lecturer: HENRY IVOR COE, M.Sc.

A course of both theoretical and practical instruction is given in the above subject.

During the Winter Session, twenty lectures are delivered on Saturdays, at 10 a.m. These deal with the physical, mechanical, and chemical properties of metals; oxidation and reduction; fuel, furnaces and furnace materials; melting, casting and working in metals; the properties of gold, silver, copper, tin, lead, zinc, mercury and other metals and of alloys and amalgams, so far as they are applied in dentistry.

A Practical Class is held in the Metallurgical Laboratory on Saturdays, from 11 till 1, during the Winter Session, to enable students to perform experiments and operations illustrative of some of the more important subjects dealt with in the lectures.

The instruction is given at the University Buildings, Edgbaston.

MEDICINE FOR DENTAL STUDENTS.

Lecturer: T. STACEY WILSON, M.D., F.R.C.P.

Introduction : Aims of medicine, etc.

Diseases of the alimentary system.

Diseases of the circulatory system.

Diseases of the respiratory system.

Diseases of the urinary system.

General diseases.

Summary of special bearings of medicine upon the work of the Dental Surgeon.

GENERAL SURGERY FOR DENTAL STUDENTS.

Lecturer: WILLIAM F. HASLAM, M.B., Ch.B., F.R.C.S.

Inflammation.

Inflammatory affections of buccal cavity.

Specific diseases.

Diseases of bones.

Injuries.

Fractures.

Injuries to blood vessels.

Injuries to nerves.

Injuries to joints.

Injuries to face and neck.

Tumours.

Cysts.

Hare-lip and cleft palate.

Affections of maxillary and frontal sinuses.

Affections of salivary glands.

Affections of cervical lymphatic glands.

Enlarged tonsils and adenoids.

Closure of jaws.

Bronchocele.

II. *GENERAL SUBJECTS.*

Anatomy and Practical Anatomy (p. 528), Physiology and Practical Physiology (p. 531), Chemistry and Practical Chemistry (p. 535), Physics (p. 541), Elementary Biology (p. 545), Pathology and Bacteriology (p. 547). (See Faculty of Medicine.)

BIRMINGHAM DENTAL HOSPITAL,

GREAT CHARLES STREET.

Dean—W. THOMPSON MADIN, B.D.S., L.D.S.

Consulting Physician—

SIR ROBERT SIMON, M.D., F.R.C.P.

Consulting Surgeon—

JORDAN LLOYD, M.D., F.R.C.S., M.Sc.

Consulting Dental Surgeon—

FRANK E. HUXLEY, M.R.C.S., M.D.S., L.D.S.

Dental Surgeons—

F. W. RICHARDS, L.D.S.

F. H. GOFFE, L.D.S.

A. E. DONAGAN, M.A., L.D.S.

J. MOUNTFORD, L.D.S.

W. T. MADIN, B.D.S., L.D.S.

J. E. PARROTT, L.D.S.

W. M. KNOTT, L.D.S.

Assistant Dental Surgeons—

G. F. CALE-MATTHEWS, L.D.S.

A. H. PARROTT, B.D.S., L.D.S.

C. H. HOWKINS, M.R.C.S., L.R.C.P., L.D.S.

S. H. ROE, L.D.S.

A. W. WELLINGS, B.D.S., L.D.S.

W. BOWATER, B.D.S., L.D.S., M.R.C.S., L.R.C.P.

Orthodontics Officer—

G. F. CALE MATTHEWS, L.D.S.

Anæsthetists—

S. W. HAYNES, M.D., C.M.

W. J. MCCARDIE, B.A., M.B., B.C.

R. H. ROLLINSON WHITAKER, F.R.C.S.

R. W. TAYLOR HADDOW, M.B., C.M.

L. KIRKBY THOMAS, M.R.C.S., L.R.C.P.

H. EWAN WALLER, M.R.C.S., L.R.C.P.

G. W. CRAIG, L.R.C.P., L.R.C.S., L.F.P.S., R.C.S.

Demonstrators—

W. C. RETALLACK, L.D.S.

HAROLD ROUND, M.D.S., L.D.S.

HUMPHREY F. HUMPHREYS, M.B., Ch.B., B.D.S., L.D.S.

Stipendiary Dental Surgeon—

C. W. RANDALL, L.D.S.

House Surgeon—

N. A. AUSTIN, L.D.S.

Prosthetic Department—

W. M. KNOTT, L.D.S.

S. H. ROE, L.D.S.

The Dental Hospital is situated in Great Charles Street, within a few minutes walk of the University. It has ample accommodation for the teaching of the practical side of the curriculum for Dentistry.

On the ground floor are a large waiting hall, private rooms for the Hon. Staff and Nurses, Museum and Class rooms, students' cloak-room, lavatories and common room.

On the first floor are a large lecture hall, patients' waiting room, examination and extracting rooms, and the anæsthetic department, consisting of operating room, separate waiting and recovery rooms for male and female patients.

On the second floor are the filling and prosthetic departments, equipped with all the latest requirements for teaching and training dental students in mechanical, prosthetic, and operative work.

The operating chairs are of the latest hydraulic-pump pattern, the front row being fitted with fountain spittoons and saliva ejectors. The electric current is supplied for lighting and motive power for dental engines and lathes; hot and cold water is laid on in all the departments. The heating of the building is on the low-pressure radiator system.

The Hospital clinic is large and varied, and affords ample opportunity to students to become dexterous in the treatment of teeth and familiar with the varied methods of overcoming the difficulties of their profession.

There is an annual attendance of about 13,000 patients, and the operations average 30,000, including gold and other fillings, and many cases of porcelain inlays, gold and porcelain crowns, bridges, and regulation cases.

The filling rooms have space for forty-five operating chairs.

RULES AND REGULATIONS FOR STUDENTS.

Admission.—Students are admitted to this Hospital on the understanding that it is their intention to obtain the Dental Diploma of the University or one of the Royal Colleges of Surgeons of the United Kingdom *cum curriculo*, and shall produce a certificate of registration as a Dental Student by the General Medical Council. They shall also sign their names as willing to conform to these rules and regulations.

The Dean receives intending students on the first Thursday in April and October for the purpose of registration; they are required to bring their fees and certificates of registration as Dental Students.

Attendance.—The Hospital is open daily at nine o'clock (Sundays excepted), and students must attend at that hour unless their attendance is required at one of the General Hospitals or the University.

The Hospital must be attended for two years consecutively, irrespective of University vacations.

Leave of absence, when desired, must be obtained (in writing) from the Dean, and a medical certificate supplied in case of illness extending over a week.

An attendance sheet is provided, and students must see that their names are duly entered thereon.

Instruments.—Every student will be required to obtain Instruments for the Hospital practice before his attendance will be recognised. A list of these will be furnished to each student on entry.

Dresserships.—Regular days will be appointed by the Stipendiary Dental Surgeon for each student to attend in the Extracting, Anæsthetics and Conservation Rooms. Cases for treatment, and operating chair, will be allotted to students by the Dental Officers in attendance. Students shall enter all appointments made with patients on the papers provided for this purpose, with the particulars of the operation. Every operation must be carefully registered in the Hospital Books.

Requirements of Curriculum.—During the two years' attendance students will be required :—

- (a) To attend preliminary course of instruction.
- (b) To attend as dressers in the Extracting and Anæsthetic Rooms.
- (c) To perform filling and other conservative operations.
- (d) To treat at least four regulation cases mechanically.
- (e) To make and insert at least six dentures; also a minimum of eight crowns, a specified number being of Richmond and collared type.
- (f) To attend the special courses of Clinical Lectures and Demonstrations.

Schedules.—Students are required to apply to the Dean for their Schedules to be signed three months previous to the date of the examination by the Licensing Body, and no schedule will be passed unless the student has given satisfaction in his work and attendances, and acquitted himself satisfactorily at the examinations.

Conduct.—Students must consider themselves strictly under the control of the Officers of the Hospital. All unnecessary conversation must be avoided, and quietness and gentlemanly conduct towards the patients observed.

Demonstrations.—In the first year instruction in Dental Mechanics and Prosthetics is given during the afternoons. Patients are seen on Tuesday and Thursday afternoons from 2 to 4, and this work may be done during the University vacations.

Attendance is also required at the preliminary three months' course of Demonstrations given during the Summer or Autumn Terms from 9 to 11 a.m. on fixed days by arrangement. No student will be allowed to undertake any operation until he has attended to the satisfaction of the Demonstrators and passed an examination in the subjects studied at the Demonstrations.

The student after having completed the courses of demonstrations, and after passing the examination held by the Demonstrators, is appointed a dresser in the Extraction and Conservation Rooms, where he will receive instruction in Operative Work.

A six weeks' course of Demonstrations on Practical Dental Mechanics is given to students preparing for their examination in Mechanical Dentistry; the days and hours are specially arranged. All students are required to attend.

A special course of Demonstrations in Clinical Dental Surgery is arranged for students reading for their final examination. Attendance upon this course is compulsory upon all students.

Operative Work.—Each student will be required to do examples of the various types of filling in a satisfactory manner.

Plastic filling, amalgam, osteo and gutta-percha.

Gold filling (Cohesive, non-cohesive and tin).

Inlay work.

Crown and bridge.

Regulation Work.—Each student will keep a record of cases of Regulations undertaken by him.

Each student is required to treat the following types of regulation cases:—

Pushing one or more upper incisor or canine teeth over the bite, or rotating same.

Retraction, etc., of upper bicuspid and canines after extraction of sixth year molars.

Expansion of arch.

Retraction in cases of superior protrusion.

The mechanical appliances must be made at the Hospital.

Anæsthetics.—A course of six Lectures on the Administration of Anæsthetics is given each year during May. Each student also receives instruction for at least one day per week from four to six months in extracting under anæsthetics under the Dental Officers in charge of the Anæsthetic rooms.

Each student receives instruction in the administration of Nitrous Oxide for at least twelve mornings (three months) from one of the Hon. Anæsthetists.

Mechanical and Prosthetic Work.—This department is open Monday to Friday from 9 a.m. to 6 p.m., Saturday 9 a.m. to 1 p.m. for making, under the supervision of a skilled teacher, dentures and regulating appliances.

Students will be appointed to attend in rotation by the Senior Honorary Officer of the Department.

Pupils are taken for the necessary two years instruction in mechanical work. Application for particulars to be made to the Dean.

Examinations.—Annual Compulsory Examinations are held to test the progress of students; they are arranged as follows

First Year.

- 1.—Preliminary work, extractions and simple fillings at end of Demonstrators' course.
- 2.—Series of specimens of mechanical work, and mechanical examination.
- 3.—Operative work at the end of the first year.

Second Year.

- 1.—Advanced work in root treatment, fillings, crowns and inlays.
- 2.—Regulation cases, models, and appliances, illustrating the students' work.
- 3.—Examination in Anæsthetics and Operations.
- 4.—Ash's Prize for a special essay.

A Prize with a Certificate will be awarded in each of the above sections if sufficient merit is shown, and the manner in which students perform the duties of their dresserships, and the regularity of their attendances will be taken into consideration in awarding the same. Other special prizes are also awarded.

UNIVERSITY OF BIRMINGHAM MEDICAL SOCIETY

WITH WHICH IS INCORPORATED THE

QUEEN'S COLLEGE MEDICAL SOCIETY.

President : Mr. W. BILLINGTON.

Hon. Treasurer : Dr. L. G. PARSONS.

Hon. Secretary : Mr. S. G. BARLING.

This Society was founded at the Queen's College in 1877, J. H. Palmer, Esq., being the first President. It is thus the oldest Society in the University, and has had a career of considerable usefulness. Membership is limited to past and present members of the Birmingham Medical School and to past and present residents of the General and Queen's Hospitals. Meetings are held every alternate Wednesday, at 8 p.m., in the Founder's Room, University Club, when patients, morbid specimens, instruments, etc., are exhibited, and papers read. The annual meeting takes place in October, when the retiring President gives an address. The object of the Society is especially to aid students in their medical studies.

The annual subscription is 2s. 6d., payable to the Treasurer.

DENTAL STUDENTS' SOCIETY.

President : C. W. RANDALL, L.D.S.

President-Elect : E. VAUGHAN TOMEY, L.D.S.

Vice-President : J. S. YOUNGSON, L.D.S.

Hon. Secretaries : R. L. BOOTH and P. J. WAKLEY.

Hon. Treasurers : J. C. YEOMANS and

H. G. S. THORNTON.

This Society was founded in 1886, and holds its meetings in the New Dental Hospital, Great Charles Street, once a fortnight during the Winter Term. The membership roll numbers over 100, and comprises past and present members of the Birmingham Dental School, and the officers of the Dental Hospital.

The Society is, however, essentially a Students' Society, its object being primarily "the furtherance of Dental Science" by means of the reading of papers, casual communications and the exhibition of living cases by students at the meetings. But combined with this object is another—that of promoting, to some extent at least, social life amongst its members in the University, and of serving as a connecting link between the now busy practitioner and his "alma mater." With this motive there are held annually a dinner, a conversation, and a pic-nic in the summer, while two evenings are usually given up to debates or lantern exhibitions. Every Dental Student should become a member of the Society, as he thereby meets members of the Dental profession in Birmingham, and derives much pleasure and valuable knowledge not to be gained from text books.

There is a prize, value Three Guineas, awarded annually by the Midland Dental Manufacturing Company, for the best paper read before the Society.

QUEEN'S MEDICAL MAGAZINE.

Hon. Secretary: B. WOOD-WHITE.

Chairman of Editorial Board: G. H. ALABASTER.

Hon. Treasurer: OSCAR PARKES.

This Magazine, founded in May, 1895, is published twice a term, *i.e.*, six times a year. The contents consist of short articles dealing with subjects, medical or otherwise, likely to be of interest to the students generally—reports on interesting hospital cases, and proceedings of various Medical Societies, athletic news, and general gossip of the Medical School. The object of the Magazine is to form a connecting link between the various sections of the Birmingham Medical School and between past and present students; the subject matter is arranged as far as possible in accordance with this idea.

Contributions or correspondence should be sent to the Hon. Secretary at the University Club.

DAY TRAINING COLLEGE.

FOR THE TRAINING OF TEACHERS IN PUBLIC
ELEMENTARY SCHOOLS.

Master of Method (Men):

FRANK ROSCOE, M.A.

Assistants : { LAWRENCE W. EDWARDS, B.Sc., F.G.S.
FRANK THORNLEY, B.A.

Teacher of Music : ARNOLD GRIFFIN.

Head Mistress (Women):

ANNE HOLLINGWORTH JOYCE, M.A.

Assistant Mistresses :

FLORENCE C. M. CLARK, B.A. (Lond.).

MILDRED F. FIELD, B.A. (Lond.).

EDITH M. HENLEY, B.A. (Lond.).

MARGARET S. CLEGHORN, M.A. (Edin.).

LILY HARRISON, Nat. Sc. Tripos (Camb.).

Teacher of Physical Training : DOROTHY BOTT.

DAY TRAINING COLLEGE.

In connection with the University there is a Training College, with departments for men and women, constituted under the regulations of the Board of Education, with the object of preparing students to become certificated teachers in Public Elementary Schools.

The ordinary Course covers two years, permission to reside for a third year being granted by the Board of Education in certain cases of special fitness.

Before admission Candidates must satisfy the following requirements :—

- (a) Obtain a first or second class in the King's Scholarship Examination or pass one of the examinations accepted by the Board of Education as equivalent thereto.

- (b) Satisfy the Medical Officer of the College as to their general health and physical fitness to undertake the work of teaching.
- (c) Have attained the age of 18 years on the 1st September immediately preceding admission.
- (d) Sign a declaration that it is their bona-fide intention to take up the work of teaching in public elementary schools.

After admission, students pursue in general subjects the curriculum of the University, this Course being recognised by the Board of Education as equivalent to Part II. of the Certificate Syllabus. In addition, they receive professional training in the form of:—

- (a) Lectures on the theory and practice of teaching.
- (b) Practice under supervision in certain of the Council Schools of the City.
- (c) Criticism and demonstration lessons.

This Course, with lessons in Reading, Music, etc., is intended to prepare for the Examination held annually by the Board of Education in the subjects of Part I. of the Certificate Syllabus.

During residence an annual grant of £25 in the case of men, and £20 in the case of women is received from the Board of Education. From this sum is deducted the University fee, amounting annually to £10. The remainder serves as a contribution towards the cost of board and lodging, books, examination fees, etc.

Students must reside with their parents or guardians, or in lodgings approved by the Master of Method or the Head Mistress, who exercise general supervision over their conduct and studies.

For forms of application and other particulars application should be made to

MR. F. ROSCOE (Men),

MISS JOYCE (Women),

The University of Birmingham.

REGULATIONS FOR OFFICIAL DEGREES OPEN TO MEMBERS OF THE TEACHING STAFF OF THE UNIVERSITY.

Any Lecturer, Assistant Lecturer or Demonstrator may, on the recommendation of his Professor, apply for an Official Degree in the Faculty in which he teaches, provided that at the date of the Degree Congregation at which the degree would be conferred he shall have completed two complete academic years of service in the position he holds. Such candidates for Official Degrees are required to submit copies of their contributions to Science, Literature, or Medicine, or a Thesis specially prepared for the occasion. These papers will be submitted to Assessors, one of whom shall be an external examiner, and in the event of a Thesis having been submitted, the Assessors will be at liberty to question the candidate upon it, should they think fit, or to call upon him to pass any examination they may think proper. On the report of the Assessors the Faculty will decide in each case whether they will recommend the Senate to nominate the candidate for a degree.

Candidates who have no degree may be admitted in the first instance to the Degree of Bachelor only.

Candidates who already possess a degree may be admitted to such degree as the Faculty may decide, upon the report of the Assessors appointed to examine the credentials which they submit.

There will be no fees required for these official degrees.

These regulations do not apply to members of the teaching staff of the Day Training Colleges for Teachers.

N.B.—Members of the Junior Staff who have received one Degree under the foregoing Regulations are required to compete for higher Degrees on the same terms as other graduates of the University and pay the usual fees, but they are not required to attend lectures or other courses of study in preparation for a higher Degree.

Forms of application may be obtained from the Registrar, and should be returned to him with two typewritten or printed copies of the Thesis on or before May 2nd.

REGULATIONS FOR AD EUNDEM DEGREES.

Graduates of other Universities may, under certain conditions, be admitted to Ad Eundem Degrees in Arts and Science, namely, B.A. and B.Sc. This privilege is limited to persons who have been in some way specially connected with the University, and persons who are residents in the City and Midland district. The original Degrees on which the candidates base their application must have involved a course of study at a University or University College of the same length as is required for the corresponding Degree in Birmingham. Each individual case will be specially considered by the Senate, and if recommended must be confirmed by the Council. A candidate holding the Degree of B.A. or M.A. of another University will only be eligible to receive the Degree of B.A. in this University, and a candidate holding a Degree of B.Sc., M.Sc., or D.Sc. of another University will only be eligible to receive the B.Sc. Degree of this University. A fee of £5 will be charged.

Holders of Ad Eundem Degrees will be eligible to become members of the Guild of Graduates, but will not be eligible to proceed to higher degrees, except under the ordinary Regulations for Graduates of other Universities.

Applications for the above degrees, with full particulars of the candidate's qualifications, should be addressed to The Registrar, The University, Birmingham.

CONSTITUTION OF THE GUILD OF GRADUATES.

1.—The Officers of the Guild shall be a Chairman, Vice-Chairman, Honorary Secretary and Assistant Honorary Secretary, elected as under Clause 11.

2.—The Guild may delegate any of its powers to committees, except the election of Representatives on the Court of Governors and of its own Officers.

3.—There shall be a Standing Committee whose duty shall be to transact the general business of the Guild. This Committee shall consist of the Officers of the Guild for the time being, and four other members elected as under Clause 11, together with those Representatives of the Guild on the Court of Governors who are not included in the above. Each Faculty shall be represented on this Committee.

Vacancies on the Standing Committee may be filled by the Committee itself pending the annual election of members.

4.—Together with the notices of the Annual General Meeting, a printed report shall be issued by the Secretary, which report shall contain :—

- (a) An account of the Guild Meetings held during the past year, and general statistical information.
- (b) A summary of the work done by the retiring Committee, together with a record of attendances at Committee meetings.
- (c) A signed report by the Representatives of the Guild on the Court of Governors.
- (d) A Financial Statement.

5.—There shall be two Ordinary Meetings of the Guild in each year: one, the Annual General Meeting, to be held in November, and one on Degree Day.

6.—Extraordinary Meetings of the Guild may be called by the Standing Committee, or by the Officers

of the Guild, or by the Secretary on the receipt of a request signed by twenty members of the Guild, such request to state the business proposed to be transacted.

7.—Twenty members of the Guild shall constitute a quorum.

8.—At all meetings of the Guild the Chairman shall have a second or casting vote. Except in the election of Representatives on the Court only those can vote who are present at meetings of the Guild.

9.—Members wishing to bring forward any business at meetings of the Guild must notify the Secretary at least three weeks before the date of such meeting.

10.—Five weeks before the Annual General Meeting the Secretary shall notify members of the Guild of the date of the meeting, of the vacancies on the Court of Governors that are to be filled, and of all other proposed business. Any four members of the Guild may sign a nomination for the Representatives on the Court, and all such nominations shall be included in a voting paper to be circulated subsequently among the members. Nominations for the Officers and other Members of the Standing Committee shall be made in the same manner. All nominations must be received by the Secretary at least three weeks before the date of the meeting.

11.—The election of the Officers and other Members of the Standing Committee shall be by ballot at the Annual General Meeting. Votes shall be counted by scrutineers appointed by the meeting, and such scrutineers shall be members who are not nominated for election.

12.—The election of Representatives on the Court of Governors shall be by voting papers, which must be received by the Secretary at least twenty-four hours before the time fixed for the General Meeting. The Counting shall be in the hands of the Officers of the Guild, who shall declare the results of the polling at the Annual General Meeting.

13.—The Representatives on the Court of Governors shall be elected for a term of three years. Two shall retire each year, one of whom shall not be eligible for re-election till after the lapse of twelve months. If both are re-nominated, only the one who receives the greater number of votes shall be re-elected.

(The order of retirement of the first six Representatives shall be determined by their place in the ballot.)

If any Representative resign before the lapse of his term of office, the vacancy shall be filled by the Standing Committee for the remainder of that term.

14.—All sums of money received as entrance fees, subscriptions, or otherwise, shall be paid over to the Honorary Secretary, who shall act as Treasurer. With this exception the funds of the Guild shall be in the hands of two Trustees, who, after setting apart such a sum as may be judged by the Committee or its Officers to be necessary to meet current expenses, shall invest them, as they shall agree, in their names conjointly, for the benefit of the Guild. Any vacancy occurring in the trusteeship shall be filled by the Committee until the next annual Business Meeting, when the selection shall be confirmed or otherwise, by the Guild.

Every person who has been admitted to a Degree in any Faculty is at once eligible to be a life member of the Guild of Graduates on payment of an entrance fee of 10/-.

Officers and Committee of Guild of Graduates.

1912.

Chairman: MRS. G. A. SHAKESPEAR, D.Sc.

Vice-Chairman: T. SLATER PRICE, D.Sc.

Vibert, Eva Margaret (Mrs. Moon) ...	1909
Woods, Grace Catlin	1909

MINING DIPLOMA.

Alatas, Mohamed	1911
Ashcroft, Charles Edwin	1909
Assinder, Arthur Cecil Frederick ...	1907
Butlin, John Arundel	1912
Dandeker, Parasharam	1910
Davenport, Edward Barry	1911
Fidoe, John Walter	1904
Gray, Edward Leadbetter	1911
Grist, Henry Noel	1907
Mokadam, Baliram Pandurang	1910
Nadin, Raymond	1907
Oxley, Frank	1908
Statham, Ira Cyril Frank	1908
Thompson, William Gordon	1908
Veale, Alfred Pocock	1911
Whitehouse, James	1905

BREWING DIPLOMA.

Ainley, William Henry	1907
Bexon, Joseph Donald	1901
Butler, Walter William	1910
Clubb, Donald	1911
Cooke, Richard Ernest	1902
Dix, Geoffrey Stuart	1912
Dupree, William	1903
Elliott, William Blake	1901
Gibbons, John	1903
Grant, Thomas Edward	1903
I'Anson, Antony Atkinson Whitfield ...	1906
John, Sydney Clement	1909
Jones, Archdale Mercer	1902
<i>Jones, William Vincent</i>	1904
King, William Gavin	1904
Lampitt, Leslie Herbert	1910
Lathbury, George Lionel	1904
Mears, Frank Charles	1904
Millar, Edmund	1904
Milward, Philip Alfred	1907
Morley, Thomas Henry	1901
Mower, George Collins	1912
Oliver, Brian Edward	1904
Phillips, Manasseh	1905
Raine, Sydney	1905
Reavenall, Alfred Cecil	1911
Robottom, Charles Henry	1902
Rudgard, Charles Walter	1902
Russell, Clive	1905
Ryland, Chawner	1904
Seabrooke, Frank Gordon	1903
Smith, Ivan Joyce	1905
Ward, George Bernard	1910
<i>Wenman, Norman Parkes (the late)</i> ...	1906
White, Sydney John	1905
Wicksteed, Howard	1910
Williamson, George Havard	1908

SOCIAL STUDY DIPLOMA.

Arundel, Frances Winifred	1909
Ashford, Ethel Bright	1909
Ashley, Annie	1912
Ashmore, Effie Mary	1909
Barnett, Mary Gilmore	1911
Basnett, Isabel Charlotte	1912
Beard, John	1909
Bennett, Emily Thérèse	1909
Brown, Mary Kathleen	1912
Carter, Margaret Elizabeth Mary	1909
Catchpool, Egerton St. John Pettifor	1912
Clements, Richard	1912
Cole, Agnes Louise	1912
Cramp, Amy Winifred (Distinction)	1912
Crosland, Robert Wilfred	1909
David, Juliette	1911
Doncaster, Gertrude Mary	1910
Ellwood, Jennie	1912
Fox, Anna	1910
Franklin, Geoffrey Montago Ernest	1912
Fryer, Alexander Stewart	1 10
Gilbert, Harry Edwin	1909
Goodfellow, George William	1910
Hobby, James	1910
Humpidge, Gertrude Phœbe	1911
Huxley, Ethel Mary	1911
Jackson, Thomas Ernst	1910
Jalland, Herbert Henry	1910
Jarvis, Walter Henry	1910
Jesper, Mabel Ethel	1912
Keay, Edith Gladys (Distinction)	1910
King, Herbert William	1909
Leeson, Cecil	1910
Lloyd, Lewis	1911
Meaden, Sarah Katie	1911

DIPLOMAS.

Parker, Nora Mildred	1911
Paterson, Mary	1910
Pearson, Mary (Distinction)	1910
Preston, Cecil Rosella Mary	1910
Smith, Edith Norah	1911
Stanners, Robert Whitfield	1911
Stewart, Jean Carruthers (Distinction)	1912
Strathy, Jessie Lyall Lee	1912
Thomson, Mary Horner	1911
Thorne, Joyce	1911
Vidal, Sylvia Mary	1910
Winder, Phyllis Devereux	1911

SOCIAL STUDY HIGHER DIPLOMA.

Arundel, Frances Winifred	1911
Barnett, Mary Gilmore	1912
Fox, Anna	1911
Goodfellow, George William	1911
Paterson, Mary	1911
Smith, Edith Norah	1912
Thomson, Mary Horner	1912
Winder, Phyllis Devereux	1912

DIPLOMA IN DENTAL SURGERY.

Jessop, John	1911
Jones, Edgar George	1911

HONOURS.

AT B.Sc. DEGREE.

Acton, Elizabeth (Zoology and Botany)	1908
Adams, Ernest (Chemistry)	1909
Allcut, Edgar Alfred (Mechanical Engineering)	1908

Asdell, John Henry (Electrical Engineering)	1909
Ashford, Florence (Geology)	1902
Bailey, Clement William (Chemistry, 2nd class)	1910
Barlow, Thomas Morgan (Electrical Engineering)	1906
Barrow, Fred (Chemistry)	1903
Bliss, Ernest William (Mathematics)...	1908
Briscoe, Frederick John (Physics) ...	1911
Clarke, Albert Ernest (Geology) ...	1908
Cox, Arthur Hubert (Chemistry and Geology)	1904
Dixon, Gertrude Mary (Zoology) ...	1908
Elsdon, George Davidson (Chemistry)	1909
Evans, Horace George (Chemistry) ...	1909
Ewen, Donald (Metallurgy)	1909
Finney, Ada Maria (Chemistry) ...	1912
Fisher, William Ernest (Mechanical Engineering)	1906
Flint, Henry Thomas (Mathematics and Physics)	1912
Friend, John Albert Newton (Chemistry)	1902
Gadd, Caleb Herbert (Botany) ...	1911
Galloway, Mabel (Zoology)	1907
Garner, William Edward (Chemistry)	1912
German, George Arthur (Geology) ...	1911
Gifford, Randolph Douglas (Electrical Engineering)	1908
Goodey, Tom (Zoology and Botany) ...	1908
Griffiths, Benjamin Millard (Botany)	1908
Grove, Alfred John (Zoology)	1907
Hanford, Sydney (Mechanical Electrical Engineering)	1911
Harby, Wilfrid Harry (Chemistry) ...	1908
Hood, Olive Eléanora (Botany) ...	1909
Ibbs, Thomas Leonard (Physics) ...	1910
Kershaw, Lawrence William (Civil Engineering)	1907

Lobley, Henry Denzil (Mechanical Engineering)	1910
Lowe, Harold Newton (Chemistry) ...	1907
Mason-Jones, Archibald John (Geology)	1906
Meggitt, Frederick Joseph (Zoology)	1912
Merritt, Onera Amelia (Zoology) ...	1902
Morris, Leslie (Geology)	1908
Nadejde, Horia Ioan (Electrical Engineering)	1911
Newton, Ethel (Zoology)	1907
Norton, Harold Richard (Chemistry)...	1908
Ottewell, Barry (Electrical Engineering)	1910
Parkes, John Wilfrid (Chemistry) ...	1912
Partridge, George Frederick (Physics)	1911
Perry, Thomas Leslie (Geology) ...	1910
Phillips, Percy (Physics)	1901
Pipe, Thomas Sylvanus (Electrical Engineering)	1905
Poulton, Ethel Maud (Botany) ...	1910
Purves, Alice Alison (Botany) ...	1910
Reade, Thomas Harold (Chemistry) ...	1912
Shercliff, William (Geology)	1912
Scarborough, Harold Archibald (Chemistry)	1912
Seyfried, John Thaddeus de (Mining)	1907
Silvester, Clara Emily (Geology) ...	1906
Smith, Gavin Hildick (Mining) ...	1907
Sonnenschein, Christopher Edward (Mechanical Engineering)	1909
Stirrup, Henry Harold (Zoology and Botany)	1911
Taylor, Harry (Civil Engineering) ...	1908
Todd, George William (Physics) ...	1907
Troughton, Beatrice Ellen (Zoology) ...	1908
Tunbridge, Edward William (Mechanical Engineering)	1905
Twiss, Douglas Frank (Chemistry) ...	1902

Villiers, Percy William (Civil Engineering)	1909
Walker, Cranston (Physiology) ...	1907
Watson, Ernest Ansley (Mechanical and Electrical Engineering) ...	1907
Wilkes, Samuel John Herbert (Mechanical Engineering)	1906
Whitworth, Ernest Stanley (Mathematics)	1912
Whitehouse, James (Mining)	1906
Whitehouse, Richard Henry (Zoology)	1907

AT B.A. DEGREE.

Kirk, Richard Thomas Francis (Latin, Greek, and French)	1901
--	------

ASSOCIATE MEMBERS OF THE GUILD OF GRADUATES.

- Barrett, Helen Mary, M.A. (Lond.)
 Billington, William, M.B., F.R.C.S.
 Blake, James Edward Huxley, B.A. (Cantab.), B.Sc. (Lond.)
 Branson, Guy Joseph, B.A., M.D. (Lond.)
 Carter, Mrs. E. M.
 Cullis, Frederick John.
 Daniell, George Frederick, B.Sc. (Lond.).
 Ellis, Mrs. Bernard.
 Featherstone, William Barltrop, M.D. (Lond.).
 Finney, William Arthur, B.A. (Lond.).
 Fridlander, Ernest David, B.Sc. (Lond.).
 Gamgee, Leonard Parker, F.R.C.S.
 Harrold, Edith.
 Hooson, John Edward, B.Sc. (Lond.).
 Jenkyn-Brown, Lilian Evelyn, M.A. (Lond.).
 Jordan, Walter Ross, M.D. (Lond.).
 Jones, Oliver.
 Lay, Charles Johnson, B.A. (Cantab.).
 Ledsam, Henry Thomas Clutton Salt, B.A. (Lond.).
 Lloyd, Emily Jane, B.Sc. (Lond.).
 Malins, Joseph, Jun., M.A. (Lond.).
 Marks, Benjamin, B.A. (Lond.).
 Marris, William Arthur, M.D. (Lond.).
 Marson, Cyril Darby, M.R.C.S., L.R.C.P., L.D.S.
 Melson, George Hyde, M.D. (Lond.), M.R.C.S.
 Moncrieff, Lady.
 Myers-Ward, Charles Frederick, M.R.C.S., L.R.C.P.
 O'Dowd John Austin, M.B.
 Pugh, John Vernon (Senior Engineering Diploma).
 St. Johnston, George, M.D. (Lond.).
 Southall, Gertrude Eliza.
 Stansbie, John Henry, B.Sc. (Lond.).
 Stern, Arthur Landauer, D.Sc. (Lond.).
 Stern, Rose, B.Sc. (Lond.).
 Sudborough, John Joseph, D.Sc. (Lond.).
 Teichelmann, Ebenezer, F.R.C.S.
 White, James Atkin Henton, M.D., F.R.C.S.

UNDERGRADUATES IN RESIDENCE

DURING THE SESSION 1911-12.

-
- 1468 Abrahams, Reginald George.
1701 Adam, Peter.
1671 Adams, Amy Maude.
1727 Adams, Frederick William.
1556 Adams, May Dorothy.
1600 Ahmad, Abd el Hameed.
1652 Airston, Wilhelmina.
1035 Alabaster, George Herbert.
1692 Alberg, Michel.
1542 Alcock, William Desmond Evelyn.
1561 Alldridge, Edward Gordon.
1662 Alsop, Horace.
1708 Amiss, Winifred Helen.
1705 Andrews, William Archibald.
1607 Antcliff, Constance Jessie.
1210 Ashby, Elizabeth Labrey.
1864 Ashby, Mabel Kathleen.
1118 Ashley, Annie.
1548 Atkinson, Elizabeth Maud.
1512 Ayrton, Agnes Clarissa.
1679 Badcock, Elsie Kathleen.
1899 Bagnall, Howard Henry.
1682 Bailey, Mabel Nellie.
1782 Bailey, Muriel Gertrude.
1349 Balcon, Samuel.
1409 Ball, Arthur.
1270 Bampton, Horace Edgar.
1677 Bandinelli, Thomas James.
1628 Barbour, Georgiana.
1420 Bardaloye, Girish Chandra.
1331 Barnes, Elizá Mary Ann.
1898 Barnes, May.
1324 Barrett, Frances May.
1726 Barwell, Hugh William Eames.

- 1397 Barwise, Henry Balfour.
1905 Bastable, Ralph Douglas.
1119 Bates, Harold Christopher.
1654 Baylis, Arthur Noël.
1900 Bayliss, Ralph Garratt.
1699 Beardsmore, Tom Archibald.
1627 Beebee, Ethel May.
1798 Beech, Ethel.
1901 Bellison, Mark.
1787 Bennett, Herbert.
1334 Bentley, Frank Thomas.
1771 Biddulph, Richard.
1841 Blackmore, Ernest Wilfrid.
1520 Bladwell, Leonard Joseph.
1570 Blizzard, Beatrice Emily.
1817 Bolas, Elsie.
1470 Booth, Robert Leslie.
1625 Bourne, Mary Ethel Temple.
1813 Bracey, Bertha Lilian.
1889 Brindley, Philip Sidney.
1021 Broderick, Ralph Alexander.
1178 Brown, John Clifford.
1856 Brown, Philip Stanley.
1698 Brown, Reginald Arthur.
1639 Browne, Julius Basil.
839 Buckler, Eric Francis.
1614 Burgess, Louisa Victoria.
1264 Burt, Marion Mildred Barrow.
1833 Burwood, Annie Lily.
1277 Bushill, Frances Mary.
1799 Caddick, Winifred May.
1685 Cade, Frank.
1585 Callow, Cicely Lillian.
1341 Campbell, Walter Colin.
1067 Campion, Grace Mary.
1850 Carr, Dorothy Marguerite Olivia.
1346 Carter, Samuel.
1724 Cash, Edith Fanny.
1827 Cass, Leonard Vivian.
1868 Cassel, Isaac Oscar.

- 1538 Caudle, Albert Grainger.
- 1194 Cautherley, Mildred Ruth.
- 1449 Chamberlain, John Harold.
- 1539 Chapman, Frank.
- 1882 Chattoe, Thomas Clarence.
- 1290 Chen, Ting Chi.
- 1879 Cheng, Yun Tin.
- 1125 Chinn, Frank Morton.
- 1630 Chitty, Florence.
- 1808 Chou, Hsi.
- 1569 Clapham, Maude Marion.
- 1326 Clarke, Albert Edward.
- 1791 Clay, Arthur Frederick.
- 1567 Clayton, Mary Emma.
- 1343 Clease, Albert George Douglas.
- 1581 Clements, William Arnold.
- 1765 Clews, Hollis Hudson.
- 1533 Clifford, George Herbert Workman.
- 1454 Coates, John Bourne.
- 1355 Coghill, Elfrida Hester Brooke.
- 1777 Collins, Horatio John.
- 1310 Cook, Dorothy Mabel.
- 1461 Cooke, Alfred Roland.
- 1839 Cooling, Winifred.
- 1283 Cooper, Henry Edward.
- 1432 Cooper, Philip Alan.
- 1653 Cope, Dora Gwendoline.
- 1348 Cottrell, Thomas Ernest.
- 1316 Couch, Herbert William.
- 1830 Craddock, Ruth Mary.
- 1560 Crosskey, John Henry.
- 1321 Crowther, Frederick Kenneth.
- 1213 Crowther, Horace Leslie.
- 1524 Crowther, Oswald Hubert.
- 1555 Cullis, Eleanor.
- 1819 Cumming, Gertrude.
- 1643 Curtin, Anne.
- 1778 Dance, Marguerite Deborah Seton.
- 1768 Daniels, John Henry.
- 1853 Dana, Gertrude Muriel.

- 1130 Dâs, Mathura Mohan.
1788 Davies, Eulalie Mabel.
1860 Davies, Sarah Lizzie.
1612 Day, Doris Elizabeth.
1610 Dedicoat, Dorothy Alice.
1206 Denby, Sarah Kate.
1356 Dennett, Stephen Hepworth.
1704 Dervichian, Krikor Garabet.
1002 Devereux, Percy Stuart.
1588 Dingley, Catherine.
1559 Donovan, Lillie Mary.
1880 Dorsch, Karl Willy.
1375 Doughty, Mabel Annie.
1902 Dow, Frank Willard.
1495 Drake, Wilfred.
1413 Drake, Winifred May.
1424 Drew, Lily Elizabeth.
1847 Druller, Vivian Vaughan.
1624 Dunn, Ralph John.
1367 Dunsby, Archibald.
1134 Dunsby, Charles.
1617 Ebborn, Mary Elisabeth.
1739 Edghill, Joan.
1837 Edwards, Blanche.
1857 Edwards, Frederick James.
1526 Ehrhardt, Herbert Wilfred.
1745 Eite, Walter.
1863 Elkington, Arthur Edward Hardwicke.
883 Elkington, George Ernest.
1735 Ellis, Owen William.
1695 Enoch, Alfred James.
1095 Erfan, Mohammed.
1513 Evans, Alice Muriel.
1370 Evans, Clementina Elizabeth.
1051 Evans, David John.
1851 Evans, Gwen.
1320 Evans, Harold Edward.
1779 Feeny, Alfred Grosvenor.
1718 Field, Arthur John.
1306 Findon, Geoffrey Bernard

- 1008 Finney, Ada Maria.
1116 Finney, Arthur Frederick.
1670 Finney, Kathleen Elizabeth.
1549 Fisher, Edmund.
1870 Fisher, Gertrude.
1886 Fisher, Gladys May.
1368 Flint, Henry Thomas.
1098 Foley, John Edward.
1496 Ford, Gabriel Robert Harvey.
1467 Ford, Grace Winifred.
1859 Francis, Alice.
1363 Freeling, Dorothy.
1710 Frew, Margaret Annie.
942 Frugoni, Emilio Lopez.
1568 Fullwood, Florence Kathleen.
1755 Fuoss, Armin Frank Maximilian.
1906 Garner, Frederic Horace.
1528 Gem, Arthur Havard Arnold.
1747 George, James Arthur.
1322 Gething, Francis Frederick.
1534 Gibson, Charles Prosser.
1381 Gibson, Heseltine.
1595 Gibson, Mary Tregellas.
1563 Gill, Koch Harry.
1786 Ginn, Ethel Mary.
1801 Given, Amy Eliza.
1456 Glendon, Edgar Tom.
1861 Goddard, Archibald Edwin.
1700 Godfrey, Harold Graham.
1891 Goldstraw, Edwin Walter.
1725 Goodwin, Gilbert Neville.
1809 Goodwin, Muriel Annie.
1388 Goodwin, Oliver Howard.
1887 Gothard, Clifford Frederic.
1888 Gothard, Sydney.
1578 Gower, Herbert George.
1507 Gray, William.
1772 Greaves, Harry.
828 Greensill, Bernard Heynes.
1836 Greetham, Ada Elizabeth.

- 1459 Griffin, John Ridgeway.
1840 Grigg, Ethel Kate.
1382 Grindlay, Agnes Scales.
836 Grout, John Lewis Anderton.
1794 Groves, Ruby Caroline.
1233 Guevara, Anibal.
1731 Guise, Ewart Stanley.
1101 Gumersall, Gerald Joseph.
1806 Gurney, Edith Ethel.
1785 Gyi, Maung Ko Ko.
1332 Hague, Gladys Dorothy.
1255 Hale, Ethel Minnie.
1580 Hall, Eric Morgan.
1438 Hall, Horace Frank.
1598 Hamada, Abd el Rahman.
914 Hampson, Travis.
1751 Hancock, Bernard Oswald.
1337 Harris, Dudley Ryde.
1330 Harris, Frances Emily.
1301 Harris, Mary Lorna.
1775 Harrison, Arthur Cyril.
1802 Harrison, Dessima Sarah Eliza.
1842 Harriss, Irene Vernon.
1362 Hart, Grace Mary.
1457 Hartland, Reginald William.
1748 Hartley, George Cleverdon.
1769 Haselden, Annie.
1720 Haselden, Robert.
1615 Hatton, Primrose.
1516 Hawkins, Edwin Sidney.
1648 Hayes, Gertrude Eliza.
1509 Hayward, Arthur Ernest.
1881 Hayward, Harold Victor.
1831 Heeler, Lily May.
1476 Hemingway, Mary Isabel.
1115 Hibburd, Else Mary.
1633 Hickman, Nellie Beatrice.
1766 Hill, Harold Belfit.
1823 Hill, Winifred.
1749 Hillman, Eric Chester.

- 1876 Hinchley, Jessie Emily.
1781 Hipkins, Charles Hammond.
1202 Hipkins, Edward Cecil Daniel.
1613 Histon, Alice Gertrude.
1519 Hodges, William Robert.
822 Holliday, Catherine Elizabeth.
1711 Holloway, Dorothy.
1825 Holloway, Jessie Elizabeth.
1878 Hopkins, Graeme.
1884 Hopley, William Arnold.
1743 Hornby, Arthur John Ward.
1717 Horniman, Robert Henry.
1387 Houlst, Marion Prince.
1574 Howell, Charles Joseph.
1763 Hughes, Oscar Cecil Lawrence.
1750 Hulse, William.
704 Humpherson, Elsie Mary.
1291 Humphreys, Tryphena Mary Christabel.
1707 Humphries, Ernest Adolf.
1591 Hundy, Ivy Florence.
1629 Hunston, Constance Helen.
1303 Hunt, Elsie Maud Caruthers.
1640 Hunt, Mabel Elsie.
1673 Hunter, Kenneth Henry Windle.
1618 Hutchin, Hilda.
1176 Hutton, John Barnabas.
1518 Ingall, Douglas Heber.
1309 Isherwood, Norman George.
1553 Ivens, John Phillips.
1575 Jacks, Edmund Cecil.
948 Jamie, Robert Cuthbert Scott.
1795 Jarvis, Percy William.
1792 Jeffcott, Wilfrid George.
1634 Jenkins, Florence Beatrice.
1741 Jennens, Arthur Ernest.
1641 Jesper, Wilfrid.
1366 Jeyes, Dorothy.
1713 Johnson, Ethel Beatrice Mary.
1389 Johnson, Horace.
1141 Johnson, William Harold.

- 1279 Jones, Charles Henry.
1693 Jones, Eric Shirley.
1697 Jones, Eveline.
1672 Jones, Frederick Allan Selous.
1826 Jones, Gertrude Sarah Ann.
1579 Jones, Herbert Arthur.
1056 Jones, John Christopher.
1716 Jones, Leslie Amiel.
1758 Jones, Mary Aline.
1147 Jones, Oscar Trevor.
1335 Jones, Reginald Edward.
1797 Jones, Samuel John.
1810 Kang, Shih-Ching.
1740 Kay, Florence Emelie.
1323 Kay, Laurence Herbert.
1804 Keey, Dorothy.
1869 Kerby, Theo Rosser Fred.
1314 Kidd, Cecil Christian.
1680 King, Cyril Henry Marshall.
1816 Kirkby, Winifred Emma.
1764 Kite, John Clarence.
1789 Klempt, Walter.
1790 Knight, Frederick William.
1537 Knowles, Frederick.
1800 Lane, Doris Mabel.
1487 Langdale-Smith, Henry Gauntlett.
1774 Lardge, Florence Mabel.
1546 Lawley, Harold Hunter.
1592 Lawton, Gladys May.
1254 Lea, Henry Turner.
1577 Lea, Norman.
1531 Leach, Winifred.
1812 Lee, Pao Ling.
1564 Lees, Francis Charles.
1676 Lerrigo, Margaret.
1911 Lewis, Bessie.
1811 Liang, Shu-Chao.
1571 Lindon, Albert.
1635 Lindsay, Ethel Marian.
1675 Littleboy, Maurice.

- 1133 Lo, Hong Nien.
- 1239 Lock, Stanley Eli John.
- 1845 Loh, Sze-Shung.
- 1754 Lones, John Arthur.
- 1835 Longdon, Georgiana May.
- 1762 Lovesy, Harold Frederick.
- 1746 Lowe, Charles William.
- 1061 Lowe, John Burman.
- 1632 Luckman, Walter Frank.
- 1596 Luker, Frederick George.
- 1814 Lusty, Hilda Marion.
- 1345 Lycett, Percival James.
- 1784 Lyth, Cyril John.
- 1275 Madgavkar, Malati Krishnarav.
- 1623 Mann, Mary Eveline.
- 1706 Mansfield, Eric Oswald.
- 1361 Marsh, Alma.
- 1773 Marsh, Nora Alice.
- 1315 Marshall, Dorothy.
- 1709 Marshall, Hazel.
- 1895 Martin, Gerald Patrick.
- 1761 Mason, Edward.
- 1541 Mason, Evelyn Arthur.
- 1681 Mathie, George Cecil.
- 368 McCready, Violet Maud.
- 1185 McGregor, Kathleen Jessie.
- 1722 McIntosh, Nora Russell.
- 1480 Meggitt, Frederick Joseph.
- 1238 Mernes, Albino Vallovero.
- 1034 Middleton, John Grove.
- 1872 Miles, Abraham Arthur.
- 1867 Millar, Kathleen L ly.
- 1483 Millington, Arthur David.
- 1665 Millington, Mabel Louisa.
- 1744 Millner, William.
- 1547 Mills, Francis Lonsdale.
- 1752 Mills, Laurence Harry.
- 1669 Minshall, Letitia Elizabeth.
- 1096 Moharram, Mohammad Abd El Latif.
- 1903 Moreton, Frank Edward.

- 1136 Morgan, Frank Leslie.
1589 Morton, Effie Jane.
1767 Moss, Kenneth Neville.
1586 Mowe, Ethel May.
1893 Mowinckel, Conrad Helge.
1601 Mulleady, Richard Thomas.
1616 Murphy, Mildred.
1690 Nair, Thekat Kumaran.
1576 Newey, Dudley Shaw.
1760 Newey, Frank.
1587 Newman, Doris Beaumont.
1907 Newnham, Eric Victor.
1311 Newsome, Theo Edward.
1005 Nickson, Horace Clarence.
1455 Nomura, Motogoro.
1505 North, Alfred William.
1271 Obaidullah, Mohammed.
1108 Orton, Joseph William Noël.
1626 Oxenham, Frederick William.
993 Parker, May Olive.
1288 Parkes, John Wilfrid.
1484 Parkes, Oscar.
1815 Partridge, Edith.
1622 Partridge, Katie Winifred.
1651 Patterson, Harry.
1852 Pearce, James George.
1736 Pearsall, Lucy Ellen.
1821 Pearshouse, Grace.
1412 Pearson, Doris Ivy.
1904 Pearson, Edgar McCully.
1535 Pearson, Stanley.
1419 Peart, Emilie.
1425 Peaty, Mary Josephine.
1481 Pettipther, Frank.
1452 Phillips, Alfred Henry.
1608 Phillips, Elsie.
1100 Piercy, Edgar Ernest.
1877 Pinder, Gladys.
1046 Pinson, Kenneth Bernard.
1562 Pinson, Raymond Fearle.

- 1818 Pither, Florence Mary.
1527 Pitt, Charles Harry.
1875 Pitt, Edith Ellen.
1458 Pitt, William Lawrence.
1728 Pool, William John.
1657 Poole, Edward Oscar.

1430 Wood, Florence Mary.
1400 Wood-White, Bernard.
1650 Woolf, Catherine Isabel.
1333 Woolf, Flora Gwendoline.
313 Woolf, Montague Sydney.
1504 Worsley, Allan Nathaniel.
1565 Worthington, Frances Ellen.
1606 Wragg, Ethel.
1661 Wynter, Herbert Noel.
1214 Zimmerman, Arthur Ulric.

STUDENTS ATTENDING CLASSES

DURING SESSION 1911-12.

STUDENTS IN SCIENCE, ARTS AND COMMERCE.

Abdalla, Mohamed.
 Adam, Peter.
 Adams, Frederick William.
 Adams, May Dorothy.
 Adams, Ralph.
 Adams, Victor Hugh.
 Ahmad, Abdel Hameed.
 Airston, Wilhelmina.
 Alberg, Michel.
 Alcock, William Desmond
 Evelyn.
 Allen, Frederick.
 Alurralde, Juan Carlos.
 Amiss, Winifred Helen.
 Anderson, Frederick William.
 Andrews, William Archibald.
 Anson, Claud Ronald.
 Apps, Mildred Rosa.
 Armstrong, Mrs. A. H. R.
 Ashley, Annie.
 Ashley, Walter.
 Atkinson, Elizabeth Maud.
 Austin, George Wesley.
 Averay-Jones, Mabel
 Winifred.
 Ayrtton, Agnes Clarissa.

 Bade, Walter Ferdinand
 Adolf Ernst.
 Badre, Abd el Aziz
 Bagnall, Howard Henry.
 Bailey, Clement William.
 Bailey, Mabel Nellie.
 Bamford, Thomas G.
 Bandinelli, Thomas James.

Banks, Reginald.
 Barbor, Herbert Reginald.
 Bardaloye, Girish Chandra.
 Barker, Howard William.
 Barlow, John Henry.
 Barnes, Eliza Mary Ann.
 Barnes, May
 Barnett, Mary Gilmore.
 Barrett, Frances May.
 Barwell, Hugh William
 Eames.
 Barwise, Henry Balfour.
 Basnett, Isabel Charlotte.
 Bates, Harold Christopher.
 Baylis, Arthur Noël.
 Baylis, Gladys.
 Bayliss, Ralph Garratt.
 Beards, John Herbert.
 Beardsmore, Tom Archibald.
 Beebec, Ethel May.
 Bennett, Herbert.
 Bennett, Philip Dennis.
 Bensande, Guida.
 Bentley, Frank Thomas.
 Berry, Thomas Gordon.
 Biddulph, Richard.
 Bisseker, Arthur.
 Blackmore, Ernest Wilfrid.
 Bladwell, Leonard Joseph.
 Blakeway, Malcolm.
 Bourne, Mary Ethel Temple.
 Bramer, John Douglas
 Stacey.
 Brazier, Sidney Albert.
 Brindley, Philip Sidney.

Briscoe, Frederick John
Brittain, Doris May.
Britton, Frederick V.
Britton, Rosa.
Brown, Ethel Holman.
Brown, Frederick John.
Brown, George Bolney.
Brown, Mary Kathleen.
Brown, Percy Charles.
Brown, Reginald Arthur.
Browne, Julius Basil.
Burdle, George.
Burman, Humphrey
 Woollaston.
Burrows, Mabel Mary.
Bushill, Frances Mary.
Butler, Frank Edward.
Butlin, John Arundel.

Cadbury, Edward.
Cadbury, Laurence John.
Carter, Edith Angela.
Carter, Samuel.
Carter, Sydney Raymond.
Cash, Edith Fanny.
Cash, Thomas Arnold.
Cassel, Isaac Oscar.
Catchpool, Egerton St. John
 Pettifor.
Cautherley, Mildred Ruth.
Chamberlain, John Harold.
Chang, Yung Chien.
Charrington, Guy Nicholas.
Chattoe, Thomas Clarence.
Chen, Ting Chi.
Cheng, Yun Tin.
Chinn, Frank Morton.
Chou, Hsi.
Churley, Elsie Margaret.
Clarke, Albert Edward.

Clay, Arthur Frederick.
Clease, Albert George
 Douglas.
Clements, Richard.
Clifford, George Herbert
 Workman.
Clubb, Donald.
Cole, Agnes Louise
Collins, Horatio John
Cook, Dorothy Mabel.
Cooke, Arthur William
Cooksey, Gladys M.
Cooper, Henry Edward.
Couch, Herbert William.
Cope, Dora Gwendoline.
Cowley, William.
Cox, Dorothy Cécile.
Cox, Marguerite Anna.
Craig, Harold Stewart
Cramp, Amy Winifred
Cross, Arthur Leslie
 Rowbotham.
Crowther, Frederick
 Kenneth.
Crowther, Horace Leslie.
Crowther, Oswald Hubert.
Crutchley, Adeline.
Culley, A. Edwin.
Cullis, Eleanor.

Dalton, Louis Fitzgerald
 Verity.
Dance, Marguerite Deborah
 Seton.
Dâs, Mathura Mohan.
David, Juliette.
Davies, Eulalie Mabel.
Davies, Harry.
Davis, Albert John
Davis, Vernon Edward.

- Demuth, Mrs. F. G.
Denby, Sara Kate.
Dennett, Stephen Hepworth.
Dervichian, Krikor Garabet.
Devereux, Percy Stuart.
Dix, Geoffrey Stuart
Dorsch, Karl Willy.
Downing, John Fisher.
Drake, Wilfred.
Drake, Winifred May.
Drew, Mrs. E.
Drew, Edwin.
Dubeau, Arthur.
Dukes, Joseph Harmer.
Dunn, Alfred John
Dunn, Ralph John.
Dunsby, Charles.
Edghill, Joan.
Ehrhardt, Herbert Wilfrid.
Elkington, Arthur Edward
 Hardwicke.
Elliott, Norman Walter.
Ellis, Owen William.
Elwood, Jennie
Ennis, Alice Margaret.
Enoch, Alfred James.
Erfan, Mohamnad.
Estcourt, Constance
 Rosemary.
Evans, Harold Edward.
Farrington, Ellen Lidia.
Feeny, Alfred Grosvenor.
Field, Arthur John.
Findon, Geoffrey Bernard.
Finney, Ada Maria.
Finney, Kathleen Elizabeth.
Fisher, Edmund.
Fisher, Gladys May.
Flower, Marie.
Ford, Eleanor Mary.
Ford, Gabriel Robert Harvey.
Ford, Grace Winifred.
Foy, Thomas Arthur Wyness.
Franklin, Geoffrey Montagu
 Ernest
Fretter, Arthur.
Frew, Margaret Annie.
Frugoni, Emilio Lopez.
Frugoni, Ricardo Lopez.
Gamble, Robert William.
Gamsaragan, Yervant A.
Gameson, Dorothy Winifred.
Gardiner, Arthur Leslie.
Garner, William Edward.
Garratt, Charles Frederick.
Gem, Arthur Havard Arnold.

 Price, Arthur Clement.
 Price, Ralph Brian.
 Priestley, Percival Thomas.
 Prosser, Mabel Eliza.
 Raison, Cyril Alban.
 Rees, Gwendolen Mary.
 Relton, Bernard Cleather.

Rice-Oxley, Leonard George
Cecil.

Richards, Evan William.

Richards, Frederick Harold.

Richmond, Henry.

Ritchie, James Henry.

Roberts, Leslie Douglas.

Robinson, Catherine Elsie.

Robinson, Frederick William.

Robinson, Margaret.

Rose, Baron Theodore.

Roth, Helen.

Rowlands, Francis George
Jackson.

Rowson, Lionel Frederick.

Rudd, Charles.

Salama, Farag.

Salt, Charles Ernest.

Sheasby, Herbert.

Sheldon, Muriel Eveline.

Shilton, Arnold Victor.

Shilton, Roy Oswald.

Shufflebotham, Hilda Nora.

Slim, Charles John

Smith, Alfred Percy.

Smith, Arthur Cloudesley.

Smith, Gilbert Ashley.

Smith, Herbert.

Smith, Leonard.

Smith, Peter de Safforie.

Spackman, Charles Lovell.

Spring, Douglas Martin.

Spurway, Eustace Edgar
Roberts.

Stafford, Thomas Sidney.

Staley, Robert James.

Stansfield, Tom.

Steward, Sydney Tibbetts.

Stubbs, Clement Massey.

Sudki, Awad.

Swann, Herbert Spencer.

Teall, Cecil George.

Thompson, Ida Helen.

Thomson, Arthur Peregrine.

Thorman, Frederick Edward
Alan.

Thornhill, Ronald Joseph
Tennant.

Thornton, Pensam.

Tsao, Hui Chun.

Turner, Gladys Maude.

Underhill, Eric.

Wagner, Ethelbert Godwin
Stockwell.

Wakley, Percy James.

Walker, James Henry.

Wall, Bernard Ernest.

Wallbank, Elsie Rose.

Weston, John Theodore
Spencer.

Wilkinson, Alan Ayscough.

Wilkinson, Geoffrey Legh.

Wilkinson, Kenneth Douglas.

Williams, Malcolm Lloyd.

Williams-Walker, Alfred.

Wilson, Ethel.

Wood-White, Bernard.

Woolf, Montague Sydney.

Worsley, Allan Nathaniel.

Wyman, Hiram Bardsley.

Yeoman, John Clark.

STUDENTS IN THE TRAINING COLLEGE.

- Adams, Amy Maude.
 Alsop, Horace.
 Andrews, Lilian Mary.
 Antcliff, Constance Jessie.
 Ashby, Mabel Kathleen.

 Badcock, Elsie Kathleen.
 Bailey, Muriel Gertrude.
 Balcon, Samuel.
 Ball, Arthur.
 Barbour, Georgiana.
 Bastable, Ralph Douglas.
 Beavon, Alice.
 Beech, Ethel.
 Bellison, Mark.
 Beswetherick, Francis John.
 Bishop, Dorothy Wolfsberg.
 Blizzard, Beatrice Emily.
 Bolas, Elsie.
 Box, Margaret Ellen.
 Bracey, Bertha Lilian.
 Braddock, Ernest Samuel.
 Bromhall, Winifred Harriett.
 Brookes, Ethel Marion.
 Brown, Philip Stanley.
 Burgess, Louisa Victoria.
 Burwood, Annie Lily.

 Caddick, Winifred May.
 Cade, Frank.
 Callow, Cecily Lillian.
 Champion, Grace Mary.
 Carr, Dorothy Marguerite
 Olivia.
 Cass, Leonard Vivian.
 Caudle, Albert Grainger.
 Chapman, Frank.

 Chick, Winifred Nella.
 Chilton, Dorothy.
 Chitty, Florence.
 Clapham, Maude Marion.
 Clarke, Cyril George.
 Clayton, Mary Emma.
 Clews, Hollis Hudson.
 Coates, John Bourne.
 Cobley, George Edward.
 Cooke, Alfred Roland.
 Cooling, Winifred.
 Cooper, Philip Alan.
 Cottrell, Thomas Ernest.
 Craddock, Ruth Mary.
 Cumming, Gertrude.
 Curtin, Anne.

 Daniels, John Henry.
 Dann, Gertrude Muriel.
 Davies, Sara Lizzie.
 Day, Doris Elizabeth.
 Dedicoat, Dorothy Alice.
 Dingley, Catherine.
 Doughty, Mabel Annie.
 Dow, Frank Willard.
 Drew, Lily Elizabeth.
 Druller, Vivian Vaughan.
 Dundon, Patrick.
 Dunsby, Archibald.

 Ebborn, Mary Elizabeth.
 Edwards, Blanche.
 Edwards, Frederick James.
 Eite, Walter.
 Ellis, Herbert William.
 Evans, Clementina Elizabeth.
 Evans, Gwen.
 Ewels, Eleanor Hannah.

Finney, Arthur Frederick.
 Fisher, Gertrude.
 Flint, Henry Thomas.
 Foulger, Ernest Claude John.
 Francis, Alice.
 Freeling, Dorothy.
 Fullwood, Florence Kathleen.

Garner, Frederic Horace.
 George, James Arthur.
 Ginn, Ethel Mary.
 Given, Amy Eliza.
 Glendon, Edgar Tom.
 Grainger, Alice Hingley.
 Greaves, Harry.
 Greetham, Ada Elizabeth.
 Griffin, John Ridgeway.
 Grigg, Ethel Kate.
 Grindlay, Agnes Scales.
 Gurney, Edith Ethel.

Hague, Gladys Dorothy.
 Harrison, Dessima Sarah
 Eliza.

Harriss, Irene Vernon.
 Hartland, Reginald William.
 Haselden, Annie.
 Hatton, Primrose.
 Hayes, Gertrude Eliza.
 Hayes, Hilda Amy.
 Heeler, Lily May.
 Hickman, Nellie Beatrice.
 Hill, Winifred.
 Hinchley, Jessie Emily.
 Hipkins, Charles Hammond.
 Histon, Alice Gertrude.
 Hodges, William Robert.
 Holloway, Jessie Elizabeth.
 Holmes, Elsie Mary.
 Holmes, Hilda.
 Hopley, William Arnold.

Horton, Nellie.
 Hudson, Elsie May.
 Hundy, Ivy Florence.
 Hunston, Constance Helen.
 Hunt, Mabel Elsie.
 Hutchin, Hilda.

Illston, Elsie Clare.
 Ivens, John Phillips.

Jackson, Frances Hilda.
 Jarvis, Percy William.
 Jenkins, Florence Beatrice.
 Jephson, Howard.
 Jesper, Wilfrid.
 Johnson, Horace.
 Jones, Gertrude Sarah Ann.
 Jones, Herbert Arthur.
 Jones, Samuel John.

Keey, Dorothy.
 Kirkby, Winifred Emma.
 Kite, John Clarence.
 Knowles, Olive.

Lane, Doris Mabel.
 Lardge, Florence Mabel.
 Lawton, Gladys May.
 Leggett, Sidney James.
 Lerrigo, Margaret.
 Lewis, Bessie.
 Lindon, Albert.
 Lindsay, Ethel Marian.
 Longdon, Georgiana May.
 Luckman, Walter Frank.
 Lusty, Hilda Marian.

Mann, Mary Eveline.
 Marsh, Nora Alice.
 Mason, Evelyn Arthur.
 Matthews, Olive Emily.
 McGough, Catherine

Meggitt, Frederick Joseph.
Milburn, Benjamin.
Millar, Kathleen Lily.
Millington, Mabel Louisa.
Mills, Francis Lonsdale.
Moreton, Frank Edward.
Morris, Ethel.
Morton, Effie Jane.
Mowe, Ethel May.

Newman, Doris Beaumont.
Nixon, George.

Owen, Gwendoline Lucy.
Owens, Dorothy Annie.

Parker, Albert Victor.
Partridge, Edith.
Partridge, Katie Winifred.
Pearshouse, Grace.
Pearson, Doris Ivy.
Pearson, Edgar McCully.
Peart, Emilie.
Phillips, Alfred Henry.
Phillips, Elsie.
Pinder, Gladys.
Pither, Florence Mary.
Pitt, Edith Helen.
Pitt, William Lawrence.
Plaice, Arthur John.
Poulson, Gertrude.
Powell, John.
Pressly, Edith Muriel.
Price, Owen.
Prosser, Catherine Lavinia.
Prosser, Winnie.

Rainsford, Raymond Gibbs.
Randall, Phyllis Amy.
Ray, Myrtle Matilda.
Raynes, Ida May.
Raywood, Marion,

Reeve, Lily.
Revening, Elsie.
Richards, Florence Mary.
Rogers, Rose Janet.
Round, Horace.
Rowlands, Edith Alice.

Sanders, Ethel.
Saw, Edith Mabel.
Shercliff, William.
Short, Mabel Singleton.
Shutt, Lillie.
Slater, Winifred Mary.
Smallwood, Ada Mary Evelyn.
Smith, Arthur.
Smith, Augusta Mary.
Smith, William Edward.
Snape, Elsie Ada.
Southall, Dorothy Rosa.
Southall, Frances Muriel.
Southerton, Laurence Cyril.
Spray, Frances Hilda.
Squire, William Daniel.
Stanley, Margaret.
Stone, Hubert Charles.
Sugden, Frances Edna.

Taylor, Gladys Kate.
Taylor, Gladys Maud.
Taylor, Herbert William.
Taylor, Victor Holden.
Tennant, Isabel.
Thompson, Harold Norman.
Thornett, Hettie Emily.
Thornton, Hilda Madeline.
Tidmarsh, Evelyn Gertrude.
Timperley, Elizabeth.
Tomlinson, Marion.
Tongue, John William Collis.
Turner, Edith Susan,

Turner, John Ewart Shipley.	White, Lucy Slater.
Upton, Olive Mabel.	Whitehead, Annie Marguerita.
Waite, Albert William.	Whitehouse, Beatrice May.
Wale, Mary Hilda.	Whitehouse, Nellie.
Walker, Edith.	Whitney, Edith Harriet.
Walker, Ethel Irene.	Whitworth, Ernest Stanley.
Wallace, Winifred Grace.	Wilkinson, William Evans.
Wheeldon, Annie May.	Wilson, Arthur Ernest.
While, Florence Helen.	Woodhall, Edith Annie.
White, Edith Rebecca.	Worthington, Frances Ellen.
	Wragg, Ethel.
	Wright, Elenor.

UNIVERSITY EXAMINATIONS,

SESSION 1911-12.

FACULTY OF SCIENCE.

JUNE, 1912.

I.—Degree of Doctor of Science.

(a) Official.

Barlow, Guy.
 Boulenger, Charles Leopold.
 Shakespear, Gilbert Arden

(b) Under Ordinary Regulations.

Lotka, Alfred James.
 Stuart, Murray.

II.—Degree of Master of Science.

(a) Official.

Fournier d'Albe, Edmund Edward.

(b) Under Ordinary Regulations.

Adams, Ernest Bryan.
 Adams, Victor Hugh.
 Austin, George Wesley.
 Briscoe, Frederick John.
 Brown, Reginald Arthur.
 Carter, Sydney Raymond.
 Chamberlain, John Harold.
 Clubb, Donald.
 Flint, Henry Thomas.
 Garner, William Edward.
 Groves, Clarence Richard.
 King, George.
 Nadejde, Horia Ioan.
 Parkes, John Wilfrid.
 Till, William Compton.
 Tunstall, James Charles Francis.
 Whitworth, Ernest Stanley.

III.—Degree of Bachelor of Science.

Under Ordinary Regulations.

Honours Division.

Finney, Ada Maria (Chemistry) *1st Class*.

*Flint, Henry Thomas (Mathematics and Physics).

Garner, William Edward (Chemistry) *1st Class*.

Meggitt, Frederick Joseph (Zoology).

Parkes, John Wilfrid (Chemistry) *2nd Class*.Reade, Thomas Harold (Chemistry) *3rd Class*Scarborough, Harold Archibald (Chemistry)
3rd Class.

*Shercliff, William (Geology).

*Whitworth, Ernest Stanley (Mathematics).

Division I.

Smith, Stanley.

Wood, Florence Mary.

*Woolf, Flora Gwendoline.

Woolf, Montague Sydney.

Division II.

*Bentley, Frank Thomas.

Dennett, Stephen Hepworth.

Evans, Harold Edward.

Finney, Arthur Frederick.

Hood, Lilian.

Phillips, Alfred Henry.

Pritchett, Kathleen Muriel.

Rowley, Percy.

Completed the Examination.

Hague, Gladys Dorothy.

Wragg, Eveline.

*Passed Examination in 1911.

*Two-Year Students eligible for Degree after a further Year's attendance
at the University.*

Honours Division.

Jones, Herbert Arthur (Physics).

Rock, George Edwin (Mathematics).

Division I.

Hawkins, Edwin Sidney.

Division II.

Dunn, Ralph John.
 Ford, Grace Winifred.
 Turner, Bertrand,
 Ward, Percy James.
 Webb, Harry William.

Passed in part of the Examination :

- Ahmad, Abdel Hameed (Physics, Pure Mathematics II, *Subsidiary*).
 Bagnall, Howard Henry (Physics, Pure Mathematics II, Applied Mathematics I, *Subsidiary*).
 Balcon, Samuel (Geology, *Principal*).
 Bastable, Ralph Douglas (Physics II, Pure Mathematics II, Applied Mathematics I, *Principal*).
 Bayliss, Ralph Garratt (Physics, Pure Mathematics II, Applied Mathematics I, *Subsidiary*).
 Beardsmore, Tom Archibald (Physics II, Pure Mathematics II, Applied Mathematics I, *Principal*).
 Bushill, Frances Mary (Geology, *Subsidiary*).
 Caudle, Albert Grainger (Geology I, *Principal* ; Physics, Applied Mathematics I, *Subsidiary*).
 Denby, Sara Kate (Physics, *Subsidiary*).
 Ehrhardt, Herbert Wilfrid (Pure Mathematics II, *Subsidiary*).
 Eite, Walter (Applied Mathematics I, Geology, *Subsidiary*).
 Garner, Frederic Horace (Physics, Pure Mathematics II, Applied Mathematics I, *Subsidiary*).
 Greaves, Harry (Geology I, *Principal* ; Applied Mathematics I, *Subsidiary*).
 Hopkins, Graeme (Physics II, Pure Mathematics II, Applied Mathematics I, *Principal*).
 Hornby, Arthur John Ward (Geology, *Subsidiary*).
 Howell, Charles Joseph (Pure Mathematics II, *Subsidiary*).
 Jennens, Arthur Ernest (Physics, *Subsidiary*).
 Jeyes, Dorothy (Applied Mathematics I, *Subsidiary*).
 Knight, Frederick William (Physics, Applied Mathematics I, *Subsidiary*).
 Lycett, Percival James (Metallurgy, *Subsidiary*).
 Mason, Evelyn Arthur (Geology I, *Principal* ; Physics, Pure Mathematics II, Applied Mathematics I, *Subsidiary*).
 Minshall, Letitia Elizabeth (Geology, *Subsidiary*).
 Newnham, Eric Victor (Physics II, *Principal* ; Pure Mathematics II, *Subsidiary*).
 Pearson, Stanley (Chemistry, *Principal* ; Metallurgy, *Subsidiary*).
 Povey, Sidney Douglas (Physics II, Pure Mathematics II, Applied Mathematics I, *Principal*).
 Somerfield, Edward (Geology, *Subsidiary*).
 Thompson, Herbert John (Pure Mathematics III, Applied Mathematics II, *Principal*).

Tongue, John William Collis (Geology I, *Principal*).
 Weaving, Archibald Arthur (Chemistry, *Principal*; Metallurgy, *Subsidiary*).
 White, Edmund John (Physics, *Principal*; Metallurgy, *Subsidiary*).
 Wood, Charles Edmund (Physics, *Subsidiary*).

IV.—Degree of Bachelor of Science in Engineering.

HONOURS DIVISION.

Morgan, Frank Leslie (Civil Engineering).

Division I.

Bates, Harold Christopher.
 Chinn, Frank Morton.
 Isherwood, Norman George.
 Jones, Charles Henry.
 Kidd, Cecil Christian.
 Middleton, John Grove.
 Moharram, Mohammad Abd el Latif.
 Thorne, Charles Everard.
 Turner, Leslie.

Division II.

Gumersall, Gerald Joseph.
 Hutton, John Barnabas.
 Rawlins, George Bromley.
 Simms, Harold Marston.
 Wilkins, Frank Trevor.

Completed the Examination.

Patterson, George.
 Smith, Leonard Warren.

Passed in part of the Examination.

Jamie, Robert Cuthbert Scott (Mechanical and Electrical Engineering, Accounting).

Two-Year Student eligible for Degree after a further year's attendance at the University

Division I.

Shaaban, Imam.

V.—Degree of Bachelor of Science in Metallurgy.

Passed in part of the Examination.

Findon, Geoffrey Bernard (Metallurgy, Engineering VIII.)
 Gibson, Heseltine (Metallurgy, Engineering VIII, Mining, Surveying).
 Ingall, Douglas Heber (Metallurgy, Chemistry, Engineering VIII.)

VI.—Degree of Bachelor of Science in Mining.

Passed in part of the Examination.

- Bardaloye, Girish Chandra (Mining, Engineering XIIIC, Geology.
Heat Laboratory, Accounting).
Pitt, Charles Harry (Mining, Engineering XIIIC, Geology.
Accounting, Assaying).
Scott, George Norman (Mining III, Engineering VIII, Geology).
Sen-Gupta, Monmatha Nath (Heat Laboratory).

VII.—Intermediate Science.

(a) *Internal Candidates.*

Division I.

- Biddulph, Richard.
Lowe, Charles William.
Newnham, Eric Victor.

Division II.

- Goddard, Archibald Edwin.
Groves, Ruby Caroline.
Jones, Leslie Amiel.
Taylor, Hubert.
Waring, Norman Harold.

Passed in part of the Examination.

- Andrews, William Archibald (Physics, Chemistry)
Mills, Laurence Harry (Physics, Chemistry).
Mowinckel, Conrad Helge (Mathematics, Chemistry)
Underwood, Elsie Amy (Chemistry, Biology).
Wearing, Cyril Murray (Physics, Chemistry).

(b) *External Candidates.*

Division I.

- Daynes, Harold Ashley (Lower School of Lawrence Sheriff, Rugby).
Keeley, Thomas Clews (King Edward's School, Birmingham).

Division II.

- Barber, Winifred Henty (Birmingham Pupil Teachers' Central
Classes).

Completed the Examination.

- Elsey, Edwin (Private Tuition).
Perry, Charles William (West Bromwich Municipal Secondary
School).

Passed in part of the Examination.

- Beardmore, Ernest William (Burton-on-Trent Pupil Teachers' Centre). (*Mathematics, Physics*)
Summerton, Harold (West Bromwich Municipal Secondary School). (*Physics, Chemistry*).

VIII.—Third Engineering Examination.

Division I.

- Crowther, Frederick Kenneth.
Crowther, Oswald Hubert.
Gibson, Charles Prosser.
Hall, Horace Frank.
Pettipher, Frank.
Tung, Pau Cheng.
Underwood, Francis.

Division II.

- Bayliss, Arthur Noel.
Hunter, Kenneth Henry Wizzle.
Roonchit, Nai Chun.

Completed the Examination.

- Jamie, Robert Cuthbert Scott.
Moharram, Mohammad Abd El Latif.
Wilkins, Frank Trevor.

Passed in part of the Examination:

- Frugoni, Emilio Lopez (Electrical Engineering, XIII.)
Hipkins, Edward Cecil Daniel (Mechanical and Civil Engineering).
Lea, Norman (Mechanical, Civil and Electrical Engineering).
Orton, Joseph William Noel (Electrical Engineering, Applied Mathematics).
Wardle, Alfred George (Mechanical, Civil and Electrical Engineering).

IX.—Second Engineering Examination.

Division I.

- Bladwell, Leonard Joseph.
Lyth, Cyril John.
Pearce, James George.
Pool, William John.
Watkins, William Lewis.

Division II.

Barwell, Hugh William James.
 Hamada, Abd el Rahman.
 Round, Benjamin James Stacey.
 Stubbs, Albert.
 Steward, Cyril Adams.

Completed the Examination :

Hildick, Allan.
 Hipkins, Edward Cecil Daniel.

Passed in part of the Examination :

Barwise, Henry Balfour (Engineering IA and II, Physics, Geology).
 Clifford, George Herbert Workman (Engineering IA and II, Pure Mathematics II, Physics, Metallurgy).
 Elkington, Arthur Edward Hardwicke (Engineering IA, II and VII., Physics, Geology).
 Gething, Francis Frederick (Engineering IA and II, Applied Mathematics I, Physics).
 Hayward, Arthur Ernest (Engineering IA and II, Applied Mathematics I).
 Hillman, Eric Chester (Engineering IA, II and VII, Geology).
 King, Cyril Henry Marshall (Engineering IA and II, Pure and Applied Mathematics, and Metallurgy).
 Rosas, Pedro Nolasco (Pure and Applied Mathematics, Physics, Geology).
 Schultz, Walter (Engineering IA and II, Physics, Metallurgy).
 Schwarck, Donald Diederich (Engineering IA, II and VII, Geology).
 Tregea, William Herbert (Engineering IA, II and VII, Applied Mathematics, Physics, Geology).

X.—First Engineering Examination.

(a) Internal Candidates.

Division I.

Adam, Peter.
 Collins, Horatio John.

Division II.

Gothard, Clifford Frederic.
 Gothard, Sydney.
 Lones, Arthur John.
 Mansfield, Eric Oswald.
 Millner, William.
 Mulleady, Richard Thomas.
 Trimble, Claude Douglas.

Completed the Examination :

Elkington, Arthur Edward Hardwicke.
Hamada, Abd-el-Rahman.
Hunter, Kenneth Henry Windle.
Steward, Cyril Adams.
Tregea, William Herbert.

Passed in part of the Examination.

Horniman, Robert Henry (Physics, Chemistry, Engineering,
Drawing).
Miles, Abraham Arthur (Pure Mathematics, Physics, Chemistry,
Engineering, Drawing).
Toeplitz, Jan (Physics, Chemistry, Engineering).

(b) External Candidates.

Division I.

Gross, Asher Ansell (Birmingham Municipal Technical School).

Division II.

Westrop, Sidney Albert (Bridgnorth Grammar School).

XI.—Second Metallurgy Examination.

Division II.

Adams, Frederick William.
Thorneycroft, William Ernest.

Completed the Examination.

Findon, Geoffrey Bernard.

Passed in part of the Examination.

Ellis, Owen William (Pure Mathematics, Drawing).
Patterson, Harry (Metallurgy, Engineering I and IA, Drawing).
Rogers, George Harry (Metallurgy, Engineering I and IA,
Drawing).

XII.—Second Mining Examination.

(a) Degree Candidates.

Division I.

Scott, George Norman.

Completed the Examination.

Pitt, Charles Harry.

Passed in part of the Examination.

Ford, Gabriel Robert Harvey (Mining, Surveying, Geology, Engineering, Metallurgy).

(b) *Diploma Candidates.*

Division I.

Butlin, John Arundel.

XIII.—First Metallurgy Examination.

Division I.

Ellis, Owen William.

Field, Arthur John.

Completed the Examination.

Gray, William.

Passed in part of the Examination.

Starley, James Reginald (Mathematics, Chemistry, Surveying).

XIV.—First Mining Examination.

(a) *Degree Candidates.*

Division I.

Hulse, William.

Division II.

Loh, Sze Shung.

Smith, Reginald Huntley.

Passed in part of the Examination.

Chou, Hsi (Chemistry, Mining, Surveying).

Jeffcott, Wilfrid George (Mining, Surveying, Mathematics, Physics, Chemistry).

Kang, Shi Ching (Mining, Surveying, Drawing).

Lee, Pao Ling (Mining, Surveying, Chemistry, Drawing).

(b) *Diploma Candidates.*

Passed in part of the Examination.

Hockaday, Sydney Reginald (Mining, Surveying, Mathematics, Drawing).

Uzielli, Valentine (Mining, Surveying, Physics, Chemistry, Drawing).

XV.—Diploma in Malting and Brewing.

Division I.

Mower, George Collins.

Division II.

Dix, Geoffrey Stuart.

SUPPLEMENTARY EXAMINATIONS.*September, 1911.*

I.—Degree of Bachelor of Science.

Completed the Examination.

Cooksey, Wilfrid Maurice.

Elwell, John Batty.

Leese, Cyril Ewart.

Lock, Stanley Eli John.

Onions, Laura.

Rogers, Sidney.

Walford, Ernest.

Passed in part of the Examination.

Ahmad, Abd el Hameed (Applied Mathematics I).

Denby, Sarah Kate (Geology I).

Ehrhardt, Herbert Wilfrid (Applied Mathematics I).

Pritchett, Kathleen Muriel (Applied Mathematics II).

Scarborough, Harold Archibald (Physics II).

Webb, Harry William (Physics II).

White, Edmund John (Physics II).

Weaving, Archibald Arthur (Pure Mathematics II).

*Two-Year Student eligible for Degree after a further year's attendance at the University.**Completed the Examination.*

Reade Thomas Harold.

II.—Degree of Bachelor of Science in Engineering.

Completed the Examination.

Powell, Clarence Henry.

III.—Intermediate Science Examination.

CLASS II.

Howell, Charles Joseph.

Completed the Examination.

Greaves, Harry (*External*).

Hood, Lilian.

Knight, Frederick William (*External*).

Pearson, Stanley.

Parry, Douglas Howell (*External*).

Robson, Vivian Erwood.

Richards, Christopher Alfred (*External*).

Passed in part of the Examination.

Howson, Charles William Harold (Physics, Chemistry).
External.

Perry, Charles William (Physics, Chemistry). *External.*

Storer, James Arthur (Physics, Chemistry). *External.*

IV.—Third Engineering Examination.

Completed the Examination.

Gumersall, Gerald Joseph.

Hutton, John Barnabas.

Jones, Charles Henry.

Middleton, John Grove.

Rawlins, George Bromley.

Thorne, Charles Everard.

Turner, Leslie.

Passed in part of the Examination.

Jamie, Robert Cuthbert Scott (Applied Mathematics)

V.—Second Engineering Examination.

Completed the Examination

Hall, Horace Frank]

Lea, Norman.

Pettipher, Frank.

Rawlins, George Bromley.

Tung, Pau-Cheng.

Underwood, Francis.

Wardle, Alfred George.

Passed in part of the Examination.

Hipkins, Edward Cecil Daniel (Pure Mathematics II).
 Mernes, Albino Vallovero (Pure Mathematics II, Applied
 Mathematics I).
 Rosas, Pedro Nolasco (Engineering Ia, II, VII).

VI.—First Engineering Examination.

CLASS II.

Elsey, Edwin (*External*).

Completed the Examination.

Barwell, Hugh William Eames (*External*).
 Barwise, Henry Balfour.
 Hardwicke-Elkington, Arthur Edward (*External*).
 Hayward, Arthur Ernest.
 Jones, Frederick Allan Selous.
 Jones, Reginald Edward.
 Schwarck, Donald Diederich.

VII.—Second Mining Examination.

(a) *Degree Regulations :**Completed the Examination.*

Bardaloye, Girish Chandra.
 Lloyd-Jones, Juan.
 Obaidullah, Mohammad.
 Sen-Gupta, Monmatha Nath

(b) *Diploma Regulations.**Completed the Examination.*

Child, John Albert.
 Garratt, Charles Frederick.

VIII.—First Mining Examination.

(a) *Degree Regulations.**Completed the Examination.*

Drake, Wilfrid.

Passed in part of the Examination.

Gray, William (Pure Mathematics I).

*(b) Diploma Regulations.**Completed the Examination.*

Garratt, Charles Frederick.

IX.—Second Metallurgy Examination.

Passed in part of the Examination.

Nair, Thekat Kumaran (Applied Mathematics I).

Thorncroft, William Ernest (Applied Mathematics I).

X.—First Metallurgy Examination.

*Completed the Examination.*Adams, Frederick William (*External*).

Keep, Arthur Stuart.

Patterson, Harry.

Rogers, George Harry.

FACULTY OF ARTS.

JUNE, 1912.

I.—Degree of Master of Arts.

*Under Ordinary Regulations*Ashley, Annie (*Specialized Course*).

Baggs, Thomas Alexander.

Brown, Percy Charles.

Burrows, Mabel Mary.

Crutchley, Adeline

Dunsby, Charles (*School of Classics*).

Gibson, Frances Millicent.

Hingley, George Clement (*School of Classics*).Kay, Laurence Herbert (*School of Modern Languages*)

Rose, Arthur Norman.

Ross, Lizzie Louise.

Wilson, Frank Percy.

Wordsworth, Emily Constance.

II.—Degree of Bachelor of Arts.

Humphreys, Tryphena Christabel Mary (*Specialized Course*).Johnson, William Harold (*Specialized Course*)Marshall, Dorothy (*School of Classics*).Parker, Mary Olive (*Specialized Course*)Piercy, Edgar Ernest (*School of Classics*).Southall, Ida Margaret (*Specialized Course*).

Division I.

- Ball, Arthur (*Distinction in History*).
 *Barnes, Eliza Mary Ann (*Distinction in Latin and English*).
 Coates, John Bourne (*Distinction in English*).
 Couch, Herbert William (*Distinction in German and History*).
 Freeling, Dorothy (*Distinction in Latin*).
 Harris, Mary Lorna (*Distinction in Spanish*).
 Hartland, Reginald William (*Distinction in Latin, English and French*).
 Hibburd, Else Mary (*Distinction in German*).
 Pitt, William Lawrence (*Distinction in Latin*).
 Reyes, Consuelo Mary Annette Bosque de (*Distinction in Philosophy*).

Division II.

- Barrett, Frances May.
 Clarke, Albert Edward.
 Cooke, Alfred Roland.
 Drew, Lily Elizabeth.
 *Evans, Clementina Elizabeth.
 Glendon, Edgar Tom.
 Grindlay, Agnes Scales.
 Harris, Frances Emily.
 Hoult, Marion Prince.
 Marsh, Alma.
 Pearson, Doris Ivy.
 Rackstaw, Marjorie.
 Smith, Arthur.
 Thompson, Lucy Ann.
 Thornton, Hilda Madeline.

Completed the Examination.

- Garbutt, Helen.
 Hibburd, Marguerite Frances.
 Partridge, Dinah.
 Wilson, Arthur Ernest.

Passed in part of the Examination.

- Barker, John William (Education, *Principal*).
 Cauterley, Mildred Ruth (Latin, *Subsidiary*).
 Cook, Dorothy Mabel (History II, *Principal*; Latin, *Subsidiary*).
 Cottrell, Thomas Ernest (Latin, Education, *Principal*; History II, *Subsidiary*).
 Griffin, John Ridgeway (Education, History, *Principal*; Psychology, *Subsidiary*).
 Hart, Grace Mary (Latin, *Principal*).
 Holliday, Catherine Elizabeth (English, History, *Principal*).
 Ivens, John Phillips (French, Education I, Pure Mathematics, *Principal*).

*Passed Examination in 1911.

- Johnson, Horace (English, Education, *Principal* ; History II, *Subsidiary*).
- Knowles, Frederick (Latin, French, *Principal* ; History II, *Subsidiary*).
- Peart, Emilie (English, Education, *Principal*).
- Preece, Muriel Jessie (English, Psychology, *Principal* ; Latin, *Subsidiary*).
- Rowlands, Edith Alice (English, Education, History, *Principal*).
- Smith, William Edward (Latin, English, French, Education I, *Principal*).
- Taylor, Herbert William (English, French, Education I, *Principal* ; Latin, *Subsidiary*).
- Thomason, May Beatrice (Education, History, *Principal*).
- Thompson, Harold Norman (French, Education I, History, *Principal*).
- Thorneycroft, Gertrude Elsie (History II, *Subsidiary*).
- Vernon, Muriel Iris Marjorie (Latin, English, History, *Principal*).
- Worthington, Frances Ellen (English, History, *Principal*).

Two-Year Students eligible for Degree after a further year's attendance at the University.

Division II.

Chitty, Florence.
Luckman, Walter Frank.

III.—Degree of Bachelor of Music.

Division I.

Raybould, Robert Clarence.

IV.—Second Examination in the School of Modern Languages.

Division II.

Finney, Kathleen Elizabeth.

V.—Second Examination in the School of English Literature.

Division I.

Bailey, Mabel Nellie.

Division II.

Dunsby, Archibald.
Peaty, Mary Josephine.

VI.—Specialized Course (Second Year).

Hunt, Elsie Maud Caruthers (Latin, Greek, General European History I).

VII.—Second Year Arts Examination.

- Adams, May Dorothy (Latin, French, Pure Mathematics, History II.)
 Alcock, William Desmond Evelyn (Latin, English, French, Greek).
 Alsop, Horace (Latin, English, French, Education I.)
 Atkinson, Elizabeth Maud (Latin, English, History II.)
 Ayrton, Agnes Clarissa (Latin, English, History, II)
 Barnes, May (Latin, English, French, Pure Mathematics, History II.)
 Beebee, Ethel May (Latin, English, History II.)
 Burgess, Louisa Victoria (Latin, English, French).
 Cade, Frank (Latin, English).
 Chapman, Frank (Latin).
 Clapham, Maude Marion (English, History II, Education I.)
 Cope, Dora Gwendoline (Latin, English, French, German).
 Cullis, Eleanor (Latin, French, Pure Mathematics, History II).
 Curtin, Annie (History II.)
 Dedicoat, Dorothy Alice (Latin, Pure Mathematics, Education I.)
 Druller, Vivian Vaughan (Latin, English, French).
 Fisher, Edmund (Latin, English, French, Pure Mathematics History II.)
 Fullwood, Florence Kathleen (Latin, English, History II, Education I.)
 Hatton, Primrose (Latin, English, History II, Education I.)
 Hayes, Gertrude Eliza (Latin, English, French, Education I.)
 Hipkins, Charles Hammond (Latin, English, French).
 Hutchin, Hilda (Latin, English, History II, Education I.)
 Keey, Dorothy (History I.)
 Leach, Winifred (Latin, French, Pure Mathematics, History II.)
 Lindon, Albert (Latin, French, Education I.)
 Mason, Edward (History II.)
 Mills, Francis Lonsdale (Latin, French, Psychology, Education I.)
 Moreton, Frank Edward (Latin).
 Murphy, Mildred (Latin, English, Psychology, History I.)
 Prosser, Catherine Lavinia (Latin, Pure Mathematics)
 Read, Marion Althea (Latin, French, History II.)
 Robinson, Harriet May (English, French).
 Round, Horace (English, Education I.)
 Shutt, Lily (Latin, English, Pure Mathematics, Education I.)
 Taylor, Gladys Maud (Latin).
 Tosh, Fannie Helen (Latin, Pure Mathematics, History II.)
 Walker, Evelyn Agar (History II.)
 Wilkinson, Miriam (Latin, English, Pure Mathematics, History II.)
 Wilkinson, William Evans (Latin, English, French, Pure Mathematics).
 Wragg, Ethel (Latin, French, British Institutions, Education I.)

VIII.—Second Examination for the Degree of
B.Mus.

Division I.

Chattoe, Thomas Clarence.
Roberts, Clifford.

IX.—First Examination in the School of Modern
Languages.

Division I.

Airston, Wilhelmina.
Rose, William.

Division II.

Cash, Edith Fanny.
Gibson, Mary Tregellas.
Thomas, Bertha Pemberton.

X.—First Examination in the School of English
Literature.

Division I.

Goodman, Gilbert Neville.

Division II.

Guise, Ewart Stanley.
McIntosh, Nora Russell.

XI.—Intermediate Arts Examination.

(a) *Internal Candidates.*

Division I.

Ashby, Mabel Kathleen.
Bellison, Mark.
Cumming, Gertrude.
Haselden, Annie.
Holloway, Jessie Elizabeth.
Jones, Gertrude Sarah Ann.
Marsh, Nora Alice.
Pither, Florence Mary.

Division II.

Dance, Marguerite Deborah Seton.
Davies, Eulalie Mabel.
Evans, Gwen.
Ginn, Ethel Mary.
Harrison, Arthur Cyril.
Haselden, Robert.

Hinchley, Jessie Emily.
 Holloway, Dorothy.
 Lardge, Florence Mabel.
 Pearson, Edgar McCully.
 Sadler, Dorothy.
 Smith, Augusta Mary.
 Southerton, Laurence Cyril.
 Turner, John Ewart Shipley.
 Waller, Grace Hutchinson.
 Whitehouse, Beatrice May.

Completed the Examination.

Beebee, Ethel May.
 Carr, Dorothy Marguerite Olivia.
 Curtin, Annie.
 Mason, Edward.
 Moreton, Frank Edward.
 Robinson, Harriet May.

Passed in part of the Examination.

Amiss, Winifred Helen (English, French, Mathematics, History I).
 Bennett, Herbert (Latin, English, History I).
 Bolas, Elsie (Latin, English, Mathematics).
 Bracey, Bertha Lilian (English, French, Geography).
 Clews, Hollis Hudson (Latin).
 Daniels, John Henry (Latin, English, History I).
 George, James Arthur (English, Mathematics, Geography).
 Hopley, William Arnold (Latin, English, Geography).
 Jarvis, Percy William (Latin, English, Geography).
 Jones, Samuel John (French, Mathematics, History I).
 Kay, Florence Emilie (Latin, English, French, History I).
 Kite, John Clarence (English, French, History I).
 Marshall, Hazel (Latin, English, Mathematics, History I).
 Pearsall, Lucy Ellen (Latin, English, Mathematics, History I).
 Randall, Phyllis Amy (Latin, English, French).
 Reeve, Mabel Gladys (English, French, German, Logic).
 Sanderson, Joyce Elizabeth (Latin, English, History I).
 Whitehead, Annie Marguerita (Latin, English, French, Geography).
 Witcomb, Robert Arthur (Latin, English, French, History I).

(b) *External Candidates :*

Division I.

Gibbons, Florence	Coventry High School for Girls.
Williams, Clara Annette	George Dixon Secondary School, Birmingham.

Division II.

Saunders, Constance Dorothy George Dixon Secondary School,
Birmingham.

Passed in part of the Examination.

Ferrario, Marie Theresé King Edward's High School,
Birmingham.
(*Latin, Greek, Mathematics.*)

Lerrigo, John Henry King Edward's High School,
Birmingham.
(*English, French, Mathematics, History I.*)

Maxwell, Florence Evelyn Birmingham Pupil Teachers'
Central Classes.
(*French, Mathematics, History II.*)

Newman, Winifred Lilian Birmingham Pupil Teachers'
Central Classes.
(*English, Mathematics, History II.*)

Rainsford, Gladys Ada Birmingham Pupil Teachers'
Central Classes.
(*English, French, Mathematics, History II.*)

XII.—Entrance Examination to School of Classics.

Passed in part of the Examination.

Sherlock, Helen Travers, King Edward's High School, Birmingham.
(*Latin, Greek, English, and Additional Classics.*)

XIII.—First Examination for the Degree of B.Mus.

Division I.

Godfrey, Harold Graham.

Completed the Examination.

Roberts, Clifford.

XIV.—Secondary Teachers' Diploma Examination.

Cox, Dorothy Cécile.
Cox, Marguerite Anna.
Fretter, Arthur.
Hindsley, Madeline.
Lewis, Dora Millicent,
Marshall, Wallace Henry.
Parker, Edward Arthur.
Partridge, Dora Lilian.

Passed in part of the Examination.

Walford, Ernest (Practical).

SUPPLEMENTARY EXAMINATIONS.

September, 1911.

I. - Degree of Bachelor of Arts.

Completed the Examination.

Campion, Grace Mary.
Critchley, Godfrey Percival.
Doughty, Mabel Annie.
Sewell, Dorothy Ella.
Simpson, Winifred Jane.
Stevenson, John Charles.

Passed in part of the Examination

Partridge, Dinah (English, *Principal*).

II. - Second Year Arts Examination.

Bartindale, Gladys Minnie (English).
Cottrell, Thomas Ernest (Latin).
Glendon, Edgar Tom (Latin, French).
Griffin, John Ridgeway (French).
Harris, Mary Lorna (Latin).
Hart, Grace Mary (English).
Ivens, John Phillips (Latin).
Knowles, Frederick (English).
Marsh, Alma (English).
Peart, Emilie (Latin).
Rackstraw, Marjorie (Latin, Philosophy).
Reyes, Consuelo Mary Annette Bosque de (French).
Thompson, Lucy Ann (Applied Mathematics I).

III. - Intermediate Arts Examination.

Completed the Examination.

Airston, Wilhelmina.
Ayrton, Agnes Clarissa.
Cade, Frank.
Cash, Edith Fanny (*External*).
Chapman, Frank.
Clapham, Maude Marion.
Cook, Dorothy Mabel.
Fullwood, Florence Kathleen.
Hatton, Primrose.
Hayes, Gertrude Eliza.
Hutchin, Hilda.
Keey, Dorothy (*External*).

Lindon, Albert.
 Marsh, Alma.
 McIntosh, Nora Russell (*External*).
 Mills, Francis Lonsdale.
 Phillips, Elsie.
 Prosser, Catherine Lavinia (*External*).
 Round, Horace.
 Shutt, Lillie.
 Sweetinburgh, Florence Ellen (*External*).
 Thomas, Bertha Pemberton.
 Thomason, May Beatrice.
 Walker, Evelyn Ager.

Passed in part of the Examination.

Hawkins, Flora Doris (Mathematics).
 Hilton, Evelyn Dorothy (Latin, English, French, British Institutions).
 Harriss, Irene Vernon (English).
 Mason, Edward (Latin, French, British Institutions, Mathematics).

IV.—Entrance Examination to the School of Modern Languages.

Completed the Examination.

Gibson, Mary Tregellas.

FACULTY OF MEDICINE.

JUNE, 1912.

I.—Degrees of Bachelor of Medicine and Bachelor of Surgery.

Class II.

Alabaster, George Herbert.
 Elkington, George Ernest.
 Lowe, John Burman.
 McCready, Violet Maud.
 Spackman, Charles Lovell.
 Thornhill, Ronald Joseph Tennant.
 Wilkinson, Alan Ayscough.

II.—Fourth Examination for the Degrees of
M.B., Ch.B. (*Forensic Medicine, Toxicology, Public
Health and Therapeutics*).

Class II.

Richmond, Henry.
Ritchie, James Henry.

III.—Third Examination for the Degrees of M.B.,
Ch.B. (*Pathology and Bacteriology and Materia Medica
and Practical Pharmacy*).

Class I.

Ashby, Elizabeth Labrey.
Roberts, Leslie Douglas.

Class II.

Abrahams, Reginald George.
Langdale-Smith, Henry Gauntlett.
Parkes, Oscar.
Pinson, Kenneth Bernard.
Raison, Cyril Alban.
Smith, Alfred Percy.
Smith, Herbert.
Stubbs, Clement Massey.
Teall, Cecil George.
Wood-White, Bernard.

Passed in part of the Examination.

Worsley, Allan Nathaniel (*Pathology and Bacteriology*).

IV.—Second Examination for the Degrees of M.B.,
Ch.B. (*Anatomy and Physiology*).

Class I.

Gill, Koch Harry

CLASS II.

Crosskey, John Henry.
Evans, Alice Muriel.
Jones, Eric Shirley.
Lees, Francis Charles.
Madgavkar, Malati Krishnarav.
Mathie, George Cecil.
Shufflebotham, Hilda Nora.
Thomson, Arthur Peregrine.
Turner, Gladys Maude.
Underhill, Eric.

V.—First Examination for the Degrees of M.B.,
Ch.B. (*Physics, Chemistry and Biology*).

(a) *Internal Candidates.*

CLASS I.

Richards, Frederick Harold.
Steward, Sydney Tibbitts.

Class II.

Alldrige, Edward Gordon.
Clements, William Arnold.
Hartley, George Cleverdon.
Hughes, Oscar Cecil Lawrence.
Kerby, Theo Rosser Fred.
Smith, Arthur Cloudesley.
Spurway, Eustace Edgar Roberts.
Staley, Robert James.

Completed the Examination.

Weston, John Spencer Theodore.

Passed in part of the Examination.

Fuoss, Armin Frank Maximilian (Chemistry and Biology).
Graham, Reginald Portman (Chemistry and Biology).
Rees, Gwendolen Mary (Chemistry and Biology).

(b) *External Candidates.*

CLASS II.

Mence, Harold George Victor (King Edward's High School,
Birmingham).
Taylor, John Lupton (King Edward's High School, Birmingham).

VI. — Third Examination for the Diploma in
Dental Surgery (*Anatomy and Physiology and Den-
tal Anatomy and Dental Histology*).

Completed the Examination.

Ashton, Percy.

VII.—Second Examination for the Diploma in
Dental Surgery (*Dental Metallurgy and Mechanical
Dentistry*).

Thornton, Harold Gordon Stewart.

VIII.—Examination for Diploma in Public Health.

PART I.

Blackham, Walter Charles.
Holden, Oscar Madeley.

SUPPLEMENTARY EXAMINATIONS.

SEPTEMBER, 1911

I.—Third Examination for the Degrees of M.B., Ch.B.

*(Pathology and Bacteriology, and Materia Medica and
Pharmacy).*

Completed the Examination.

Ritchie, James Henry.

II.—Second Examination for the Degrees of M.B., Ch.B.

(Anatomy and Physiology).

CLASS II.

Abrahams, Reginald George.
Parkes, Oscar.
Smith, Herbert.
Stubbs, Clement Massey.
Thornton, Pensam.
Worsley, Allan Nathaniel.

III.—First Examination for the Degrees of M.B., Ch.B.

(Physics, Chemistry and Biology).

Completed the Examination.

Lees, Francis Charles

Passed in part of the Examination

Weston, John Theodore Spencer *(Physics and Chemistry).*

DECEMBER, 1911.

Degrees of Bachelor of Medicine and Bachelor of Surgery.

CLASS II.

Bampton, James Henry.
 Coleman, Robert Baxendell.
 Court, Christopher Charles Cole.
 Newton, Percy Alfred.

Diploma in Dental Surgery.

Jessop, John.
 Jones, Edgar George.

Third Examination for the Diploma in Dental Surgery.

(Anatomy and Physiology, and Dental Anatomy and Dental Histology).

Ashton, Percy (Anatomy, Physiology).

First Examination for the Diploma in Dental Surgery.

Completed the Examination.

Thornton, Harold Gordon Stewart.

 MARCH, 1912.

Examination for the Diploma in Public Health.

PART II. *(To complete Examination.)*

Boome, Edward James.

PART I.

Briggs, Robert Warden.

 CLINICAL PRIZES.

 Medicine.

Senior: George Ernest Elkington.
Junior: No award.

Surgery.

Senior: George Ernest Elkington.*Junior*: No award.

Midwifery.

George Herbert Alabaster.

FACULTY OF COMMERCE.JUNE, 1912.

I.—Degree of Master of Commerce.

Pao, Kuang Yung.

Woo, Ching Sung.

Woo, Tsoo Dong.

II.—Degree of Bachelor of Commerce.

Division I.

Goodwin, Oliver Howard (*Distinction in Commerce, Spanish*).

Division II.

Tannan, Mohan Lal.

Completed the Examination.

Lo, Hong Nien (Accounting, Commercial Law, Technique of Trade, French and German).

Passed in part of the Examination:

Alberg, Michel (Spanish).

Carter, Samuel (Commerce, Statistics, Commercial Law, Public Finance).

Nomura, Motogoro (Commerce, Commercial Law).

Solera, Juan Ma (Spanish, Italian).

Vivar, Eduardo de (Statistics, Public Finance).

III.—Second Examination for the Degree of B.Com.

Division I.

Browne, Julius Basil (*Distinction in German*).

Surr, Rudolph Vincent (*Distinction in Commerce*).

Division II.

Littleboy, Maurice.

Oxenham, Frederick William.

Passed in part of the Examination.

Carter, Samuel (Transport, Industrial Law).

Gower, Herbert George (Commerce, Accounting, General Economics, Transport, Industrial Law, Engineering, Machine Drawing, Workshop).

Hayward, Harold Victor (Commerce, General Economics, Transport, Industrial Law).

Jacks, Edmund Cecil (Commerce, Accounting, Transport, Industrial Law, Engineering, Machine Drawing, Workshop).

Luker, Frederick George (Commerce, Accounting, General Economics, Transport, Industrial Law, Spanish, Engineering, Machine Drawing, Workshop).

Nomura, Motogoro (Industrial Law).

Skipworth, Bernard William (Commerce, Accounting, General Economics, Transport, Industrial Law, Spanish, Logic).

Solera, Juan Ma (Commerce).

Vivar, Eduardo de (Industrial Law, Italian).

Whittall, William Gordon (Commerce, Transport).

IV.—First Examination for the Degree of B. Com.

Division II.

Brindley, Philip Sidney (*Distinction in Accounting, Spanish*).

Lovesy, Harold Frederick.

Completed the Examination.

Vivar, Eduardo de (Accounting, General Economics, Italian).

Passed in part of the Examination.

Alberg, Michel (Accounting).

Reicher, Casimir (French, German, European History).

Solera, Juan Ma (Accounting).

Waite, Frederick (Commerce, Accounting, General Economics, Engineering I, Machine Drawing, Workshop).

Whittall, William Gordon (General Economics).

Wynter, Herbert Noel (Accounting).

SUPPLEMENTARY EXAMINATIONS,

September, 1911.

First Examination for the Degree of B.Com.

Completed the Examination :

Jacks, Edmund Cecil.
Skipworth, Bernard William.

SOCIAL STUDY DIPLOMA EXAMINATION.

JUNE, 1912.

Social Study Higher Diploma.

Barnett, Mary Gilmore.
Smith, Edith Nora.
Thomson, Mary Horner.
Winder, Phyllis Devereux.

Social Study Diploma.

Ashley, Annie.
Basnett, Isabel Charlotte.
Brown, Mary Kathleen.
Catchpool, Egerton St. John Pettifor.
Clements, Richard.
Cole, Agnes Louise.
Cramp, Amy Winifred (*Distinction*).
Ellwood, Jennie.
Franklin, Geoffrey Montagu Ernest.
Jesper, Mabel Ethel.
Stewart, Jean Carruthers (*Distinction*).
Strathy, Jessie Lyall Lee.

THE GUILD OF UNDERGRADUATES.

President : MISS M. PARKER.

Vice-President : O. H. GOODWIN.

Hon. Secretary : A. F. CLAY.

The Guild is an organised association of the Undergraduates for the furthering of their common interests, which is provided for by the Charter of the University, and should be the recognised means of communication between the Undergraduates on the one hand, and the Court of Governors, Council and Senate on the other. For this purpose it may at any time petition or make representation to the Council or Senate of the University on any matter affecting the interests of the Undergraduates, while, in addition, the Guild has three Representatives on the Court of Governors with the privileges of full members.

The Guild also organises every year a number of social functions such as a *conversazione*, dance, and students' night at the Pantomime, and deals with inter-university undergraduates' business.

It publishes annually a Handbook containing information about Students' Societies and Clubs; the University Magazine, the *Mermaid*, is its official organ.

BIRMINGHAM UNIVERSITY ATHLETIC CLUB.

President :

Vice-President : Professor J. CADMAN, D.Sc., F.G.S.

Hon. Secretary : J. C. BROWN.

Hon. Treasurer : G. A. SHAKESPEAR, D.Sc. ; M.A.

Membership of the Club is open to past and present members of the University of Birmingham, to past members of Mason College, and to past members of Queen's College, Birmingham. The entrance fee is Five Shillings. There is no annual subscription.

All members of the Club are entitled to wear hat-bands, scarves, blazers, and ties in the Athletic Club colours (red, blue, and black), but not the Lion blazer, which is specially awarded.

The Club includes the following sections :—Rugby Football, Association Football, Cricket, Hockey, Tennis, Swimming, Golf, Boxing, Wrestling, and Sports. No one is eligible to become a member of any section unless he has previously joined the Athletic Club. Each section is managed by its own Committee, which arranges the subscription and awards colours (these are subject to the approval of the Athletic Club Committee). The A.C. Committee consists of two representatives from each Section, the President, Vice-President, Secretary, and Treasurer. The authorities allow the Athletic Club a certain sum, which is allotted to the various Sections according to their needs.

The Athletic Ground is adjacent to the University Buildings at Edgbaston.

BIRMINGHAM UNIVERSITY OFFICERS' TRAINING CORPS.

COMMITTEE OF MILITARY EDUCATION.

MR. NEVILLE CHAMBERLAIN (*Chairman*).
 THE VICE-CHANCELLOR.
 THE PRINCIPAL.
 THE VICE-PRINCIPAL.
 THE SECRETARY.
 THE COMMANDANT, O.T.C. CONTINGENT.
 THE DEAN OF THE MEDICAL FACULTY.
 THE DEAN OF THE SCIENCE FACULTY.
 MR. JOSEPH JAMES.
 MR. W. W. BUTLER.
 THE OFFICERS OF THE COMPANY,
 THE COMMANDING OFFICER, 5TH BATT. ROYAL
 WARWICKSHIRE REGT.

Under the auspices of this Committee, a contingent of the Officers' Training Corps has been established, particulars of which are given below.

Lectures on Military subjects will be delivered in the University from time to time.

Officers' Training Corps.

BIRMINGHAM UNIVERSITY CONTINGENT.
 MAJOR W. E. BENNETT, *Commanding*.

The object of this Corps is to provide students and others with a standardised measure of elementary

military training with a view to their eventually becoming officers in the Special Reserve of Officers or Territorial Force.

The Corps is under the direct control of the War Office.

Two Certificates (A and B) are awarded by the War Office, on the result of examinations, which are held half-yearly. These certificates entitle the holders to certain advantages and exemptions on taking commissions.

Parades and instruction are arranged so as not to interfere with lectures or general work.

Membership is not confined to the University, but is limited at the discretion of the Commandant.

Further particulars can be obtained from the Adjutant O.T.C. at the University, Edmund Street, with whom an appointment should be made.

APPENDIX.

The Walter Myers Travelling Studentship.

D E E D

ESTABLISHING "THE WALTER MYERS TRAVELLING
STUDENTSHIP FUND."

This Indenture made the 10th day of December 1901 between THE UNIVERSITY OF BIRMINGHAM (incorporated by Royal Charter on the 24th day of March 1900 and acting with the powers conferred upon them by the Birmingham University Act 1900 and hereinafter called "The University") of the first or one part and GEORGE MYERS of Thornfield Edgbaston in the City of Birmingham of the second or other part. **Whereas** the said George Myers in order to promote original research by a Graduate of the Birmingham University and in memory of his only son Walter Myers M.A., M.B., B.C. of the University of Cambridge and B.Sc. of the University of London and a former student of the Mason University College of Birmingham who contracted yellow fever at Brazil while investigating the causes of such disease on behalf of the Liverpool School of Tropical Medicine hath proposed to give to the University of Birmingham the sum of £3,000 to be held by the University for the purposes hereinafter set forth. **Now therefore this Indenture witnesseth** that in consideration of the sum of £3,000 paid to the Treasurer of the University on the day of the date hereof (the receipt of which sum the University do hereby acknowledge) the Birmingham University for themselves and their successors do hereby covenant with the said George Myers that the Birmingham University and their successors shall stand possessed of the said sum of £3,000 and the securities on which the same shall be from time to time invested and the accruing income of such investments upon the trusts and for the purposes hereinafter expressed and declared that is to say:—

1.—The University shall invest the said sum in any securities on which Trustees may for the time being be authorised by law to invest trust moneys.

2.—The said sum and the investments thereof shall be called and distinguished from the other moneys and investments of the University by the name of "The Walter Myers Studentship Fund" and the University shall at all times hereafter keep an account of this fund and the investments and income thereof separate and apart from the general or any other funds or accounts of the University.

3.—The University shall apply the income of the said investments in payment to the holder for the time being of a Studentship to be called "The Walter Myers Travelling Studentship" of the sum of £150 payable in advance by quarterly instalments such holder to be nominated and appointed each alternate year for one year only. Provided nevertheless that in the case of a student of exceptional merit and ability the University may allow such student to hold the scholarship for a second year but the sum payable to such student for the second year shall not exceed £90.

4.—In case in any year in which the Studentship is offered no candidate shall present himself or herself or in case no one of the candidates shall in the opinion of the hereafter mentioned Committee be of sufficient merit to be nominated the income of the Studentship shall be retained by the University and the Studentship offered again in the succeeding year and so on *toties quoties* until a candidate shall be nominated and appointed in manner hereinafter provided. In every case of suspension of the Studentship the income shall be invested and accumulated and if in any year the suspended income and its accumulation shall be sufficient then another Studentship may be awarded annually so long as the income will allow.

5.—The University shall on or before the 10th day of July in each year in which the Studentship is offered advertise the conditions in two Medical Journals

published in London and two newspapers published in Birmingham and shall also print a copy of these presents in the University Calendar in each year.

6.—The Studentship shall be awarded irrespective of sex sect or party but in the case of two applicants of equal merit a native of Birmingham shall have the preference.

7.—The merits of the candidate for the Studentship shall not be ascertained by the results of any form of competitive examination but by a Committee consisting of the following persons namely: The Dean of the Medical Faculty of the University and the Professors of Pathology and Chemistry in the University and the External Examiner in Pathology appointed by the University. The External Examiner shall be Chairman of the said Committee with an original and a casting vote and the Studentship shall not be awarded at any meeting unless the External Examiner is present. Subject as aforesaid the Committee shall ascertain the fitness of the candidate in such manner as they think proper and report to the Council as soon as possible after the first day of October in the year in which the Studentship is offered and the election shall then be made by the Council of the University.

8.—The Studentship shall be tenable at the University of Berlin Frankfort or Freiburg in Baden or at some University or Hospital not in Great Britain or Ireland appointed from time to time by the Council of the University on the recommendation of the Senate.

QUALIFICATION OF CANDIDATES.

9.—Every Candidate for the Studentship must be (1) Under the age of thirty years at the date of his or her application and (2) a graduate of the Birmingham University and (3) must have attained the degree of M.B. in such University and the degree of B.Sc. in the University of Birmingham or of London Cambridge or Oxford.

CONDITIONS OF TENURE.

10.—The conditions of holding the studentship shall be as follows:—

- (a) The holder shall engage in the study of Pathology in Berlin Frankfort or Freiburg or such other place of study not in Great Britain or Ireland as shall be appointed as provided by Clause 8.
- (b) In clinical work combined with pathological research at such Hospitals as the Council of the University on the recommendation of the Senate shall appoint either at Berlin Frankfort or Freiburg or at any other University or Hospital not in Great Britain or Ireland which may from time to time be approved of as aforesaid.
- (c) The student during the tenure of his or her studentship shall not systematically follow any business or profession or engage in any other work which in the opinion of the Council would interfere with his or her researches.

11.—In case the student shall publish in any way the results of his or her investigations during the studentship he or she shall where practicable describe himself or herself as the "Walter Myers Student" of the University of Birmingham.

In witness whereof the University hath hereunto set its seal and the said George Myers his hand and seal the day and year first aforesaid.

The Seal of the University of Birmingham was hereto affixed by the undersigned duly authorised by a resolution of the Council to affix such seal.

Seal of
University.

F. C. CLAYTON.

R. S. HEATH.

GEO. H. MORLEY,
Secretary.

Signed sealed and delivered by the said George Myers in the presence of

GEORGE MYERS (L.S.)

G. J. JOHNSON,
Solicitor, Birmingham.

FORM OF BEQUEST TO THE UNIVERSITY.

I BEQUEATH the sum of £ , free of legacy duty, to the University of Birmingham. And I direct that the said legacy and the legacy duty thereon shall be paid exclusively out of such part of my personal estate as may by law be bequeathed for charitable purposes, and preferably to any other payment thereout. And I direct that the same legacy shall be paid to the Treasurer for the time being of the said University, whose receipt shall be an effectual discharge for the same, and that the same shall be applied * [in the discretion of the Council of the said University to the general purposes thereof, or to such special purposes as the said Council shall determine].

NOTE.—If any special directions or conditions are to be attached to the legacy, the part in brackets to be omitted and the special matter inserted.
